The islands of St. Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they have a population (1952) of 51,044, and a total area of about 170 square miles.

The climate is decidedly healthy for the tropics, the temperature being from 66° to 88°.

St. Kitts (population 1952, 31,079), the principal island, was the first possession of the British West Indies to be colonized (1623); it is situated in lat. 17° 18' N. and long. 62° 48' W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central range, which rises to a height of 3,711 feet (Mount Misery). Cotton is also grown to a considerable extent. The capital Ψ Basseterre is a port of registry.

Nevis (population 1952, 13,671) is separated from St. Kitts by a strait 3 miles wide and has an area of 50 sq. miles. Cotton and coconuts are exported, and cattle and vegetables are raised. Its greatest elevation is 3,596 feet. The chief town, Ψ Charlestown, is a port of entry.

Anguilla (population 1952, 6,294) is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. There are no hills. Salt is the principal product, and small stock are raised.

CAPITAL, Ψ Basseterre (St. Kitts). Population (1946), 12,210.

(3) MONTserrat,

is situated in 16° 41' N. lat. and 61° 15' W. long., 27 miles S.W. of Antigua. It is about 11 miles in length and 7 in breadth, comprising an area of 32½ square miles, population (1952) 13,587. Discovered by Columbus in 1493, it was settled by Irishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1784. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island is mountainous, the rest well cultivated. A great part of the island was devastated by hurricanes in 1924 and 1928. The chief exports are sea island cotton, tomatoes, carrots, onions, limes and lime products. There is a wireless station on the island.

CHIEF TOWN, Ψ Plymouth. Population (1950), about 2,200.

(4) THE BRITISH VIRGIN ISLANDS

The Virgin Islands are a group of islands at the eastern extremity of the Greater Antilles, divided between Great Britain and the U.S.A. Those of the group which are British number about 36, of which 11 are inhabited, and have a total area of about 67 square miles. The principal are Tortola (the largest, situate in 18° 27' N. lat. and 64° 40' W. long.), Virgin Gorda, Anegada and Jost Van Dykes. The population is approximately 7,300 (1952). Communication is by launch to St. Thomas (Virgin Islands of the U.S.), where there are air, sea and cable services to continental America and the rest of the West Indies. The principal exports are livestock, fish, charcoal, vegetables and fruit, for which the principal market is St. Thomas. Rum is distilled on a small scale.

Medical Officer, J. D. Rosanelli (+allowance £50 and private practice)..... £400 to 550

Asst. Treasurer and Postmaster (vacant). £450 to 500

Supervisor of Education (vacant)..... £450 to 500

CAPITAL, Ψ Road Town (on the south-east of Tortola). Population, about 800.

TRINIDAD AND TOBAGO

Trinidad, the most southerly of the West India Islands, lies close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. The island is situated between 10° 3'—10° 50' N. lat. and 60° 55'—61° 56' W. long., and is about 50 miles in length by 37 in breadth, with an area of 1,862 square miles, and a population estimated (Dec. 31, 1952), at 669,650 (including Tobago). The island was discovered by Columbus in 1498, was colonized in 1532 by the Spaniards, capitulated to the British under Abercromby in 1797, and was ceded to Britain under the Treaty of Amiens (March 25, 1802). Oil is the principal export. A remarkable

phenomenon is the asphalt lake, 114 acres in extent near the village of La Brea, from which (1952) 46,100 tons of asphalt (\$1,601,000) were exported. The soil of Trinidad is rich and productive, the most important products being sugar, cocoa, molasses, rum, copra, coffee, limes, coconuts, grape-fruit and various kinds of timber and fruits. Oil is one of the principal products. On December 31, 1952, there were 317 primary schools, 64 being Government and 253 assisted, 8 intermediate schools (2 Government and 6 assisted). There were also 13 secondary schools (1 Government and 12 assisted and 158 private primary schools, and 35 private schools providing courses leading up to the School Certificate Examination. There were 129,007 pupils attending the Primary Schools, 6,019 attending the Intermediate Schools, and 6,128 and 4,067 attending the Government and assisted secondary schools and the private secondary schools respectively.

In 1953 the Government of the Colony allocated \$7,053,600 for expenditure on medical services for hospitals and clinics, malaria, tuberculosis, dental services, leprosy, hookworm, maternity and infant welfare, nutrition and health education.

There are 118 miles of railway open, and the island is in communication with Tobago and the mainland by telegraph and wireless. There are 3 head post offices and 160 district post offices and postal agencies, 50 of which transact savings bank and money order business. There are 41 internal telegraph offices.

Eight international scheduled airlines operate to and through Trinidad and Tobago, which acts as a focal point for air traffic between the Americas. There were 12,505 movements of aircraft in 1952 (commercial scheduled, 9,080; commercial non-scheduled, 229; private, 3,196). A domestic air service between Trinidad and Tobago is operated by B.W.I.A. Flights in 1952 averaged one per day.

The chief town and port of entry, Port of Spain (pop. 111,350), is one of the finest towns in the West Indies, with sewerage, electric lighting, trolley-bus and telephone services. Other towns of importance are Port of San Fernando (pop. 34,600), about 30 miles south of the capital, and Arima (pop. 9,700).

FINANCE

	1951	1952
Revenue.....	\$59,186,809	\$66,785,389
Expenditure.....	52,868,842	62,488,766
Public debt.....	53,976,497	52,986,130

TRADE

	1951	1952
Imports.....	\$218,639,398	\$243,939,897
Imports from U.K.....	77,735,260	85,788,934
Exports.....	213,602,947	230,460,138
Exports to U.K.....	58,820,656	68,097,819

The chief domestic exports (1952) were petroleum products (including crude petroleum), \$175,511,388; sugar, \$20,267,429; asphalt products (including asphalt cement), \$4,379,931; cocoa (raw), \$8,237,141; rum \$991,538.

Tobago lies between 11° 8' and 11° 21' N. lat. and between 60° 30' and 60° 50' W. long., about 75 miles south-east of Grenada, 21 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados. The island is 26 miles long, and 7½ broad, and has an area of 116 square miles, with a population estimated (1952) at 32,600. It is one of the healthiest of the West Indies; the temperature varies from 81° to 88°. The main town is Scarborough (pop.) 1,210.

Other Islands.—Corozal Point and Icacos Point, the N.W. and S.W. extremities of Trinidad,

enclose the Gulf of Paria and west of Corozal Point lie several islands, of which Chacachacare, Huevos Monas and Gaspar Grande are the most important. On Chacachacare is a Leper Settlement, the Medical Superintendent of which appeals for Sunday and weekly editions of British newspapers.

GOVERNMENT

The Colony is administered by a Governor in accordance with the provisions of the Trinidad and Tobago (Constitution) Order in Council, 1950, which provides for Executive and Legislative Councils, on which there are unofficial elected majorities. The Executive Council, which is the chief instrument of policy, consists of the Governor, as chairman, 3 ex-officio members, 1 nominated member, and 5 elected members of the Legislative Council. The Legislative Council consists of a Speaker who presides, 3 ex-officio members, 5 nominated members and 18 elected members.

THE WINDWARD ISLANDS

The Windward Islands consist of the four colonies of Grenada (the seat of government), St. Vincent, St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent, and (since Jan. 1, 1940) of the Island of Dominica (formerly part of the Leeward Group). The total area is 821 square miles, with a population estimated at 252,000. There is one Governor for the four islands, and in July 1950 the Colonial Office announced that a majority of members of the Legislative Councils of each of the four colonies would be elected by universal adult suffrage.

Governor and Commander-in-Chief, His Excellency Edward Betham Beetham, C.M.G., C.V.O., O.B.E. (1953) (+ £1,000 duty allee.) £2,750
Chief Justice of Windward and Leeward Islands, Sir Donald Jackson 1,500

Attorney-General, C. F. Henville 900
Chief Secretary, L. Cools-Lartigue 900
Principal Auditor, J. V. Gatchfield 900
 Transit to Grenada from London about 14 days.

GRENADA AND THE GRENADINES

Grenada is situated between the parallels of $12^{\circ} 13' - 11^{\circ} 58' N.$ lat. and $61^{\circ} 20' - 61^{\circ} 35' W.$ long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 133 square miles; population (including some of the Grenadines), 80,056 (1951). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonized by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1783.

The soil is very fertile, and cocoa, spices, sugar cane, cotton, coconuts, limes and fruit are grown. The imports chiefly comprise dry goods, wheat flour, dried fish, bread-stuffs, hardware, etc.

Ψ St. George's (population approximately 6,000), on the south-west coast, is the chief town, and possesses a good harbour, where a deepwater jetty has been built to accommodate ocean-going vessels.

Finance

	1951	1952
Public revenue.....	\$3,942,028	\$3,877,884
Expenditure.....	3,840,416	3,788,359

Exports to U.K.....	3,126,617	2,623,137

Government

There is a Legislative Council of 14 members, of whom 3 are officials, 3 are nominated and 8 elected.

Administrator, His Honour W. Macmillan (+ duty allee. £300) £1,550
Colonial Treasurer, G. H. Adams, C.B.E. 1,200
Senior Medical Officer and Registrar-General, L. M. Comissiong 1,200

Magistrates, E. A. Heyliger (S. District) £550 to £650; W. L. MacIntyre (W. and N. Districts); B. Dias (E. District)

Assistant Administrator, C. B. Gibbs 900
District Officer, Carriacou, F. A. Phillip (and quarters) £450 to 550
Superintendent of Police, Brigadier P. J. T. Pickthall, M.C. (and quarters) £650

The Grenadines are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1946), 7,237.

ST. LUCIA

the largest and most picturesque of the Windward group, situated in $13^{\circ} 54' N.$ lat. and $60^{\circ} 59' W.$ long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 24 miles S. of Martinique, is 27 miles in length, with an extreme breadth of 14 miles. It comprises an area of 238 square miles with a population (1953) of 88,711. It possesses perhaps the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports are sugar, copra, coconuts, cacao, limes, lime oil, fresh fruit and vegetables.

Ψ Castries, the capital, is recognized as being one of the finest ports in the West Indies on account of its reputation as a safe anchorage in the hurricane season. The town was greatly damaged by fire in 1948, but the work of reconstruction is in progress. In 1951, 541 vessels (tonnage 944,778), entered Castries.

Finance and Trade

	1950	1951
Public revenue.....	\$3,235,486	\$4,456,911

Government

There is an Executive Council partly nominated and partly elected, and a Legislative Council with a majority of elected members.

Administrator, J. K. R. Thorp, M.B.E. (+ allee. \$1,920) \$5,280
Treasurer, A. C. H. Baynes \$3,600
Commissioner for Reconstruction, F. E. Degazon, O.B.E. \$4,800

ST. VINCENT

an island about 95 miles west of Barbados, situate in $13^{\circ} 10' N.$ lat. and $60^{\circ} 57' W.$ long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (1949) of 66,770. In 1846, a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the three other islands of the group. In 1983 it was secured to Great Britain.

The chief products are arrowroot, cotton, copra, coconuts, rum, sugar, cassava, cocoa ground provisions, and spices. Its chief imports are foodstuffs (including canned and pickled meat, salted and pickled fish, butter, rice and flour), cotton and woollen piece goods, hardware, lumber, iron and steel manufactures, cement and fertilizers.

There were 41 primary schools with 14,925

pupils enrolled in 1952, and 2 secondary schools with an attendance of 427.

DOMINICA

Dominica, the loftiest of the Lesser Antilles, was transferred from the Leeward to the Windward Group on Jan. 1, 1940. It is situated between $15^{\circ} 20' - 15^{\circ} 45'$ N. lat. and $61^{\circ} 13' - 61^{\circ} 30'$ W. long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad, comprising an area of 305 sq. miles, or 195,200 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with usn, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85° . The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. The exports consist almost entirely of agricultural produce, principally bananas, lime oil, lime juice, oranges, bay oil, cocoa and vanilla. The population was (1951), 55,914. Included in this total are about 400 Caribs, of whom about 40 are of pure blood. The principal towns are Ψ Roseau, on the south-west coast, population 10,000 and Portsmouth, population 1,800.

Education.—There are 50 elementary schools, of which 47 are Government and 3 assisted. Of the 4 secondary schools, 3 receive a grant-in-aid and one is maintained by Government.

CAMEROONS

See NIGERIA

(Cameroons under British Mandate)

CYPRUS

Area and Population.—Cyprus is a large island in the Mediterranean Sea, between N. lat. $34^{\circ} 33'$ and $35^{\circ} 41'$, and E. long. $30^{\circ} 21'$ and $30^{\circ} 35'$. It is about 40 miles distant from the nearest point of Asia Minor, and 60 miles from Latakia, on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad, from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is 3,572 square miles. In 1952 the estimated population was 497,788, of whom nearly 81 per cent. were Greek-Orthodox and 18 per cent. Moslems. In summer it is hot and dry on the plains and humid on the seashore, but the climate of the hills inland is equable and bracing. The winter is mild and invigorating and, except in the mountains, the temperature rarely falls below freezing point. Owing to the eradication of malaria, the intensive efforts to improve rural sanitation, and the establishment of an increasing number of infant welfare clinics, the death rate of the island has been reduced to the low figure of 7.65 per thousand.

Production and Industries.—Cyprus is predominantly an agricultural country. The chief agricultural products are:—Cereals, legumes, carobs, olives, grapes and grape juice, wines and spirits, potatoes, raisins and sultanas, onions, cheese, almonds, citrus and deciduous fruit, tobacco, wool and cotton. A vegetable and flower seed export trade also exists. Various kinds of livestock are raised, especially donkeys and mules, a considerable number of which are exported. Mining is carried on in various parts of the island and the following minerals are extracted:—Copper concentrates, iron and cupreous pyrites, asbestos, cement copper, chrome ore, earth colours and gypsum. The value of minerals exported in 1952 was £10,250,000. In addition to the major industries of agriculture and mining, the following are manufactured:—Buttons, artificial teeth, cotton yarn, textiles, cigarettes, leather, lithographed crown corks, soap, footwear, bricks, tiles, pottery, macaroni, chocolates, biscuits, Turkish delight, caramels, sugared almonds, jams and marmalades, animal fodder, silk, carob gum, olive kernel oil, essential oils and nails. An up-to-date factory for tyre retreading is also operating in the island.

The reconstruction policy of the government embraces the development of the island's resources, co-operative credit and agricultural marketing, the improvement of living conditions, encouragement of exports, etc. A 10-year plan of development was initiated in 1946 and funds amounting to over £13,000,000 are being devoted to various projects, including a water supply for each of the 600 villages in the island (£1,000,000); irrigation (£1,250,000), and various health schemes (£900,000). An electrification scheme is also in progress.

Education.—Each religious denomination has its own elementary schools under the general control of the Government. During the school year 1952-53 there were 709 schools (Greek 489; Turkish

204; Armenian 4; Maronite 5; Latin 4; others 3) with a total enrolment of 64,868. Secondary education is for the most part on a similar denominational basis with a total enrolment of 14,231.

Language and Literature.—Modern Greek and Turkish are the languages of the principal communities, English and French being spoken by the educated classes. The use of English is increasing. In 1951 there were 10 daily and 16 other newspapers (3 English, 17 Greek and 6 Turkish) in addition to government publications.

Communications.— Ψ Famagusta is the main seaport. There were (December, 1952) 12,067 motor vehicles on the register, including 4,793 private cars and 2,949 motor cycles. In 1952 1,502 steamships (tonnage 2,179,081) and 468 sailing vessels (tonnage 26,596) engaged in the foreign trade, in addition to 496 steamships (tonnage 628,390) and 149 sailing vessels (tonnage 8,500) engaged in the coasting trade, called at Cyprus ports. *Nicosia Airport* has developed from a mere grass strip in 1938 to one of the main aerial crossroads in the Middle East; it is only 10 minutes from the centre of Nicosia and has an excellent weather record. Traffic during 1952 was maintained principally by 8 schedule air lines—Cyprus Airways, *Misir Air Lines* (Egyptian), *Air Liban*, *Middle East Air Lines* (Lebanese), *National Greek Airlines*, *Turkish State Air Lines*, *El Al* (Israel) and *Air Jordan*. Twenty non-scheduled operators also passed through Cyprus in 1952. The airport which is open 24 hours a day, is operated on a "joint user" basis by the R.A.F. The civil side during 1952 handled 4,702 aircraft, 52,000 passengers, 1,135,000 kilograms of air freight and 98,500 kilograms of air mail. There were a number of landings by flying boats at Limassol port.

FINANCE

	1951	1952
Revenue*	£7,201,162	£8,298,938
Expenditure*	6,418,534	6,758,573

* Exclusive of grants-in-aid and Cyprus share of the Turkish debt charge (£92,800) and of Colonial Development and Welfare grants and Development expenditure. 180 Cyprus piastres = £1 sterling.

The chief imports in 1952 were: wheat, beans and peas, rice, sesame, oil seed cake, preserved meat (including bacon and ham), butter and butter substitutes, cheese, condensed milk, almonds and bananas, coffee (raw), biscuits, chocolates, jams, fish, edible oils, sugar, leaf tobacco, cigarettes, asphalt, sulphur, timber, ox hides, trocas shells, seed potatoes, asbestos tubes and pipes, pottery, glassware, cement, iron and steel, hardware and cutlery, electrical goods, telegraph and telephone apparatus, machinery, wood manufactures, cotton yarns and threads, textiles, apparel, empty sacks, footwear, chemicals, paints and colours, benzene, gas oil, kerosene, lubricating oils, paper, motor cars and parts, perfumery, books and stationery. The most important exports were: barley, cheese, almonds, grapes, grape-fruits, lemons, oranges, raisins, potatoes, wines, spirits, carobs, grape juice, leaf tobacco, cotton, wool, cuminseed, hides and skins, artificial teeth, buttons, mules and mining and quarry products, viz., asbestos, chrome ore, copper cement, cupreous concentrates, pyrites and ground gypsum.

The Roman supply of copper was chiefly drawn from Cyprus and was known as *aes cyprium* (Cyprus brass) which was shortened to *cuprum*, and corrupted to *cuprum*, whence is derived the English word copper.

GOVERNMENT

On June 4, 1878, the Sultan of Turkey "assigned the island of Cyprus to be occupied and adminis-

tered by England." The island was formally annexed to Great Britain on Nov. 5, 1914, on the outbreak of war with Turkey. From March, 1925, when it became a Crown Colony, until Nov. 1931, the Government was administered by a Governor, aided by an Executive and a Legislative Council, the latter containing 9 official and 15 elected members, but after the disturbances of 1931, the clauses in the Letters Patent of March, 1925, dealing with the constitution of the Legislative Council were revoked, and the island has since been administered by the Governor, assisted by an Executive Council which at present has 4 official and 3 non-official members (two Greek Cypriot and one Turkish Cypriot).

In 1946 a Consultative Assembly drawn from representative elements in the island was called together to consider the framing of proposals for constitutional reform, including the re-establishment of a central Legislature. The efforts of the Consultative Assembly were not successful in bringing about the result which was hoped for, but the offer of constitutional reform has been kept open.

For administrative purposes the island is divided into six districts, in each of which Government is represented by a commissioner. This division also obtains for judicial purposes. The Law Courts comprise a supreme court, 6 assize courts, and 6 district courts. In all these courts, Cypriot judges take part. The family laws of the various communities in the island are expressly saved.

<i>Governor and Commander-in-Chief, His Excellency Robert Percival Armitage, C.M.G., M.B.E., appointed 1953 (+ £1,200 duty allowance)</i>	£3,300

The capital is NICOSIA, near the centre of the
 island, with a population of 39,639 in 1952: the
 other principal towns are Ψ Larnaca (population
 16,064), Ψ Limassol (26,501), Ψ Famagusta
 (20,234), Kyrenia (3,322) and Paphos (6,382).
 Nicosia is distant from London 3,030 miles.

EAST AND WEST AFRICAN HIGH COMMISSIONS, ETC.

EAST AFRICA HIGH COMMISSION

The East Africa High Commission, consisting
 of the Governors of Kenya, Tanganyika and
 Uganda, was constituted by the East Africa (High
 Commission) Order in Council, 1947, and came
 into operation on January 1, 1948. The Governor
 of Kenya is the Chairman of the High Commission,
 and in his absence the High Commission
 appoints one of its members to be Chairman.

The High Commission administers certain inter-
 territorial services such as: The East African
 Directorate of Civil Aviation, the East African
 Income Tax Department, The East African Posts
 and Telecommunications Administration, the East
 African Railways and Harbours Administration,
 the East African Customs and Excise Department,
 the East African Meteorological Department, the
 East African Statistical Department, the East
 African Literature Bureau, Inter-territorial Research
 Organizations and services connected with the
 maintenance of contact between the territories and
 the Defence Services. These services are grouped
 for purposes of administration under four Principal
 Executive Officers to the High Commission: The
 Administrator, the Commissioner for Transport,
 the Finance Member and the Postmaster General.

The East Africa Central Legislative Assembly
 was established by the Order in Council, and by a
 further Order in Council in 1951 had its life ex-
 tended until December 31, 1955. It is presided
 over by a Speaker and consists of seven *ex officio*
 members who are officers in the High Commission's
 service, three nominated official members
 (one from each Territory) and thirteen unofficial
 members, one elected by the unofficial members of
 the Legislative Council of each Territory, one
 European, one Indian and one African member
 appointed by the Governor of each Territory (in
 Kenya the European and Indian members are
 elected by the European and Indian members
 respectively of the Legislative Council) and one
 Arab member appointed by the High Commission.

The High Commission has power to legislate,
 with the advice and consent of the Assembly, in
 respect of certain matters of common interest to the
 three territories such as Civil Aviation, Customs
 and Excise, Defence, Income Tax, Inter-territorial
 Research, Makerere College, Posts and Telegraphs,
 Meteorological Services, Statistics, Railways,
 Harbours and Inland Water Transport, etc. It has
 also power to legislate with the advice and consent
 of the Legislative Councils of the three Territories
 on any matter concerned with the peace, order
 and good government of the territories.

EASTERN AFRICAN COURT OF APPEAL

Nairobi, Kenya Colony

This Court, reconstituted in 1952, consists of a
 permanent President, a permanent Vice-President,
 and a permanent Justice of Appeal.

President, Sir Barclay Nihill, K.B.E., M.C., Q.C.
 Vice-President, Sir Newnham Worley, Q.C.
 Justices of Appeal, Sir Enoch Jenkins; F. A. Briggs.

WEST AFRICA GOVERNORS' CONFERENCE

The West Africa Governors' Conference, under
 the Chairmanship of the Secretary of State for
 the Colonies, comprising the Governors of Nigeria,
 Sierra Leone, the Gold Coast and Gambia, was
 created for co-ordination of and consultation on all
 matters of common interest. The headquarters
 of the Conference is in the Gold Coast. The
 Conference has a permanent secretariat, of which
 the secretary is a senior Civil Servant from the
 U.K.

WEST AFRICAN COURT OF APPEAL

Accra, Gold Coast

This Court, as reconstituted in 1948, consists of a
 permanent President, one or more permanent
 Justices of Appeal and such Judges of the Supreme
 Courts (usually the Chief Justices) as the President
 may summon.

President, Sir Stafford Foster Sutton, C.M.G., O.B.E.,
 Q.C.
 Justice of Appeal, Sir James Henley Coussey.

FALKLAND ISLANDS

These, the only considerable group in the South
 Atlantic, lie about 300 miles east of the Straits of
 Magellan, between 52° 15'–53° S. lat. and 57°
 40'–62° W. long. They consist of East Falkland
 (area 2,580 sq. miles), West Falkland (2,038 sq.
 miles) and upwards of 100 small islands in the
 aggregate, the total population in 1952 being
 2,230. Mount Adam, the loftiest peak, rises
 2,315 feet above the level of the sea. The Falk-
 lands were discovered by Davis in 1592, and visited
 by Hawkins in 1594. A settlement was made by
 France in 1764; this was subsequently sold to
 Spain, but the latter country recognized Great
 Britain's title to a part at least of the group in 1771.
 The settlement was destroyed by the Americans in
 1832. In 1833 occupation was resumed by the
 British for the protection of the seal-fisheries, and
 the islands were permanently colonized as the
 most southerly organized colony of the British
 Empire. The climate is cold, the thermometer
 ranging in winter from 20° to 50°, and in summer
 from 46° Fahrenheit; it is notably windy. The
 islands are chiefly moorland. The population is
 mainly British, and is principally engaged in shep-
 farming, to which practically all the land in the
 colony is devoted, 618,627 sheep being carried in
 1952. The chief exports are wool, tallow, hides,
 sheepskins and seal oil. The only important settle-
 ment is Stanley, on the coast of East Falkland.

FINANCE AND TRADE

	1950	1951–52*
Public revenue.....	£218,753	£452,973
Expenditure.....	204,042	362,468

Imports from U.K.....	360,164	494,595
Exports to U.K.....	616,969	702,496

GOVERNMENT

The Governor is assisted by a Legislative Council of 11 members, with the Governor as Chairman, 3 *ex officio* (Colonial Secretary, Senior Medical Officer and Agricultural Officer), 2 official and 2 non-official members (nominated by the Governor) and 4 representatives elected by the people.

Governor and Commander-in-Chief, His Excellency Oswald Raynor Arthur, C.M.G. (apptd. Aug. 21, 1953)

(+ duty allow. £550) £1,750

Colonial Secretary, C. Campbell..... 1,200

Senior Medical Officer, R. S. Slessor..... 1,100

Agricultural Officer, J. P. Oliver..... £720 to £960

Colonial Treasurer, J. E. Briscoe..... £720 to £960

CHIEF TOWN, ΨStanley. Estimated population (1952), 1,320.

DEPENDENCIES.—South Georgia, an island 800 miles east-south-east of the Falkland Group, with an area of 1,450 square miles. An Administrative Officer and other officials reside there. In the South Shetlands, Deception Island contains the harbour at Port Foster, ice-free for about five months in the year. On the South Orkneys the Argentine Government has, with the permission of H.M. Government, established a meteorological station, in connexion with a discovery that a cold winter in the Weddell Sea is a precursor of drought in the maize and cereal area of Argentina 3½ years later. The other dependencies, of which the principal units are the South Sandwich Islands and Graham's Land (a peninsula of the Antarctic Continent) are even more inhospitable than those already named, being covered with snow and ice and almost completely destitute of plant life. In spite, however, of the climatic and other disadvantages, the revenue derived from all the dependencies from January, 1951, to June 1952, amounted to £155,697 and the expenditure to £187,457. There is a whaling industry in South Georgia, 1 British, 1 Argentine and 1 Norwegian company operated during the 1951-52 season, 233.5x8 barrels of whale oil being exported. Sealing operations yielded 10,807 barrels of seal oil in 1952. A chain of meteorological stations is maintained in the Dependencies.

Trade of the Dependencies

	1951	1952
Total imports.....	£2,821,214	£2,406,411
Total exports.....	3,101,440	3,690,165
Imports from U.K....	804,666	554,438
Exports to U.K.....	2,875,896	3,429,753

Further information in connexion with these Antarctic Dependencies will be found on p. 723.

Ψ Stanley, the capital of the Falkland Islands, is distant from England about 8,103 miles; transit by steamer *via* Montevideo. Telegrams by wireless U.K. direct. The journey from U.K. to Falkland Isles can be accomplished in 8 days travelling to Montevideo by air and thence by local steamer to the Falklands.

FIJI

This is a group of 322 islands (of which only 106 are inhabited) in the South Pacific Ocean, about 1,100 miles north of New Zealand. The gross area of the group, which extends 300 miles from east to west, and 300 north to south, between 15° 45'—21° 10' S. lat. and 176° E.—178° W. long. is 7,083 square miles. Many of the islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu, Vanua Levu, Taveuni and Kandavu. The climate is

oceanic. Shade temperatures seldom rise above 93° F. or fall below 60° except in the mountains. On the windward sides of the larger islands rainfall is copious and vegetation luxuriant; on the leeward (or dry) sides the vegetation is sparse and scattered. The chief products are coconuts, sugar cane, gold, rice, bananas, plantains, yams, and dalo or taro (colocasia).

In 1946 a 10-year plan of education was approved to provide a training college for teachers of both sexes and both the principal races of the Colony, to provide for additional technical and home-craft centres, and to expand the field of education in general. This programme is now well advanced.

The population (estimated, Dec. 31, 1952) was 312,678 (148,802 Indians, 135,877 Fijians, 7,298 part Europeans, 7,980 Europeans, 4,498 Polynesians, Melanesians and Micronesians, 3,845 Rotumans, 3,719 Chinese and 659 others).

FINANCE

	1951	1952*
Public income.....	£F3,613,167	£F3,820,067
Public expenditure....	3,573,918	4,129,223
Public debt (Dec. 31)..	1,756,222	1,255,541†

* Estimated.

† Partial Estimate. To this must be added approx. £F1,250,000 of Development loans raised in 1952.

TRADE

	1951	1952
Total imports.....	£F9,368,137	£F12,008,620
Total exports.....	7,312,990	10,998,050
Imports from U.K....	3,062,511	4,125,691
Exports from U.K....	2,612,104	3,479,418

Fijian currency—£111 Fiji=£100 sterling.

The principal exports are sugar, gold, copra, bananas, trocas shell, molasses, coconut oil, fresh fruit and vegetables, and bêche-de-mer. The chief imports are drapery, machinery, hardware, flour, petroleum products and motor vehicles.

GOVERNMENT

The Governor is appointed by the Crown, and is assisted by an Executive Council. Laws are passed by a Legislative Council (of which the Governor is president) containing 16 official members, 5 European members (3 elected, 2 nominated), 5 Native members (nominated from a panel submitted by the Council of Chiefs) and 5 Indian members (3 elected and 2 nominated).

The executive officer of the native administration is the Secretary for Fijian Affairs, who is responsible to the Governor and, in appropriate matters, to the Legislative Council. The controlling financial authority is the Fijian Affairs Board whose members are the Secretary for Fijian Affairs (Chairman), the five native members of Legislative Council, and a legal adviser. The Board has power to make regulations affecting the Fijians, but such regulations are subject to approval by the Legislative Council.

CAPITAL. Ψ Suva, in the island of Viti Levu. Population (1946), 25,395.

Suva is 11,000 miles from London; transit from London, *via* Vancouver or San Francisco, about 30 days; *via* Panama, by direct cargo steamer service, with limited passenger accommodation, about 34 days; *via* Sydney, about 60 days; by air, *via* Canada, U.S.A., or Sydney, about 4 days. Fiji is on the main air route between North America and Australia and New Zealand. It is a base for South Pacific Regional air services, covering New Zealand, Western Samoa, New Caledonia, Tahiti, Cook and Norfolk Islands.

GAMBIA

The West African river Gambia, which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth I, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognized, by the *Treaty of Versailles*, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It now consists of the island of St. Mary, British Kombo, Albrede, the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river. The total area is estimated at 4,003 sq. miles. The population of the island of St. Mary, at the census of 1951 was 27,297, and that of the Protectorate was 252,389. The climate is unhealthy during the rainy season, viz., from June to October; but during the rest of the year it is pleasant and generally healthy. The rainfall is extremely variable from year to year, ranging between 30 and 59 inches. Internal communication is by motor vessels and launches; there are no railways. There are 5 Government wireless stations.

Education.—Government expenditure on education amounted to £58,947 in 1952. In 1945 all

primary education in Bathurst was taken over by and is now financed by Government, and the schools have been reorganized as follows:—3 Boys', 1 mixed and 2 Girls' primary schools each taking children from Standard I to Standard VII, and 3 infant schools. Children in these 9 schools numbered 2,455. There are 2 Boys' and 2 Girls' mission secondary schools in Bathurst with a total of 430 children. A School of Science serving all four secondary schools was opened in Bathurst in January, 1947. In the Colony there are 2 Government and 1 Mission primary schools with a total of 563 children. In the Protectorate there is 1 government school giving primary education, 6 Mission schools and 21 Native Authority schools of a primary type. Over 73 per cent. of children attending school live in Bathurst.

FINANCE

	1951	1952
Public revenue.....	£1,132,429	£1,431,495
Public expenditure....	1,170,068	1,424,413
Public debt.....	38,760	38,760

The sum of £1,300,000 has been reserved under the Colonial Development and Welfare Act, 1945, for development work in the Gambia, and a fund to finance development in the farming areas has been set up with resources provided by the profits of the Gambia Oilseeds Marketing Board. At Sept. 30, 1952 this fund amounted to £1,691,253.

TRADE

	1951	1952
Total imports.....	£3,997,485	£3,708,991
Total exports.....	3,369,357	3,960,045
Imports from U.K.....	2,390,709	1,934,649
Exports to U.K.....	3,073,918	3,745,666

The chief export is ground-nuts, which form over ninety-six per cent. of the total exports; practically all of this crop is sent to Europe, where the oil is extracted and used for the same purpose as olive oil. Palm kernels, hides and skins, and beeswax are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are apparel, cotton goods, flour, kola nuts, oil, rice, soap, spirits, metals of all kinds, sugar, tobacco and motor vehicles.

Total tonnage of vessels entered and cleared in 1952 was 961,405.

CHIEF TOWN, Ψ Bathurst. Population (1951), 19,602.

GOVERNMENT

The Government is vested in a Governor, assisted by an Executive Council consisting of 1 *ex officio* Member and 9 Appointed Members and by a Legislative Council of 1 Vice-President, 3 *ex officio* Members, 4 Official Members, 3 Elected Members and 5 Unofficial Members. The Governor is President of both Councils.

British Council Representative, Bathurst, G. F. de Sausmarcz.

Bathurst is distant from London 2,600 miles; transit about 20 days. A twice weekly air service (B.O.A.C.) reduces transit time to 34 hours.

GIBRALTAR,

a rocky promontory, $3\frac{1}{2}$ miles in length, $\frac{1}{2}$ of a mile in breadth and 1,396 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. The population is approximately 24,000.

ψ Gibraltar is a naval base of vital strategic importance to Great Britain. It was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and was ceded to Great Britain by the Treaty of Utrecht, 1713. Several attempts have been made to retake it, the most celebrated being the great siege in 1779-83, when General Elliot, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. It is a popular tourist centre. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, beer, motor spirit, perfumery, coffee and fuel oil.

A Department of Education has been established. There are now 6 secondary schools, 16 primary and also infant schools. Teacher training and University Scholarships have been provided, 3,371 pupils are at present in Government schools, and the Government expenditure on education in 1952 was £65,561.

FINANCE AND TRADE

Representative, W. G. Ingham.

Distance, 1,209 miles; transit, $3\frac{1}{2}$ days. B.E.A. have a daily air service from U.K. *via* Bordeaux and Madrid; transit, 7 hours.

GOLD COAST

Area and Population.—The Gold Coast Colony, with Ashanti, the Northern Territories and Togoland under United Kingdom Trusteeship is situated on the Gulf of Guinea, between $3^{\circ} 15'$ W. long. and $1^{\circ} 12'$ E. long., and is bounded on W. by the French Ivory Coast, on E. by Togoland under French Mandate, on N. by the French Sudan, on S. by the sea. It extends about 334 miles along the coast-line and inland to an average distance of 440 miles or to 11° N. lat. The area of the Colony is 23,937 sq. miles, of Ashanti 24,379 sq. miles, of the Northern Territories 30,486 sq. miles, and of Togoland under U.K. Trusteeship 13,041—a total of 91,843 sq. miles. Although a tropical country, the Gold Coast is rather cooler than many countries within similar latitudes. With increased medical facilities and improved sanitation a healthy life can now be enjoyed.

The population (1948) was: Gold Coast Colony 2,217,416; Ashanti, 817,782; Northern Territories, 1,096,482. Total, 4,111,680, including 6,770 non-Africans; the figure for Togoland included in the total was 382,717. About 30 per cent. of the natives are Christians and about 20 per cent. Moslems, with 60 per cent. Animists or Pagans.

Education and Social Conditions.—In January, 1952, there were in the Colony, Ashanti and the Northern Territories, excluding Togoland under United Kingdom Trusteeship, 2,733 primary and middle schools with an enrolment of 271,884 (202,739 boys and 69,145 girls) and 57 secondary schools with an enrolment of 6,707 (5,938 boys and 769 girls). Post-primary technical institutions had an enrolment of 560 (504 boys and 56 girls) and 1,662 students were in teacher-training colleges (1,121 men and 541 women). The University College of the Gold Coast had 304 students (293

men and 11 women) and 339 students were enrolled at the Institute of Education (223 men and 16 women) taking Diploma and Associateship Courses. There is a College of Technology at Kumasi, with an enrolment of over 200. In addition to the teacher-training department of the College, courses in civil, mechanical and electrical engineering, and in accountancy and secretarial studies, are available, and a course of pharmacy was introduced in January, 1953. Togoland under United Kingdom Trusteeship had at the same date, 340 primary and middle schools with an enrolment of 28,821 (20,397 boys and 8,424 girls); there were 7 secondary schools with an enrolment of 139 (128 boys and 1 girl). Two teacher-training colleges had between them 165 students (126 men and 39 women). In June, 1952, the first mass literacy campaign was launched in the Ashanti, Fante and Trans-Volta language areas. By the end of September there had been over 75,000 registered learners in literacy classes with over 7,000 voluntary class leaders, and examinations for literacy certificates were in progress.

There are 4 central hospitals (Government) with specialist facilities, in addition to 27 Government, 21 mines, 3 mission and 10 private hospitals with a total of 2,448 beds and 355 cots. The number of beds is distributed as follows:—Government 1,670, mines 462, mission 128, private 177. These hospitals are supplemented by 18 Government and 130 non-Government dressing stations in rural areas. Three Government health centres are nearing completion. There were 68,854 in-patients and 738,586 out-patients in the Government hospitals alone during the year. There are 3 schools of hygiene (Accra, Tamale and Kintampo) for the training of sanitary inspectors and superintendents. The Medical Field Units (10 in 1951) make surveys and initiate mass treatment of trypanosomiasis and yaws, and undertake enquiries into the incidence of other endemic diseases, such as guinea-worm, bilharzia, onchocerciasis, leprosy, malaria, etc.

Communications.—There are four aerodromes in the Gold Coast, situated at Accra, Takoradi, Kumasi and Tamale. Accra Airport is an international airport and is the terminus for the B.O.A.C. trunk route from the United Kingdom. Other airlines using Accra are Pan American World Airways, operating between New York and Johannesburg, Air France operating from French West Africa, Transportes Aereos Portugueses operating between Lisbon and Portuguese West African territory and West African Airways Corporation, operating between the British West African territories and internally within the Gold Coast. The aerodromes at Takoradi, Kumasi and Tamale are used by West African Airways Corporation on their internal services and connect the Northern Territories, Ashanti and the Western Province to the capital. Fully-staffed meteorological stations are maintained at all the airfields and at 20 other places in the Gold Coast. Pilot balloon observations are made at 5 places. Other government departments, local government authorities, commercial organizations, schools and private individuals co-operate in maintaining 32 climatological stations and 79 rainfall stations.

Railway communication consists of a main line running from Takoradi to Kumasi and thence to Accra, a distance of 357 miles with branches, Takoradi Junction to Sekondi (3 miles) Tarkwa to Prestea (18 miles), Aboso to Cinamon Bipbo (4 miles), Huni Valley to Kade (99 miles) (Central Province line) and Dunkwa to Awaso (46 miles).

The main line and branches are 3 ft. 6 ins. gauge. The gross railway earnings for the year

1951-52 were £2,885,429 and the working expenditure including provision for renewals (£465,009) and pensions was £2,998,901. The total number of miles open to traffic on 31st March, 1952 was 535 miles and the track mileage 643. The capital cost is £11,670,376. The railway carried 5,650,313 passengers during the financial year 1951-52 and 1,876,692 tons of freight.

There are 3,685 miles of road, 894 miles being of bituminous surface and 2,791 miles of gravel or earth surface.

The control of Takoradi Harbour is vested in the General Manager, Gold Coast Railway, as Harbour Authority. Rail and road access, transit shed and open storage accommodation and ample cranes are provided at the deep-water and lighter wharves and storage accommodation is provided for 50,000 tons of cocoa. Very large extensions are being made to the harbour to ease present congestion. At Accra there is a small breakwater with two 30 cwt. steam cranes operating thereon for the purpose of handling heavy lifts from surf boats. A new harbour for ocean-going ships is under construction at Tema, 17 miles east of Accra. Four berths will be provided initially.

The Black Volta rises in the hills near Soukouraba, and the White Volta rises near Quahigouga, both in the French Colony of Haute Volta. These two rivers converge some 280 miles from the sea on the Ashanti-Northern Territories border and become the River Volta which flows into the sea at Ada. This river is navigable for light draught launches as far as Akuse, and with the exception of the Krachi rapids, can be used for canoe traffic during certain seasons of the year as far as Yeji. The Ankobra River is navigable for many months of the year by surf-boats and light draught launches for a distance of 50 miles. The Tano, connected with Half Assini by the main lagoon, is navigable for light draught launches and canoes as far as Tanoso, a distance of about 60 miles. The Sutri rapids prevent this river being further utilised.

FINANCE

	1951-52	1952-53
Total revenue.....	£34,237,849	£36,844,100
Expenditure.....	35,789,087	34,247,860
Public debt.....	10,710,000	10,730,000

TRADE

	1951	1952
Total imports.....	£63,326,092	£66,572,613
Total exports.....	91,249,192	86,276,566
Imports from U.K.....	33,493,818	37,280,663
Exports to U.K.....	37,839,066	32,435,000

Trade in 1952 was principally with the U.K. (56 per cent.), U.S. (7 per cent.), Netherlands (11 per cent.), Japan (4 per cent.), Western Germany (3 per cent.) and India (2 per cent.).

The principal exports in 1951 and 1952 were:

Cocoa.....	£60,309,000	£52,533,000
Gold.....	8,562,000	9,179,000
Manganese Ore.....	7,217,000	8,333,000
Timber.....	4,977,000	4,157,000
Diamonds.....	5,971,000	5,547,000
Bauxite.....	226,000	138,000

The chief imports were cotton manufactures, machinery of all kinds, iron and steel manufactures, artificial silk, cement, tobacco of all kinds, provisions, medicines and drugs and flour (wheat).

GOVERNMENT

Under the Constitution which came into force in January, 1951, there is an Executive Council

(now more usually called the Cabinet), composed of the Governor, as President, the Chief Secretary, the Attorney General, the Financial Secretary and not less than 8 representative members, who are members of the Legislative Assembly proposed by the Governor after consultation with the Prime Minister and approved by the Assembly. The Prime Minister is appointed by the Governor subject to the approval of the Assembly. In the absence of the Governor the Prime Minister presides at meetings of the Cabinet.

The Governor at his discretion may charge any *ex-officio* Member of the Cabinet with the responsibility of Government Departments, and may similarly charge any Representative Member after consultation with the Prime Minister. The Legislative Assembly under the new constitution consists of a Speaker, the Chief Secretary, the Attorney-General, the Financial Secretary, 75 elected members divided into 33 rural members, 37 territorial members and 5 municipal members, and 6 special members. The rural members are elected by an election in two stages on a basis of universal suffrage; 6 of the territorial members are elected by the Asanteman Council, 11 by the Joint Provincial Council, 19 by the electoral college of the Northern Territories, and 1 by the Southern Togoland Council: the municipal members are elected by direct election; the special members are elected by the Chambers of Commerce and Mines and have restricted powers of voting in the Assembly. On March 5, 1952, Dr. Kwame Nkrumah, Leader of Government Business, assumed, with the Queen's approval, the title of Prime Minister.

Seat of Government, Ψ ACCRA, population (1948) 135,926. Other principal towns are Ψ Cape Coast (23,346); Ψ Sekondi with Takoradi (44,557); Kumasi (78,483); Tamale (16,164); Koforidua (17,806); Ψ Winneba (15,171); Obuasi (15,876) and Keta (11,380).

Accra, sea distant from Liverpool, 3,920 miles; transit, 12 to 30 days, is governed by a Town Council of 13 members (3 official, 3 nominated and 7 elected). A 23 hours air-mail service operates to and from the U.K. six times a week.

ASHANTI

Ashanti was placed under British protection on Aug. 27, 1896, and is now administered, under the Governor of the Gold Coast, by a Chief Regional Officer, with an Assistant Chief Regional Officer as relieving officer, and a staff of 2 Senior Administrative Officers and 21 Administrative Officers. Local Government is in the hands of a number of District, Local and Urban Councils.

In January, 1935, the Confederation of Ashanti, which was broken up and had remained inoperative for 35 years, was re-established with Otumfuo Sir Osei Agyeman Prempeh II., K.B.E. (a nephew of the late Nana Prempeh) at its head. The Confederacy has now been renamed the Asanteman Council.

The area is 24,379 square miles, with a population (Census of 1938) of 823,672 (including 1,187 non-Africans). In 1952 there were 1,794 children in the Government schools, and 95,452 in the assisted and approved mission schools. There are 9 hospitals, 30 health centres and dressing stations, 11 midwifery clinics and 2 mobile clinics (Red Cross). 2,747 miles of motor roads afford access to all parts of the country. Agriculture is the staple industry: 118,118 tons (middle and main crops) of cocoa were exported in 1952-53. Approximately 10,000,000 cu. feet of logs were extracted from the forests of the southern half of Ashanti in 1952-53, of which approximately 7,400,000 cu. feet were sawn locally or in the Colony; gold output (1952-53), 220,736 oz.; average number employed in mining industry, 201 non-Africans, 8,232 Africans in 1952-53. The Mampong Scarp divides Ashanti into two natural divisions; the southern part being tropical rainfall forest, rich in mahogany, cedar, and trees yielding fruits, oil, rubber and gum copal, the eastern side being heavily planted with cocoa and the western side expanding its cocoa planting rapidly. The northern part of the Dependency is orchard savannah, the main products being maize, yams, cocoyams, bananas, plantains, and groundnuts.

CHIEF TOWN, Kumasi, pop. (1948), 78,483.	
Chief Regional Officer, W. H. Beeton (Chief Commissioner).....	£2,425
Assistant Regional Officer, S. R. J. Kingston (acting).....	2,100

NORTHERN TERRITORIES

The Northern Territories lie to the north of the parallel 8° N. lat. and are bounded on the west and north by French possessions, on the east by Togoland and on the south by Ashanti. They came under British Protection in 1901 and are administered, under the Gold Coast Government, by a Chief Regional Officer with his headquarters at Tamale, an Assistant Chief Regional Officer and 26 Administrative Officers. The local government reforms which took place in 1951-52 have established local district and urban councils with elected majorities throughout the Protectorate to replace the former native authorities whose membership was entirely traditional. The total area is 27,106 sq. miles (including the Northern Section of Togoland under British Trusteeship), varying in type from the forests in the extreme south of the Gonja district to the rolling open country on the northern frontier. Figures of the Census taken in 1948 give the population as 1,045,093 (including the part of Togoland under British Trusteeship which is administered jointly with the Northern Territories). The principal occupations of the people are agriculture and animal husbandry. Maize, millet and guinea-corn are grown, mainly for local consumption, and with yams and rice form the staple food of the people. Yams, groundnuts, Shea butter and rice are exported to Ashanti. The live-stock industry is the principal source of wealth, and cattle, sheep, goats and poultry are exported to Ashanti and the Colony. There are about 3,000 miles of motor roads. There are senior boarding schools for boys at Tamale, Nalerigu, Yendi, Wa, Damongo, Sandema, Bawku and Lawra, and for girls at Tamale and Jirapa. There is also a training college for teachers and a Trade Training Centre at Tamale. There are 96 local authority primary schools and 16 managed by missions. There are 8 hospitals and 42 dispensaries, and a health centre at Bimbilla, in Togoland.

CHIEF TOWN, Tamale, population, 16,055 (1948).	
Chief Regional Officer (vacant).....	£2,425
Assistant Chief Regional Officer, T. A. Mead	2,100

TOGOLAND

(Under Mandate to France and Great Britain)

The total area of the former German colony of Togoland is about 34,535 square miles, with an estimated total population of 1,000,000. The French (Eastern) Trustee zone has an area of about 21,494 sq. miles and the western, or British, zone adjoins the eastern frontier of the Gold Coast and is administered as part thereof; there are 4 districts, the administrative centre for the Southern Section of Togoland under U.K. Trusteeship being Ho (pop. about 6,000). It consists of an area of about 13,041 sq. miles with a population (census of 1948) of 382,564, including 51 non-Africans. There are 3 hospitals and 7 dispensaries.

HONG KONG

The Crown Colony of Hong Kong, consisting of a number of islands and of a portion of the mainland, on the south-eastern coast of China, is situated at the eastern side of the mouth of the

Pearl River, between 22° 9' and 22° 37' N. lat. and 113° 52' - 114° 30' E. long.

The capital city, Victoria, situated on the island of Hong Kong, is 91 miles S.E. of Canton and 40 miles E. of the Portuguese colony of Macao at the other side of the Pearl River. It lies along the northern shore of the island and faces the mainland: the harbour (17 sq. miles water area) lies between the city and the mainland, on which is situated Kowloon with a population equalling that of Victoria. The total area of the Colony is 391 sq. miles, with a population which has varied considerably during recent years owing to unsettled conditions in China, the highest estimate given being 2,360,000 in May, 1950, the most recent estimate (Jan. 1953) being 2,250,000.

The island of Hong Kong is about 11 miles long and from 2 to 5 miles broad, with a total area of 32 square miles; at the eastern entrance to the harbour it is only separated from the mainland by a narrow strait (Lyemun) not more than a quarter-mile wide. It was first occupied by Great Britain in January, 1841, and formally ceded by the Treaty of Nankin in 1842; Kowloon was subsequently acquired by the Peking Convention of 1860; and the New Territories, consisting of a peninsula in the southern part of the Kwangtung province, together with adjacent islands, by a 99-year lease signed June 9, 1898.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is 1,809 feet high. The New Territories contain several peaks higher than this, the highest being Taimoshan, 3,141 feet. The hot season lasts from May to October. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The average daily maximum temperature ranges from 87° in July to 63° in February, and the average daily minimum temperature from 82° in July to 59° in February. The average annual rainfall is 84.76 in., of which no less than 75 per cent. falls between May and September, when the S.W. monsoon prevails.

Communications.—Hong Kong, one of the world's finest natural harbours, possesses excellent docks, capable of holding vessels up to 750 ft. in length. Shipping tonnage for the year ending March, 1953, was 22,264,850. A railway, 22½ miles in length, owned by the Government, runs between Kowloon and the Chinese frontier. It forms a direct overland communication with Canton, Hankow and Shanghai, but since October, 1949, all through traffic has been suspended.

Hong Kong Airport, Kai Tak, is on the north shore of Kowloon Bay, some 4 miles from the centre of Kowloon and is regularly used by 13 airlines which provide frequent services to Europe, U.S.A., Canada, Australia and neighbouring territories, China excepted. The Colony is an important link on the main air routes of the Far East. B.O.A.C. operates a 5-times-a-week service to London, the route on two days being the longer one via Singapore; the journey on the direct route takes about 45 hours. Full facilities for aircraft and passengers are provided from dawn to dusk but night flying is not usually attempted. A flying-boat base is adjacent to the airfield.

Education.—In 1953 there were 1,052 schools with 201,541 pupils, of whom 71,055 were receiving education financed wholly or in part by the Government. 10 per cent. of the Colony's total expenditure for the financial year 1952-53 was spent on education. The University of Hong Kong, opened in 1912, has a full-time residential student strength of 982 (of whom 265 are women) in Faculties of Medicine, Civil Engineering, Arts, Architecture, Chinese Languages and Science.

FINANCE

* Estimated.		

TRADE

Restrictions on the export of strategic goods to China, imposed as a result of the war in Korea, remained in force during 1952, and the total value of trade fell from \$9,303,000,000 in 1951 to \$6,678,000,000 in 1952. Trade with most countries was at a much reduced level, the principal exceptions being in respect of imports from Thailand and Japan and exports to Formosa, Thailand and Indonesia.

GOVERNMENT

Hong Kong is administered as a Crown colony, with a Governor, aided by an Executive Council and a Legislative Council which consists of nine official and not more than eight unofficial members. There is also an Urban Council in which is vested, *inter alia*, power of making bye-laws in respect of certain matters of public health and sanitation.

(See BRITISH WEST INDIES)

KENYA

Kenya Colony and the Kenya Protectorate are situated in Eastern Equatorial Africa. Kenya (Colony and Protectorate) is bounded on the North by the Anglo-Egyptian Sudan and Abyssinia, on the South by Tanganyika Territory, on the East by the Indian Ocean, and Somalia, and on the West by Lake Victoria and Uganda Protectorate. The total area is 224,960 sq. miles (including 5,230 sq. miles of water). The total population at the 1948 censuses was 5,405,966; this included 5,251,220 Africans, 29,660 Europeans, 90,528 Indians, 7,159 Goans and 24,174 Arabs. The estimated population in December, 1951, was 5,700,000.

Arabs predominate on the coasts, the majority of the Africans (Bantu and other tribes) living inland. Recent discoveries in the Great Rift Valley, near Mount Olorgesallie, mark the site of one of the most important prehistoric areas in the world.

Production.—Although the Colony lies astride the Equator, the range of altitude from sea level to 17,000 feet enables most types of crops both indigenous and introduced to be grown. In the coastal region the principal crops are copra, maize, sisal, sugar and cotton, while the yield of a comparatively new crop, cashew nuts, is steadily increasing. Passing from the coastal strip the country becomes flat, dry and in some places semi-desert of very little agricultural value. At about two hundred and fifty miles inland the first rise of the Kenya Highlands is met. Farming in this extremely fertile upland area at altitudes between 5,000 feet and 9,000 feet are some hundreds of European farmers who produce among other crops wheat, coffee, maize, sisal, wattle, pyrethrum and tea. Extensive herds of native and imported stock are maintained, and there is considerable production of meat and butter. Some 7,000,000 acres are under white occupation in this area. There are also very extensive forests in the Highlands, cedar for the pencil industry being a valuable export. Towards the area of Lake Victoria which forms a natural boundary with Uganda, the African population grow large quantities of maize and millets, which are their staple foods, and cotton which has considerable export value. The value of domestic exports in 1951 (£24,068,000) was nearly six times that of 1939. Contributing to this total were sisal (£4,469,588), coffee (£7,123,360), hides and skins (£1,062,026), tea (£1,315,803), wattle bark extracts (£1,685,912), sodium carbonate (£1,183,543), pyrethrum (£511,971) and maize (£2,385,264).

Prospecting and mining are carried on in many parts of the Colony, the principal minerals at present produced being soda ash, salt, limestone, gold, kyanite, diatomite and copper and zinc concentrates. The total production of all minerals is not precisely known, but the values of the output of the main minerals in 1951 were: soda ash £1,219,000, gold £131,000, kyanite £196,000 and commercial salt £139,000.

Since the end of the war there has been a considerable increase in the number of secondary industries, many of which are engaged in processing agricultural produce, and industrial areas are being developed or planned in a number of the leading towns.

Communications.—The postal service handled 76,081,300 postal packets in 1951. The telegraph and telephone system has 4,025 miles of line. A cable connects Mombasa with Zanzibar, and a wireless station in Nairobi works directly with the United Kingdom, providing both telegraph and telephone facilities. There is a coast wireless station at Mombasa with a radio-telephone service for the

marine mobile service. Telephone and/or telegraph communication by both line and radio exists in the majority of the settled areas of the Colony and to Uganda, Tanganyika, Belgian Congo, Nyasaland and South Africa.

The East African Railways and Harbours are State-owned; the railway, which is metre gauge, has a total route mileage of open line of 3,054 miles, made up as follows: Kenya and Uganda Section—Main Line: Mombasa–Kampala (871 miles); Principal Lines: Nakuru Junction–Kisumu (134), Tororo–Soroti (100), Voi–Kahe Junction (92); Minor and Branch Lines: Rongai–Lake Solai (27), Kisumu–Butere (43), Leseru–Kitale (41), Mbulamuti–Namasagali (19), Kampala–Port Bell (6), Gilgil–Thomson's Falls (48), Nairobi–Nanyuki (145). The Konza–Lake Magadi Line (91 miles) is worked but not owned by the Railway Administration. Tanganyika Section—Main Line: Dar-es-Salaam–Kigoma (780 miles); Principal Line: Tabora–Mwanza (237); Branch Lines: Msagali–Kongwa (17), Kaliwa–Mpanda (131). The Tanga Line runs from Tanga to Arusha (272 miles). Southern Province (operated under construction conditions and not included in total route mileage shown above): Lindi (Mkwaya)–Nachingwea (81 miles); Nachingwea–Lumesule Juu (70 miles); Mtwara–Ruo (66 miles)—under construction; Kampala–Mityana (45 miles)—open line; Mityana–Kasere (160 miles)—under construction. In addition the Administration operates a marine service on Lakes Victoria, Kioga, Albert and Tanganyika, and also on the River Nile, with a route mileage of 4,411 miles. There are also 1,685 miles of road services, including 75 miles in Uganda, connecting Lakes Kioga and Albert, and 1,610 miles in Tanganyika, connecting the Central and Tanga Lines and providing regular transport to the Southern and Usambara Highlands.

Air line trunk services are operated either to or through Kenya by B.O.A.C., Air France, Central African Airways and Ethiopian Airways.

There are approximately 20,500 miles of road in Kenya, varying in standard from good bitumen surfaced highways to barely motorable tracks in the more remote areas. The main roads, except during exceptional rains, are for the most part all weather.

The Great North Road from Cape Town to Cairo (Route A.104) passes through Kenya by way of Namanga, Nairobi (3,662 miles from Cape Town), Nakuru and Mau Summit, entering Uganda at Tororo.

A construction programme is in hand and several new roads are being built. These include the completion of the last 11 miles of the new road from Thika to Sagana for Mount Kenya traffic and an extension of the Great North Road from Broderick Falls (N.W. of Eldoret) towards Tororo. In addition to this construction programme, a considerable amount of betterment work is being carried out on roads in various parts of the Colony.

Imports from U.K. (Kenya, Uganda and Tanganyika).....	£57,617,205
Exports to U.K. (do.).....	39,229,404

In 1949 the Customs Departments of Kenya, Uganda and Tanganyika were amalgamated under the title of the East African Customs and Excise Department as an East Africa High Commission Service. The main imports to East Africa Territories are cotton piece goods, vehicles and transport equipment, base metals and manufactures thereof, machinery, apparatus and appliances, products for heating, lighting and power, and non-metallic minerals and manufactures thereof. The principal exports are sisal, cotton and lint, coffee, hides, skins and leather, wattle extract, diamonds, gold, pyrethrum, sodium carbonate and tea.

Kenya Protectorate is under the same government. It consists of the mainland dominions of the Sultan of Zanzibar (a strip extending 10 miles inland along the coast from the Tanganyika mandated territory frontier to Kilipini and the islands of the Lamu Archipelago), for which Kenya Colony pays the Sultan a rent of £10,000 per annum. The Protectorate also includes the *Witu Protectorate*, a small tract of country at the mouth of the Tana River.

The Colony and Protectorate is divided into 5 Provinces (Nyanza, Rift Valley, Central, Coast and Northern) and an extra-provincial district (Masai).

The Supreme Court Central Registry is situated at Nairobi and has district registrars at Mombasa, Nakuru, Eldoret, Kisumu and Nyeri. Periodic sessions are held at these towns and elsewhere as required. In all cases to which natives are parties native law and customs are considered. Resident Magistrates are stationed at all important centres throughout the Colony.

The Eastern African Court of Appeal was re-constituted in 1951, as a permanent court for the territories of Aden, Kenya, British Somaliland, Tanganyika, Uganda, Zanzibar and Seychelles.

GOVERNMENT

The Government is that of a Crown Colony under a Governor and Commander-in-Chief who is assisted by an Executive Council of 8 *ex-officio* Members and 4 Unofficial Members of whom 2 are European, 1 Indian and 1 African. All the unofficial Members of the Executive Council are Members of the Legislative Council. Under the constitution brought into effect after the 1952 General Election, the Legislative Council consists of the Governor who is President, a Vice-President who is the Speaker and 54 Members, of whom 8 are *ex-officio* Members, 18 Nominated Members, 14 European Elected Members, 6 Asian Elected Members (4 non-Muslim and 2 Muslim), 1 Arab Elected Member, 6 African Representative Members and 1 Arab Representative Member. In the East Africa Central Legislative Assembly, Kenya is represented by one Official and five Unofficial Members, of the latter 2 being European, 1 Asian, 1 Arab and 1 African.

Trafalgar Square, W.C.2

NAIROBI, the capital of the Colony, possesses a Cathedral (All Saints) and is the central station of the East African railways and harbours. There are about 3,500 European farmers throughout the Colony, the most closely settled part being the good coffee soil near Nairobi, Ψ Mombasa, which is connected with Europe by telegraph, possesses perhaps the finest harbour on the east coast of Africa; other centres are Eldoret, Kisumu, Nakuru, Kitale, Nyeri, and Ψ Lamu.

Nairobi; transit from London about 20 day by sea; by air, 2 days,

LEEWARD ISLANDS

(See BRITISH WEST INDIES)

MALAYA AND BRITISH BORNEO

The British and British-protected territories in South East Asia are located principally in the Malay Peninsula and in the island of Borneo, and consist of the following five separate units:

(1) The Federation of Malaya, composed of the nine British-protected Malay States of Johore, Perak, Selangor, Negri Sembilan, Pahang, Kedah, Kelantan, Trengganu and Perlis, and the two British Settlements of Penang and Malacca which were formerly part of the Crown Colony of the Straits Settlements.

(2) The Colony of Singapore, formerly one of the Straits Settlements.

(3) The Colony of Sarawak in North-West Borneo.

(4) The Colony of North Borneo (including Labuan, formerly part of the Straits Settlements).

(5) The British Protected State of Brunei.

GOVERNMENT

The five territories are politically and administratively separate, but are included in the area of authority of the Commissioner-General for the United Kingdom in South East Asia, whose headquarters is in Singapore. In the first place a Governor-General was appointed—in May, 1946—to ensure co-ordination of policy and administration throughout the area under British control. On May 1, 1948, the Governor-General's appointment was changed to that of Commissioner-General. The Commissioner-General continues to exercise the functions of the former Governor-General in relation to the above-named territories in addition to those of the former Special Commissioner in South East Asia, a diplomatic post established in 1946 primarily for co-ordinating measures to meet the then critical supply situation in South East Asia, especially in regard to food supplies.

The Commissioner-General communicates with the Secretary of State for the Colonies on matters with which he formerly dealt as Governor-General; and with the Secretary of State for Foreign Affairs on matters which were formerly the concern of the Special Commissioner.

Commissioner-General for the United Kingdom in South-East Asia, The Rt. Hon. Malcolm MacDonald.

Deputy do. (Foreign Affairs), A. A. Dudley, C.M.G.
Deputy do. (Colonial Affairs) (vacant).

UNIVERSITY EDUCATION IN MALAYA

The University of Malaya was established in Singapore on October 8, 1949, by the incorporation of the King Edward VII College of Medicine, Singapore (founded 1905), and Raffles College, Singapore (founded 1928). The University at present has Faculties of Arts, Science and Medicine (including Dentistry) and Departments of Malay Studies and Chinese Studies. The number of full-time students during Session 1951-52 was 871. Permanent new buildings for the University are in course of construction on a new site in the State of Johore, close to the Straits of Johore.

THE FEDERATION OF MALAYA

The Federation of Malaya consists of 9 sovereign Malay States and the two British Settlements of Penang and Malacca. Together they make up the whole of the Malay Peninsula from the Straits of Johore (which divide the territory from Singapore Island) on the south, to the Siamese frontier on the north.

Johore (Ruler, H.H. Sultan Ibrahim ibni Almarhum Sultan Abu Bakar, G.C.M.G., G.B.E., K.B.E. (Mil.)) is the most southerly state of the Federation, the Straits of Johore forming the boundary with the island of Singapore Peninsula. Its area is approximately 7,330 square miles, with a population estimated in 1952 at 860,523. It is connected with the island of Singapore by a causeway over which run a road and the main railway line between Singapore and Bangkok. The seat of Government is at Johore Bahru (pop. 38,826).

Negri Sembilan (Ruler, H.H. the Yang di Pertuan Besar, Tuanku Abdul Rahman ibni Almarhum, Tuanku Muhammad, K.C.M.G.) lies on the west coast of the Malay Peninsula to the north of Johore. The area of the State is approximately 2,580 square miles with a population estimated in 1952 at 314,836. The seat of Government is Seremban.

Pahang (Ruler, H.H. Sultan Abu Bakar Ri'ayatuddin Al-Muadzam Shar ibni Almarhum Almu'tasim Bi'llah Abdullah, G.C.M.G.) lies on the eastern side of the main range to the north of Johore. It comprises 13,280 square miles, with a population estimated in 1952 at 277,450. The State includes the island of Tioman, lying about 25 miles off the coast in the China Sea. The seat of Government is at Kuala Lipis.

Selangor (Ruler, H.H. Sultan Hisamuddin Alam Shah ibni Almarhum Sultan Alauddin Sulaiman Shah, K.C.M.G.) lies on the west coast, north of Negri Sembilan, and has an area of 3,160 square miles with a population estimated in 1952 at 829,287. The seat of Government, Kuala Lumpur, is also the seat of Government of the Federation of Malaya. Ψ Port Swettenham, the principal mainland port, is situated about 28 miles distant by road and rail.

Perak (Ruler, H.H. Sultan Puduku Sri Sultan Yussuf Izuddin Shah ibni Almarhum Sultan Ja'il Radziah Hu'an-hu, K.C.M.G., O.B.E.) is on the west coast, north of Selangor. It comprises 7,980 square miles with a population estimated in 1952 at 1,097,106. Ipoh is the seat of Government. Situated in the rich tin producing Kinta valley, it is the largest town with a population of 90,837.

Kedah (Ruler, H.H. Sultan Tunku Badlishah ibni Almarhum Sultan Abdul Hamid Ahm Shah, K.C.M.G., K.B.E.) lies on the north-west coast to the north of Perak, and is bordered on the north-east by the Siamese States of Sangkhla and Patani. The State includes the island of Langkawi, and adjoining islands. Its area, including the Langkawi group of islands, is about 3,660 square miles with a population estimated in 1952 at 634,207. The seat of Government is Alor Star.

Perlis (Ruler, H.H. the Raja Syed Putra ibni Almarhum Syed Hassan Jamalulail, C.M.G.), about 320 square miles in area, with a population estimated in 1952 at 79,784, is the smallest of the Malay States. It lies on the north-west border of Kedah and adjoins the Siamese Provinces of Nakhon Sridhammaraj and Setul. Padang Besar on the main trunk line to Bangkok is the frontier railway station between Siam and Malaya. Kangar is the seat of Government.

Kelantan (Ruler, H.H. Sultan Ibrahim ibni Almarhum Sultan Mohamed IV, K.C.M.G.) is the north-east border state, adjoining the Siamese Province of Patani. Its area is 5,750 square miles, with a population estimated in 1952 at 487,635. The seat of Government is Kota Bharu. Kuala Krai is the headquarters of the southern, and Pasir Puteh of the eastern, administrative districts.

Trengganu (Ruler, H.H. Sultan Nasiruddin Shah ibni Almarhum Sultan Zainal Abidin, K.C.M.G.) lies on the east coast between Kelantan and Pahang.

The area of the State is about 5,050 square miles, with a population estimated in 1952 at 246,199. The western and inland half of Trengganu is mountainous and almost uninhabited. The population is concentrated on the rivers and along the coast-line. The highest peak is Gunung Lawit (4,985 feet). The three principal administrative centres are Besut in the north, Kuala Trengganu in the centre and Kemaman in the south. The seat of Government is at Kuala Trengganu.

Penang is an island 15 miles long and 12 miles broad, containing an area of 120 square miles with a population estimated in 1952 at 503,789. It is situated off the west coast of the Malay Peninsula, at the northern extremity of the Straits of Malacca. The chief town is officially styled George Town, but is generally known as Ψ Penang. It is the chief port of the Federation. On the opposite shore of the mainland, from which the island is separated by a strait from 2 to 10 miles broad, is Province Wellesley, a strip of territory 12 miles in width, and extending 31 miles along the coast, with an area of 290 square miles, the chief town being Butterworth.

Malacca is situated on the western coast of the Peninsula, 154 miles by road from Singapore and 347 miles by road from Penang, and consists of a strip of territory about 43 miles in length, and 27 miles in breadth. The total area is about 640 square miles. It has a population estimated in 1952 at 278,340.

CLIMATE

The principal features of the Malayan climate are copious rainfall, high humidity and uniform temperature. It is subject to the influences of the south-west and north-east monsoons, which correspond roughly to the summer and winter of northern latitudes, but which bring little climatic change except on the east coast. The rainfall is usually heaviest in the months between the seasons, corresponding roughly with spring and autumn in the north. Rainfall averages about 100 inches a year, though it varies considerably in different parts of the country. Average (shade) maximum temperature is about 90° F. and the minimum about 70°. At the hill stations temperatures are considerably lower.

TRADE AND INDUSTRY

The Federation of Malaya is primarily and overwhelmingly a producer of raw materials, the chief of which are rubber and tin (of which it is the world's biggest individual supplier), palm oil, coconut oil and copra, and other agricultural products. These constitute two-thirds of the total export trade, the other one-third being entrepôt trade consisting of re-export of raw materials and produce of neighbouring countries. Imports consist mainly of foodstuffs, textiles and manufactured industrial and consumer goods, the chief suppliers of which are the United Kingdom, the United States of America, and India and Japan. Domestic rice production totalled 341,000 tons in the 1951-52 season (the last for which figures are available), which is about 40 per cent. of requirement. The balance is imported, mainly from Siam, Burma and Indo-China. Measures to increase the home-grown rice output are being actively pursued. Domestic industry includes manufacture of rubber goods, pottery, matches, pewter-ware, furniture, timber, tiles, soap, biscuits and other small scale

industry. At the end of 1952 a large factory for the processing of Malayan palm oil was opened in Selangor, and in 1953 a large cement factory commenced operations in the same State.

GOVERNMENT

Under the Federation of Malaya Agreement the central government comprises a High Commissioner appointed by Her Majesty, a Federal Executive Council to aid and advise the High Commissioner, and a Federal Legislative Council which is the supreme law-making body. The State Agreements provide that the Rulers shall enjoy the prerogative, power and jurisdiction which they enjoyed before the Japanese occupation. All authority in matters of defence and external affairs is vested in Her Majesty's Government. In April 1951 there was introduced the Member System, which is designed to develop ministerial responsibility and pave the way to a Cabinet System of government. There are nine members (of whom six are Unofficials). The Federal Executive Council consists of the High Commissioner, the Deputy High Commissioner, the Chief Secretary, the Financial Secretary, the Attorney-General, the Secretary for Defence, the Secretary for Chinese Affairs, together with the above nine Members and five other Unofficials. The Federal Legislative Council consists of the High Commissioner as President, an Unofficial as Speaker, three *ex-officio* members, eleven State and Settlement members, eleven officials and 50 Unofficials.

In each State there is a State Executive Council and a Council of State. The chief executive officer is the Mentri Besar (chief minister), who is also President of the Council of State. In the two Settlements there are similar Councils and the chief executive is the Resident Commissioner. The authority of the State and Settlement governments is defined in the Federation of Malaya Agreement. The Rulers themselves constitute a Conference of Rulers, which meets at least three times a year for consultation with the High Commissioner.

Local government is in the process of being re-organized and broadened. The major towns are administered by Municipal Councils, the medium-sized ones by Town Councils and smaller centres by Local Councils. The principle of free election to such Councils is being actively developed.

THE COLONY OF SINGAPORE

The Crown Colony of Singapore consists of the islands of Singapore, Cocos-Keeling and Christmas Island, with a total area of 217 sq. miles.

Singapore is an island situated off the southern extremity of the Malay Peninsula, to which it is joined by a causeway, carrying a road and a railway, across the Straits of Johore, which are about three-quarters of a mile in width; its length is 26 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 220 square miles, and a population estimated (1952) at 1,099,381, of whom 844,400 were Chinese, 83,615 Indians and Pakistanis, 134,506 Malaysians, 15,599 Europeans, 11,016 Eurasians and 10,245 others. Singapore was in the 13th and 14th centuries a Malay city of importance till it was destroyed by the Javanese about 1365. The present Settlement was founded on January 30, 1819, by Sir Stamford Raffles, then Lieut.-Governor of Bencoolen, Sumatra. The original lease by the Sultan of Johore and the Dato Temenggong, the Chief of Singapore in 1819, was followed in 1824 by the cession of the island in perpetuity, this being accepted by the Dutch in the Treaty of Holland of the same year. The city of Singapore, situated on the south side of the island in lat. 1° 17' N. and long. 103° 50' E., had 520,164 inhabitants in 1937. The island surrendered to the Japanese on Feb. 15, 1942; it was restored to British rule Sept. 9, 1945, and returned to civil government on April 1, 1946, at the end of the period of the British Military Administration.

The Cocos-Keeling Islands were declared a British possession in 1857, and in 1878 were placed under the control of the Governor of Ceylon. On February 1, 1886, they were placed under the Governor of the Straits Settlements, and in 1903 they were annexed to the Straits Settlements and incorporated with the Settlement (now the Colony) of Singapore. The 27 small coral islands lie between lat. 12° 4' to 12° 13' S., long. 96° 49' to 96° 56' E., 700 miles S.W. of Batavia. The largest is 5 miles by 1 mile. Only two, Home and Direction islands, have important settlements, the latter being inhabited by the staff of Cable and Wireless,

which maintains a station there. On West Island there is an air-strip which played an important part in communications during the war with Japan (the Cocos—Keeling Islands, unlike the rest of the Colony, were never occupied by the Japanese) and in which interest is again being shown as a link in an Australian—S. African air route. The only export is copra. The population numbers (1952) 552.

Christmas Island, in the Indian Ocean, 222 miles S. of Java, and 529 miles E. of the Cocos—Keeling Islands, has an area of about 60 square miles and a population (1952) of 1,743. It is administered as a part of the Colony of Singapore, represented by a District Officer. The island, which is densely wooded, contains extensive deposits of phosphate of lime worked by the Christmas Island Phosphate Company. The amount exported in 1952 was 332,795 tons.

Revenue.....	£23,343,000
Expenditure.....	28,870,000

TRADE

Singapore is primarily a commercial and strategic centre. It is the chief port of the produce of the Malay peninsula, the chief entrepôt centre for south-east Asia and Indonesia, and a focus for air and sea transport. There are also a number of secondary, processing and assembly industries. Tin smelting, the manufacture of rubber goods, rattan works, saw-mills, brick works, paints, and the canning of locally-grown pineapples are the more important of these; products of secondary importance are beer, biscuits, soap, coconut-oil, groundnuts, furniture, asbestos packing, aluminium manufactures, etc.; but the prosperity of the colony mainly depends on the productivity and volume of trade of the surrounding territories.

GOVERNMENT

The Government is that of a Crown Colony with an Executive Council of 6 official and 6 unofficial members and a Legislative Council consisting of the Governor as President, an unofficial Vice-President, 4 *ex-officio* and 5 nominated official members and 12 elected members (3 elected by the Singapore, Chinese and Indian Chambers of Commerce) and 9 elected in 9 single-member constituencies on a franchise confined to British subjects over 21 years of age, whose names are on the electoral register, and 4 nominated unofficials. The Council thus has an unofficial majority. The second Legislative Council was sworn in on April 17, 1951.

The Municipality became a City by Royal Charter on Sept. 22, 1951. Local Government in the Municipal Area is carried out by a City Council of 27 Unofficials, 18 of whom are elected for 3-year periods by annual elections in 6 wards, on a franchise similar to that for the Legislative Council. The President is an official.

BRITISH BORNEO

Borneo is a large island in the Eastern Archipelago, extending from lat. 7° 4' N. to 4° 20' S. and from long. 108° 50' to 119° 20' E. It is about 850 miles in length and 600 in breadth, and contains an area of 284,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consisting chiefly of Dyaks, Malays, Kyans, Papus or Negritos, Chinese, Bajaus, Dusuns, Muruts and Bugis (the aboriginal Celèbes). The island was discovered by the Portuguese in 1521. About 202,000 sq. miles are included within Indonesia. Of the remainder of the island (the North Coast 50,000 sq. miles form the Colony of Sarawak and 30,000 sq. miles the Colony of North Borneo (including Labuan), all British.

NORTH BORNEO

The former State of North Borneo was governed by the British North Borneo Chartered Company, the last Chartered Company to administer an area of the British Empire, from 1888 to 1942, and became part of the new Crown Colony of North Borneo on July 15, 1946.

The Colony of North Borneo occupies the northern part of the island of Borneo, and has an area of 29,387 square miles with a coast-line of approximately 900 miles. The interior is mountainous. Mt. Kinabalu, sacred to the Dusuns, is the highest mountain in the East Indies, rising to 13,455 feet. Most of the Colony is densely timbered. On the west coast there is a narrow coastal plain which supports the main agricultural and rubber production of the Colony.

The census of the population was completed in June, 1951. The Census Report shows that since 1931, the year in which the last census was held, the total population of the Colony has increased by 20.4 per cent. from 277,476 to 334,141 and the native population by 18.4 per cent. from 205,218 to 243,009. The Chinese population has increased by 48.6 per cent. from 50,056 to 74,374. The number of Europeans, including Eurasians, has

increased from 647 to 1,213. The native population comprises Dusuns (mainly agricultural), Bajaus and Bruneis (fishing and agricultural), Muruts and Suluks and several smaller tribes. Labuan has a population of 8,784 (mainly Malays and Chinese).

The main towns of the Colony are situated on the coast. These are Jesselton (the capital) (11,704), Kudat (1,895), Sandakan (21,499) and Tawau (4,282) on the mainland and Victoria (2,526) on the island of Labuan.

Climate.—North Borneo is favoured by a relatively cool climate for a place situated so near the Equator. The average mean temperature varies between a maximum of 88° and a minimum of 66° F. The annual rainfall varies from 60 to 180 inches according to locality.

Communications.—The only railways are a metre gauge line running from Jesselton on the coast through Beaufort (57 miles) to Melalap in the interior, a distance of 96 miles, with a branch line from Beaufort to Weston (20 miles). There are 212 miles of metalled road, 192 miles of earth roads and 572 miles of bridle paths. Labuan is well supplied with coral roads. There is an airstrip suitable for Skymaster aircraft at Labuan, and Dakota strips at Jesselton and Sandakan. The construction of additional landing grounds for the operation of internal air services has been completed, and the service is now in operation. There is a service five times a week to and from Singapore, a twice-weekly service *via* Manila to and from Hong Kong, and a weekly service *via* Labuan to and from Australia and Hong Kong.

Production.—The main industries of the Colony are the cultivation of rubber (119,000 acres), rice (71,346 acres), coconuts and coconut products (45,627 acres), sago (8,649 acres), tobacco (1,600 acres) and hemp (3,154 acres). Fishing gives employment to a large number of local natives and Chinese. About nine-tenths of the territory is still heavily timbered with many valuable species of hardwoods and soft hardwoods, of which the more important are seraya (Borneo cedar) and camphor.

Trade.—The main imports in 1951 were provisions, textiles and apparel, rice, tobacco, cigars and cigarettes, sugar and vehicles. Rubber is by far the greatest export (valued in 1951 at a little over \$86,000,000); other exports are timber, copra, firewood, tobacco, cutch, dried and salt fish and hemp.

Currency.—The Malayan dollar is the currency of the colony, and is valued at 2s. 4d. Sterling.

GOVERNMENT

The Government is administered as a Crown Colony with a Governor appointed by the Crown. A new constitution establishing Executive and Legislative Councils was brought into force by Proclamation on October 17, 1950. The new Legislative Council comprises the Governor as President, three *ex-officio* members, nine official members, and ten nominated members; and the

new Executive Council consists of three *ex-officio* members, two official members, and four nominated members.

BRUNEI

Sultan, H. H. Omar Ali Saifuddin, C.M.G., acceded 1950.

British Resident, J. C. H. Barcroft.

Brunei is a British Protected State on the north-west coast of the island of Borneo, total area about 2,226 sq. miles, population (1947 census figure) 40,657, of whom 31,161 were of Malay or Bornean race. The chief town, Brunei, has a population of about 10,620. The supreme authority in the State is vested in the Sultan-in-Council. By virtue of a Royal Commission published on May 1, 1948, the Officer for the time being administering the Government of the Colony of Sarawak is High Commissioner for Brunei. The general functions of Administration are carried out by a British Resident whose advice, in accordance with the Treaty of 1906, must be asked and acted upon in all questions other than those affecting the Moslem religion. The climate is of the humid tropical type.

SARAWAK

Sarawak is a British Colony on the north-west coast of the island of Borneo, with a seaboard of about 500 miles, an area of about 50,000 square miles, and a population estimated in 1950 at 550,000, composed of various races, of whom the Sea Dyaks (Ibans), Malays, Chinese, Land Dyaks, Melanau, Kayans and Kenyahs are the most numerous. The government of Sarawak was obtained in 1841 from the Sultan of Brunei by the late Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions

were made in 1861, 1882, 1884, and 1890, when the Limbang River was obtained. The Lawas River was added in 1904. In 1864 Great Britain recognized Sarawak as an independent State, and under an agreement of 1888 the State was placed under British protection. In 1941 the centenary of Brooke rule was celebrated throughout the State.

Sarawak was ceded to Great Britain by the Rajah on July 1, 1946.

The territory of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of North Borneo. The southern boundary is, except for a few short stretches, formed by outstanding ridges of hills; the eastern boundary is a broken range of mountains with peaks rising to 10,000 feet. The principal rivers are the Rejang (navigable for about 160 miles), the Baram (navigable for about 200 miles), the Batang-Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (23 miles).

The country produces rubber, oil, sago, rice, illipe nuts, birds' nests, gold, pepper, rattans and jungle produce. There are also known coal and cinnabar deposits.

GOVERNMENT

On May 22, 1946, H.H. the Rajah signed an instrument ceding Sarawak to the British Crown. This was made effective by an Order-in-Council on July 1, 1946, from which date Sarawak became a Crown Colony. The constitution provides for a Governor, Supreme Council, which at present consists of 6 European, 2 Chinese and 1 Malay and 1 Dyak members, and a Legislative Council, known as the Council Negri, composed at present of 13 Official Members, 10 Unofficial Members and 14 Standing Members. Divisional and District Advisory Councils, composed of representatives of all races, and 16 Native Authorities controlling their own finances, have been constituted since the territory became a Crown Colony.

THE MALDIVE ISLANDS

The Maldive Islands, 400 miles south-west of Ceylon, are a group of 12,000 coral atolls, richly clothed with coconut palms, and yielding millet, fruit and edible nuts. About 200 islands are inhabited. The old form of Government was abolished in 1932, and a new Constitution was introduced. The Maldive Islands became a republic on January 1, 1953, and Amir Amin Didi was instituted first President. The international relations of the Maldives, which is a Protected State, are conducted in accordance with the advice of the United Kingdom Government, which does not interfere with the internal affairs of the Islands.

Population over 93,000. The people are Moslems. They are highly civilized and are great navigators and traders.

The Capital of the Maldives is Malé, on King's Island.

MALTA, *Gr.*

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 94.9 square miles. The colony includes also the adjoining island of Gozo (area 25.9 sq. miles); Comino and several islets. The estimated population, in January, 1953, was 316,883.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in A.D. 58. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Normandy. It passed successively under the rule of the Angevins and Aragonese, and followed the fortunes of their kingdoms. In 1530 it was handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Valette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then, at their own wish, admitted into the British Empire, the act being confirmed by the Treaty of Paris of 1814. Malta was again closely besieged in the late war and again withstood the attacks of all its enemies. From June, 1940, to the end of the war, 432 members of the garrison and 1,540 civilians were killed by enemy aircraft, and about 35,000 houses were destroyed or damaged.

Parliament of the United Kingdom made a free grant of £10,000,000 for restoring war damage, and for rebuilding after the war. A further grant of £20,000,000 has been promised.

The climate, although not tropical, is hot in summer. The mean maximum temperature for the months of June, July and August, 1952, was 86-6° F. The mean minimum temperature for the months of January and February, 1952, was 49-6° F. The islands are intensively cultivated. The chief export crops are potatoes, on ons and cumin seed. Wheat, barley, clover and ton atoes are extensively grown on dry lands, while on irrigated land all the usual temperate climate and sub-tropical vegetables are grown. Tomatoes are grown on irrigated and non-irrigated land. Before the war considerable progress had been made with the local livestock industry. Agriculture and fishing are among the principal occupations of the inhabitants.

Mdina (Notabile), the former capital, is and, contains the ancient palace or the courts of justice, the Cathedral, and the Old Seminary; its population has now dwindled to 1,122, but its suburb, Rabat, has 14,440 inhabitants. Notable has been entirely eclipsed in importance by the modern capital of Ψ Valletta, which was founded in 1566. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet.

Malta possesses a University (about 300 students) and a Lyceum (1,030 students); 120 Government primary schools, 6 secondary schools (one of them preparatory) and a technical schools. There are numerous private elementary and secondary schools. English and Maltese are the only languages taught in the primary schools. In religion the Maltese are Roman Catholics. The Islanders are mainly Punic in origin. The Maltese language is of Semitic origin, and is held by some to be derived from the Carthaginian and the Phœnician tongues. There is a Maltese order of nobility, recognized by the Crown, consisting of 29 families.

English and Maltese are the official languages of administration and Maltese is the official language in all the Courts of Law and the language of general intercourse in the islands. Provision has been made by ordinance for the use of the English language in any proceedings before any Court where any party or any accused person does not speak Maltese as the principal language to which he is accustomed. Where the proceedings are in a language not known to the party or parties or to the accused they are translated. In 1934, Maltese was substituted for Italian as the principal language of the Courts of Law.

FINANCE

	1951-52	1952-53
Public revenue.....	£6,146,662	£7,851,465
Expenditure.....	7,217,766	7,217,268

A tax on incomes above £240 per annum was imposed in 1948.

Bank of England notes ceased to be legal tender in the island as from Sept. 21, 1949, and only notes issued by the Commissioners of Currency are now legal tender. In addition, British coins, including silver, cupro-nickel and bronze coins, are legal tender.

TRADE

	1951	1952
Imports.....	£19,642,343	£20,356,016
Exports.....	2,104,005	3,380,183

The principal imports for home consumption are meat, wines and textiles, milk, wheat and wheat flour. Chief exports of local origin are

potatoes, onions, smoking requisites, hides and skins, gloves, buttons and beer.

CAPITAL, Ψ Valletta. Population (1953) 23,138. On Sept. 13, 1942, in the bomb-scarred city of Valletta, amid the ruins of Palace Square, Viscount Gort, the Governor and Commander-in-Chief, handed to the Chief Justice the George Cross conferred upon the people of the Island by King George VI in April 1942.

MALTA'S NATIONAL DAY is September 8, commemorating the raising of the sieges of 1565 and 1940-43.

GOVERNMENT

By Letters Patent dated September 5, 1947, Responsible Government was re-established in Malta and the new Legislative Assembly was opened by H.R.H. The Duke of Gloucester on November 10, 1947. The Maltese Legislature may not pass laws touching the public safety or defence of Her Majesty's dominions and the general interests of British subjects outside Malta. In addition to this general reservation, certain subjects are specifically withheld from the Legislature's competence. The principal subjects so reserved are matters dealing with the defence of the Island and naval, military or air force matters generally, aliens, immigration, currency and treaties and relations with foreign states except in so far as it may be necessary for laws to be made in Malta to enable effect to be given to any treaty extending to Malta. Laws dealing with "reserved matters" may be made by the Governor subject to Her Majesty's approval, or by Order in Council.

The Governor is assisted by two Councils: the Executive Council, consisting of such Ministers as he selects; and the Nominated Council, consisting of the Lieutenant-Governor, the Legal Secretary (who are *ex officio* members) and three Officers chosen from the Navy, the Army and the Air Force. There is a Privy Council which consists of the members of the Executive Council and the members of the Nominated Council, and the Governor may, as occasion may require, appoint a Joint Committee of the Privy Council consisting of three members of the Executive Council, nominated by the Prime Minister, and three members of the Nominated Council selected by the Governor.

Governor and Commander-in-Chief, H.E. Sir Gerald H. Creasy, K.C.M.G., O.B.E. (1949) £5,500

THE JUDICATURE

Chief Justice and President of the Court of Appeal,
 His Honour Dr. L. A. Camilleri.....£1,400
 Judges, Dr. A. J. Montanaro Gauci; Dr. W. Harding;
 Dr. T. E. Gouder; Dr. A. V. Camilleri;
 Dr. J. Caruana Colombo; Dr. A. Magri
 each £1,050

BRITISH COUNCIL

Representative, J. A. O'Brien.

COMMISSIONER-GENERAL IN LONDON.

Malta House, 39 St. James's St., S.W.1.

[Regent: 7361]

Commissioner-General, Alfred Salomone, O.B.E.

MAURITIUS

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17'–57° 46' E. long. and S. lat. 19° 58'–20° 33', and comprising with its dependencies an area of 805 square miles. The resident population at the census of 1952 was 504,415, made up of Indians, Europeans (mainly French), and persons of mixed descent. The total population, including dependencies, was estimated (Dec. 31, 1952) at 525,600.

Mauritius was discovered in 1511 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1638 they established a small colony on the shore, but in 1710 they abandoned the island, and in 1715 the French took possession of it and changed the name to Isle de France, but did not settle it until 1721. Under the French it became a great centre of trade. In 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule though the ancient name, Mauritius, was restored.

Of the total cultivable area of about 210,000 acres, 181,800 are under sugar, about 3,220 under aloe (regular plantations), 4,100 under maize, 2,400 under tea, 90 under rice, 860 under tobacco and the rest under other foodcrops and mixed farming. The sugar crop of 1952 was about 467,900 metric tons.

Situated just within the tropics but being a small land mass in a large ocean area, Mauritius has a climate more subtropical than tropical except at low altitudes. In summer, conditions are sometimes trying because of high humidities and light winds rather than because of the relatively high temperatures. The island lies in that region of the South Indian Ocean where tropical cyclones are most frequent. At times, as in 1892, 1931 and 1945 they are very severe and do much damage to crops and buildings.

Railways and Shipping.—There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes entirely through Port Louis. The shipping entered and cleared in 1952 amounted to 1,889,171 tons. In 1952 there were 100 miles of railway (4 ft. 8½ in. gauge), 82 post-offices and postal agencies, 51 telegraph offices and 11 telephone-exchange offices in the island, with 583 miles of telegraph, including block telegraph of the railway, and 10,395 miles of underground and overhead (Government) telephone wires and 5,524 telephone installations.

Civil Aviation.—The island is linked by air with

Africa, U.K. and Europe through the bi-weekly service of *Air France*. The airport at Plaisance, in the Grant Port district, received the first passenger aircraft on July 15, 1946. At the beginning of September, 1952, Qantas Empire Airways (of Australia) started a fortnightly scheduled service from Sydney to Johannesburg, via Perth, Cocos Islands and Mauritius.

The inhabitants of European descent are mostly Roman Catholic. Educational facilities are available up to University entrance level. Primary education is provided in 148 schools, 72 of which are Government and the rest grant-aided. There are 3 Government Secondary Schools, 2 for boys and 1 for girls, and a large number of non-Government day institutions, 9 of which are grant-aided. The Government at present allocates about 14 per cent. of its total recurrent expenditure to education.

FINANCE

Public revenue...	Rs.82,612,696	Rs.80,717,283
Public expenditure	73,861,434	79,686,227

* Estimated.

Currency—Rs.—Rupce=1s. 6d.

TRADE

	1951	1952
Total imports...	Rs.204,630,842	Rs.231,740,623
Total exports...	238,341,361	251,699,466
Imports from U.K.	£5,738,170	£7,134,778
Exports to U.K.	9,820,841	9,146,549

The necessities of life have all to be imported from abroad. In 1952 rice and grain were obtained from Burma, Madagascar, Straits Settlements and Ethiopia, flour from Australia, oxen from Madagascar and Rodrigues, and minor imports from South Africa and elsewhere; 88.6 per cent. trade of the island was with Great Britain and British Dominions in 1952.

GOVERNMENT

The Government is administered by a Governor, aided by an Executive Council.

Under the Constitution promulgated June 5, 1948, the Legislature consists of the Governor (as President), 3 *ex-officio* members (the Colonial Secretary, the Procureur and Advocate General and the Financial Secretary), 12 nominated members and 19 elected members. The franchise was also extended and women are admitted thereto. The executive includes 4 members selected from the Legislative Council in accordance with regulations made by the Governor.

CAPITAL, Port Louis. Population (1952), 69,693; other centres are Curepipe (22,026), Beau Bassin and Rose Hill (28,690), Phoenix Vacoas (27,880), Quatre Bornes (17,707) and Mahébourg (9,329).

DEPENDENCIES OF MAURITIUS

Rodrigues, 350 miles east-north-east of Mauritius. Area, 40 square miles. Population (1952) 14,051. Cattle, beans, salt fish, sheep and goats are the principal exports. The island is under the administration of a Magistrate and Civil Commissioner from Mauritius, who takes his orders from the Governor of Mauritius. Magistrate, P. Toureau.

Trade with Mauritius

	1951	1952
Total imports.....	Rs. 2,120,918	Rs. 2,754,100
Total exports.....	1,120,020	1,243,494

Other Dependencies.—Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any

disputes which may be referred to them. The chief product is coconut oil. The most important are the Oil Islands Group, the largest of which, *Diego Garcia* (pop. 1044, 501), lies on the direct route from the Red Sea to Australia, and possesses a good harbour; other islands are Six Islands, Peros Banhos, Agalega, St. Brandon, Salomon, and Trois Frères. The total area of the "Other Dependencies" is about 47½ square miles, with a population (1952) of 1,752.

Trade with Mauritius

	1951	1952
Imports.....	Rs. 692,454	Rs. 805,582
Exports.....	780,242	912,496

NIGERIA

Nigeria, the largest British Colonial Territory, is situated on the west coast of Africa. It is bounded on the south by the Gulf of Guinea, on the west and north by Dahomey and French Niger and on the east by the French Cameroons. A small portion of the old German colony of the Cameroons is under United Kingdom Trusteeship and this is administered as an integral part of Nigeria. The area including this portion is about 373,250 sq. miles. A belt of mangrove swamp forest 10–60 miles in width lies along the entire coastline. North of this there is a zone 50–100 miles wide of tropical rain forest and oil-palm bush. North of this the country rises and the vegetation changes to open woodland and savannah. In the extreme north the country is almost desert. There are few mountains except along the eastern boundary, where the highest peak is the 13,000-foot Cameroon Mountain. The Niger, Benue, and Cross are the main rivers.

The climate varies with the types of country described above, but Nigeria lies entirely within the tropics and temperatures are high. Temperatures of over 100° in the north are common while coast temperatures are seldom over 90°. The humidity at the coast, however, is much higher than in the north. The rainy season is from about May to October; rainfall varies from under 25 inches a year in the extreme north to 150 inches on the eastern coast line. An area at the foot of the Cameroon Mountain has a freak rainfall of over 350 inches. During the dry season the harmattan wind blows from the desert: it is laden with fine particles of dust.

The 1952–53 Census returns, so far as they are yet available, give a total population estimate of 30,000,000. The population is almost entirely African. There are some 15,000 Europeans, Americans, Lebanese and others engaged in Government posts, commerce and Missionary work. The most important towns are Lagos (est. pop. 267,000), Ibadan (459,000), Kano (130,000), Iwo (100,000), Ogbomoso (139,000), Oyo (72,000), Oshogbo (123,000), Abeokuta (70,000), Ede (45,000), Iseyin (50,000), Ilesha (72,000), Yerwa (57,000), Katsina (53,000), Sokoto (48,000), Zaria (46,000).

Development and Social Services.—A 10-year plan of development, to cost £55,000,000, has been in operation since 1946. In the Budget Session of the Nigerian Legislature, 1951, a revised plan was approved covering the years 1951–56, to further the object of the original plan of raising the standard of the basic social services and to adapt it to present-day conditions. At the end of the financial year 1952–53, approximately £27,000,000 of the original estimated cost remained unspent. The principal subjects of the new development plan are Education, Roads, Water Supplies, Health

Services and Agriculture. Other important development schemes are financed by the Produce Marketing Boards and the Regional Production Development Boards.

Health Services.—There are 162 general hospitals in Nigeria and the Cameroons and 347 doctors. There are also 191 small maternity homes and 758 rural dispensaries. The country has many formidable health problems including the recurrence of serious epidemic diseases such as cerebro-spinal fever, the prevalence of malaria and helminth infestations and the need for a higher level of hygiene and nutrition, especially among the country population. The Nigerian health services besides combating these diseases by modern methods of treatment, aim at a solution of the country's health problems primarily by preventive medicine and by raising the standard of living of the population as far as is practicable.

Education.—Education is expanding rapidly at all levels. The number of primary and secondary schools has been greatly expanded to meet the need to eliminate illiteracy as soon as possible. These schools are mainly conducted by Christian missions, by the Government and by Native Administrators. Just over one million children were on the rolls of primary and secondary schools in 1952. The estimated Government expenditure on education in 1952-53 was £4,587,000. A University College was opened at Ibadan in 1948; 338 students are in residence and, as the building programme progresses, the numbers will be expanded to 1,000.

Production and Industry.—Nigeria is mainly an agricultural country. Four of the country's main agricultural products, *viz.* palm-oil and palm kernels, cocoa, bananas (from the Cameroons) and ground-nuts are of the greatest importance in Nigeria's export trade (see figures under "Trade" below). Other crops include benniseed, capscums, cassava, coffee, cotton, guinea-corn, kola-nuts, maize, millet, rice, rubber, tobacco and yams. There are important tin and coal-mining industries, at Jos and Enugu respectively. The coal is mainly used within the country; in 1952 581,000 tons were produced.

Railways.—The Nigerian railway system, which is controlled by the Government, is the most extensive in British Colonial territories. There are 2,000 miles of line, some of it over very difficult country. There are two major bridges, one over the Niger at Jebba and one over the Benue at Makurdi. The latter is 2,624 ft. long and it believed to be the second longest in Africa. The North-western main line runs from Lagos to Kano (700 miles) through the important towns of Abeokuta, Ibadan, Ilorin, Jebba, Minna, Kaduna and Zaria. The eastern line runs from Port Harcourt deep-water quay on the Bonny river through the thickly populated oil palm area to Enugu, where it serves collieries. It then crosses the Benue and joins the north-western line at Kaduna, 569 miles from Port Harcourt. A branch line serves the tin mines at Jos. The railway hauled 1,808,000 tons of freight in 1951-52.

Roads.—There are 28,200 miles of motorable road. Under the ten-year development plan (see above) it is planned to bring the mileage to 40,000. Most of the roads have gravelled or earth surfaces, but some 1,500 miles are tarred.

Civil Aviation.—Trunk route services operated by British, Netherlands, French and Belgian airlines bring Nigeria within less than 20 hours of the Western European capitals and South Africa. There are also connections to French Africa and the United States. A network of internal air services

operated by the West African Airways Corporation connects the main internal centres, the annual number of aircraft movements at Nigerian airfields now exceeding 20,000. Radio navigational aids are installed at many airfields and there is a network of meteorological reporting stations.

FINANCE

	1951-52	1952-53*
Revenue.....	£50,327,000	£42,583,000
Expenditure.....	43,673,000	42,042,000
Public debt.....	21,238,000	21,238,000

* Estimated.

Trade.—Nigeria's trade is increasing. Imports to the U.K. include about one-third of the U.K.'s total cocoa imports, one-quarter of her tin imports, one-quarter of her dry hides, and 10 per cent. of her hardwoods.

	1951	1952
Total imports.....	£84,569,000	£113,113,000
Total exports.....	120,068,000	120,289,000
Imports from U.K....	43,467,000	58,207,000
Exports to U.K.....	89,343,000	91,825,000

The principal imports (1952) were cotton piece goods (£24,765,300), unmanufactured tobacco and cigarettes (£1,898,300), jute bags and sacks (£3,729,900), artificial silk piece-goods (£9,379,000), motor-vehicles (£6,324,052), bicycles (£2,081,500), other machinery (£5,242,000), cement (£2,236,000), motor spirit (£2,357,100), corrugated iron sheets (£2,951,200), stockfish (£2,896,000) and beverages (£2,128,000). The principal exports were cocoa (£28,666,200), tin ore (£7,665,500), groundnuts (£17,995,700), palm kernels (£20,412,000), palm oil (£14,617,400), timber (£2,660,500), hides and skins (£3,259,600), cotton (£6,733,600) and bananas (£2,186,900).

GOVERNMENT

Nigeria is divided into three regions known as the Northern Region, the Western Region and the Eastern Region. The capital of the whole country is at Lagos: the capitals of the Northern, Western and Eastern Regions are at Kaduna, Ibadan and Enugu, respectively. There is a Governor and Commander-in-Chief with authority over the whole country and Lieutenant-Governors in each of the three Regions.

The Constitution of 1951 established a Central Legislature and Council of Ministers for the whole of Nigeria and separate Legislatures and Executive Councils in each of the three Regions. The Council of Ministers is the principal instrument of policy in Nigeria. It consists of the Governor, 6 *ex-officio* members and 12 ministers.

The Regional Executive Councils are the principal instruments of policy in and for the Regions in matters to which the executive authority of the Regions extends. The appropriate Lieutenant-Governor presides in each of these Councils and there are three *ex-officio* officers. There may also be up to 2 official members of each of the councils. The majority of each council is, however, composed of elected members chosen from the respective Houses of Assembly.

There is a Central House of Representatives which consists of the President, 6 *ex-officio* members, 136 elected members and not more than 6 special members, representing interests which, in the Governor's opinion, are not otherwise adequately represented in the House. Of the 136 representative members, 68 are chosen by the Joint Council of the Northern Region, 31 by the Western House of Assembly, 3 by the Western House of Chiefs and 34 by the Eastern House of Assembly. The Governor, with the advice and consent of the

Central House of Representatives, may make laws for the peace, order and good government of Nigeria. The Lieutenant-Governors of the Regions, with the advice and consent of the Regional Houses, may make laws for the peace, order and good government of the Regions with regard to a large number of matters such as agriculture, education, town and country planning, public health and sanitation.

There are Joint Councils in both the Northern and the Western Regions. The Northern Joint Council consists of not more than 40 members elected from each legislative house, making a total number of 80 in all. The Joint Council of the Western Region is similarly constituted. The members of the Regional Houses of Assembly are elected by electoral colleges. In the North, an electoral college is elected in each province, in the West and East, in each division. The electoral colleges are formed by a number of intermediate stages, the first in each case being a primary election at which all adult male taxpayers may vote.

MINISTRY

Labour, Dr. Hon. E. M. L. Endeley.
Lands, Survey, Local Development and Communications, Hon. Okoi Arikpo.
Works and Transport, Hon. M. A. T. Balewa, O.B.E.
Social Services, Hon. Shettima Kashim, M.B.E.
Mines and Power and Natural Resources, Hon. M. M. Ribadu, M.B.E.
Commerce and Industries, Hon. A. C. Nwapa.
Without Portfolio, The Emir of Katsina, C.B.E.

LOCAL GOVERNMENT

Local Government in Nigeria is the main responsibility of a large number of Native Administrations. In the East, however, there are a number of county and other councils on familiar English lines and, throughout the country, in recent years, the influence of British local government institutions has been increasingly marked.

CAMEROONS

(Trusteeship Territory of the Cameroons)

The German Protectorate of Kamerun on the west coast of Africa between (British) Nigeria and French Congo was obtained by conquest by Franco-British forces during the War of 1914-18.

The approximate geographical limits of the German territory were 2°-11° 30' N. lat. and 8° 30'-16° E. long. and the area was about 177,496 square miles. By the Milner-Simon Agreement of July 10, 1919, the whole area was divided into a British sphere (about 34,081 square miles) and a French sphere (about 143,415 square miles). In 1922 the territories were placed by the League of Nations under British and French Mandates, and in 1946 by the United Nations under British and French Trusteeship. The Cameroons under United Kingdom Trusteeship marches the whole distance of the Nigerian Eastern boundary, save for one short break. The population of the British sphere was estimated in 1951 at 1,083,000.

The two narrow strips of territory reach from the Atlantic Ocean to Lake Chad, a distance of 700 miles, and lie diagonally between 4°-12° 30' N. lat. and 8° 30'-14° 45' E. long. The nature of the country varies to a remarkable extent, from the coastal mangrove swamps and thick forest regions to the grasslands at heights of 4,000 ft. to 7,000 ft. and more, and again to sandy and swampy areas in the region of Dikwa and Lake Chad. The highest point is the peak of the Cameroon Mountain, which rises to a height of 13,350 ft. It is volcanic, but has not been active since 1922.

The Cameroons under United Kingdom Trusteeship is administered as part of Nigeria. The Northern areas are administered by the Residents of the adjoining Provinces of Adamawa, Bornu and Benue; the Southern section, formerly a single province, was divided in 1949 into two provinces, known as the Cameroons Province and the Bamenda Province, each being administered by a Resident with headquarters at Buea and Bamenda respectively. At the same time, a Commissioner of the Cameroons was appointed to be responsible for the overall administration of the two southern provinces as well as to act as the United Kingdom's special representative when Cameroons affairs are before the Trusteeship Council. His headquarters are at Buea on the slopes of the Cameroon Mountain.

Cattle breeding and the production of guinea corn are the chief occupations of the population of Dikwa, which consists mainly of Arabs and Kanuri. The inhabitants of the areas which for administrative purposes form part of the Adamawa Province are mostly primitive hillmen whose chief occupation is agriculture. Cattle breeding is the chief occupation in Bamenda Province, which consists mostly of high grassland.

Cameroons Province is rich in timber, and the volcanic soil of the lower slopes of the Cameroon Mountain is particularly fertile. 250,000 acres of this land, formerly German-owned plantations, have been leased to the Cameroons Development Corporation, which was set up in 1946 for the production of bananas, oil palm products, rubber and cocoa, almost all of which are exported. Profits earned by the Corporation are by statute to be applied for the benefit of the inhabitants of the Trust Territory.

The chief exports from the Territory are cocoa, palm oil and kernels, rubber and bananas; the chief imports are textiles, motor spirit, provisions, ironware and salt.

The seaports of Victoria and Tiko are connected with Buea and all divisional headquarters by motor road.

Commissioner, Brig. E. J. Gibbons, C.B.E.

(+ allice. £450) £1,760

Buea, population (estimated) 3,000.

PACIFIC ISLANDS

(Western Pacific High Commission)

High Commissioner, His Excellency Robert Christopher Stafford Stanley, C.M.G., O.B.E. (1952).....	(+ allice. £620) £2,250
Chief Secretary, R. J. Minnitt.....	2,100
Chief Judicial Commissioner, His Honour R. Hyne.....	2,400
Financial Sec., A. M. MacLeod-Smith.....	1,800
Legal Adviser and Attorney-General of British Solomon Islands Protectorate, P. N. Dalton.....	1,750
1st Asst. Sec. (vacant).....	1,500
Asst. Secs., H. C. A. Dobbs; R. D. Fairley; T. Russell.....	£600 to £1,300

The principal groups under the High Commissioner in, over, and for the Western Pacific Islands are (1) The Gilbert and Ellice Islands Colony; (2) The British Solomon Islands Protectorate; (3) The New Hebrides; (4) There are also a number of scattered groups and isolated islands, including Caroline, Flint, Malden, Starbuck and Vostock Islands, which are not attached to any group.

The Gilbert and Ellice Islands Colony, which includes Ocean, Christmas, Fanning and Washington Islands, besides the Gilbert, Ellice and Phoenix Groups, was formerly a Protectorate, and was formally annexed to the Empire in November, 1915. The total land area of the Colony is 375 sq. miles with a population (Census, 1947) of 36,000 (304 Europeans, 142 Chinese, 29,923 Micronesians and 5,066 Polynesians). The revenue of the Colony in 1950 was £250,024; expenditure (including £57,961 special war rehabilitation expenditure) £280,467. Imports £255,858; exports (excluding value of 217,300 tons of phosphate exported from Ocean Island) £566,400.

The Government maintains two boys' boarding schools and two primary mixed schools. There are 227 village schools throughout the Gilbert, Ellice and Phoenix Groups. These are run by missionary societies, in some cases with assistance from the Government.

The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° E. longitude, consists of 16 islands, Makin, Butaritari, Marakei and Abaiang (Northern Gilberts), Tarawa (Headquarters of the Colony), Maiana, Abemama, Kuria and Aranuka (Central) and Nonouti, Tabiteuea, Beru, Nikunau, Onotoa, Tamana and Arorae (Southern Gilberts), with several small islands or islets depending upon them. The area of the group is 114 sq. miles and the population (estimated 1949) 27,868. The Ellice Group of 9 islands (Nanumea, Napumanga, Niutao, Nui, Vaitupu, Nukufetau, Funafuti, Nukulaele and Nurakita) lies between lat. 5° 30' and 11° S. and long. 176° E. and 180° E. The area of the group is 9½ sq. miles and the population (estimated 1949) 4,464. Ocean Island (or Banaba), in lat. 0° 52' S. and long. 166° 35' E. was proclaimed British in 1900. The Line Islands between lat. 4° 40' and 2° N. and long. 160° 20' and 157° W. include Fanning, Washington and Christmas Islands. Fanning and Washington Islands were included in the Colony in 1926, Christmas Island in 1919. Christmas Island is the largest atoll in the Pacific. The boundaries of the Colony were extended (March 18, 1937) to include the Phoenix Islands (Birnie, Canton, Enderbury, Gardner, Hull, McKean, Phoenix and Sydney Islands), between 3° and 5° S. and 170° and 175° W. Enderbury and Canton Islands are for common use of Gt. Britain and U.S.A. for aviation and communications, under an agreement made on April 6, 1939. Canton Island is an international airport on the Trans-Pacific route between Fiji and Honolulu.

In each island of the Gilbert and Ellice Groups (except Niulakita) and in three islands in the Phoenix Group there is a Native Government under an appointed native Magistrate whose court administers a code of native laws. The Colony is administered by the High Commissioner through a Resident Commissioner.

Resident Commissioner, Gilbert and Ellice

Islands, Michael Louis Bernacchi (1952)

(+ allice. £100) £2,100

The British Solomon Islands Protectorate, established in 1893, now includes all the islands in the Solomons Archipelago S. and S.E. of the large island of Bougainville. The main islands in the Protectorate are Choiseul, Santa Ysabel, Shortland Group, Vella Lavella, Kolombangara, Ganongga, Gizo, New Georgia, Florida, Guadalcanal, Russells, Malaita and San Cristoval, and the outlying islands of Bellona, Rennell, Vanikoro, Tikopeia, Cherry, Mitre, Utupua, Swallow (or Reef Islands) and Duff Groups, Sikaiana (or Stewart) and Ontong Java (or Lord Howe Atoll). The Protectorate is situated between 5°-12° S. lat. and 155°-170° 20' E. long. It has a total land area of about 11,500 square miles and ocean area of about 270,000 square miles, and a population (est. 1950) of 376 Europeans, 205 Asiatics and 98,000 Natives. Estimated revenue (1952) £A480,508; expenditure (1952) £A460,949; imports (1951) £S795,756; exports £S801,588. The main imports are foodstuffs and building materials. The headquarters of the Western Pacific High Commission were moved from Suva in Fiji to Honiara, the capital of the British Solomon Islands Protectorate, in December, 1952, and the High Commissioner for the Western Pacific assumed the direct administration of the Protectorate on Jan. 1, 1953, the present post of Resident Commissioner being abolished.

The Tongan or Friendly Islands.—A self-governing State under the protection of Great Britain by Treaty made in 1900. These islands are situated on the Southern Pacific to the E.S.E. of Fiji, and 300 miles therefrom, with an area of 250 square miles, and population (December 31, 1952) of 235

Europeans, 80 other races, 580 persons of mixed descent, 49,773 Tongans and 322 other Pacific Islanders, a total of 50,980. They were discovered by Tasman in 1643. Most of the islands are of coral formation, but some are volcanic (Fofua, Kao, and Niuafoou or "Tin Can" Island). The limits of the group are between 15° and 23° 30' S., and 173° and 177° W. Nukualofa, on the island of Tongatabu, is the seat of government. The present Queen Salote Tubou, G.B.E., succeeded her father the late King George Tubou II on April 12, 1918. There is a legislative assembly of 21 members, the representatives of the Nobles and of the people (seven of each) being elected triennially. Soil generally is fertile, the principal export is copra. Two of the smaller islands disappeared, owing to a tidal wave, in June, 1919. Revenue 1951-52 £T470,173; expenditure £T391,668. There is no debt. Total imports (1952) £T1,161,042; total exports £T1,401,376. The total shipping entered and cleared in 1951 was 166,403 tons.

Agent and Consul, J. E. Windrum (1949)

(and duty allowance £100) £1,800

The New Hebrides Condominium (see p. 824).

Pitcairn Island, situate in lat. 25° 3' 30" S., long. 130° 8' 30" W., is nearly equidistant from Australia and America. It was discovered by Carteret in 1767 but remained uninhabited until 1790, when it was occupied by the mutineers of H.M.S. *Bounty* with some women from Otaheite. In 1856 the inhabitants numbering 192 were removed at their own request to Norfolk Island, but 40 of them returned to Pitcairn. The islands of Henderson, Ducie and Oeno were annexed to Pitcairn in 1902. Area, 2 sq. miles. Chief Magistrate, Warren Christian.

FEDERATION OF RHODESIA AND NYASALAND

Following upon a conference on Central African Federation held in London in January, 1953, a scheme was drawn up for the Federation of Southern Rhodesia, Northern Rhodesia and Nyasaland with the federal capital at Salisbury. The scheme provided that the Governor-General of the Federation should appoint a Prime Minister and other Ministers, and that the Federal Assembly should consist of a Speaker and 35 members, 17 from Southern Rhodesia, 11 from Northern Rhodesia and 7 from Nyasaland. Of these, 9 members, 6 Africans and 3 Europeans, are to be selected or appointed to represent African interests. There would also be an African Affairs Board, which would be a standing committee of the Assembly.

The Federal legislature would have control of external affairs, defence, immigration and emigration, citizenship of the Federation, overseas trade, currency, transport, postal services, education of persons other than Africans, and European agriculture. There would be a unified system of taxation, a federal Supreme Court, a federal public service, and a federal police force. For a period of ten years from the inception of the constitution there would be no change in the division of powers between the Federation and the territories except with the consent of all three territorial legislatures.

At a referendum held in Southern Rhodesia on April 9, 1953, 25,570 votes were cast in favour of federation and 14,729 against. An enabling Act was passed in the United Kingdom Houses of Parliament on July 14, 1953, and an Order in Council giving legislative effect to the Federation subsequently made by the Queen. The appoint-

ment of Lord Llewellyn as Governor-General of the Federation was announced on August 3.

Governor-General, His Excellency The Lord Llewellyn, P.C., G.B.E., M.C., T.D., assumed office, Sept. 4, 1953.

Prime Minister and Minister of Finance, External Affairs and Defence, Rt. Hon. Sir Godfrey Huggins, K.C.M.G., C.B.

Minister of Internal Affairs, Sir Malcolm Barrow.

Minister of Transport and Development, Sir Roy Welensky, C.M.G.

SOUTHERN RHODESIA

Southern Rhodesia, comprising Matabeleland and Mashonaland, is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, its political neighbours being Northern Rhodesia and Portuguese East Africa on the N.; the Transvaal and Bechuanaland on the S. and W.; and Portuguese East Africa on the E. The total area is 150,333 square miles. The population (1951 census, preliminary figures) numbered 136,000 Europeans, 4,340 Asiatics and 5,960 Coloureds; Natives are estimated at 2,000,000, giving a combined total of approximately 2,146,000. In 1951 there were 3,929 European births and 957 deaths, the death-rate being 6.9 per 1,000.

The Natives of Southern Rhodesia (members of the Bantu race) are Amandebele (known more usually as Matabele); Kalanga, who occupy Matabeleland, the western portion of the Colony; and Wazezuru, Wakaranga and a number of other tribes which grouped together are broadly described as the Mashona, who are settled (for the most part) in Mashonaland, the eastern part of the territory.

Defence.—The defence of S. Rhodesia is based on a permanent force of Europeans and Africans augmented by compulsory service for European Territorials.

Communications.—The Rhodesia Railway system begins at Vryburg and in conjunction with the railways of the Union of South Africa and Beira provides communication from Cape Town through Bechuanaland, Southern and Northern Rhodesia to the Belgian Congo and to Portuguese East Africa (port of Beira). The total mileage of the system, which was acquired by the State in 1947, is 2,436 miles, of which 1,284 miles are within Southern Rhodesia. In the Colony there are several branch lines tapping the chief mining areas. Road motor services with a route mileage of 2,720 miles supplement the railways in outlying areas.

Central African Airways is a public corporation owned jointly by the Southern Rhodesia, Northern Rhodesia and Nyasaland Governments and has the task of providing regular scheduled air services for passengers, mail and cargo throughout the Central African territories.

Central African Airways services operated by nine Vickers Viking 27-seater aircraft, five D.C.3 aircraft and six de Havilland Beaver aircraft, cover some 8,322 miles and serve many widespread places including:—to the north of Salisbury—Nairobi, Dar-es-Salaam, Kasama, Tabora, Abercorn, Ndola, Lusaka, Blantyre, Fort Jameson, Broken Hill, Lilongwe, Salima, Monkey Bay, Kasungu, Mzimba, Fort Johnson and Zomba; to the east—Lourenço Marques in Portuguese East Africa and Umbalo; to the west—Livingstone (Victoria Falls), Mongu, Mankoya, Kalabo, Sesheke and Balovale; and to the south—Gatooma, Enkeldoorn, Que Que, Gwelo, Shabani, Fort Victoria, Bulawayo and Johannesburg. A weekly lower-fare service between Salisbury and London was started in 1953.

On Dec. 31, 1952, there were 182 Post Offices

(77 Savings Bank and Money Order Offices and 105 Postal Agencies) in the Colony. For 1952 revenue from Posts, Telegraphs and Telephones was £1,670,908 and expenditure £1,590,804. The total wire mileage of the telegraph and telephone system is 146,061. The balance due to Savings Bank depositors at the end of 1952 was £13,769,896.

Social Service.—The Government of the Colony of S. Rhodesia maintains 16 general hospitals, one of which was converted into an African Clinic during 1952, 1 Mental Diseases Hospital, 1 Nervous Disorders Hospital and 2 Leprosy Hospitals. In addition there are 6 general hospitals maintained by Mining Companies and 2 large private nursing homes. There are 8 maternity homes and 4 maternity wings of general hospitals maintained by Government as well as 4 privately run registered maternity homes. Five of the larger local authorities provide hospital facilities for the treatment of infectious disease.

A State-aided maternity scheme exists to provide financial grants for medical, hospital and auxiliary aid expenses incurred by European, Asiatic and Coloured mothers.

There are 4 main Public Health laboratories for routine investigations as well as a clinical pathology departments at hospitals.

There is a section of preventive medicine within the Government Department of Public Health with its own staff to control epidemic and endemic diseases.

Apart from the facilities available in the African sections of the Government institutions listed above, the Government has established 2 maternity hospitals for Africans which are in each case the first section of new and very large African hospitals to be put into use. A tuberculosis sanatorium accommodating 100 patients is now in operation in a native reserve near Salisbury and a second institution of the same type is being built at Bulawayo. The Government maintains 88 native clinics which provide an in- and out-patient service for Africans in rural areas under the supervision of European medical officers. All institutional in- and out-patient treatment for Africans is free of charge to the individual. Fifty-three missions maintain African hospitals which vary from small buildings to elaborately equipped modern general hospitals. All these receive financial Assistance from Government, both in respect of capital expenditure and of maintenance costs. Many of the smaller mines and a few of the larger farms and industrial concerns maintain small hospitals for their employees. A research unit is engaged in the investigation of problems in malaria and bilharziasis. A National Nutrition Council is established. Africans are trained as nursing orderlies, microscopists and health demonstrators.

Education.—On April 1, 1953, there were, for European children, 115 Government and Government-aided schools—kindergarten, primary and secondary. In addition, there were 14 Government-aided schools, 10 private schools and 9 aided farm schools. A correspondence school in Salisbury provides primary education for rural children who live beyond reach of country schools and who are unable to enter boarding schools. The total number of European children in all types of schools on April 1, 1953, was 31,659. There are 19 schools for Asiatics and coloured children with 3,495 pupils. For Africans there are 18 Government schools, including two industrial training centres at Domboshawa (Mashonaland) and Mzingwane (Matabeleland), with 8,211 pupils and 2,336 schools with 240,952 pupils conducted by mission agencies with Government aid. A

secondary school for Africans (299 pupils in 1952) was opened at Goromonzi in January, 1946. In addition, another Government secondary school is in course of construction at Gwelo, and there are 9 secondary schools (580 pupils) conducted by missions, assisted by the Government.

Minerals.—The rights to the rich mineral deposits, originally acquired by the British South Africa Company, were purchased by the Government in 1933 for £2,000,000. The value of the gold production since occupation (1890) to Dec. 31, 1952, was £191,033,327. The output for 1952 was valued at £6,165,671. The value of asbestos produced in 1952 was £6,651,975, the next most important mineral being chrome ore (1952 production: 861,839 tons valued at £4,279,440). Silver, coal, beryl ore, mica, iron pyrites, limestone, tin and tungsten concentrates have also been produced in considerable quantities, while various other metals and minerals have been produced in small quantities.

Industries.—Though the climate is sub-tropical, the average altitude (3,000–5,000 ft.) makes it well suited for European occupation, and it possesses all the essential characteristics and facilities necessary for successful agriculture and cattle raising, and for the cultivation of European fruit trees, cereals, and vegetables, in addition to tobacco, cotton, and the indigenous products of the country. The staple crops are maize and tobacco; the tobacco crop, 1951–52, was 99,611,338 lb. (Virginian) and 158,382 lb. (Turkish), total 99,769,720 lb. In 1952–53 the Virginian crop was estimated at 108,350,000 lb. The total area under cultivation (summer crops—European only) in 1952 was 839,766 acres (maize 361,024, tobacco 190,940, legumes and fodders 207,428). Cattle (European-owned 1,154,860; native-owned 1,809,624 on Dec. 31, 1951) thrive well; an export trade in chilled beef and other preserved meat is being built up: sheep numbered 317,377 (European 117,187; native 200,190); and pigs 110,766 (European 48,989; native 61,777). Dairy products sold in 1951 include milk 5,035,824 gallons, and eggs 1,432,299 dozen. Butter available for sale in 1951 amounted to 933,138 lb. and cheese to 468,645 lb. In addition to the main industries of mining and farming there are grain mills, creameries, meat preserving and preparing industries, sugar refineries, breweries, cigarette factories, oil, soap and candle factories, cement and lime works, steel works, metal manufacturing industries, textile mills, clothing and footwear factories, and many other undertakings, including asbestos-cement and plastic industries. The 1951 Census of Industrial Production shows a gross output of £76,929,000, of which £51,011,000 relates to manufacturing, £21,738,000 to construction, and £4,180,000 to production and supply of electricity and water. During 1952, 555 new companies with nominal capital of £8,642,925 were registered.

On the grant of Responsible Government in 1923, the British South Africa Company relinquished all rights and interests in the land of Southern Rhodesia except in the estates which it was already developing and working on July 10, 1923. The mineral rights (originally granted by Lobengula, king of the Matabele, under the famous Rudd Concession) were purchased by the Government from the Company in 1933 for £2,000,000. Considerable efforts have been made by the Government in recent years to increase the number of new European settlers on the land, and the settlement of some 500 Rhodesian ex-Servicemen on Crown land farms since the end of the war has been very successful. A Land and Agricultural

Bank grants loans for farm development and acquisition of residential property on easy terms of repayment. Of the Colony's 96,000,000 acres, some 32,000,000 have been set apart for native occupation (Native Reserves) and purchase (Native Purchase Areas).

FINANCE

	1951-52	1952-53*
Revenue.....	£21,235,262	£28,525,693
Expenditure from revenue.....	23,199,146	27,349,900
Public debt.....	105,581,496	121,470,219

TRADE

	1951	1952
Merchandise:		
Total imports....	£85,634,000	£88,378,000
Total exports....	45,683,000	54,588,000
Imports from U.K.	38,747,000	38,747,000
Domestic exports to U.K.....	19,362,000	19,362,000

Gold Bullion, Concentrates, etc.

	1951	1952
Imports.....	£118,373	£96,597
Exports.....	6,107,673	6,649,070

The principal imports for home consumption are metals and manufactures thereof, fibres, yarns and textiles, foodstuffs, oils, waxes, resins, paints, etc., wood and cane, leather, rubber, books, paper and stationery, drugs, chemicals, minerals, earthenware and glassware. The chief exports of local origin (in addition to gold) are tobacco and cigarettes, asbestos, chrome ore, cattle hides, apparel, coal, preserved meats, refined sugar, footwear, cotton piece goods and unmanufactured wood.

GOVERNMENT

The Colony obtained self-government in 1923 and has a Parliament of 30 members and a Cabinet of 6 members. The Queen is represented by a Governor who presides over the Executive Council. The only reserved legislation is differential legislation affecting the Native population, which is subject to the consent of the Secretary of State for Commonwealth Relations.

Municipal self-government has been established in the city of Salisbury; the city of Bulawayo, and in the towns of Umtali, Gwelo, Gatooma and Que Que. Smaller areas are administered by Town Management Boards.

On March 6, 1938, a Royal Commission was appointed by the Imperial Government "to enquire and report whether any form of closer co-operation or association between Southern Rhodesia, Northern Rhodesia and Nyasaland is desirable and feasible, with due regard to the interests of all the inhabitants, irrespective of race, of the territories concerned." The Commission reported that immediate amalgamation was not in the best interests of the territories concerned, but in 1944 the United Kingdom Government announced the establishment of the *Central African Council* to co-ordinate joint services common to the two Rhodesias and Nyasaland; joint services are now in operation with regard to currency, meteorology, airways, archives, town planning, broadcasting, films for Africans, statistics, scientific research and Court of Appeal. An *Inter-territorial Commission* is investigating hydro-electric power schemes to serve the two Rhodesias. The *Central African Council* is advisory only and has no executive authority, all inter-territorial action being subject to the approval of the respective legislatures. The Council consists of the Governor of

Southern Rhodesia (*Chairman*), the Governors of Northern Rhodesia and Nyasaland, the Prime Minister of Southern Rhodesia (*ex officio*) and of 3 ordinary members from each territory appointed at intervals of 2 years. Early in 1951 officials representing Southern and Northern Rhodesia, Nyasaland and the United Kingdom met in London and prepared a scheme for the federation of the three Central African territories. A Conference of Ministers and other senior representatives met at the Victoria Falls in September, 1951, and there was a further Conference in London in April, 1952. (See p. 809).

Governor and Commander-in-Chief, His Excellency Maj.-Gen. Sir John Noble Kennedy, G.C.M.G., E.C.V.O., K.B.E., C.B., M.C. (1947):... (and allowances £3000) £4,000

M.C., Rhodesia House, 429 Strand, W.C.2

(allowances £1,500) £3,000

Official Secretary, J. B. Ross.

SALISBURY, the capital, is situated on the Mashonaland plateau, altitude 4,831 ft., population (estimated) 160,000, including 50,000 Europeans. **BULAWAYO**, the largest town in Matabeleland, altitude 4,405 ft., estimated population 220,000, including 40,000 Europeans. Other centres (with European totals) are Umtali (7,000), Gwelo (7,000), Gatooma (2,000), Que Que (2,000). Since the war Southern Rhodesia has accepted about 75,000 immigrants; mainly from the United Kingdom and the Union of South Africa.

U.K. High Commissioner in Salisbury, L. M. R. MacLennan, C.M.G.

Principal Secretary, A. H. Reed.

Economic Adviser, H. W. Woodruff.

Salisbury is 5,600 miles from London (air route) transit 24 hours; by sea 30 days (approx.).

NORTHERN RHODESIA

The Protectorate of Northern Rhodesia lies on the plateau of Central Africa between the longitudes 22° E. and 33° 33' E. and between the latitudes 8° 15' S. and 18° S. Its area is 290,323 square miles, and its boundaries are 3,515 miles in length.

With the exception of the valleys of the Zambezi, the Luapula, the Kafue and the Luangwa Rivers the greater part of Northern Rhodesia has a flat to rolling topography, with elevations varying from 3,000 to 5,000 feet above sea level, but in the north-eastern districts the plateau rises to occasional altitudes of over 5,000 feet. In many localities the evenness of the plateau is broken by hills, sometimes occurring as chains which develop into areas of broken country. The highest group of hills is the Muchinga Mountains which form part of the Great Escarpment running down the western edge of the Luangwa River Valley, and of these, individual peaks rise to about 8,000 feet.

Although Northern Rhodesia lies within the tropics, and fairly centrally in the great land mass of the African continent, its elevation relieves it from the extremely high temperatures and humidity usually associated with tropical countries. The lower reaches of the Zambezi, Luangwa and Kafue rivers in deeper valleys do experience high humidity and trying extremes of heat, but these areas are remote and sparsely populated.

The census of May 8, 1951, showed a European population of 37,221, a coloured population of 1,092 and an Asiatic population of 2,529. The native population was estimated (Dec. 31, 1951) at 1,700,577.

Agricultural production, etc.—Over 8,000,000 acres of land are under settlement by white farmers. The chief crop grown is maize. Other crops are tobacco, wheat, potatoes, and citrus. Stock raising is carried on by many farmers. The native-owned cattle in the territory is estimated at 771,324, and European-owned cattle 135,605. The vast copper deposits in the northern part of the Territory have attracted much capital, the four large producing mines, the Roan Antelope, Nkana, Mufulira and Nchanga, being responsible for the production in 1951 of 309,348 tons of copper, a portion of which is now refined at Nkana; Nkana copper ore contains cobalt, silver and gold. Zinc is produced on a considerable scale at Broken Hill, which mine also produces lead and vanadium. The total value of mineral production in 1951 was £72,277,038.

Many species of game are to be found, and good sport at a moderate cost is available for the big-game hunter. The Kafue National Park was declared in 1950 and contains large numbers of

game of many varieties. The southern section of the Park will be opened in 1953.

Development plans involving the expenditure of about £17,000,000 over the 10 years 1947-56 have been passed.

The Central African broadcasting station at Lusaka provides programmes for Africans in the Territory, Southern Rhodesia and Nyasaland.

Communications.—The trunk line of the Rhodesia Railways' system traverses the protectorate from Livingstone to the Congo border. A trunk road, which is at present in process of being bituminized, closely follows the railway line. The Zambesi, Kafue, Chambeshi and Luangwa rivers are navigable for a considerable portion of their courses. One International and three National Airports lying along the North/South corridor route through the Territory provide customs, health and immigration controls as well as fuel, air traffic control, radio and navigation aids. In all, there are forty-two airfields of which fourteen are constructed for use in all weathers. *Central African Airways* operate regular internal services between Lusaka, Livingstone, Fort Jameson, Mankoya Mongu, Kalabo, Balovale, Broken Hill, Ndola, Kasama and Abercorn. Regional services link Northern Rhodesia with Southern Rhodesia, the Union of South Africa, Nyasaland, Tanganyika, Kenya and the Belgian Congo. The International Airport at Livingstone, opened in August, 1950, is a regular scheduled stopping place on the direct trunk airline route from Europe to the Union of South Africa *via* the West Coast. There are 63 post offices, the majority of which are money order offices. The main telegraph and telephone route lies alongside the railway from Victoria Falls Bridge to the Congo border, with branches from Ndola to Luanshya, Ndola to Kitwe, from Kitwe to Mufulira and Chingola, and Lusaka to Fort Jameson. Fort Jameson is connected by telegraph with the Nyasaland, and Abercorn with the Tanganyika, system. The aeronautical wireless stations at Lusaka, Kasama, Ndola and Livingstone are equipped for communication with aircraft in flight, for point to point interterritorial communication, and for communication with adjacent territories. The airports are also equipped with radio navigational aids to give complete coverage for aircraft in transit over Northern Rhodesia, and for any aircraft requiring to "home" to any of the 4 main airfields.

Education.—In Dec. 1951 there were 31 European schools with an enrolment of 6,942, of which 22 were Government schools, with an enrolment of 5,732, and 1,380 recognized and Government schools for natives with an enrolment of 146,000.

The Rhodes-Livingstone Institute of Central African Studies, founded in 1937, is situated at Livingstone. The Rhodes-Livingstone Museum at Livingstone, housed in a new building completed in 1951, is the Territory's National Museum.

The chief imports for home consumption are

metal manufactures, textiles and foodstuffs. The chief exports of local origin are copper, zinc, lead, tobacco, cobalt alloy, cattle hides, wood and vanadic oxide.

GOVERNMENT

The administration is in the hands of a Governor appointed by the Crown, assisted by an Executive Council of 7 official and 4 unofficial members. The Governor is Chairman of the Executive Council. There is a Legislative Council, which consists of a Speaker, 9 official members, 10 elected members, 2 unofficial members nominated to represent African interests and 2 Africans. The country is divided into 6 Provinces for fiscal and administrative purposes.

Commissioner in London, J. H. Wallace, 57 Haymarket, S.W.1.

NYASALAND PROTECTORATE

The Nyasaland Protectorate comprises the western shore of Lake Nyasa, with the high tableland separating it from the basin of the Loangwa River, and the region lying between the watershed of the Zambesi and Shire Rivers on the west, and the Lakes Chiuta and Chilwa and the River Ruw (a tributary of the Shire) on the east, including the mountain systems of the Shire Highlands and Mlanje.

The Protectorate is bounded on the North by Tanganyika Territory, on the West by Northern Rhodesia and on the South and East by Portuguese East Africa (Mozambique). The rainy season is from November to March, and it is dry for the rest of the year.

Nyasaland has a total area of 49,177 sq. miles (land area, 36,879) with an estimated population in 1952 of 2,463,228, including 4,534 Europeans and 5,248 Asians.

The chief products of the Protectorate are tobacco, tea, cotton, tung, maize and rice.

An allocation of £2,500,000 has been made by the Imperial Government under the Colonial Development and Welfare Act to finance various schemes for the welfare and economic development of the Protectorate included in the 10-year development programme. In addition, a regional allocation of £1,000,000 has been made under the Act to Nyasaland and Northern Rhodesia for joint development schemes.

For internal communications there are on Lake Nyasa three steamers, two belonging to the Nyasaland Railways, Ltd. (one of which is a cargo vessel and the other mixed cargo and passenger); and the other to the Universities Mission of Central Africa at Likoma Island. There is a 3 ft. 6 in. gauge railway system extending from the Port of Beira, in Portuguese East Africa, to Salima (515 miles) crossing the Zambesi River at Sena (199 miles) by the lower Zambesi Bridge, passing through Blantyre (353 miles), and connecting with the lake service at Chipoka (496 miles). Main roads and "carrier" roads are open all over the Protectorate, the total mileage being 4,765. A road from Salisbury to Blantyre, *via* Tete and Zobe in Portuguese East Africa is open all the year round, while a branch road from Tete to Vila Coutinho (P.E.A.) and Dedza is open during the dry season only. The main North-South road through the Protectorate connects with the Tanganyika road system at Tunduma and a road branching off at Lilongwe connects Nyasaland with Fort Jameson in Northern Rhodesia. The protectorate is connected by telegraph overland with the Cape *via* Salisbury, and with adjacent countries to the North by landline and radio. A radio-telephone link exists to Southern Rhodesia. Telephone services were further extended in 1951 to provide for calls to the Union of South Africa, Beira and Nairobi.

Central African Airways operate regular services between Southern Rhodesia, Northern Rhodesia and East Africa calling at Salisbury, Lusaka, Dar-es-Salaam and Nairobi. The latter service provides a through connection to the United Kingdom. The Airports at Blantyre and Lilongwe have at present limited ground handling and passenger reception facilities, and are available for all weather operations. Zomba (the administrative capital) has a small grass airfield which, together with 9 other small landing grounds in the three Provinces, cover the requirements for air transportation to date.

The seat of Government is Zomba (est. pop., 1952, 5,430), other centres being Blantyre and Limbe in the Shire highlands, Ψ Fort Johnston (on Lake Nyasa), Ψ Lilongwe, Milanje and Mzimba.

FINANCE

Exports to U.K. (excl. transit and bullion)...	3,914,644	3,931,370

The principal exports are tobacco, tea, cotton, soya beans, fibre, tung oil, tobacco shooks, maize and ground nuts. The principal imports are cotton manufactures, machinery and other metal manufactures, petrol, vehicles and parts, wood and timber, earthenware and china ware, agricultural implements and machinery.

GOVERNMENT

The Government consists of the Governor and an executive and legislative council, both nominated.

In 1944 and 1945 African Provincial Councils were established in each of the three provinces. These councils, which are advisory, are composed of chiefs and other responsible African members under the presidency of the Provincial Commissioner. An African Protectorate Council, also of an advisory nature, was established in 1946.

ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in 15° 55' S. lat. and 5° 42' W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with an estimated population at Dec. 31, 1952 of 4,828. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator, João de Nova, in 1502 (probably on St. Helena's Day) and remained unknown to other European nations until 1588. It was used as a port of call for vessels of all nations trading to the East until it was annexed by the Dutch in 1633. It was never occupied by them, however, and the English East India Company seized it in 1659. In 1834 it was ceded to the Crown. During the period 1815 to 1821 the island was lent to the British Government as a place of exile for the Emperor Napoleon Bonaparte who died in St. Helena on May 5, 1821. It was formerly an important station on the route to India, but its prosperity decreased after the construction of the Suez Canal. A phormium (flax fibre) and lacemaking industry has been established. Ψ St. James's Bay, on the north-west of the island, possesses a good anchorage.

GOVERNMENT

The government of St. Helena is administered by a Governor, with the aid of an Executive Council of 3 official members. The Governor is also assisted by an Advisory Council of 6 unofficial members chosen to represent, as far as possible, all unofficial sections of the community, the Governor alone making all ordinances.

ASCENSION

An isolated island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55' 55" S. lat. and 14° 25' 55" W. long. It is said to have been discovered by João de Nova, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is $7\frac{1}{2}$ miles, and extreme breadth 6 miles, with an area of about 38 square miles, and, being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it; on Dec. 31, 1952, the population was 170. Ascension was administered by the Board of Admiralty until 1922, when by Royal Letters Patent it became a Dependency of St. Helena, and was transferred to the Colonial Office. Ψ Georgetown, the capital, is situated in a small bay on the N.W. coast. Ascension is visited from January to May by the sea-turtle, which lay their eggs in the sand; the sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month.

Resident Magistrate, F. B. Stephens.

TRISTAN DA CUNHA

is the chief of a group of islands of volcanic origin lying in lat. 37° 6' S. and long. 12° 2' W., discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. They have a total area of 45 square miles and in 1921 the inhabitants numbered 127, increased in 1952 to 275; they are stated to be very long-lived. The main island is about 2,000 miles W. of the Cape of Good Hope, 4,000 miles N.E. of Cape Horn, and about 1,500 miles S.S.W. of St. Helena. It was the resort of British and American sealers from the middle of the 18th century, and in 1760 a British naval officer visited the group and gave his name to Nightingale Island. On August 24, 1816, the group was annexed to the British Crown and a garrison was placed on Tristan da Cunha, but this force was withdrawn in 1817. William Glass, a corporal of artillery (*died* 1853), remaining at his own request, with his wife and two children. This party, with two ex-Navy men, Alexander Cotton and John Mooney, and three masons imported for the purpose of housing the garrison, formed the present settlement. In 1827 five coloured women from St. Helena, and afterwards others from Cape Colony, joined the party. The inhabitants are of mixed blood, but the British strain is predominant. In 1885 many of the

able-bodied men were drowned through the upsetting of a boat, and in 1886 a grant of stores and provisions was made by Parliament. The principal settlement (Edinburgh) is in a fertile tract in the north-west of the island, its name being in honour of a visit from the former Duke of Edinburgh in 1867. The inhabitants raise crops and possess cattle, sheep and pigs.

From the death of Corporal Glass until 1933 the oldest inhabitant acted as Governor; in 1933 a council of four was set up (with one of its members as Chairman), the chairman, or chief, acting as island spokesman and conducting marriages in the absence of a chaplain. In 1948 an Administrator was appointed by the Governor of St. Helena. There is also a women's council for matters affecting women and children. Communications with the outside world were infrequent until the outbreak of war in 1939, but have improved since that time. There is now a South African Government meteorological station equipped with wireless. The recent commencement of operations by a South African fishing company should lead to more frequent visits of vessels to the island.

CAPITAL, Ψ Edinburgh.

Administrator, J. P. L. Scott (1952).

Resident Chaplain, Rev. D. Neaum.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl. Cultivation was started in 1937.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and $\frac{1}{2}$ mile wide, and rises in two peaks, 960 and 1,205 ft. above the sea-level respectively. The smaller islands, Stollenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

GOUGH ISLAND (or Diego Alvarez), in 40° 20' S. and 9° 44' W., lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and has valuable guano deposits. There is no permanent population.

By Letters Patent dated January 12, 1938, the Islands of *Tristan da Cunha*, *Gough*, *Nightingale* and *Inaccessible* in the South Atlantic were made Dependencies of the Island of St. Helena.

SEYCHELLES

The Seychelles Islands, in the Indian Ocean, which number altogether 92, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1810. By letters patent of Sept., 1903, they were erected into a separate colony. The principal islands of the group are Mahé (56 sq. miles), Praslin (9,700 acres), Silhouette (4,900 acres), La Digue (2,500 acres), Curieuse (900 acres), Félicité (689 acres), North Island (525 acres), St. Anne (500 acres), Providence (500 acres), Frigate (700 acres), Denis (340 acres), Cerf (290 acres), and Bird, or Sea Cow Island (160 acres), and the total area of the Colony, with dependencies, is estimated at 1561 square miles; the dependencies are the Amirantes, Alphonse, Bijoutier, St. Francois, St. Pierre, the Cosmoledo Group, Astove, Assumption, Coëtivy, Aldabra and Farquhar Island. The population on June 30, 1951, was 36,613. The population of Victoria in 1947 was 9,478 and of Praslin, 2,893. Although only 4° S.

of the Equator, the islands are healthy, the death-rate in 1950 being 11.60 per 1,000, the birth-rate being 29.50 per 1,000. There are 28 Roman Catholic and Church of England and Government primary schools, and Government technical and homecraft centres. There are also 5 private schools. There are 2 secondary grammar and 2 secondary modern schools. Aldabra, one of the dependencies of the Seychelles, and about 630 miles from Mahé, is famous for the gigantic land tortoises, while the unique double coconut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. The Governor is assisted by an Executive Council of 3 *ex officio* members and 5 unofficial members appointed by the Government, and by a Legislative Council of 6 official and 6 unofficial members, 4 of whom are elected.

SIERRA LEONE

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony, including those portions administered as Protectorate, lies along the coast, extending from the boundary of French Guinea—north of the

mouth of the Scarles River—to the boundary of Liberia at the mouth of the Mano River, a distance of approximately 210 miles; having an approximate area of 2,500 square miles. Those portions of the Colony which are strictly administered as Colony (viz. the Sierra Leone Peninsula, Tasso Island, Banana Islands, the township of Bonthe on Sherbro Island and York Island) cover areas totalling approximately 271 square miles, with a population (1949) of approximately 125,000, of whom about 600 were resident Europeans and about 900 resident Asiatics. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes; a babel of tongues is thus to be heard in the streets of Freetown. The total area of the Colony and Protectorate is about 28,000 sq. miles, and the total population about 1,860,000. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 212 miles, lying between 6° 55' and 10° N. lat., and the extreme breadth from east to west is 207 miles, between 10° 16' and 13° 18' of W. long. For administrative purposes the Protectorate is divided into 3 Provinces covering 12 Districts, each administered by a Commissioner. The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Mendis in the south.

Communications.—A railway runs inland from Freetown to Pendembu (227½ miles) and a branch line of 83 miles extends in a north-easterly direction from Bauya to Makeni. There are 170 miles of motor road in the Colony, of which 88 miles are bitumen surfaced. In the Protectorate there are over 1,310 miles of main and over 880 miles of lower standard motorable roads. The Posts and Telegraphs Department maintains a trunk line network of 800 miles of telephone and telegraph routes connecting Freetown with the Colony and Protectorate. On these routes telegraph services exist between Freetown and 55 towns in the Protectorate. Trunk speech facilities are available between Freetown, Bo and other main centres in the Protectorate.

Education.—In 1951 there were 289 primary schools with 26,285 boys and 11,039 girls on the rolls, and 15 secondary schools with 2,090 boys and 848 girls enrolled. Fourah Bay College provides University and other post-secondary courses, and the Prince of Wales School provides a course in science up to Higher School Certificate standard. There are 6 teacher training institutions, including the Normal Department of St. Joseph's Convent.

The total expenditure in 1952 was £319,721 from Colony Resources; £217,467 under Colonial Development and Welfare Act; and approximately £75,000, £20,000 and £800 from Missions, Native Administration and Protectorate Mining Benefit Fund respectively.

FINANCE

	1951	1952
Public revenue.....	£3,850,713	£5,213,775
Public expenditure....	3,904,374	5,401,539
Net public debt (Dec. 31).....	3,448,841	3,448,841

TRADE

	1951	1952
Total imports.....	£8,206,894	£10,282,485
Total exports.....	10,068,442	10,164,158
Imports from U.K.....	5,154,775	6,730,448
Exports to U.K.....	8,414,481	8,153,337

The principal exports are bananas, benniseed, cocoa, raw coffee, chrome ore, diamonds, ginger, gold, coconuts, ground-nuts, iron ore, kola nuts, palm kernels, palm oil, peppers, piassava and rice. Some of the largest diamonds known have been found in the Colony; in 1943 one of 530 carats and in 1945 one of 770 carats. The chief imports are cotton goods, patent fuel, apparel, hardware, provisions, petroleum, spirits and tobacco.

GOVERNMENT

Under the Constitution of 1951, there is a Legislative Council consisting of the Governor as President, a Vice-President who may not be already a member of the Legislative Council and 30 members, 7 of whom are *ex officio*, 7 elected to represent the Colony, 12 elected by the District Councils of the Protectorate, 2 elected by the Protectorate Assembly and 2 nominated by the Governor. The Council has full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council of 4 official and 6 unofficial members, the latter appointed from among the unofficial members of the Legislative Council. There is thus an unofficial majority in both the Legislative and the Executive Councils. Five of the unofficial members of the Executive Council hold ministerial portfolios, and the sixth is a Minister without portfolio.

Governor, His Excellency Sir Robert de Zouche Hall, K.C.M.G. (1953) (and £1,500 Duty Allee.)	£3,500

Commissioner of Income Tax, N. L. Gordon.	1,600
Director of Fishery Research Institute, West Africa, A. G. Taylor.	1,600
British Council Representative, Freetown, E. L. Hancock.	

CAPITAL, Ψ Freetown (population, 1947, 64,576). Freetown, which possesses the finest and most important harbour in West Africa, is 3,078 miles from Liverpool; transit, 9 days by sea; 2 days by air.

SINGAPORE (See MALAYA)

SOMALILAND PROTECTORATE

The Somaliland Protectorate occupies the north-east horn of the African Continent along the south of the Gulf of Aden up to 49° E. longitude. It is bordered to the west by French Somaliland (Djibouti) and Ethiopia, and to the south and east by Somalia (ex-Italian Somaliland). The territory covers an area of approximately 68,000 square miles, and lies between 11° 27' north latitude and 42° 40' and 49° east longitude. The interior of the Protectorate is characterized by an elevated plateau rising towards the north to an altitude of from 2,000 to 7,000 feet, and descending in scarps and broken hills to the coastal plain which varies in width from 30 to 60 miles. Vegetation consists largely of nutritious grasses and thorn and acacia trees, which furnish good grazing for camels, sheep and goats.

The nomadic population is estimated at from 500,000 to 700,000, and consists entirely of various Moslem Somali tribes of the Qadrayeh and Saleyeh sects. The life and wealth of the people is centred round their stock (camels, sheep and goats). Agriculture is confined to small but increasing areas with sufficient rainfall. Frankincense and myrrh are found in the east. The coastline abounds in fish, and the presence of coal, oil and minerals is reported in the interior. The chief exports are meat on the hoof, skins and hides. Game in the Protectorate includes lion, leopard, kudu, ostrich and numerous types of gazelle.

Climatic conditions are governed by the south-west monsoon (Kharif) which blows from May to September, and the north-east monsoon which lasts from November to March. Much of the interior is generally cool and healthy owing to its elevation.

The Protectorate owes its foundation to the capture of Aden by the Bombay Government in 1839, when Turkey claimed the Somali Coast from Zeilah to Cape Gardafui. The Egyptians bought the port of Massawa in Eritrea in 1864 and subsequently spread their jurisdiction south to Zeilah and Berbera at a time when this Coast provided the chief source of supplies for Aden. As they were pre-occupied by events in the Sudan and the rise of the Mahdi, the Egyptians withdrew from the Somali coast in 1884. On July 20, 1887, the Powers were notified that a British Protectorate had been established on the Somali Coast from Ras Jibuti to Bender Ziada. Its boundaries were later defined by treaties with France, Italy and Ethiopia; but they are still artificial. The frontiers between ex-Italian Somaliland and the Protectorate, save for the Bender Ziada Enclave, and those between Ethiopia and the Protectorate have been demarcated.

The Protectorate was invaded by Italian forces on August 4, 1940; and after resistance against greatly superior numbers the British forces were evacuated on August 18, leaving the Italians temporarily in occupation. British sovereignty was restored in 1941 in the course of the East African campaign.

FINANCE AND TRADE

SWAZILAND

(See BASUTOLAND)

TANGANYIKA TERRITORY

The Trust Territory of Tanganyika (formerly German East Africa, 1884-1918) occupies the east central portion of the African continent, between 2°-12° 45' S. lat. and 28° 50'-40° 38' E. long. The Territory is bounded on the N. by Kenya and Uganda; on S.W. by Nyasaland and N. Rhodesia; on S. by Portuguese E. Africa; on the W. it is bounded by the Belgian trust territory of Ruanda-Urundi and the Belgian Congo; on the E. the boundary is the Indian Ocean. Tanganyika has a coast-line of about 500 miles and an area of 362,688 square miles (including 19,982 square miles of water). The coast-line extends from the mouth of the Umba to the mouth of the Rovuma River.

The greater part of the Territory is occupied by the Central African Plateau from which rise many mighty mountains, including Mt. Kilimanjaro, the highest point in the Continent of Africa (19,340 ft.), and Mt. Meru (14,979 ft.). The Rovuma, Rufiji, Pangani, Wami and Kingani rivers flow into the Indian Ocean; the Mara and Kagera into Lake Victoria; the Malagarasi into Lake Tanganyika; the Songwe into Nyasa; and the Rungwa and Lupa-Songwe into Lake Rukwa. A National Park, being created in the Ngorongoro-Serengeti area of the Northern and Lake Provinces, covers several thousand square miles of the finest game country in Africa.

The native population consists mostly of tribes of mixed Bantu race. At the census of 1952 the European population was 17,885, other non-natives 77,609. At the 1948 census the native population was 7,407,517. According to German law every native born after 1905 is free, but a mild serfdom was continued under German rule. Legislation for the abolition of the status of slavery was enacted on June 9, 1922.

Education.—Expenditure by Government on African education in 1952 was £1,492,032, including sums contributed by Native Administrations. In 1952 there were 447 Government and Native Administration African primary schools, with a

total of 54,146 pupils, and 1,150 voluntary agency assisted primary schools with an enrolment of 152,714 pupils. There were 95 Government and Native Administration schools and 223 voluntary agency schools with post-primary standards. Enrolment in them was 8,609 and 16,079 respectively. There were 4 Government Indian schools (enrolment 3,269) and 94 assisted Indian schools (enrolment 11,244). There were also 8 Government European schools, 14 assisted European schools and a Government Correspondence Course. Enrolment for these schools was 1,677.

Production, etc.—The total area under forest of some kind, including the vast dry forest zone of 119,000 square miles, is about 140,000 square miles or about 41 per cent. of the land and swamp area of the Territory. Of this total about 4,000 square miles is closed forest and 10,945 square miles have been reserved. Including areas selected for reservation, the Forest Department now has control in some form of about 17,635 square miles (10,945 reserved; 5,774 selected for reservation; 350 square miles private forest; 317 square miles Native Authority reserves). The production of machine sawn timber in 1952 was roughly 52,000 tons, of which 14,560 tons were officially exported. It is estimated that local consumption additional to the above is 737 million cu. ft. of fuel and about 25,000,000 poles. The total value of the timber trade together with services in the form of free issues is tentatively estimated at £3,700,000. The value of the lumbering and sawmilling industry for 1952 is estimated at £1,320,000. Actual known consumption of machine sawn and other timber, of fuel and charcoal and of poles is valued at £1,696,000 in 1952. The principal export crops other than timber are: sisal, cotton, coffee, oilseeds, hides and skins, tobacco, tea and beeswax. Maize, sorghums, rice, beans and rootcrops are largely grown by natives, and maize and wheat by non-natives, for consumption within the Territory. Increasing quantities of locally grown tobacco, tea and oilseeds are consumed in the Territory. The export products of non-native farms and estates include sisal, coffee, tea, tobacco, seed-beans, pyrethrum and papain.

Live Stock.—In 1952 there were 6,551,951 cattle, 2,513,424 sheep, 3,585,596 goats, 13,711 pigs, 104,865 donkeys and 195 horses in the Territory.

Minerals.—The provisionally estimated value of the Territory's mineral exports and local sales for 1952 amounted to £6,034,330 as follows: diamonds £4,124,577; gold (refined) £850,268; salt £132,804; mica £142,947; tin concentrates £44,571; building minerals £171,724; lime £25,266; silver (refined) £10,989; kaolin £3,946; phosphate £842; tungsten concentrates £45,610; lead concentrates £480,547. The figure of £6,034,330 is an unusually large one, however, owing to the disposal during the year of the diamond production accumulated by ore production during the greater part of 1950 and the whole of 1951.

By December the programme of coalfield investigation in the Njombe and Songea Districts by the Colonial Development Corporation had been virtually concluded. It was reported by the Corporation that their investigations in three coalfields have so far disclosed the following coal tonnages:—Proved extractable, 216,000,000; indicated, 40,000,000; gross, 400,000,000 plus. The project is now on a care and maintenance basis while the possibility of building a railway is considered.

Communications.—The Railways in Tanganyika are operated by the East African Railways and Harbours Administration. They are metre gauge

and comprise the following lines:—*Tanga Line*. Tanga to Moshi, 219 miles, with a branch line 54 miles in length from Moshi to Arusha. There is a connection with the Kenya and Uganda Section at Moshi. *Central Line*. Dar-es-Salaam to Kigoma on Lake Tanganyika, 780 miles, with branch lines from Msagali to Kongwa (17 miles); Tabora to Mwanza on Lake Victoria (237 miles); and Kaliuwa to Mpanda (131 miles). *Southern Province Railway*. Mkwaya to Lumesule Juu, 152 miles, is under construction and has been opened as far as Nachingwea (79 miles). A 66-mile line connecting the new port at Mtwara with the railway at Ruu junction is under construction. Steamers run on Lakes Victoria, Nyasa and Tanganyika. Road services operate over 1,583 route miles, the main roads being from Morogoro to Korogwe (178 miles), Dodoma to Arusha (273 miles) and Dodoma to Mbeya (407 miles). A 120-mile macadam road runs from Namanga (on the Kenya border) to Himo (south-east of Mt. Kilimanjaro), via Moshi and Arusha. Work on a road of similar standard between Tanga and Korogwe will end early in 1954. The new road from Dar-es-Salaam to Morogoro will also be completed early in 1954; some 27 miles will be macadamized. A high standard gravel road from Morogoro to Iringa is under construction. The *Great North Road*, from Northern Rhodesia to Nairobi (Kenya), runs for 810 miles of its total length of 928 miles through Tanganyika. Dar-es-Salaam is in telegraphic communication with many inland centres, and with the adjoining territories of Nyasaland, Kenya, Uganda and Northern Rhodesia. There are 150 post offices and postal agencies, and 182 telegraph offices. Dar-es-Salaam has a ship-shore radio-telegraph service. There are 56 telephone exchanges and trunk services are available between most major centres, and also with Mombasa and Nairobi.

ψ The chief seaports are Dar-es-Salaam, Tanga, Lindi, Mkwaya, Mtwara and Kilwa. Deep-water berths are being built at Dar-es-Salaam and Mtwara. In 1952, 1,322 steam and motor vessels of 3,625,643 tons entered the various coast ports.

FINANCE

	1952	1953*

TRINIDAD AND TOBAGO

(See BRITISH WEST INDIES)

THE UGANDA PROTECTORATE

The territories now comprised within this Protectorate came under British influence in 1890. The present limits are approximately as follows:—On the north, the Anglo-Egyptian Sudan; on the east, the western boundary of Kenya Colony; on the south, Tanganyika Territory and Belgian Ruanda-Urundi; and on the west, the eastern boundary of the Belgian Congo. Within these boundaries lie Lake Victoria (part), Lake Edward (part), Lake George, Lake Albert (half), Lake Kyoga, Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to the Sudan frontier post at Nimule. Total area, 93,981 square miles, including 13,689 square miles of water.

For administrative purposes, the Protectorate is divided into 4 Provinces:—

- (1) Buganda (Mengo, Masaka and Mubende).
- (2) Eastern (Busoga, Mbale and Teso).
- (3) Western (Bunyoro, Toro, Ankole and Kigezi).
- (4) Northern (Acholi, Lango, West Nile and Karamoja).

The total population of Uganda at the 1948 census was 4,955,176, composed as follows: Africans 4,914,211; Indians 33,767; Europeans 3,448; Goans 1,448; others 2,302. About 2,500,000 Africans, who occupy the Central and Southern parts of the Protectorate, speak Bantu languages of which the most important is Luganda (the language of the Baganda tribe, from whom the present name of the Protectorate was originally derived). Ki-Swahili in a debased form is also spoken as a trading and, in a few districts, administrative language. The tribes occupying the North of the Protectorate are closely related to various tribes in the South of the Anglo-Egyptian Sudan. They speak a series of widely differing languages, now distinguished as belonging to the Sudanian, Nilotic and Nilo-hamitic clusters.

Post-war Development.—A comprehensive development plan was drawn up in 1946, and revised in 1948.

A dam is being erected at the Owen Falls on the Nile, near Jinja, to provide hydro-electric power for industrial development. It is expected that by early in 1954 generating capacity of 90,000 kW. will be available, and the potential generating capacity of the dam is 150,000 kW.

Raw materials of basic industry are available in Uganda in considerable quantity, particularly limestone, magnetite, copper, iron pyrites, salt and wood fuel. To these may be added an abundance of phosphate rock and quantities of other more valuable minerals. These resources are situated in two widely separated areas, one in the west on the slopes of the Mountains of the Moon, and the other around Tororo in the east where a cement factory has been built, and where it is hoped that other chemical works will soon be established, chiefly through private enterprise in association with the Uganda Development Corporation. This body was established in 1952 with a capital

of £5,000,000 to take over Government holdings in industry and to foster, assist, and, where necessary, to participate in the financing of further industrial enterprises, normally by establishing subsidiary companies in which private enterprises will be encouraged to participate and in proper circumstances have a majority holding.

Work has also started on the building of a textile factory at Jinja. The 50-mile extension of the Mombasa-Uganda railway from Kampala to Mityana has begun and this extension will be continued to link up with the Lakes system of Western Uganda and the Belgian Congo.

Education.—Most of the schools are administered by Missionary Societies, with the aid of substantial Government grants for buildings, equipment and staff salaries. Total Protectorate Government expenditure on African education in 1952 was £1,050,190, and on all education £1,411,720. Total number of Africans attending Government or grant aided schools in 1952 was approximately 250,000. Makerere College, Kampala, the University College of East Africa, is an autonomous inter-territorial foundation; its Board of Governors is appointed by the East African Governments, the Inter-University Council and the Academic Board of the College. It was granted special relationship with London University in 1949, and London external degrees were awarded for the first time at the end of 1953.

Communications.—The main line of the East African Railways in Kenya-Uganda extends from Mombasa and Nairobi, *via* Tororo and Jinja, to Kampala. Construction work on the Western extension of the main line from Kampala is well under way and the first 50 miles to Mityana has already been opened to traffic. There are branches from Tororo to Soroti, from Mbulamuti to Namasagali on Lake Kyoga, and from Kampala to Port Bell on Lake Victoria. The Railway Administration maintains a regular steamer service on Lake Kyoga between Namasagali and Masindi Port; and on Lake Victoria between Port Bell, Entebbe, Kisumu and Tanganyika Ports. A service is maintained on Lake Albert and the Nile between Butiaba and Nimule (connected by motor road with Juba in the Sudan) and between Butiaba and the Belgian Congo port of Kasenyi. A road transport service operates between Masindi Port and Butiaba. A through service is thus provided by the Railway Administration from Mombasa to the Sudan and the Belgian Congo. 2,457 miles of all-weather main roads radiating from Kampala to the principal administrative centres are maintained by the Public Works Department, and about 6,000 miles of excellent roads are kept up by the African Local Governments; The Post and Telegraph system is amalgamated with those of Kenya and Tanganyika. Entebbe has a first-class international airport, and is a principal stopping place on the B.O.A.C. Comet route to South Africa. Other airlines operating regularly through Entebbe include Sabena and E.A.A.C. It is also a stopping point on many charter flights. There are landing grounds at Kampala, Jinja, Tororo, Masindi, Mbale, Gulu, Soroti, Arua, Lira, Mbarara and Lalopi. There are hotels at Entebbe, Kampala, Jinja, Tororo, Masindi, Fort Portal, Kabale, Mbarara, Kichwamba and Masaka.

Production.—Agricultural production is almost entirely in the hands of Africans, the most important crops being cotton and coffee. Sugar, coffee, tea and paw paw are the main crops on non-native estates. The potential mineral wealth is considerable, tin ore and wolfram being won in the Western Province.

FINANCE

	1952	1953*
Estimated revenue....	£17,289,018	£15,566,706
Estimated expenditure (excluding loans)....	15,590,996	15,729,156
Public debt (June 1, 1953).....	—	9,933,000
	* Estimated.	

TRADE

	1951	1952
Total imports.....	£22,137,944	£24,296,238
Total exports.....	47,197,150	47,222,802

The Customs Services of Uganda, Kenya and Tanganyika are administered jointly by the Customs and Excise Department of the East Africa High Commission. The export trade is mainly in raw cotton, coffee, cotton-seed, oil seed cake, tea, cigarettes, ores, and hides and skins. The chief imports are cotton fabrics, base metals and metal manufactures, and machinery. The trade is chiefly with Great Britain, India and the neighbouring African territories.

GOVERNMENT

There is an Executive Council of 6 *ex officio* members, 3 official members and 6 unofficial members; and a Legislative Council of 6 *ex officio*, 20 official and 16 unofficial members, which is to be enlarged in 1954.

The whole territory is under British Administration; but in particular areas local powers are specifically reserved by treaty or "Agreement" to the local tribal government.

There are four "Agreement States," all monarchical in constitution—Buganda, Ankole, Toro and Bunyoro.

Generally throughout the whole country, government has been and still is administered through a system of county, sub-county and parish chiefs, first developed during the latter half of the 19th century in Buganda and extended by British and Ganda influence to all parts of the country. Chiefs consequently are to be regarded everywhere not as hereditary leaders of the original social groups, but as salaried civil servants selected and promoted by merit. A system of Native Courts corresponding to this administrative pyramid extends from the Sub-County Court through the County and District Native Courts, up to the High Court of Uganda as a final Court of Appeal. Similarly in recent years (since 1936) there has been built up a system of councils extending from the Parish Council through the Sub-County, County and District Councils up to the Provincial Council and thence to the Legislative Council of the Protectorate. In addition to the Native Courts, there are Protectorate Courts dealing with more serious crimes, appeal from which lies to the High Court of Uganda and ultimately to the High Court of Appeal of Eastern Africa.

WINDWARD ISLANDS (See BRITISH WEST INDIES)

ZANZIBAR

(The Zanzibar Protectorate)

Sultan, H. H. Seyyid Sir Khalifa bin Harub, G.C.M.G., G.B.E., born Aug. 26, 1879; succeeded Dec. 9, 1911. The bicentenary of the Al Busaid dynasty, to which the Sultan of Zanzibar and the ruler of Muscat belong, was celebrated on Nov. 20, 1944.

Heir-Apparent, Seyyid Abdullah bin Khalifa, C.M.G., born Feb. 12, 1910.

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tunghi Bay and north to Warskeikh; but since the cession of the coast-line from Ruwuma to Vanga, including the island of Mafia, to Germany in 1890, and of the Benadir and Kismayu coasts to Italy in 1904 and 1924 respectively, they are confined to the islands of Zanzibar and Pemba, a coastal strip from Vanga to Ras Klamboni (Dick's Head), the islands of Lamu, Manda, Patta, and Siu, for which His Highness' Government receives

annual rentals of £10,000 from the Government of Kenya, and £1,000 from Her Majesty's Government in respect of part of the Somali coast-line.

Zanzibar has an area of 640 square miles with a population of 149,575 (1948 Census); Pemba (380 square miles) population, 114,587; total area, 1,020 square miles; total population, 264,162.

Production, etc.—The islands produce a large percentage of the world's supply of cloves and clove oil (cloves exported in 1952 were valued at £2,969,358 and clove oil at £134,659). They also exported £479,478 of coconut oil in 1952. Other important products are chillies, oil cake, soap, tobacco and coir rope. Rice and cassava are grown extensively for local consumption. The importance of Zanzibar as a port of transhipment and distribution has decreased, owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the adjacent mainland coast.

Education.—There are free Government primary schools for Arab and African children, and a combined primary and junior Government school for Indian boys. Grant-aided primary schools are mainly for Indians. There are two Government secondary schools for boys and girls respectively of all communities, a Muslim academy for Arabic studies, a rural middle school for Arab and African boys, the H.H. the Aga Khan Secondary School for boys, a convent school mainly for Goan and Parsee boys and girls, and a boys' school at Kiungani run by the Universities' Mission to Central Africa. Boys are sent for technical training to the Mombasa Institute of Muslim Education. In addition there are Government Primary Training schools for men and women teachers. The total enrolment in December, 1952, was 9,927 and the total estimated expenditure on education in 1952 £193,600.

Communications.—There are 206 miles of road suitable for motor traffic in Zanzibar and 80 miles in Pemba. There are 5 post offices in the two islands and a Government telephone system. The city of Zanzibar, on the island of the same name, had a population (1948) 45,284. It possesses a magnificent harbour, which presents great facilities for shipping and trade generally. Net tonnage of ocean-going steamers which entered the port in 1946 was 422,844. Zanzibar provides the best water supply on the East Coast of Africa, and it is much in demand for shipping supplies.

A civil aerodrome is situated 4 miles south-east of the city, linked with Tanganyika and Kenya by charter and daily scheduled services.

FINANCE

	1951	1952
Revenue.....	£1,801,824	£1,643,752
Expenditure.....	1,387,180	1,663,652

TRADE

	1951	1952
Imports.....	£5,263,002	£5,177,553
Exports.....	6,185,892	4,825,152
Imports from U.K....	1,095,208	1,426,382
Exports to U.K....	635,914	746,809

The principal imports are rice, grain, groceries, sugar, tobacco, ivory, petroleum and piece-goods; the exports are cloves, copra, soap, clove oil, coconut oil, oil cakes and coir rope in addition to re-exports of previously imported ivory and piece-goods.

GOVERNMENT

Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonial Office.

The government is administered by a British Resident. There is an Executive Council, over which H.H. the Sultan presides, and a Legislative Council of 16 members (4 *ex officio*, 5 official and 8 unofficial) under the chairmanship of the Resident.

British Resident, John Dalzell Rankine,

Zanzibar is distant 6,850 miles; transit, 20 days by sea; 2 days by air.

THE ARCTIC OCEAN

The Arctic Ocean consists of a deep sea over 2,000 fathoms, on the southern margin of which there is a broad continental shelf with numerous islands. Into this deeper sea there is only one broad channel, about 700 miles, between Greenland and Scandinavia. Behring Strait is only 49 miles wide and 27 fathoms deep. The southern boundary of the Arctic Ocean is the Wyville-Thomson and Faeroe-Icelandic submarine ridge, which separates the North Atlantic from the Norwegian and Greenland Seas. The Norwegian Deep lies between Norway and Jan Mayen and Iceland; it exceeds 1,500 fathoms. The Greenland Deep, of similar depth, lies between Spitsbergen and Greenland. These two depressions are separated by a somewhat deeply submerged ridge from the east of Jan Mayen to Bear Island, south of Spitsbergen. A shallow ridge from the north-west of Spitsbergen to Greenland separates the Greenland Sea from the deep North Polar Basin. This extends from the north of Spitsbergen and Franz Josef Land to the north of the New Siberia Islands and of the North American Arctic Archipelago.

Another more shallow depression is Baffin Bay, less than 1,000 fathoms. This is separated from the North Atlantic by a submarine ridge. Barent's Sea, between Spitsbergen, Norway and Novaya Zemlya, and the Kara Sea, between Novaya Zemlya and the Siberian coast, are respectively below 200 and 100 fathoms.

The total area of the Arctic Sea is about 5.5 million square miles, of which 2.3 million square miles are probably covered with floating ice.

Condominiums

THE ANGLO-EGYPTIAN SUDAN

The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 36' N. lat., and reaches from French Equatorial Africa about 21° 49' E. (at 12° 45' N.) to the north-west boundary of Eritrea in 38° 35' E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and from east to west 950 miles.

The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea, Eritrea and Ethiopia; on the south lie Kenya Colony, the British Protectorate of Uganda and the Belgian Congo; and on the west French Equatorial Africa and Libya.

The estimated area is about 976,750 sq. miles, with a population of about 8,766,000. Partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 8,000 Europeans. The Arabs and Nubians are all Moslems. The Negroes are generally pagans, but some have been converted to Christianity.

The Nile enters from Uganda at the Sudan frontier post of Nimule in Equatoria Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. From the Atbara confluence to the Mediterranean the river has a course of close on 1,716 miles, and from its sources to the confluence its length may be reckoned at 1,810 miles, giving a total waterway of 3,526 miles. Between Khartoum and Wadi Halfa occur five of the six Cataracts.

Justice.—Under the Self-Government Statute the Judiciary becomes an independent department of State, and the Civil High Court the guardian of the Constitution. Civil Justice is administered by the Chief Justice and Judges of the High Court, who are also members of the Court of Appeal, and by subordinate District Judges.

The religious law of Islam is administered by the Mohammedan Law Courts in matters of inheritance, marriage, divorce and family relations generally amongst the Muslim population. There are District and Province Courts, and a High Court (*Mahkama*) at Khartoum presided over by the Grand Kadi.

Serious crimes are tried by Major Courts constituted under the Code of Criminal Procedure and composed of a President and two members. In the provinces in which circuits of the High Court exist, Major Courts are, as a rule, presided over by a Judge of the High Court. In the other three Provinces a senior Magistrate presides, usually a District Commissioner. Decisions of a Major Court require confirmation by the Chief Justice, to whom there is a right of appeal.

Education.—The education system which formerly fell into two spheres, North and South, is now in process of unification, under the control of a Sudanese Minister of Education. Arabic is being adopted as the national language, and the Government is taking an increasing part in education in the southern provinces, which has hitherto been largely in the hands of various Christian Missions. Higher education is represented by the University College of Khartoum (formerly Gordon Memorial College) controlled by an independent Board of Governors. In the North there are 3 boys' secondary schools with more than 1,500 pupils; one junior secondary school with a commercial bias and 140 pupils; 23 intermediate schools with nearly 3,000 pupils; and 226 elementary schools with nearly 38,000

pupils. At Bakht er Ruda in the Blue Nile Province, is the Institute of Education, where about 300 schoolmasters are in training and where the planning of elementary and intermediate education is carried out by staff of British and Sudanese experts. For girls there are a secondary school in Omdurman with 92 pupils, 5 intermediate schools with some 450 pupils and 121 elementary schools with over 14,000 pupils. There are 3 small teacher training colleges with a total of 182 woman students. In the North there are 140 non-government school of varying grades with about 14,000 boys and 3,000 girls in attendance. Upwards of 500 sub-grade schools (state-aided) and some 230 "Khalwas" (indigenous Koranic schools—also state-aided) provide a varying standard of education for nearly 55,000 pupils.

Four technical intermediate schools provide students for the nearly completed Technical Institute in Khartoum, which is divided into schools of engineering, building, crafts and commerce. In the southern provinces there are now one Government secondary school with 176 boys, 3 Mission and 5 Government intermediate schools, with 750 boys; and 57 boys' and 24 girls' elementary schools, with a total attendance of 6,370 boys and 2,030 girls. Three Mission technical schools are attended by 200 boys. Below the elementary level 335 village-schools cater for 15,536 children.

Production.—The principal grain crop is *dura* (great millet), the staple food of the people in the Sudan. Sesame and ground-nuts are other important food and export crops. Egyptian and American-type cottons are grown, the total value of the crop in 1952-53 being £27,000,000. The Sudan Gezira Scheme, irrigated from the Sennar Dam on the Blue Nile, provides most of the high-quality long staple cotton. The irrigation and cultivation of its 1,000,000 acres is carried on by a partnership of government, tenants and national management board who share taxes and profits.

Live stock are the mainstay of the nomadic Arab tribes of the plains and the negro tribes of the river and swamp country in the south. They include 4,785,000 cattle, 6,000,000 sheep, 5,000,000 goats, 1,175,000 camels, 500,000 asses and 20,000 horses.

Communications.—The railway system (3 ft. 6 in. gauge) has a route length of 2,058 miles (including 41 miles of a new extension south of Sennar), linking Khartoum with Wadi Halfa, Port Sudan, Wad Medani Sennar, El Obeld, Kassala and Gedaref. Regular rail and the Nile Steamer Services connect with the Egyptian State Railways to the North, and with the East African Railways and Steamers System to the South. Port Sudan is a well-equipped modern seaport. Sudan Airways run regular services from Khartoum to many parts of the Sudan.

FINANCE

	1951-1952
Revenue	£46,344,279
Expenditure	21,528,607

£ = Egyptian Pound of 100 Piastres.

Exchange Rate 97-50 Piastres = £1 sterling.

TRADE

	1951	1952
Total imports...	£41,966,091	£61,695,716
Exports	61,037,707	41,104,872
Imports from U.K.	14,610,632	20,993,385
Exports to U.K...	41,612,956	23,451,890

The principal export is cotton, the value of which, together with cotton-seed, amounted in 1952 to £E31,422,856. The chief imports are cotton and silk piece goods, iron and steel ware, machinery, tea, wheat flour, coffee, bags and sacks, petroleum products, motor vehicles, and tobacco.

GOVERNMENT

By virtue of the Condominium Agreement of 1899 between H.M. Government and the Egyptian Government, and Article 11 of the Anglo-Egyptian Treaty of 1936, the Sudan is administered by a Governor-General on the joint behalf of Great Britain and of Egypt.

On February 12, 1953, an Anglo-Egyptian Agreement guaranteed to the Sudanese the right to determine their own future and reserved the sovereignty of the Sudan until the day of self-determination for the Sudanese. The Legislative Assembly was dissolved on October 23, 1952, and elections supervised by an international Commission were expected to be held towards the end of 1953. In addition to providing for the Electoral Commission the Anglo-Egyptian Agreement resulted in the appointment of an international Governor-General's Commission, a Sudanisation Committee, and international supervision of arrangements for self-determination which, provided the Administration, Police and Sudan Defence Force are Sudanized, will take place after the election of Parliament. The latter will consist of an all-elected House of Representatives, a Senate, and a Council of Ministers.

Governor-General, His Excellency Sir Robert George Howe, C.B.E., K.C.M.G. (1946).

Private Sec., F. M. M. Forster.

CAPITAL, KHARTOUM. The town contains a large mosque for Moslems, an Anglican Cathedral, and the University College, with extensive Government buildings. Population 75,000. Omdurman has a population of 125,000.

THE NEW HEBRIDES

The New Hebrides Group, in the South Pacific Ocean, situated between the 13th and 21st degrees of South latitude and the 166th and 170th degrees of East longitude, of an area of roughly 5,700 square miles, is administered by a British-French Condominium Government.

The principal islands are Espiritu Santo, Malekula, Epi, Ambrym, Efate or Sandwich, Erromanga, Tanna, Ancityum, Lopevi, Maewo, and Pentecost. The executive consists of a British and a French Resident Commissioner assisted by a staff of officers. The population (Dec. 31, 1952) was 52,589 (Nationals, Ressortissants, and Protected Persons, British 478, French 3,611, Natives, estimated at 48,500). Principal products, copra, coffee, cocoa, wool, sandalwood and shell. The imports, principally from Australia (52 per cent.), were valued at £1,695,977 for 1952. Exports in 1952 were valued at £1,335,884, over 92 per cent. of which went to France; copra accounted for 80 per cent. of total exports. Joint revenue, 1952, £320,000 (revised estimate); expenditure, £366,000 (revised estimate).

Attached to the New Hebrides are the Banks (309 sq. miles, pop. 2,300) and Torres (40 sq. miles, pop. 150) Islands.

Seat of New Hebrides Administration—Ψ Vila, pop. about 1,500.

British High Commissioner, R. C. Stanley, C.M.G., O.B.E.

French High Commissioner, M. Angamarre.

British Resident Commissioner, H. J. M. Flaxman.

French Resident Commissioner, M. P. Anthonioz.

IRELAND

See also Northern Ireland, pp. 687-690; Republic of Ireland, pp. 826-829.

Position and Extent.—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,408 sq. miles and its geographical position between $51^{\circ} 26'$ and $55^{\circ} 21'$ N. latitude and from $5^{\circ} 25'$ to $10^{\circ} 30'$ W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Annagh Head), is 174 miles. On the N. coast of *Achill Island* (Co. Mayo) are the highest cliffs in the British Islands, 2,000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the *Central Plain*, with an elevation of 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coastline. The principal mountains, with their highest points, are the *Sperrin Mountains* (Sawel 2,240 ft.) of County Tyrone; the *Mountains of Mourne* (Slieve Donard 2,796 ft.) of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,039 ft.); the *Derryveagh Mountains* (Errigal 2,466 ft.) of County Donegal; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway; *Macgillicuddy's Reeks* (Carratuohill 3,414 ft., the highest point in Ireland); and the *Galtee Mountains* (3,018 ft.) of County Tipperary, and the *Knockmealdown* (2,609 ft.) and *Comeragh Mountains* (2,470 ft.) of County Waterford. The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Harbour, and the *Suir*, *Barrow* and *Nore*, to Waterford Harbour. As in Scotland, the principal hydrographic feature is the *Loughs*, of which Lough Neagh (150 sq. miles) in the north-east is the largest in Ireland and the British Isles, others being the Shannon Chain of *Allen*, *Boderg*, *Forbes*, *Ree* and *Derg*, and the Erne Chain of *Gowna*, *Oughter*, *Lower Erne*, and *Erne*; *Melvin*, *Gill*, *Gara* and *Conn* in the north-west; and *Corrib* and *Mask* (joined by a hidden channel) in the west. In County Kerry, to the east of Macgillicuddy's Reeks, are the famous *Lakes of Killarney*. The climate of Ireland is more equable than that of Great Britain, the extreme range of temperature readings being from 2° F. to 90° F. (compared with -17° F. to 100° F. over Great Britain). The average annual rainfall varies from 27 inches at Dublin to more than 100 inches in the mountains of Connemara. The rainfall is also more uniform from year to year than in Great Britain.

Primitive Man.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island; a grave containing a polished stone axehead assigned to 2,500 B.C. was found at Linkardstown, Co. Carlow, in 1944, and the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Goidels* appear to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scoti*, who afterwards established themselves in Scotland.

History.—According to Irish legends, the island of Ierne was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C. The supremacy of the *Ardrí* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Orlel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn McCool (Fingal) to connect Antrim with Scotland (Staffa).

Hibernia was visited by Roman merchants but never by Roman legions, and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as *Findgaill* (White Strangers) and the Danes as *Dubgaill* (Black Strangers), names which survive in "Fingall," "MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (Ulaid-tír, Laigin-tír, Mumans-tír and Kunnak-tír). The outstanding events in the encounters with the Northmen are the *Battle of Tara* (980), at which the Hy Neill

king Maelsechlainn II. defeated the Scandinavians of Dublin and the Hebrides under their king Amlaib Cuarán; and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Brians of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermot MacMurrough (Diarmait MacMurchada), the deposed king of Leinster, sought assistance in his struggle with Ruaidhri O'Connor (the high king of Ireland), and visited Henry II., the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom, and Dermot enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow*, who landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermot's daughter. In 1172 (Oct. 18) Henry II. himself landed in Ireland. He received homage from the Irish kings and established his capital at Dublin. The invaders subsequently conquered most of the island and a feudal government was created. In the 14th and 15th centuries, the Irish recovered most of their lands, while many Anglo-Irish lords became virtually independent, royal authority being confined to the "Pale," a small district round Dublin. Though under Henry VII, Sir Edward Poyning, as Lord Deputy had passed at the *Parliament of Drogheda* (1494) the act later known as *Poyning's Law*, subordinating the Irish Legislature to the Crown, the Earls of Kildare retained effective power until, in 1534, Henry VIII began the reconquest of Ireland. Parliament in 1541 recognized him as King of Ireland and by 1603 English authority was supreme.

Christianity.—Christianity did not become general until the advent of St. Patrick. St. Patrick was born in Britain about 389, and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organize the Christian religion throughout the island.

* Provisional.

GOVERNMENT

The Constitution.—The Constitution of Ireland, approved by a plebiscite on July 1, 1937, came into operation on December 29, 1937.

On December 21, 1948, the *Republic of Ireland Act* was enacted, repealing the *External Relations Act*, by which Eire acknowledged some British control in external affairs. The *Republic of Ireland Act* came into force on April 18, 1949.

The Constitution declares that Ireland is a sovereign independent democratic State and affirms the right of the Irish Nation to choose its own form of Government, to determine its relations with other nations, and to develop its life, political, economic and cultural, in accordance with its own genius and traditions. The national territory is declared to be the whole island of Ireland, its islands and the territorial seas. Pending the re-integration of the national territory, and without prejudice to the right of the Parliament and the Government established by the Constitution to exercise jurisdiction over the whole of the national territory, the laws enacted by that Parliament shall have the like area and extent of application as those of the Irish Free State, which did not include the six counties of Northern Ireland. The national flag is the tricolour of green, white and orange. The Irish language, being the national language, is the first official language. The English language is recognized as a second official language.

The President.—The President of Ireland—*Uachtarán na h-Éireann*—is elected by direct vote of the people for a period of seven years. A former or retiring President is eligible for a second term. The President summons and dissolves *Dáil Éireann* on the advice of the *Taoiseach* (Head of the Government). He signs and promulgates laws. The supreme command of the Defence Forces is vested in him, its exercise being regulated by law. He has the power of pardon. The President, in the exercise of certain of his constitutional powers and functions, is aided and advised by a Council of State.

The Legislature.—The Parliament—*Oireachtas*—consists of the President and two Houses: a House of Representatives—*Dáil Éireann*—and a Senate—*Seanad Éireann*.

Dáil Éireann is composed of 147 members elected by adult suffrage on a basis of proportional representation.

THE PRESIDENT

Uachtarán na h-Éireann (President of Ireland), elected June 25, 1945, re-elected June 25, 1952, Seán T. Ó. Cellaigh (Seán T. O'Kelly).

Secretary to the President: Micheál Mac Donnchadha (Michael McDunphy).

Members of the Government	
<i>Taoiseach (Head of the Government), Éamon de Valera</i>	£3,000
<i>Tánaiste and Minister for Industry and Commerce, Seán F. Lemass</i>	2,125
<i>Minister for Education, Seán Ó Maoláin (Seán Moylan)</i>	2,125
<i>Minister for External Affairs, Proinsias Mac Aogáin (Frank Aiken)</i>	2,125
<i>Minister for Lands, Tomás Ó Deirg (Thomas Derrig)</i>	2,125
<i>Minister for Posts and Telegraphs, Erskine H. Childers</i>	2,125
<i>Minister for Agriculture, Tomás Breathnach (Thomas Walsh)</i>	2,125
<i>Minister for Finance, Seán Mac an tSaoi (Seán MacEntee)</i>	2,125
<i>Minister for Justice, Gearóid Ó Beoláin (Gerald Boland)</i>	2,125

Seanad Éireann is composed of 60 members, of whom 11 are nominated by the *Taoiseach* and 49 are elected; three by the National University of Ireland, three by the University of Dublin, and 43 from panels of candidates, established on a vocational basis.

The Executive.—The executive authority is exercised by the Government subject to the Constitution. The Government is responsible to *Dáil Éireann*, meets and acts as a collective authority, and is collectively responsible for the Departments of State administered by the Ministers.

The *Taoiseach* is appointed by the President on the nomination of *Dáil Éireann*. The other members of the Government are appointed by the President on the nomination of the *Taoiseach* with the previous approval of *Dáil Éireann*. The *Taoiseach* appoints a member of the Government to be the *Tánaiste* who acts for all purposes in the place of the *Taoiseach* in the event of the death, permanent incapacitation, or temporary absence of the *Taoiseach*. The *Taoiseach*, the *Tánaiste* and the Minister for Finance must be members of *Dáil Éireann*. The other members of the Government must be members of *Dáil Éireann* or *Seanad Éireann*, but not more than two may be members of *Seanad Éireann*.

CAPITAL

Dublin (*Baile Átha Cliath*) is a City and County Borough on the River Liffey at the head of Dublin Bay. In April, 1951, its population was 522,183. There are many notable public buildings in the City, among them the two Cathedrals of Christ Church and St. Patrick, the Bank of Ireland (formerly the House of Parliament) and Trinity College (the only constituent College of the University of Dublin). University College is a constituent college of the National University of Ireland. A large export trade of agricultural products passes through the city and there is a considerable brewing industry, while there is an increasing amount of light manufacturing.

Other cities and towns are Cork (pop. 74,567), Dún Laoghaire, formerly Kingstown (47,920), Limerick (50,820), Waterford (28,691), Galway (21,316), Dundalk (19,678), Drogheda (16,779), Sligo (13,529), Wexford (11,979), Bray (12,062), Kilkenny (10,572), Tralee (11,045), Clonmel (10,471) and Athlone (9,015).

THE LEGISLATURE

The Legislature (*Oireachtas*) consists of the President and two Houses—a House of Representatives (*Dáil Éireann*) and a Senate (*Seanad Éireann*). *Dáil Éireann* is composed of 147 Members, elected on the system of Proportional Representation by means of the single transferable vote. All citizens who have reached the age of 21 years and are not disqualified by law have the right to vote. The same *Dáil* does not continue for a longer period than seven years, but a shorter period of five years has been fixed by existing legislation. The present

<i>Minister for Defence, Oscar Mac Thréinfhír (Oscar Traynor)</i>	£2,125
<i>Minister for Health and for Social Welfare, An Dr. Séamus Ó Riain (Dr. James Ryan)</i> ..	2,125
<i>Minister for Local Government, Pádraig Mac Gabhann (Patrick Smith)</i>	2,125

(14th) Dáil was elected on May 30, 1952, and met on June 13, 1952.

*** Members of Dáil Éireann, other than Ministers and Parliamentary Secretaries, are allowed £5a (and members of Seanad Éireann £39) a month towards expenses, together with free travelling facilities between Dublin and their constituencies.

Parliamentary Secretaries.

Parliamentary Secretary to the Government and to the Minister for Lands, Seán Ó. Loingsigh (John Lynch).

Do, to the Taoiseach and to the Minister for Defence, Donnchadh Ó Briain.

Do, to Minister for Finance, Pádraig Ó Beacháin (Patrick Beegan).

Do, to Minister for Social Welfare, Micheál Seosamh O Cinnéide (Michael Joseph Kennedy).

Do, to Minister for Agriculture, Gearóid Mac Pharthaláin (Gerald Bartley).

Attorney-General, Thomas Teevan.

Secretary to the Government, Muiris Ó Muimhneacháin (Maurice Moynihan).

Assistant Secretary to the Government, Nioclás Ó Nualláin, Ph.D. (Nicholas Nolan, Ph.D.).

United Kingdom Ambassador to the Republic of Ireland

H. E. Sir Walter Crossfield Hankinson. K.C.M.G., O.B.E., M.C., 39 Merrion Square, Dublin.

Counsellor, G. W. St. J. Chadwick.

First Secretary, E. G. Le Tocq.

Military Attaché, Lt.-Col. A. D. J. Stewart.

Trade Commissioner, E. S. A. Baynes, O.B.E.

Head of Visa Section, F. C. Savage, O.B.E.

Diplomatic Representatives Abroad

The Holy See: J. P. Walshe (Ambassador).

Argentina: M. Murphy (Chargé d'Affaires).

Australia: T. J. Kiernan (Ambassador).

Austria: W. Warnock (Minister).

Belgium: C. J. O'Donovan (Minister).

Canada: Seán Murphy (Ambassador).

France: C. C. Cremin (Ambassador).

Federal Republic of Germany: J. A. Belton (Minister).

Great Britain: Frederick H. Boland (Ambassador), 17 Grosvenor Place, London, S.W.1.

Italy: D. A. Devlin (Minister).

Netherlands: Mrs. J. MacNeill (Minister).

Norway: B. Gallagher (Minister).

Portugal: Count G. O'Kelly de Gallagh (Chargé d'Affaires).

Spain: L. T. McCauley (Ambassador).

Sweden: B. Gallagher (Minister).

Switzerland: W. Warnock (Minister).

Turkey: D. A. Devlin (Minister).

U.S.A.: J. J. Hearne (Ambassador).

THE JUDICIARY

The Judiciary consists of Courts of First Instance and a Court of Final Appeal called the Supreme Court—*Cúirt Uachtarach*. The Courts of First

Instance include a High Court—*Ard-Chúirt*—invested with full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction, with a right of appeal as determined by law. The High Court alone has original jurisdiction to entertain the question of the validity of any law having regard to the provisions of the Constitution. The Supreme Court has appellate jurisdiction from all decisions of the High Court, subject to exceptions and regulations prescribed by law. No law may, however, be enacted excepting the question of the validity of any law from the appellate jurisdiction of the Supreme Court.

Chief Justice, Hon. Conor Maguire. £4,600

President of the High Court, Hon. Cahir Davitt. 3,450

Judges, Supreme Court, Hon. J. O'Byrne; Hon. Cecil Lavery; Hon. T. C. Kingsmill Moore; Hon. C. O'Daly. each 3,450

Judges, High Court, Hon. Martin Maquire; Hon. Kevin Haugh; Hon. Kevin J. Dixon; Hon. F. G. O. Budd; Hon. R. McLoughlin; Hon. W. G. Shannon (ex officio). each 3,000

Master of High Court, John O. Leary, S.C.

DEFENCE

The Supreme Command of the Defence Forces—the exercise of which is regulated by law—is vested in the President. The Minister for Defence is assisted in his control of the Defence Forces by a Council of Defence consisting of the Minister, his Parliamentary Secretary, the Chief of Staff, the Adjutant General and the Quartermaster General, with the Permanent Secretary of the Department of Defence as Secretary. Establishments provide at present for a permanent force of approximately 13,000 all ranks, including the Air Corps and the Naval Service. The Defence Estimates for the year ending March 31, 1954, provide for approximately 23,500 all ranks First and Second-Line Reserves. The First-Line Reserve is composed of personnel who have already been trained in the Permanent Force and who normally perform training annually. The Second-Line Reserve is a territorial force. Recruitment is on a voluntary basis. Minimum service for the Army is two years Permanent and six years with the Reserve. Suitable men may complete twenty-one years Permanent service. For the Naval Service, enlistment is for six years Permanent service and six years with the Reserve. The Naval Service comprises three Corvettes and auxiliary vessels. The Defence Estimates for the year ending March 31, 1954, provide for an expenditure of £7,884,920.

FINANCE

	1952-53 (Actual)	1953-54 (Estimated)
Revenue	£95,918,810	£101,172,000
Expenditure	107,073,650	116,228,000

The expenditure figures include certain services of a capital nature regarded as proper to be met from borrowing. Issues for these services in 1952-53 amounted to £8,607,480 and for 1953-54 are estimated at £14,181,000. The figure for 1952-53 includes £499,712 for the purchase of shares of the Industrial Credit Co., while that for 1953-54 includes £900,000 for the purchase of defensive equipment.

The estimated Revenue for 1953-54 includes: Customs, £35,655,000; Excise, £16,630,000; Estate, etc., Duties, £2,710,000; Income Tax and

Super-tax, £22,450,000; Corporation Profits Tax, etc., £2,775,000; Motor Vehicle Duties, £4,350,000; Stamp Duties, £1,650,000; Post Office Services, £6,330,000.

The principal items of estimated *Expenditure* for 1953-54 are Debt Service, £11,961,000; Agriculture, land division, etc., £13,013,000; Food subsidies, £5,386,000; Army, £7,885,000; Police, £3,479,000; Education, £10,363,000; Social Insurance, £1,974,000; Social Assistance, £17,931,000; Postal Services, £6,484,000; Superannuation, £3,753,000.

The *Gross Debt* on March 31, 1953, was £244,000,000 with *Assets* £148,000,000, leaving the *net* total of the debt at £96,000,000.

RELIGION

(Census of 1946)

Catholics.....	2,786,033
Protestant Episcopalians.....	124,829
Presbyterians.....	23,870
Methodists.....	8,355
Others.....	12,020
Total.....	2,955,107

EDUCATION

Primary Education is directed by the State (4,876 schools with an enrolment of 476,051, and average daily attendance 85.3 per cent.). Secondary Education is in private hands and is largely conducted by Religious Orders (441 recognized schools with 52,151 pupils 12-20 years of age). Vocational (Continuation and Technical) Education is conducted by 38 local Committees in 220 permanent schools (including 15 residential schools of domestic training and one day trades preparatory school) and several temporary centres (20,080 whole-time day students and 68,795 other students). There are two Universities in Dublin, of which the National University has 3 constituent colleges (Cork, Galway and Dublin) with 404 Professors, etc., and 4,666 students; and Trinity College, Dublin with 181 Professors, etc., and 2,128 students in the academic year 1951-52. The estimated State expenditure on education in 1952-53, excluding administration and inspection, was Primary £7,333,160; Secondary £1,268,970; Vocational £851,900; Science and Art £163,190.

PRODUCTION AND INDUSTRY

Agriculture and Live Stock.—In 1952 there were 1,096,345 acres under corn crops, 600,770 under root and green crops, 11,062 under flax, 11,847 under fruit, and 1,931,926 under hay, a total of 3,651,940 acres. The principal produce in 1952 was: oats, 577,500 tons; wheat, 262,100 tons; barley, 249,000 tons; turnips, 1,987,700 tons; potatoes, 2,676,200 tons; mangolds, 1,230,500 tons; sugar beet, 570,100 tons; and hay, 4,522,900 tons. The *Live Stock* included 4,309,007 cattle, 2,856,791 sheep, 719,412 pigs, 341,701 horses.

Minerals.—1,402 persons were employed in the coal mines in 1951 and 166,682 tons of coal won.

Sea Fisheries.—9,684 persons were employed in the fisheries in 1952, the total value of all fish excluding salmon landed being £602,970.

COMMUNICATIONS

Railways.—There were (1951) 2,440 miles of railway of which 2,154 miles are of standard (5 ft. 3 in.) gauge. 18,058,000 passengers and 3,495,000 tons of merchandise were conveyed. The gross receipts were £15,874,966 and the net loss £2,051,194.

2 D*

These figures include receipts from Road Transport Services, Canals, etc., operated by the Railway Companies.

Road Motor Services.—In 1951 road motor vehicles carried 296,000,000 passengers, the gross receipts being approximately £4,448,000.

Shipping.—In 1951 the number of ships with cargoes and in ballast entered at the various ports, Dublin, Cobh (Queenstown), Dún Laoghaire (Kingstown), Cork, Galway, Waterford, Roslure, Limerick and Foynes, Dundalk, etc., was 8,671 of 8,578,267 tons, of which 1,328 (1,112,374 tons) were Republic of Ireland flag, and 5,702 (5,001,260 tons) British.

CIVIL AVIATION

Shannon Airport, 15 miles W. of Limerick, on the main transatlantic air route, caters for traffic to and from the U.S.A., Canada, Gt. Britain and the Continent. A service to and from Dublin is operated daily. In 1952 the transatlantic companies operating through the airport carried 229,164 passengers and 15,318,235 lb. of cargo.

Dublin Airport, situated at Collinstown, 6 miles N. of Dublin, serves the cross-Channel and European services operated by *Aer Lingus Teoranta* and continental airlines. During 1952 the airport handled 300,582 passengers and 11,187,785 lb. of cargo.

The following private aerodromes are also licensed: Weston Airport, 9 miles W. of Dublin; Dunmore East, 10 miles S.E. of Waterford; Coonagh, 2 miles W. of Limerick; Oranmore, 5 miles E. of Galway; Killarney Racecourse, 1 mile S.W. of Killarney; Rosapenna Strand, 25 miles N. of Letterkenny; Farmers' Cross, 4 miles S.W. of Cork.

OVERSEAS TRADE

Year	Imports	Exports	Trade Balance

IMMIGRATION AND EMIGRATION

From 1820 to 1952, 39,796,719 alien immigrants were admitted to the United States. Of the inward total in 1952, 21,427 were born in the British Isles; 56,259 in Germany and Austria; 5,394 in Scandinavia; 9,306 in Italy; 33,211 in Poland; and 3,454 in France. The total number of alien immigrants admitted in the year ending June 30, 1952, was 265,520. During the same period 21,880 residents left the United States for permanent residence abroad.

MARRIAGE AND DIVORCE

Laws of marriage and of divorce are within the exclusive jurisdiction of each State. Each State legislature enacts its own laws prescribing rules and qualifications pertaining to marriage and its dissolution.

Year	Marriages	Per 1,000 Pop.	Estimated Divorces	Per 1,000 Pop.
1941	1,696,000	12.7	293,000	2.2
1942	1,772,000	13.2	321,000	2.4
1943	1,577,000	11.8	359,000	2.6
1944	1,452,000	11.0	400,000	2.9
1945	1,613,000	12.2	485,000	3.5
1946	2,291,000	16.4	610,000	4.3

The total number, including countries not specified, was 10,161,168 in 1950 compared with 11,419,138 in 1940. 1950 figures include a total of 180,024 from all Asian countries, 120,297 from countries in America other than Canada and Mexico and 86,375 from European countries not listed above.

PHYSIOGRAPHY

The Republic occupies nearly all that portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25°-49° North and longitude 67°-124° 30' West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line has an estimated length of about 3,561 miles on the Atlantic, 1,872 miles on the Pacific, 2,908 miles on the Gulf of Mexico, and 2,470 miles on the Great Lakes. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 1,700 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Platte, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Alabama and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follow:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high tableland, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Appalachian Highlands, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live oak, water-oak, magnolia, palmetto, tulip-tree, cypress, etc., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The Mississippi valley is eminently fertile. The mineral kingdom produces much ore of iron, copper, lead, zinc, and aluminium, the non-metallic minerals include immense quantities of coal, anthracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals include gold and silver, mined chiefly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver). The highest point is Mount Whitney at 14,495 feet above sea-level, and the lowest point of dry land is in Death Valley, 280 feet below sea-level; these two points are in California, only 86 miles apart. The mean elevation of the 48 States is approximately 2,500 feet.

GOVERNMENT

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organization as Territories, and 28 were admitted after such organization), and of 2 organized Territories.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to twenty-second Feb. 7, 1795, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, Aug. 26, 1920, Feb. 6, 1933, Dec. 5, 1933 and May 1, 1951), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE

THE Executive power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet in their respective States on the first Monday after the second Wednesday in December following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the sixth day of January by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the highest on the list (not exceeding three) the House of Representatives elects a President, the votes being taken by States, the representation

from each State having one vote. There is also a Vice President, who, on the death of the President, becomes *ex officio* President for the remainder of the term. Under the XXth Amendment to the Constitution the terms of the President and Vice President end at noon on the 20th day of January of the years in which such terms would have ended if the Amendment had not been ratified, and the terms of their successors then begin. In case of the removal or death of both President and Vice President, a statute provides for the succession.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of \$100,000 with a taxable expense allowance of \$50,000 and a non-taxable travelling allowance of not exceeding \$40,000. Under the XXIInd Amendment to the Constitution, the tenure of the Presidency is limited to two terms. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and has power, "by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur." The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT

President of the United States (January 20, 1953, to January 20, 1957), DWIGHT D. EISENHOWER, of New York City, New York, born Oct. 14, 1890, sworn in as President (in succession to Harry S. Truman) Jan. 20, 1953. Republican.

Vice-President, Richard Milhous Nixon, of California, born Jan. 9, 1913, elected Nov. 4, 1952. Republican.

THE CABINET

(Each \$22,500).

Secretary of State, John Foster Dulles, of New York (born Feb. 25, 1888), appointed Jan. 21, 1953.

Secretary of the Treasury, George M. Humphrey, of Ohio (born Mar. 8, 1890), appointed Jan. 21, 1953.

Secretary of Defence, Charles E. Wilson, of Michigan (born July 18, 1890), appointed Jan. 28, 1953.

Attorney-General, Herbert Brownell, Jr., of New York (born Feb. 20, 1904), appointed Jan. 21, 1953.

Postmaster-General, Arthur E. Summerfield, of Michigan (born Mar. 17, 1899), appointed Jan. 21, 1953.

Secretary of the Interior, Douglas McKay of Oregon (born June 24, 1893), appointed Jan. 21, 1953.

Secretary of Agriculture, Ezra T. Benson, of Utah (born Aug. 4, 1899), appointed Jan. 21, 1953.

Secretary of Commerce, Sinclair Weeks, of Massachusetts (born June 15, 1893), appointed Jan. 21, 1953.

Secretary of Labour (vacant).

Secretary of Health, Education and Welfare, Mrs. Oveta Culp Hobby, of Texas (born Jan. 19, 1905), appointed April 11, 1953.

THE CONGRESS

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a veto power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 301,164. The Senate consists of 96 members. The salary of a Senator is \$12,500 per annum, with mileage at 20 cents per mile each session. The House of Representatives consists of 435 Representatives besides a delegate from Alaska, a delegate from Hawaii, and a resident commissioner from Puerto Rico. The salary of a Representative is \$12,500 per annum with mileage as for Senators. By the XIXth Amendment, sex is no disqualification for the franchise. On July 1, 1950, there were 47,860,228 men and 49,556,137 women of voting age, excluding members of the armed forces overseas.

THE EIGHTY-THIRD CONGRESS.

Noon of Jan. 3, 1953, to Noon of Jan. 3, 1955.
 President of the Senate, Richard M. Nixon,
 Rep., Calif. \$30,000
 Speaker of the House of Representatives
 Joseph W. Martin, Jr., Rep., Mass. . . . \$30,000
 Secretary of the Senate, J. Mark Trice, Rep.,
 Md.

Clerk of the House of Representatives, Lyle O. Snader, Rep., Ill.

Members of the 83rd Congress were elected on Nov. 4, 1952.

The 83rd Congress is constituted as follows:

Senate.—Republicans 48, Democrats 47, Independent 1. Total 96.

House of Representatives.—Republicans 221, Democrats 210, Independent 1, vacancies 3. Total 435.

LIBRARY OF CONGRESS

(National Library),

Capitol Hill, Washington, D.C.

The Library of Congress was established in 1800 and destroyed by fire in 1814. In 1815, Congress purchased Thomas Jefferson's library of 6,487 volumes as the basis for a new collection, which was partially destroyed by fire in 1851. Since that date increased (1) by regular annual appropriations by Congress; (2) by deposits under the copyright law; (3) by gifts and exchanges. The collection is the largest in the Western Hemisphere and one of the largest in the world. Exclusive of 2,172,000 unbound newspapers and parts of serials awaiting binding, its collections contained, on June 30, 1952, nearly 31,000,000 items. These included about 9,500,000 volumes and pamphlets; 140,500 bound newspaper volumes; 13,000,000 manuscripts; 2,100,000 maps and views; 4,000 microcards; 90,000 reels and strips of microfilm; 98,000 reels of motion pictures; 2,000,000 volumes and pieces of music; 387,000 phonograph records;

2,225,000 photographic negatives, prints and slides; 580,500 fine prints, 23,000 microprint cards, and more than 705,000 broadsides, photostats, posters and miscellaneous items. The main building was first occupied in 1897. Considerable additions, including an Annex completed in 1939, have brought the total cost to approximately \$18,880,000 and the floor space to 1,563,289 square feet (nearly 36 acres), with more than 250 miles of shelving. During the fiscal year 1952, \$12,627,860 was available for use by the Library. Of this sum \$9,259,860 was appropriated directly by Congress; \$2,135,763 was transferred from other Government agencies; \$855,508 was derived from gifts; and \$399,046 was carried over from previous years. During the fiscal year 1952, the Library registered copyright claims for 203,705 works and took in \$803,168 in copyright fees. It also received more than \$869,000 in payment for nearly 21,000,000 catalogue cards sold to more than 9,000 subscribers. These funds are transferred to the U.S. Treasury. As the national library, the Library of Congress serves other Government agencies, other libraries throughout the world, scholars, and the general public as well as the Congress. In addition to providing reference service on the materials in its collections and publishing catalogues and other guides, the Library administers a national programme to provide books for the blind, sponsors music concerts, literary readings and other cultural affairs, and participates in international professional and cultural activities.

Librarian of Congress (vacant).

Librarian of Congress Emeritus, Herbert Putnam.

Chief Assistant Librarian, Verner W. Clapp.

Assistant Librarian, Solon J. Buck.

Deputy Chief Assistant Librarian, Lucile M. Morsch.

Assistant Librarian for the American Collections, David C. Mearns.

Director, Administrative Department, Frederick H. Wagman.

Director, Legislative Reference Department, Ernest S. Griffith.

Director, Processing Department, John H. Cronin.

Director, Reference Department, Burton W. Adkinson.

Law Librarian, W. Lawrence Keitt.

Register of Copyrights, Arthur Fisher.

Director, A. G. Wenley.

Assistant Director, John A. Pope.

National Zoological Park

Director, William M. Mann.

Asst. Director, E. P. Walker.

NATIONAL COMMISSION OF FINE ARTS

Interior Dept. Building, Washington, D.C.

The Commission of Fine Arts was created by Congress May 17, 1920, to advise generally upon the location, selection, and erection of statues, fountains, and monuments in the District of Columbia, and also to advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress. Under this latter provision its functions have been enlarged by Executive Order to cover all works of Art with which the Federal Government is concerned, including designs of public buildings and public parks, within the D.C. An expenditure not exceeding \$10,000 in any one year is authorized by Congress for travelling and other expenses. The members serve without remuneration.

Chairman, David E. Finley.

Members, Joseph Hudnut; Edward F. Neild, Sr.;

Felix W. de Weldon; Pietro Belluschi; Elbert

Peets; George Biddle.

Secretary and Administrative Officer, H. P. Caemmerer.

THE JUDICATURE

The Federal Judiciary consists of three sets of Federal Courts: (1) The Supreme Court at Washington, D.C., consisting of a Chief Justice and eight Associate Justices, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts and from the decisions of the highest Courts of the States. (2) The United States Courts of Appeals, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District judges within the circuit. (3) The 93 District Courts, served by 199 District Court Judges.

THE SUPREME COURT

STATE AND LOCAL GOVERNMENT

State Government

Each State has a constitution drafted to suit its own problems. States vary greatly in size, population and character but there are no important variations in the form of government organization. Like the National Government, State governments have three branches, legislative, executive and judicial.

State Legislatures.—With one exception, State legislatures consist of two Houses, a Senate and a House of Representatives; Nebraska has a single legislative body. The basis of representation in both Senate and House is the county, counties being combined or divided into districts which return one Senator and one or more Representatives. With a few variations, Senators serve for four and Representatives for two years. Generally the two houses meet in the State capital for a legislative session every two years; in a few States they meet annually; the legislature of Alabama meets only once in every four years.

Most of the business of the State legislature is carried on by committees. A bill, introduced either in the Senate or the House of Representatives, is first considered by a committee of the same house. Public hearings are usually held by committees at which representations may be made by opponents and supporters of the measure. If the committee approves the bill it makes a report to the house, when the bill may be further debated before a vote is taken. When passed by one house it is sent to the other where treatment is much the same. A bill which has been changed by the second house is sent to a "conference committee" of both houses for adjustment and if this is successful the bill is voted on favourably by both houses and sent to the governor for signature when it becomes law. Failing a report by the committee, a bill is not considered by the legislature unless a majority of the house votes for consideration without a committee report. In every State except North Carolina the governor may veto a bill and, ordinarily, prevent it from becoming law. The legislators have a right to vote again on a bill to decide whether it shall become law without the governor's approval; in some cases a two-thirds majority is required.

State Executives.—The chief executive of the State is the governor, who is elected by popular vote for a two year or, in about half the States, a four year term. His powers are outlined in the State constitution. The governor may advise the legislature on new laws which he considers necessary and may call special sessions of the legislature to consider such laws. He appoints members of many boards and commissions, subject in some cases to Senate approval. He is head of the National Guard of his state and may use it to keep order if need arises. The governor may pardon persons convicted of crimes by the state courts or reduce sentences. Elected with the governor is a lieutenant governor whose regular duty it is to preside over the Senate and who succeeds if the governor dies or is removed from office.

Other important officers of the executive are the Secretary of State, whose duties concern the official records of the State, publication of the State laws and elections; the attorney-general, chief law officer of the State; the State auditor or comptroller and the State treasurer. There are also many departments and commissions such as labour boards, boards of health, banking commissions and highway commissions. In some States the governor has a considerable control over the work of the other State officials and in others little or none. A civil

service system, intended to put much of the work of government offices into the hands of qualified workers not subject to political control and change, has been adopted by some States.

State Courts.—The simplest form of state court is usually presided over by a justice of the peace and hears minor civil and criminal cases. In large cities this work is done by police courts or special municipal courts. More important cases are dealt with in district courts, superior courts, circuit courts or common pleas courts, all dealing usually with both civil and criminal matters. Supreme courts of States deal largely with appeals and references from lower courts. Some States have a large number of special courts such as probate, children's, domestic relations and small debts courts. Judges, usually elected (but in some States appointed by the Governor or by the State legislature) preside over all trials. Many of the court practices in the United States have come from the English courts.

Local Government

Cities.—There is a number of different forms of government organization. Usually there is an elected central council with a mayor or manager to act as head of the organization. The three main forms of city government are (1) *The mayor-council plan.* The oldest type of city government, this compares with National and State organizations. The mayor is elected and usually appoints the heads of departments and many other officers, sometimes subject to the council's confirmation. He may sign or veto city ordinances and in general is responsible for putting them into effect. The mayor may also be required to produce a budget. The council passes the city laws which must not violate the city charter or conflict with State or National laws or constitutions. (2) *The commission form of government.* Three or more commissioners are elected from the city as a whole, rather than from districts or wards, and are given both law-making and law-enforcing powers. One of the commissioners is chairman and is usually called the mayor although his powers may be no greater than those of the other commissioners. Each commissioner supervises the work of one or more of the departments and is responsible for them. (3) *The City-Manager plan.* A small elected council makes city ordinances and decides general policy. It appoints a professional administrator as city-manager. The city manager appoints the heads of departments and some of the other officers; he advises the council on the needs of the city, suggests plans for finance and city improvements and enforces city ordinances. In most cases he holds office as long as the council is satisfied with his work.

County and other Local Governments.—The county, a subdivision of the State usually containing two or more townships and a number of villages, is administered by a board of commissioners or supervisors elected by the voters of the entire county. In recent years a number of counties have appointed County Managers to be responsible to a small board for the county government as a whole. In many townships, officials such as justices of the peace, constables and road supervisors are elected. The voters of some New England townships meet once a year and make their own laws on purely local matters, fix rates, decide how the money is to be spent and elect officials. Village or town government is usually in the hands of a council of elected members and some villages elect a president or mayor and employ local officials.

DEFENCE

Department of Defence.

Secretary of Defence (in the Cabinet), Charles E. Wilson (Jan. 26, 1953).

Secretary of the Army (not in the Cabinet), Robert Ten Broeck Stevens.

Secretary of the Navy (not in the Cabinet), Robert B. Anderson.

Secretary of the Air Force (not in the Cabinet) Harold E. Talbott.

Army.—The Army of U.S. had a strength of 8,291,336 on V.E. Day, reduced by June 30, 1950, to 591,700 (excluding Air Corps).

Navy.—The peak strength of the Navy (including Marine Corps) in the summer of 1945 was 3,855,497. The strength at June 30, 1950, was 454,800.

Air.—The U.S. Air Force was formerly the Army Air Corps and directly under command of the War Department. In 1947 an independent Department of the Air Force was established under a Secretary of the Air Force. The Navy and Marine Corps retained separate air organizations. Strength of the Air Force (June 30, 1950), 412,000.

SHIPS OF U.S. NAVY

	1940	1945 Aug. 31	1952 July
Battleships.....	15	23	4
Fleet Aircraft Carriers.....	4	28	12
Escort Carriers.....	8	71	15

Light Cruisers.....	19	48	3
Destroyers and Destroyer- type craft.....	220	737	244
Submarines.....	94	234	100

The cruisers *Newport News*, *Salem*, and *Des Moines* are the largest, fastest and most powerful cruisers afloat.

LOSSES IN WAR OF 1941-45

Army and Air Corps.....	237,049
Navy.....	36,488
Marine Corps.....	19,568
Coast Guard.....	1,917
	295,022

These figures include those killed in action or died of wounds and those who died as prisoners.

CAPITAL OF THE U.S.

In 1790 Congress ratified the cession of 100 sq. miles by the States of Maryland and Virginia as a site for a Federal City to be the national capital of the United States. In 1791 it was decided to name the capital *Washington* and in 1793 the foundation-stone of the Capitol building was laid. In 1800 the seat of government was removed to Washington, which was chartered as a city in 1802. In 1846 the Virginia portion was retroceded and the present area of the *District of Columbia* (with which the City of Washington is co-extensive) is 69.245 square miles, with a population at the Census of 1950 of 802,178.

The District of Columbia is ruled directly by the President and Congress through a Board of Commissioners appointed by the President, one being chosen from the Engineer Corps of the United States Army and two from civil life.

The *City of Washington*, the Capital of the United States, is co-extensive with the District of Columbia. It is situated on the west central edge of Maryland, opposite the State of Virginia, on the left bank of the Potomac at its confluence with the Anacostia, 107 miles from Chesapeake Bay and 186 from the Atlantic Ocean.

EDUCATION

Educational Attainment of the Population

Persons 14 years old and over in U.S. April, 1950).

	Per cent. of population 14 years and over
School years completed.	
Less than 5 years.....	9.4
5 and 6 years.....	8.4
7 and 8 years.....	25.8
1 to 3 years of High School.....	20.3
4 years of High School.....	20.9
1 to 3 years of College.....	7.4
4 or more years of College.....	5.2
Not reported.....	2.6

The median number of school years completed by the population of 14 years old and over was, for the white population only, 9.9; for the non-white population 7.4.

State School Systems

Every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 16 years of age, and those from 14 to 16 must attend school or be lawfully employed. In all States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

In 1951 the total number of children in the United States of 5 to 17 years of age was 31,595,000, of whom 25,706,000 (13,121,000 boys and 12,585,000 girls) were enrolled in public elementary

and secondary schools. The average daily attendance in the public schools was 22,747,000, the average length of school term was 177.9 days, and the average number of days attended by each pupil enrolled was 156.8 days. In 1950-51, 944,036 teachers (214,966 men and 729,070 women) were employed. The average annual salary of all teachers was \$3,126. The estimated value of all public school property was \$11,000,000,000.

The total revenue receipts for school purposes, excluding balances on hand, was \$5,946,828,000. Of this amount, \$184,579,000 was received from Federal sources, \$2,360,619,000 from State sources and \$3,401,629,000 from county and local sources. Current expenditure was \$5,117,014,000. This figure comprises administration, \$236,690,000; instruction, \$3,393,044,000; operation and maintenance of plant, \$695,665,000; other current expenditure, \$688,615,000. In addition, \$1,256,435,000 was expended for sites, buildings, furniture and equipment; \$98,659,000 for interest; and \$56,191,000 for adult and summer schools.

Institutions of Higher Education

In the autumn of 1952 enrolment in institutions of higher education numbered 2,148,284. Of the total enrolment in institutions of higher education 232,880 or 11 per cent. were veterans.

Institutions of higher education include universities, colleges, professional schools, teachers' colleges and normal schools, and junior colleges. The 1952 survey of enrolments covered 1,507 institutions classified as follows: 1,174 universities, colleges and professional schools enrolling 1,735,232

students of whom 205,217 were veterans; 205 teachers' colleges enrolling 173,540 students of whom 10,398 were veterans, and 527 junior colleges enrolling 239,512 students of whom 17,265 were veterans. There are 108 institutions of higher education for Negroes, enrolling 68,375 students of whom 4,222 were veterans, included in the foregoing figures.

During the school year 1951-52, 331,924 bachelor's degrees were conferred, 227,029 to men and 104,895 to women; 63,471 masters' degrees, 43,537 to men and 19,934 to women; and 7,683 doctor's degrees, 6,969 to men and 714 to women. Education, Business and Commerce, and Engineering, were, in that order, the fields in which most students received baccalaureate degrees. There were 52,060 bachelor's degrees in Education, 46,683 in Business and Commerce, and 30,549 in Engineering. The three leading fields of study for the master's degree were Education (24,538), Engineering (4,091) and Business and Commerce (3,548). The most popular fields of study on the doctorate level were Education (1,061), Chemistry (1,031) and Psychology (540).

Particulars of some of the Universities are Harvard (10,156 students, including 271 women, in 1952), founded at Cambridge, Mass., on Oct. 28, 1636, and named after John Harvard of Emmanuel College, Cambridge, England, who bequeathed to it his library and a sum of money in 1638; Yale (7,567 students, including 622 women, in 1952), founded at New Haven, Connecticut, in 1701; Bowdoin, Brunswick, Me. (founded 1794); Brown, Providence, R.I. (founded 1764); Charleston, S.C. (founded 1785); Columbia, New York, N.Y. (founded 1754; 25,119 students, including 8,816 women, in 1952); Cornell (founded at Ithaca, N.Y., 1865; 9,871 students, including 2,443 women, in 1952); Dartmouth, Hanover, N.H. (founded 1769; 2,840 students in 1952); Georgetown, Washington, D.C. (founded 1789; 4,812 students in 1952); North Carolina, Chapel Hill, N.C. (founded in 1789; 5,474 students, including 887 women, in 1952); Pennsylvania, Philadelphia, Pa. (founded 1740; 14,885 students, including 3,547 women, in 1952); Pittsburgh, Pittsburgh, Pa. (founded 1787; 14,914 students, including 4,134 women in 1952); Princeton, Princeton, N.J. (founded 1746); Tennessee, Knoxville, Tenn. (founded 1794; 7,859 students, including 2,149 women, in 1952); William and Mary, Williamsburg, Va. (founded 1693); New York University, founded in 1831 at New York, had 41,307 students, including 11,264 women, in 1952.

Private Schools and Colleges

In 1949-50 there were 2,707,777 pupils in private kindergarten and elementary schools, 672,362 pupils in private high schools and academies, 20,769 pupils in elementary and secondary departments of private universities and colleges, and 1,304,119 students in privately controlled institutions of higher education.

Illiteracy

Illiteracy is practically unknown in the United States. The rate for the whole population, White and Coloured, was only 3 per cent. of those over 14 years of age.

Newspapers

In 1950 there were 1,772 English language daily newspapers with a total circulation of 53,829,000, 5,386,000 metric tons of newsprint was consumed in the United States in 1950, compared with 5,016,000 tons in 1949.

American Book Statistics

The number of books published in U.S.A. was:—

1942.....	9,525	1947.....	9,132
1943.....	8,325	1948.....	9,897
1944.....	6,970	1949.....	10,892
1945.....	6,548	1950.....	11,022
1946.....	7,735	1951.....	11,255

Libraries and Museums

In 1950 the Library of Congress contained approximately 9,000,000 volumes with an annual circulation of 2,045,000.

Type of Library	Number	No. of Volumes
Public Libraries.....	6,100	136,230,000*
University Libraries.....	131	66,472,000
Other institutions for higher education..	1,362	44,314,000
School Libraries.....	98,800	100,000,000
Special Libraries (Dist. of Columbia)	163	11,864,000

* Annual circulation in 1950, 349,000,000 volumes approximately.

Museums.—There were 2,225 museums in the United States in 1950. Art museums in the larger cities include the National Gallery of Art and the Corcoran Gallery of Art in Washington, D.C.; the Metropolitan Museum of Art and the Museum of Modern Art in New York City; the Boston Museum of Fine Arts; and the Art Institute of Chicago. The collections of the Metropolitan Museum of Art are the most extensive. All the large art galleries carry on educational programmes to increase art appreciation. They provide free lectures and arrange special exhibitions. Many of these are sent as travelling exhibits to smaller cities and towns.

Music and Drama

There are about 550 symphony orchestras in the United States. The 25 largest professional symphony orchestras employ from 80 to 110 musicians each. Together, these 550 orchestras give more than 10,000 concerts during each music season. There are also about 35,000 orchestras in colleges, universities and schools. Some 3,000,000 pupils in the public schools receive instruction each year in instrumental music and another 3,000,000 receive instruction in singing.

More than 20 opera companies give grand and light opera performances. Several hundred touring companies bring dramatic and musical plays, ballet performances, and popular music to cities and towns. Every year, some 30,000,000 admission tickets are sold to performances of classical music and ballet.

RELIGIOUS DENOMINATIONS IN U.S.

* No later figures than 1936.

FINANCE

TREASURER OF THE U.S.

On Jan. 27 1953, Mrs. Ivy Baker Priest, of Utah (born 1905), was appointed Treasurer of the United States.

BUDGET RECEIPTS AND EXPENDITURE

FOR THE FISCAL YEARS 1951 AND 1952

Description	1952 Actual	1953 Estimated
BUDGET RECEIPTS:—		
Direct Taxes on Individuals	\$30,713,000,000	\$34,446,000,000
Direct Taxes on Corporations	21,467,000,000	23,700,000,000
Excise Taxes	8,893,000,000	9,795,000,000
Employment Taxes:—		
Existing Taxes	4,573,000,000	4,932,000,000
Customs	550,000,000	590,000,000
Miscellaneous Receipts	1,803,000,000	1,745,000,000
Deduct:—		
Appropriation to Federal old age and survivors' insurance trust fund	3,569,000,000	4,000,000,000
Refunds of Receipts (excluding interest)	2,302,000,000	2,511,000,000
Total Budget Receipts	\$62,128,000,000	\$68,697,000,000

BUDGET EXPENDITURES	Fiscal Year 1952, Actual	Fiscal Year 1953 Estimated
Military Services	\$39,727,000,000	\$44,380,000,000
International Security and Foreign Relations	5,268,000,000	6,035,000,000
Veterans' Services and Benefits	4,863,000,000	4,546,000,000
Social Security Welfare, and Health	2,491,000,000	2,594,000,000
Housing and Community Development	735,000,000	757,000,000
Education and General Research	171,000,000	272,000,000
Agriculture and Agricultural Resources	1,045,000,000	1,943,000,000
Natural Resources	2,948,000,000	3,370,000,000
Transportation and Communication	1,923,000,000	2,086,000,000
Finance, Commerce and Industry	241,000,000	478,000,000
Labour	243,000,000	252,000,000
General Government	1,411,000,000	1,385,000,000
Interest on Public Debt	5,934,000,000	6,520,000,000
Reserve for Contingencies	—	25,000,000
Adjustment	—855,000,000	—
Total Budget Expenditure	\$66,145,000,000	\$74,593,000,000

FOR THE FISCAL YEARS 1950-51 TO 1952-53

GOLD AND SILVER MOVEMENTS

Year	Gold		Silver	
	Imports	Exports	Imports	Exports
1946	\$532,962,000	\$221,468,000	\$57,578,000	\$35,455,000
1947	2,079,588,000	213,241,000	68,140,000	30,649,000
1948	1,981,175,000	300,771,000	70,885,000	12,400,000
1949	771,390,000	84,936,000	73,536,000	23,281,000
1950	162,749,000	534,036,000	110,035,000	6,202,000
1951	81,259,000	630,382,000	103,469,000	8,590,000
1952	740,254,000	55,921,000	67,296,000	4,921,000

PUBLIC DEBT

On June 30, 1952, the *Federal Public Debt* of the United States stood at \$259,105,000,000; the level at the end of fiscal year 1951 was \$255,222,000,000.

COST OF LIVING IN U.S.A.

The Consumers Price Index (for moderate income families in large cities) showed a monthly average during 1951 of 111.0 (the basic figure of 100 being the 1935-1939 average). The monthly average in 1952 was 113.5, and the figure for March, 1953, was 113.7.

According to figures prepared by the Bureau of Labour Statistics, retail prices (all items) rose during the year July 1, 1951—June 30, 1952 from 110.8 to 113.4 (the average for the years 1947-1949=100). Food rose from 112.3 to 114.6, rents from 112.7 to 117.6, and transportation from 117.5 to 126.3. On the other hand, apparel fell slightly from 106.6 to 105.6. During the first four months of 1953, the consumer price index for all items declined slightly from 113.9 in January to 113.7 in April (1947-1949=100). Food declined from 113.1 to 111.5, while rents rose from 121.1 to 122.1, and transportation rose from 129.3 to 129.4. Apparel remained at 104.6.

The wholesale price index showed a monthly average during 1951 of 114.8 (the average for the years 1947-1949=100). The monthly average declined to 111.6 in 1952, and the figure for April

1953, showed a further decline to 109.4. Wholesale prices for farm products declined from 113.4 in 1951 to 107.0 in 1952, and dropped still further to 97.5 in April 1953. Processed food prices declined from 111.4 in 1951 to 108.8 in 1952 and were down to 103.2 in April, while industrial prices showed a decline from 115.9 in 1951 to 113.2 in 1952 and a slight rise to 113.3 in April 1953.

PERSONAL INCOMES IN U.S.A.

Personal incomes in the United States rose from \$254.1 billion in 1951 to \$268.3 billion in 1952, an increase of \$14.2 billion. Most of this rise was accounted for by an increase of \$11.7 billion in labour income and \$2.0 billion in business, professional, and rental income. The only decline in this period was registered in farm proprietors' income, which went from \$15.6 billion in 1951 to \$15.2 billion in 1952. The average of the seasonally adjusted annual rates for the first four months of 1953 was \$281.8 billion. Preliminary estimates for April 1953, showed personal income at \$283.1 billion, an increase of \$14.8 billion over the 1952 average. Labour income increased from an average of \$182.4 billion in 1952 to \$195.7 in April 1953, and most of the other categories showed small increases during this period. Farm proprietors' income, however, declined from the average of \$15.2 billion in 1952 to \$13.6 billion in April.

PRODUCTION

AGRICULTURE AND LIVE STOCK

Agriculture.—The total land surface, excluding island possessions and Alaska, is 1,903,824,640 acres, of which about 61 per cent. is in farms. The total number of farms in 1950 (1950 Census of Agriculture) was 5,382,162. The cash income from crops in 1946 was, \$10,834,000,000; in 1947, \$13,230,000,000; in 1948, \$13,136,000,000; in 1949, \$12,585,000,000; in 1950, \$12,352,000,000; in 1951, \$13,053,000,000; and in 1952, \$14,627,000,000. Cash income from livestock and livestock products, in 1946, \$13,730,000,000; in 1947, \$16,476,000,000; in 1948, \$17,071,000,000; in 1949, \$15,359,000,000; in 1950, \$15,976,000,000; in 1951, \$19,569,000,000; and in 1952, \$18,499,000,000. It is expected that cash receipts during 1953 will be somewhat below those of 1952.

Livestock and poultry on farms and ranches showed a net increase during 1952 for the fourth successive year. The increase amounted to 1 per cent. There has been a substantial increase in the number of cattle, though the number of all other livestock fell. Horse and mule numbers continued the decline which has been in progress for many years.

Crop production in 1952 was the second largest ever recorded. The aggregate volume was 132 per cent. of the 1923-32 average. Acreage upon which 52 leading crops were planted or grown in 1952 approximated 355,000,000 acres or about 7,000,000 less than in 1951. One reason for the relative smallness of acreage is that there was less abandoned winter wheat land available for replanting with sorghum and other spring crops. Acreages of cotton, all sorghums, spring wheat and barley were significantly smaller than in 1951.

The composite yield per acre in 1952 with an index figure of 150 per cent. (1923-32=100) was greater than for any year except 1948, when the figure was 152 per cent.

Live Stock on Farms, Jan. 1.

RECLAMATION

Bureau of Reclamation, Interior Department, Interior Building, 18th and 19th Streets (between C and E streets), N.W., Washington, D.C. Commissioner, Wilbur A. Drexheimer.

The Bureau of Reclamation constructs and operates irrigation, power and other multiple-purpose projects in the area west of the 97th meridian and is the Federal agency with principal responsibility for water conservation in this region. Almost 7,000,000 acres of lands in the arid and semi-arid west can be irrigated by works constructed by the Bureau. In June, 1952, the Bureau had in operation, under construction or authorized 84 irrigation and multiple-purpose projects. Among these is the *Missouri River Basin project*, with more than 250 units, authorized by the Flood Control Acts of 1944 and 1946. Seventy-five projects, or divisions of projects, are producing food supplies and electric energy and furnishing municipal-industrial water. Farmers on Bureau or Reclamation projects in 1952 produced 23,606,417 tons of food and forage crops, valued at \$93,679,755.

136 storage dams have been completed or are under construction on Reclamation projects. Three of them are the three largest concrete structures in the world.

Grand Coulee Dam, on the Columbia River in the State of Washington, the largest concrete structure in the world by volume (10,585,000 cubic yards), and with the greatest hydro-electric power-plant capacity, began operating in March, 1941; its installed capacity is 1,974,000 kW. The dam

will provide storage for the ultimate irrigation of 1,029,000 acres in the Columbia Basin project.

Hoover Dam (Arizona and Nevada), on the Colorado River, is the highest dam in the world (726 ft.), and has an operating power plant with a capacity of 1,249,800 kW., and an ultimate capacity of 1,332,300 kW.

Shasta Dam (602 ft.), on the Sacramento River in California, is the world's second highest. It was completed in 1944, and the power plant has a rated capacity of 793,000 kW.

Hungry Horse Dam, virtually completed in 1952, on the Flathead River in Montana is 565 ft. high, the third highest in the world. It will have an ultimate power capacity of 285,000 kW.

MINERALS

The value of mineral production in continental United States in 1952 totalled an estimated \$13.5 billion. The comparable value for 1951 was \$13.3 billion and for 1950 \$11.9 billion (revised figures).

Nearly three-quarters of the mineral production of the United States (in value) consists of fuels. Most of this is petroleum for which the 1952 demand was estimated at the unprecedented figure of 2,825 million barrels, almost 3.4 per cent. more than in 1951. Nearly 160 million barrels were exported in 1952, an increase of 3.3 per cent. Domestic demand increased by 3.4 per cent.

In 1952 U.S. production of crude petroleum was estimated at 2,492 million barrels, a gain of

12 per cent. over that of 1951. 23,466 new wells were drilled by the industry during the year.

WEIGHTS, MEASURES AND CURRENCY

The *Weights and Measures* in the United States in common use are of British origin and in many cases are the same as those now employed in Great Britain. The *short ton* of 2,000 pounds (20 hundred weight of 100 pounds each) is generally used instead of the *long ton* of 2,240 pounds. The old "Winchester" bushel and the wine gallon and their subdivisions are used instead of the British Imperial units of capacity; 1 U.S. bushel = 0.9689 British bushel, and 1 U.S. gallon = 0.83268 British gallon. The U.S. *liquid quart* is divided into 32 fluid ounces. The Metric System of Weights and Measures is permissive, but is not extensively used except in scientific work. The unit of currency is the *dollar* of 100 cents. The rate of exchange with sterling will be found on p. 83.

MANUFACTURES

The leading 5 States according to value added by manufacture in the 1951 Annual Survey were: New York (\$11,933,729,000), Pennsylvania (\$9,421,770,000), Ohio (\$4,396,103,000), Illinois (\$8,835,518,000) and Michigan (\$7,392,255,000).

The average number of employees in 1951 was 15,612,619, salaries and wages totalling \$55,692,091,000. The value added by manufacture (value of output less cost of materials and supplies) was \$102,805,814,000.

INDUSTRIAL DIVISIONS, 1951

Division	No. of Employees	Salaries and Wages	Value added by Manufacture
New England.....	1,490,000	\$5,100,000,000	\$8,469,000,000

LABOUR IN THE UNITED STATES

Organized Labour.—The American Federation of Labour, founded in 1881, consists of 109 national unions (called "international" when they have Canadian branches); the Congress of Industrial Organizations (CIO) formally established in 1938, has 33 affiliates. At least 73 national unions are independent, including the 4 Railroad Brotherhoods (Locomotive Engineers, Firemen and Engineers, Railway Conductors, and Trainmen) and the United Mine Workers.

	Estimated 1952 Membership
AFL.....	9,500,000
CIO.....	5,000,000
Railroad Brotherhoods.....	380,000
United Mine Workers.....	600,000
Others.....	1,270,000

*16,750,000

* Includes 800,000 members in Canada.

Approximately one-third of the non-agricultural labour force of the United States is estimated to be organized.

Work Stoppages.—There were over 5,000 stoppages recorded in 1952, involving 3.5 million workers and causing almost 60 million man-days of idleness. However, this amounted to only 0.57 per cent. of estimated working time of all workers. There were more man-days of idleness in 1952 than in any postwar year except 1946, when 116 million days were lost. Over one-third of the days lost in 1952 were in steel; construction, mining and the group transportation, communication and other public utilities accounted for another third.

Employment and Unemployment.—The civilian labour force (working population) was 62,810,000 in April, 1953. This includes self-employed, wage and salary-earners, employed and unemployed. Unemployment was at the lowest post-war figure of 1,582,000 (2.5 per cent.). In addition there were 2,168,000 temporarily stopped, and 9,248,000 working less than 35 hours a week.

Wages.—Average weekly earnings by industry ranged from \$87.76 per week in soft coal mining

to \$39.07 in laundries. The average for all manufacturing was \$71.51 in January 1953, a three-fold increase since 1939 but in terms of 1939 purchasing power, the increase was 1½ times.

	January 1953	Average Weekly Earnings	Hours Per Week	Average Hourly Earnings
Manufacturing...		\$71.51	41.1	\$1.74
Durable.....		77.43	41.9	1.85
Non-durable..		63.16	39.9	1.58
Coal Mining:				
Anthracite....	70.97		28.4	2.50
Bituminous...	87.76		35.5	2.47
Building-construction.....	87.54		37.0	2.37
Class I Railroads	75.13		40.7	1.85
Gas and Electricity	78.29		41.8	1.87
Wholesale trade	69.63		40.6	1.71
Retail trade....	52.81		39.0	1.34
(except eating and drinking places)				
Laundries.....	39.07		40.7	0.96

A minimum wage of 75 cents an hour is set by federal law for employees engaged in interstate commerce or in the production of goods for interstate commerce, or in activities directly essential to such production. The act requires time and a half for all hours over 40 a week. While national averages by industry are generally above the minimum, rates in some occupations are close to the minimum.

In addition to cash wages, most workers receive some type of "fringe" benefits—the most common forms being paid vacations, and public holidays, various types of insurance and health funds financed by the employer or by employer and union (or employees) jointly. Such fringe benefits have been frequently negotiated during the periods of legal wage stabilization since 1942, in lieu of cash increases.

Wages and price controls, initiated after the outbreak of war in Korea, were ended in the spring of 1953.

INDIAN POPULATION

On Jan. 1, 1950, the enumerated and estimated Indian population of the United States, exclusive of Alaska, was 421,600. There are many persons of Indian blood who are not enrolled with any recognized tribe, have no rights in tribal property and receive no services from the Government. The States with the largest resident Indian population are: Arizona, 67,800; Oklahoma 54,000; New Mexico, 43,500; North Carolina, 31,500; South Dakota, 25,600; California, 24,500; Montana, 18,000; Washington, 16,100; New York, 15,100; Minnesota, 13,900.

GOVERNMENT PRINTING OFFICE

North Capitol and H. Streets, Washington, D.C.

The Office was established by Congress in 1860 and has been in continuous operation from that time. It carries out all the printing and binding ordered by Congress and the departments, independent establishments and agencies of the Federal Government, and provides them with stationery. It also distributes Government publications as required by law, maintains the necessary catalogues and a library of these publications, and prints for sale to the public such documents as are not confidential.

Public Printer, Raymond Blattenberger, N.J.
\$15,000.

POSTS, TELEGRAPHS AND TELEPHONES

On June 30, 1952, there were 40,919 post offices in the U.S. handling 49,740,510,000 "pieces" of mail matter. The postal revenue was \$1,947,316,280, and the expenditure \$2,674,366,498 for the fiscal year of 1952. The telegraphs and telephones are operated by private companies.

On June 30, 1952, the postal savings deposits amounted to \$2,617,234,673, a decrease of \$170,683,671 since June 30, 1951.

Miles Operated.....	236,599

ROADS

On January 1, 1952, there were 3,326,000 miles of roads and streets in the United States, of which 2,987,000 miles were in rural areas and 339,000 miles were in urban areas. Surfaced roads and streets account for 1,998,000 miles of the total; 667,000 miles are graded and drained, and 661,000 miles are unimproved. State primary roads, including extensions in urban areas, total 401,000 miles (389,000 surfaced). Other roads under State control total 228,000 miles (173,000 surfaced); 2,623,000 miles are under local control (1,419,000 surfaced); and 74,000 miles (17,000 surfaced) are under Federal control.

An estimated total of \$5,014,000,000 was spent in 1952 for roads and streets in the United States. Of this total \$2,986,000,000 was spent for State highways, \$1,085,000,000 was spent for county and local rural roads, \$898,000,000 was spent for city streets, and \$45,000,000 was spent on roads in Federal areas. Capital outlay accounted for 58.1 per cent. of the total expenditures; 32.1 per cent. was spent for maintenance; 4.9 per cent. for administration; 2.0 per cent. for highway police; and 2.9 per cent. for interest on highway bonds.

Motor Vehicles and Taxation.—The number of motor vehicles registered in 1952 in the United States was 53,258,570, an increase of 2.6 per cent. over the 1951 total of 51,913,965. In 1941 the registrations in the U.S.A. were 34,894,134. The State Governments received \$1,468,554,000 in 1941 and \$3,101,167,000 in 1952, respectively, from motor-fuel, motor-vehicle and motor-carrier taxes. In 1952 the Federal Government received \$2,100,066,000 from excise taxes on motor vehicles and parts, gasoline and lubricating oil.

Accidents.—In 1952 there were 38,000 deaths and

over 1,350,000 injuries caused by motor vehicle accidents. The death rate per 100,000,000 miles of travel was 7.3 in 1952, a slight decrease over the 1951 rate of 7.6.

SHIPPING

The active ocean-going Merchant Marine of the U.S. on June 1, 1953, consisted of 1,492 vessels of 1,000 gross tons and over, of which 1,256 were privately owned and 236 were government-owned ships under charter or general agency agreement with private companies. There were 1,853 government-owned vessels in the reserve fleets. Of the active vessels, 1,987 were dry cargo ships, 57 were combination passenger and cargo, and 448 were tankers.

AIR TRANSPORT

United States domestic and international scheduled airlines in 1952 carried 28,381,801 passengers 15,548,247,000 passenger miles, an increase of 11 per cent. in passengers and 18.1 per cent. in passenger mileage over 1951. Mail carried by air during the year totalled approximately 171,000,000 pounds, compared with 270,000 pounds in 1926 when a mail service was first provided by private contractors. The combined express and freight flown by the scheduled airlines during 1952 totalled 233,447,076 ton-miles, an increase of 8.6 per cent. over the 1951 figure.

Domestic air coach or tourist service is becoming increasingly popular in the United States. First introduced in 1948, this type of service carried 352,804 passengers nearly 250,000 miles in 1949. During 1952, scheduled domestic airlines flew 2,309,238,000 air coach passenger miles an increase of more than 81 per cent. over the 1951 total.

In 1954 seven principal classes of commercial air carriers can be distinguished in the United States. (a) The Domestic Trunk Lines (14); (b) Domestic Local Service Lines, operating the low-density traffic routes between the smaller traffic centres and between small and large centres (16); (c) The International and Overseas Group, including all U.S. flag air carriers authorized to operate between the U.S.A. and foreign countries, between foreign countries and into Mexico and the Caribbean (12); (d) Territorial Air Carriers, operating in Hawaii (2); other less important classes are (e) Certificated All Cargo Lines (4); (f) Helicopter Airmail Operators (3); and (g) Non-Certificated Air Carriers, including irregular transport carriers, air taxi operators, air freight forwarders and Alaskan pilot-owners and air carriers (1,653).

584 cities of the United States were served by domestic trunk and local service airlines at the beginning of 1954 and 5,966 airports of all classes were in use, including 363 military. In 1952, 78,644 persons were employed by all domestic airlines and 21,472 by all international airlines.

33. Dwight D. Eisenhower	Rep.	1890, Oct. 14	1953

† Died in office. ‡ Assassinated. (a) Elected as Vice-President.

‡ Re-elected Nov. 5, 1940, the first case of a third term; re-elected for a fourth term Nov. 7, 1944.

TERRITORIES AND PRINCIPAL ISLAND POSSESSIONS OF THE UNITED STATES

The territories and the principal islands and island groups under the sovereignty of the United States of America comprise: the Territory of Alaska (which includes all of the Aleutian Islands east of longitude 167° east of Greenwich); the Territory of Hawaii (including Ocean or Kure Island, and Palmyra Island); Kingman Reef (about 1 sq. mile); Johnston (or Cornwallis) Island and Sand Island (about 1 sq. mile in all); Midway Islands; Wake Island; Guam; Howland Baker and Jarvis Islands (about 3 sq. miles in all); American Samoa (including the island of Tutuila, the Manua Islands, and all other Islands of the Samoan group east of longitude 171° west of Greenwich together with Swains Island); Puerto Rico; the Virgin Islands of the United States, and Navassa Island (2 sq. miles).

The Canal Zone is under the jurisdiction of the United States.

The Trust Territory of the Pacific Islands is under the jurisdiction of the United States pursuant to a trusteeship agreement between the U.S. Government and the Security Council of the United Nations. It consists of the Mariana (except Guam), Caroline and Marshall Islands, with a land area of 687 square miles and a population of 57,037 in 1952. Nine individual languages are spoken in the Territory. Copra is the only export of importance.

There are certain small guano islands, rocks, or keys which, in pursuance of action taken under the Act of Congress, August 18, 1856, subsequently embodied in Sections 5570-5578 of the Revised Statutes, are considered as appertaining to the

United States. Responsibility for territorial affairs generally is centred in the Office of Territories, Dept. of the Interior, Washington, D.C.

HAWAII

The Hawaiian (or Sandwich) Islands form a Territory of the U.S. and consist of a chain of 24 (named) islands in the N. Pacific Ocean between 18° 55'—22° 15' N. lat. and 154° 4'—160° 30' W. long. Of the 24 islands 9 are inhabited. The total area is 6,435 sq. miles.

For Administrative purposes the Territory of Hawaii is divided into four counties. The island of Oahu is known as the city and county of Honolulu. The other counties are Hawaii, including the island of that name; Maui, including the islands of Maui, Kahoolawe, Lanai and all of Moikoi except the leper settlement; and Kauai, including the islands of Kauai and Niihau. The leper settlement on Molokai (where Father Damien worked from 1873-1889) constitutes a fifth county, Kalawao, which is under the control of the Territorial Board of Health. The estimated population of the Territory of Hawaii on Jan. 1, 1952, was:—

County	Pop.
City and County of Honolulu..	326,923
County of Hawaii	66,601
Counties of Maui and Kalawao.	47,662
County of Kauai	29,561

Total..... 470,747

The islands were discovered by Capt. James Cook, R.N., in 1778 (he was killed there in 1779) and formed a kingdom under native rulers until Queen

Liliuokalani was driven from the throne in 1893, a republic being proclaimed in 1894. In 1898 the group was annexed by the U.S., being organized as a Territory on June 14, 1900. The Governor is appointed by the President of the U.S. There is a Senate of 15 and House of Representatives of 30 members, the Territory sending an elected Delegate to Congress at Washington, D.C.

The majority of native Hawaiians are Christians. School attendance is compulsory for all children, 6 to 16 years of age. Kindergarten work is offered to 5-year-old children. The University of Hawaii (founded 1907) has an enrolment of 12,821.

The group is of volcanic origin and contains many craters, Haleakala on Maui being the largest in the world. Kilauea and Mauna Loa, on Hawaii, are active volcanoes, with Mauna Kea (13,823 ft. above mean sea level) extinct. The islands are very fertile, and rice, cane sugar, pineapples, coffee, bananas and other tropical and sub-tropical products are abundantly grown.

	1951-52
Tax collections (Territorial)	\$75,464,407
U.S. Internal Revenue collections. . .	134,608,840
Net Territorial Debt (June 30, 1952)	38,431,277
	1951
Exports to U.S.	\$229,000,000
Imports from U.S.	344,628,000

The U.S. Government maintains large military bases on the island of Oahu, including an important naval base at Pearl Harbour.

Governor, Samuel W. King \$15,000
Territorial Secretary, Farrant L. Turner.

CAPITAL, ΨHonolulu, on the island of Oahu, population (1952), 236,370. ΨHilo, on the island of Hawaii, has a population of 26,659.

CANTON AND ENDERBURY

Under the Anglo-American Pact of Aug. 10, 1938, Canton and Enderbury (of the Phoenix Island Group in the Central Pacific) were declared to be for the common use of Gt. Britain and U.S.A. for aviation and communications. The islands are about midway between Hawaii and Australia.

On April 6, 1939, the U.S. and Great Britain agreed to set up a joint regime for Canton and Enderbury Islands. Provision for the joint control of these islands was made by exchange of notes between the two Governments on April 6, 1939.

GUAM

Guam, the largest of the Ladrone or Mariana Islands in the North Pacific Ocean, lies in 13° 25' N. lat. and 144° 39' E. long., at a distance of about 1,506 miles east of Manila. The area of the island is estimated at 217 square miles, with a population of 59,498 (1950), of whom 28,000 are Guamanians. The Guamanians are of Chamorro stock mingled with Filipino and Spanish blood. The Chamorro language belongs to the Malayo-Polynesian family, but has had considerable admixture of Spanish. English is the language used throughout the island, although Chamorro is also used in Guamanian homes.

Guam was occupied by Japanese in Dec., 1941, but was recaptured and occupied throughout by U.S. forces before the end of August, 1944. Under the Organic Act of Guam of August 1, 1950 (Public Law 630 of the 81st Congress), Guam has statutory powers of self-government, and Guamanians are United States citizens. A governor is appointed for a four-year term. A 21-member unicameral legislature is elected biennially. There is also a District Court of Guam, with original jurisdiction in cases under federal law.

Governor, Ford Q. Elridge.

Secretary, Randall S. Herman.

CAPITAL, Agaña. Port of entry, ΨApra.

WAKE AND MIDWAY ISLANDS

Wake Island, annexed in 1898, has an area of about 1 sq. mile and lies in the N. Pacific about 2,300 miles from Hawaii on the direct route to Hong Kong. Wake Island was occupied by Japanese Dec. 27, 1941; it was re-occupied by U.S. on Sept. 15, 1945.

Midway Islands, with a total area of 22 sq. miles and a population (1940) of 437, lie in the N. Pacific about 1,300 miles from Hawaii. There is no indigenous population. The group is under the jurisdiction of the U.S. Navy.

PUERTO RICO

Puerto Rico (Rich Port) is an island of the Greater Antilles group in the West Indies, and lies between 17° 50'–18° 30' N. lat. and 65° 30'–67° 15' W. long., with a total area of 3,435 square miles and a population of 2,210,703 at the census of 1950. Three-fourths of the population are of Spanish descent and about one-fourth coloured. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,399 miles distant from New York, and 963 miles from Key West. Puerto Rico was discovered in 1493 by Christopher Columbus. It was explored by Ponce de León in 1508. It continued a Spanish possession until Oct. 18, 1898, when the United States took formal possession as a result of the Spanish-American War. It was ceded by Spain to the United States by the Treaty ratified on April 11, 1899. Sugar is grown along the coastal plain and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, and yams are also grown. The trade is principally with the U.S. About 320 miles of railroad were in operation in June, 1940, and there are good harbours at San Juan and Ponce. The Constitution recently approved by the Congress and the President of the United States, which came into force on July 25, 1952, establishes the Commonwealth of Puerto Rico with full powers of local self-government. Legislation functions are vested in the Legislative Assembly, which consists of 2 elected houses; the Senate of 27 members (2 from each of 8 senatorial districts and 11 at large) and the House of Representatives of 51 members (1 from each of 40 representative districts and 11 at large). Membership of each house may be increased slightly to accommodate minority representatives. The term of the Legislative Assembly is 4 years. The Governor is popularly elected for a term of 4 years. A Supreme Court of 5 members is appointed by the Governor, with the advice and consent of the Senate. There are 8 similarly appointed Secretaries at the head of permanent departments, but the selection of the Secretary of State must be approved also by the House of Representatives. The Governor appoints all inferior judges. Puerto Rico is represented in Congress by a Resident Commissioner, elected for a term of 4 years, who has a seat in the House of Representatives, but not a vote. Great improvement has been made in the progress and welfare of the island during the present century—it is self-supporting, free public schools are established throughout, a system of good roads reaches every important city and town, public buildings are attractive and well built, health and sanitary measures are completely modern. The capital,

Ψ Seaport.

Ψ San Juan, had 223,949 inhabitants in 1950, other towns being Río Piedras 132,369, Ψ Ponce 99,190, Ψ Mayaguez 58,788, Ψ Caguas 33,733, Ψ Arecibo 28,500, Bayamon 20,245.

Debt (June 30, 1950).....	23,594,640

TRADE.	1950-51
Total Imports.....	\$437,535,606
Total Exports.....	271,041,874

Governor, Luis Muñoz Marín, elected 1948; re-elected 1952.

Resident Commissioner, Antonio Fernós Isern.

AMERICAN SAMOA

American Samoa consists of the island of Tutuila, Aunu'u, Ofu, Olosega, Ta'u, Rose and Swains Islands, with a total area of 76.5 square miles and a population of 18,602 in 1950, distributed as follows:—Tutuila and Aunu'u 15,621; Rose Island, uninhabited; Manu'a Group (Ofu and Ta'u Islands) 2,817; and Swain's Island (annexed May 13, 1925) 164.

Tutuila, the largest of the group, has an area of about 40 square miles and contains a magnificent harbour at Ψ Pago Pago (pop. 1950, 3,531), the capital and seat of government. The remaining islands have an area of about 30 square miles. Copra is the only export of importance.

Under an Executive Order of the President, which became effective on July 1, 1951, civilian administration under the Department of the Interior replaced the Naval administration which had existed since 1900. At present the Government consists of an executive, an advisory bicameral legislature and a judiciary. Most of the Samoans are U.S. nationals, but some have acquired citizenship through service in the United States armed forces.

Governor, Lawrence M. Judd.
Secretary, Leland P. Draney.

TRUST TERRITORY OF THE PACIFIC ISLANDS

The Trust Territory of the Pacific Islands consists of the Mariana (excluding Guam), Caroline and Marshall Islands which extend from latitude 1° to 20° north and from longitude 130° to 172° east. They cover an ocean area of 3,000,000 square miles but have a total land area of only 687 square miles. There are 96 separate islands and island groups in the Trust Territory. The population in 1952 was 57,037. The inhabitants of the Trust Territory are broadly classed as Micronesians. The native cultures vary markedly among island groups and even more among islands and atolls in the same geographic area. Nine mutually unintelligible languages are spoken in the territory.

The Trust Territory is administered by the United States pursuant to a Trusteeship Agreement with the Security Council of the United Nations of July 18, 1947. From the cessation of hostilities to that date, the area was administered under United States Military Government. On July 18, 1947, the islands were placed under the jurisdiction of the Secretary of the Navy. On July 1, 1951, civilian government was established with the transfer of responsibility for the Trust Territory to the Secretary of the Interior. On January 1, 1953, responsibility for the administration of the islands of Saipan and Tinian in the Mariana Islands was retransferred to the Secretary of the Navy.

For administrative purposes, the territory is

divided into six districts: Saipan, Koror, Yap, Truk, Ponape and the Marshalls. Local governments exist within each district.

High Commissioner, Frank E. Midkiff.

Deputy High Commissioner, James A. McConnell.
Temporary seat of government: Honolulu, Hawaii.

VIRGIN ISLANDS

Purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 132 sq. miles, with a population in 1950 of 26,654. St. Thomas (28 sq. miles) has a population of 13,811; St. Croix (84 sq. miles) has a population of 12,096; St. John (20 sq. miles) has a population of 747. St. Croix exports sugar and rum; Ψ St. Thomas is famous for its harbour.

CAPITAL, Ψ Charlotte Amalie (pop. 11,463), contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refuelling station. The climate of the Virgin Islands is delightful at all times, and particularly so during the winter months.

Governor, Morris F. de Castro.

Government Secretary, Daniel W. Ambrose.

ALASKA

Alaska is the largest peninsula of the North American continent and includes an area of approximately 586,400 square miles or one-fifth the area of the United States. The population on April 1, 1950, totalled 128,643, of which 33,884 were Alaska Natives (Eskimos, Indians and Aleuts).

Alaska was acquired by the United States in 1867 when the Territory was purchased from Russia for \$7,200,000. The present Organic Act which created the Territory of Alaska was enacted in 1912 and provides the basis for the Territory's government. The Governor is appointed by the President of the United States. The Territory every two years elects a delegate to the Federal Congress. The Territorial Legislature meets biennially in odd-numbered years and consists of two houses, the Senate with 16 members and the House of Representatives with 24 members. The University of Alaska is widely recognized for its mining courses and is a growing centre for Arctic research.

The principal industry of Alaska is its fisheries, and the total annual value of its production is in excess of \$100,000,000. Alaska produces 85 per cent. of the U.S. production of canned salmon. Mining is also important to the economy of the Territory; since 1880 the total value of mineral production has been about one billion dollars. Total timber resources of Alaska are estimated in the order of 435 billion board feet. The interior of Alaska is served by the Alaska Railroad, owned and operated by the U.S. Government. The line extends from the port of Seward northwards 470.6 miles to Fairbanks. The principal cities in the interior are connected with each other by road and to the United States and Canada *via* the Alaska Highway, built by the United States during the Second World War. The Alaska Highway extends from Dawson Creek, British Columbia, Canada, to a junction with Alaska's Richardson Highway, near Fairbanks; only 302 miles of this 1,523-mile road are in Alaska. The Territory is also served by steamship and airlines and lies on one of the principal air routes to the Orient.

THE PANAMA CANAL

The Panama Canal and its adjuncts, including the related commercial enterprises in the Canal Zone, are operated by the Panama Canal Company, which was formed on July 1, 1951, under the provisions of the Panama Canal Company Act. The Canal Zone is governed by the Canal Zone Government, which was established simultaneously with the new Canal Company. Both organizations are headed by Brigadier General John S. Seybold, U.S.A., who holds the joint title of Governor of the Canal Zone and President of the Panama Canal Company.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1825 and 1890. In 1876 a concession for the construction of a canal was granted to a French promotion corporation which conducted surveys during a period of two years and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Interocceanic Panama Canal Company, of which de Lesseps was nominal head. The amount of work to be accomplished proved to be greater than was estimated, and resulted in the failure of the company, a receiver being appointed in 1889. A new company was formed to carry on the work, and excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government took possession of the effects of the French company in Panama.

Congress authorized the President in 1902 to purchase the rights and property of the French company for \$40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of \$10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognized by the United States, and a treaty was ratified on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the isthmus, were ceded to the United States. The canal is built through the centre of this territory. In 1922 a treaty between Colombia and the U.S. provided for the payment to Colombia of \$25,000,000 in satisfaction of all claims arising out of the Canal controversy. The independence of Panama was recognized by this treaty.

The canal is fifty statute miles long (44.08 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. It contains 12 locks in twin flights; 3 steps at Gatun on the Atlantic side, 1 step at Pedro Miguel and 2 at Miraflores on the Pacific side, and transit from sea to sea occupies 7 to 8 hours (passage through locks 3 to 3½ hours). The

least width is in Gaillard Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface of Gatun Lake is at 85 feet above sea-level varies from 85 feet in some parts of Gatun Lake to 42 feet in the Atlantic entrance. The depth through Gaillard Cut is 45 feet.

Including only ocean-going vessels, 300 Panama Canal net tons measurement or over, against which tolls were collected, the volume of traffic passing through the Canal during each of the last 26 fiscal years is shown below:—

Fiscal Year	No. of Transits	Canal *Net Tons	Cargo Tons
1927	5,293	24,245,000	27,733,555
1928	6,253	27,229,000	29,615,051
1929	6,289	27,585,000	30,647,768
1930	6,027	27,716,000	30,018,429
1931	5,370	25,690,000	25,065,283
1932	4,362	21,842,000	19,798,986
1933	4,162	21,094,000	18,161,165
1934	5,234	26,410,000	24,704,009
1935	5,180	25,720,000	25,309,527
1936	5,381	25,923,000	26,505,943
1937	5,387	25,430,000	28,108,375
1938	5,524	25,950,000	27,385,924
1939	5,903	27,170,000	27,866,627
1940	5,370	24,144,366	27,299,016
1941	4,727	20,642,736	24,950,791
1942	2,688	11,010,004	13,607,444
1943	1,822	8,233,999	10,599,966
1944	1,562	6,073,457	7,003,187
1945	1,939	8,380,959	8,603,607
1946	3,747	17,516,517	14,977,940
1947	4,260	20,233,043	21,670,518
1948	4,678	22,902,064	24,117,788
1949	4,793	23,473,236	25,305,128
1950	5,448	28,013,236	28,872,293
1951	5,593	27,180,425	30,073,022
1952	6,524	30,674,302	33,610,509

* Net Tonnage figures 1926-1938 are estimated figures based on revised measurement rules which became effective March 1, 1938.

The United Nations

CHARTER OF THE UNITED NATIONS

The foundations of the Charter of the United Nations were laid at the Conference of Foreign Ministers at Moscow in 1943, and upon those foundations a structure was built at the meetings at Dumbarton Oaks, Washington, D.C., Aug. 21-Oct. 7, 1944. The design was discussed and criticised at San Francisco from April 25 to June 26, 1945, on which date representatives of 50 Allied Nations appended their signatures to the Charter.

The United Nations formally came into existence on October 24, 1945. It was later decided that its seat should be in the United States. Permanent headquarters have been erected at Manhattan, New York.

The following sixty States are members of the United Nations:—

Afghanistan, Argentina, Australia, Belgium, Bolivia, Brazil, Burma, Byelorussian Soviet Socialist Republic, Canada, Chile, China, Colombia, Costa Rica, Cuba, Czechoslovakia, Denmark, Dominican Republic, Ecuador, Egypt, Ethiopia, France, Greece, Guatemala, Haiti, Honduras, Iceland, India, Indonesia, Iran, Iraq, Israel, Lebanon, Liberia, Luxembourg, Mexico, Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Panama, Paraguay, Peru, Philippines, Poland, Salvador, Saudi Arabia, Syria, Sweden, Thailand, Turkey, Ukrainian Soviet Socialist Republic, Union of South Africa, Union of Soviet Socialist Republics, United Kingdom, United States of America, Uruguay, Venezuela, Yemen, Yugoslavia.

The principal organs of the United Nations are:—(1) The General Assembly; (2) The Security Council; (3) The Economic and Social Council; (4) The Trusteeship Council; (5) The International Court of Justice; (6) The Secretariat.

1. THE GENERAL ASSEMBLY

The General Assembly consists of all the Members of the United Nations. Each Member is entitled to be represented at its meetings by five representatives, but has only one vote. The General Assembly meets once a year in regular session normally on the third Tuesday in September. Special Sessions may also be held.

The first part of the first session was held in London from January 10 to February 14, 1946. The General Assembly met for the second part of the first session from October 23 to December 15, 1946, in New York. The second session was held in New York from Sept. 16 to Nov. 29, 1947; the first part of the third session was held in Paris from Sept. 21 to December 12, 1948. The second part of the third session was held in New York from April 5 to May 18, 1949. The fourth session was held in New York from Sept. 20 to Dec. 10, 1949. The fifth session opened in New York on Sept. 19, 1950, and continued into 1951. The sixth session was held in Paris from Nov. 6, 1951, to Feb. 5, 1952. The seventh session lasted from Oct. 14, 1952 until April 23, 1953.

The work of the General Assembly is divided between six Main Committees, on each of which every Member has the right to be represented:—(1) Political and Security (including the regulation of armaments); (2) Economic and Financial; (3) Social, Humanitarian and Cultural; (4) Trusteeship (including Non-Self Governing Territories); (5) Administrative and Budgetary; (6) Legal. There is also an *ad hoc* Political Committee, to relieve the burden on the first Committee.

The Main Committees consider items referred to them by the General Assembly and recommend draft resolutions for submission to the Assembly's plenary meetings.

The Assembly has two procedural committees—a General Committee and a Credentials Committee; and two standing committees—an Advisory Committee on Administrative and Budgetary Questions and a Committee on Contributions.

The General Assembly appoints such *ad hoc* committees as may be required from time to time for special purposes. The Assembly is also assisted in its work by subsidiary bodies such as a Board of Auditors, an Investments Committee, a United Nations Staff Benefit Committee, and an International Law Commission.

During its second session on November 13, 1947, the General Assembly established an Interim Committee, consisting of representatives of all Members, as a subsidiary organ, to function until the Assembly's next regular session. The Interim Committee was charged, *inter alia*, with considering questions affecting peace and security not being dealt with by the Security Council and reporting on them to the Assembly. It was re-established for an indefinite period by resolution of the General Assembly on Nov. 21, 1949.

2. THE SECURITY COUNCIL

The Security Council consists of eleven Members, each of which has one representative and one vote. There are five permanent Members (China, France, U.K., U.S.A., U.S.S.R.) and six non-permanent Members elected for a two-year term.

The Security Council bears the primary responsibility for the maintenance of peace and security. Decisions on procedural questions are made by an affirmative vote of seven Members. On all other matters the affirmative vote of seven Members must include the concurring votes of the permanent Members, and it is this clause which makes the *Veto* possible. The only exception to this rule is that in regard to measures for peaceful settlement a party to a dispute must refrain from voting.

Until 1952 two separate Commissions, the Atomic Energy Commission and the Commission for Conventional Armaments, reporting to the Security Council, dealt with different aspects of the armaments problem. On January 11, 1952, the General Assembly approved the establishment of a new Disarmament Commission, bringing atomic and conventional armaments under one body.

A Committee on the Admission of New Members was set up by the Security Council on May 17, 1946, for the purpose of examining applications for admission to membership in the United Nations which may be referred to it by the Security Council. It is composed of a representative of each of the members of the Security Council.

The Security Council also establishes *ad hoc* committees and commissions which may be required from time to time for special purposes. For example, on August 25, 1947, a Committee of Good Offices on the Indonesian Question was established (the name was later changed to the United Nations Commission for Indonesia). A United Nations Commission for India and Pakistan was established on January 20, 1948, and a United Nations Truce Commission for Palestine on April 23, 1948.

3. THE ECONOMIC AND SOCIAL COUNCIL

This body is responsible under the General Assembly for carrying out the functions of the United Nations with regard to international economic, social, cultural, educational, health and related matters.

It has established the following Commissions: Transport and Communications, Fiscal, Statistical, Human Rights, Social, Status of Women, Narcotic Drugs, Population, Regional Economic Commissions for Europe, Asia and the Far East, and Latin America. The Council also supervises and co-ordinates the work of twelve specialized agencies established to cover the main fields of international co-operation.

United Nations International Children's Emergency Fund

U.N.I.C.E.F.

United Nations, New York.

London Office: Russell Square House,
Russell Square, W.C.1.

Established by the General Assembly, December, 1946, to meet the emergency needs of children, particularly in war devastated countries, and to further child health purposes generally. In December, 1950, the Assembly directed that emphasis should be given to aiding children in the under-developed areas. In May 1953 the Commission recommended that the General Assembly be requested to approve an indefinite extension of the Fund's mandate. The Fund is financed by voluntary contributions from Governments and from the public. The Fund has given assistance to 81 countries and territories.

4. TRUSTEESHIP COUNCIL

The establishment of a Trusteeship Council in connexion with territories placed under United Nations supervision through individual Trusteeship Agreements was made possible after the General Assembly on December 13, 1946, approved the following eight Trusteeship Agreements: *New Guinea* (agreement submitted by Australia); *Ruanda-Urundi* (agreement submitted by Belgium); *French Cameroons and French Togoland* (agreements submitted by France); *Western Samoa* (agreement submitted by New Zealand); *British Cameroons, British Togoland, and Tanganyika* (agreements submitted by the United Kingdom); a ninth agreement was afterwards approved concerning *Nauru* (administered by Australia on behalf of Australia, New Zealand and U.K.).

A Trusteeship Agreement for the former Japanese mandated islands, the *Marshalls, Marianas and Carolinas*, was submitted by the United States to the United Nations, and after approval by the Security Council, came into force on July 18, 1947.

A Trusteeship Agreement for the former Italian Colony of Somaliland was approved by the General Assembly on Dec. 2, 1950.

The Trusteeship Council is composed of countries administering Trust Territories; permanent members of the Security Council; and enough other countries (elected by the General Assembly for three-year terms) to make an equal division between countries which administer Trust Territories and countries which do not.

The functions of the Trusteeship Council are to consider reports from administering authorities; examine petitions in consultation with the administering authority; make periodic inspection visits; and check conditions with an annual questionnaire

on the political, economic, social, and educational advancement of the inhabitants of trust territories.

Under the United Nations Charter, Members administering territories which have not yet attained a full measure of self-government have undertaken to transmit regularly to the Secretary-General information relating to economic, social, and educational conditions in the territories for which they are responsible. This information is summarized, analysed and classified by the Secretariat. In each of the last seven years it has also been examined by a Special Committee appointed by the General Assembly.

5. THE INTERNATIONAL COURT OF JUSTICE

The International Court of Justice is the principal judicial organ of the United Nations. The Statute of the court is an integral part of the Charter and all Members of the United Nations are *ipso facto* parties to it. The Court held its inaugural meeting at The Hague on April 18, 1946.

If any party to a case fails to adhere to the judgment of the Court, the other party may have recourse to the Security Council.

The 15 judges of the Court (which has its seat at The Hague) were elected by the Security Council and the General Assembly in February, 1946, their terms of office being determined by lot. The General Assembly and the Security Council, at simultaneous but independent elections on October 22, 1948, re-elected the five judges whose terms were to expire in February, 1949.

The first case to come before the Court was the *Corfu Channel Dispute* between U.K. and Albania. On April 9, 1949, the Court ruled that Albania was responsible under international law for the explosions on two British warships which occurred on October 22, 1946, in Albanian waters and for the damage and loss of human life that was the result. By its judgment of December 15, 1949, the compensation due from Albania to the United Kingdom was assessed at £843,947. The Court further ruled that by subsequent acts of the British navy in Albanian waters, the United Kingdom violated the sovereignty of Albania. The Court stated that this declaration constituted in itself appropriate satisfaction.

On May 26, 1951, the U.K. Government submitted a complaint in connection with the Anglo-Iranian Oil Company's case. Persia challenged the competence of the Court, and the Persian argument was subsequently upheld by the Court by nine votes to five.

The Court has also given advisory opinions on the question of Membership in the United Nations, on the question of reparations for injuries suffered in the service of the United Nations, on the interpretation of peace treaties with Bulgaria, Hungary and Roumania, and on the international status of South-West Africa.

THE SECRETARIAT

The Secretariat is composed of the Secretary-General, who is the chief administrative officer of the Organization, and an international staff appointed by him under regulations established by the General Assembly. The Secretary-General is appointed for a term of five years. At the end of 1950, Mr. Trygve Lie's term was extended by three years, but he resigned in 1952.

Secretary-General, Dag Hammarskjöld (Sweden).
Assistant Secretary-General (Security Council Affairs),
Konstantin E. Zinchenko (U.S.S.R.).
Do. (Conference and General Services), Shamaldharee Lall (India).

- Do. (Public Information), Benjamin Cohen (Chile).
 Do. (Legal Affairs), Ivan Kerno (Czechoslovakia).
 Do. (Economic Affairs), David Owen (U.K.).
 Do. (Social Affairs), Guillaume Georges-Picot (France).
 Do. (Trusteeship and Information from Non-Self-Governing Territories), Victor Chi-Tsai Hoo (China).
 Do. (Administrative and Financial Services), Byron Price (U.S.A.).

BUDGET OF THE UNITED NATIONS

The financial year coincides with the calendar year. On February 13, 1946, the General Assembly established a Working Capital Fund of \$25,000,000 (U.S.).

For the year 1953, the appropriation was \$48,327,700. The scale of assessments for the 1953 budget for British Commonwealth countries was: Australia, 1.75 per cent.; Canada, 3.30 per cent.; India, 3.45 per cent.; Pakistan, 0.79 per cent.; New Zealand, 0.48 per cent.; Union of South Africa, 0.83 per cent.; United Kingdom, 10.30 per cent. The United States contribution was 35.12 per cent.; U.S.S.R. was 12.28 per cent.; France was 5.75 per cent.; and China was 5.62 per cent.

UNITED NATIONS EDUCATIONAL SCIENTIFIC AND CULTURAL ORGANIZATION

UNESCO

Unesco House, Avenue Kléber, Paris, 16 (me).

The purpose and functions of the United Nations Educational, Scientific and Cultural Organization, as stated by Article I of the Constitution, are: "to contribute to peace and security by promoting collaboration among the nations through education, science and culture in order to further universal respect for justice, for the rule of law and for the human rights and fundamental freedoms which are affirmed by the peoples of the world, without distinction of race, sex, language or religion, by the Charter of the United Nations; to collaborate in the work of advancing the mutual knowledge and understanding of peoples, through all means of mass communication and to that end recommend such international agreements as may be necessary to promote the free flow of ideas by word and image; to give fresh impulse to popular education and to the spread of culture, by collaborating with Members at their request, in the development of educational activities; by instituting collaboration among the nations, to advance the ideal of equality of educational opportunity without regard to race, sex or any distinctions, economic or social; by suggesting educational methods best suited to prepare the children of the world for the responsibilities of freedom; to maintain, increase and diffuse knowledge by assuring the conservation and protection of the world's inheritance of books, works of art and monuments of history and science and recommending to the nations concerned the necessary international conventions; by encouraging co-operation among the nations in all branches of intellectual activity, including the international exchange of persons active in the fields of education, science and culture and the exchange of publications, objects of artistic and scientific interest and other materials of information; by initiating methods of international co-operation calculated to give the people of all countries access to the printed and published materials produced by any of them."

A Conference was convened in London on November 1, 1945, of representatives of 44 nations. This body drafted a detailed programme of action, designated Paris as Unesco Headquarters, and drew up a Constitution to become effective after twenty nations had formally accepted and signed it. There are now 65 member States:—Afghanistan, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Burma, Cambodia, Canada, Ceylon, China, Colombia, Costa Rica, Cuba, Czechoslovakia, Denmark, Dominican Republic, Ecuador, Egypt, France, Germany, Greece, Guatemala, Haiti, Honduras, Hungary, India, Indonesia, Iraq, Israel, Italy, Japan, Jordan, Korea, Laos, Lebanon, Liberia, Luxembourg, Mexico, Monaco, the Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Panama, Persia, Peru, Philippines, Poland, Salvador, Saudi Arabia, Sweden, Switzerland, Syria, Thailand, Turkey, Union of South Africa, United Kingdom, United States of America, Uruguay, Venezuela, Viet-Nam and Yugoslavia.

The First Session of the General Conference of Unesco was held in Paris in November, 1946. This group elected officers of the organization, and launched its world-wide programme.

Subsequent sessions were held in Mexico City in November, 1947, at Beirut in November/December, 1948, in Paris in September/October, 1949, in Florence in May/June, 1950, and in Paris in June/July, 1951.

The Programme of Unesco is now of a continuing nature, with priority tasks selected from year to year by the General Conference. The Budget for 1952 stands at \$8,718,000. The principal sections of the Programme relate to education (including fundamental and adult education), natural sciences, social sciences, cultural activities, mass communication, rehabilitation, exchange of persons and technical assistance.

Unesco's efforts are more and more concentrated on the realization of certain articles of the Universal Declaration of Human Rights, such as the promotion of free compulsory primary education, universal access to scientific knowledge and participation in the common cultural heritage of mankind, and it is also launching a world-wide campaign of fundamental education on a scale commensurate with the needs.

Director-General, Luther H. Evans (U.S.A.).

Deputy Director-General, John W. Taylor (U.S.A.).

Director, Department of Education, Lione Elvin (U.K.).

Director, Department of Natural Sciences, Pierre Auger (France).

Director, Department of Social Sciences, Alva Myrdal (Sweden).

Director, Department of Cultural Affairs, Jean Thomas (France).

Director, Department of Mass Communications, D. H. Schneider (U.S.A.).

Director, Department of Technical Assistance, Malcolm Adiseshiah (India).

FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS

FAO

Viale delle Terme di Caracalla, Rome.

The Food and Agriculture Organization of the United Nations was established in October, 1945, as an agency to further separate and collective action of member nations for the purposes of:—

- (i) Raising levels of nutrition and standards of living of the peoples under their respective jurisdictions.
- (ii) Securing improvements in the efficiency of the production and distribution of all foods and agricultural products.
- (iii) Bettering the condition of rural populations, and thus contributing toward an expanding world economy.

FAO is designed to work toward these ends by (1) collecting, analysing, interpreting, and disseminating information relating to nutrition, food and agriculture and agricultural products; (2) promoting and where necessary recommending national and international action; and (3) furnishing technical assistance to governments that request it.

On January 1, 1952, F.A.O. had 68 member countries: Afghanistan, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Burma, Cambodia, Canada, Ceylon, Chile, China, Colombia, Costa Rica, Cuba, Denmark, Dominican Republic, Ecuador, Egypt, Ethiopia, Finland, France, German Federal Republic, Greece, Guatemala, Haiti, Honduras, Iceland, India, Indonesia, Iraq, Irish Republic, Israel, Italy, Japan, Jordan, Korea, Laos, Lebanon, Liberia, Luxembourg, Mexico, Nepal, Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Panama, Paraguay, Philippines, Portugal, Saudi Arabia, Salvador, Spain, Sweden, Switzerland, Syria, Thailand, Turkey, Union of South Africa, United Kingdom, United States, Uruguay, Venezuela, Viet Nam and Yugoslavia.

The general policies of the organization are directed by its Conference on which each member nation has one representative. A council of the Food and Agricultural Organization, composed of 18 member nations, acts for the Conference between its sessions.

Director-General, Norris E. Dodd (U.S.A.).

Deputy Director-General, Sir Herbert Bradley, K.B.E.

Secretary-General, Marc Veillet-Lavalée.

Special Assistants, F. L. McDougall; Joseph L. Orr. *Regional Representative for North America*, Gove Hambridge.

Regional Representative for Near East, Mahmoud Tewfik Hefnawy.

Regional Representative for Asia and Far East, W. H. Cummings.

Regional Officer for Latin America, W. H. Casseres.

Directors of Divisions: F. T. Wahlen (*Agriculture*); A. H. Boerma (*Economics*); D. B. Finn (*Fisheries*); Marcel Leloup (*Forestry*); W. R. Aykroyd (*Nutrition*); F. Weisl (*Administration*); Duncan Wall (*Information and Education*).

INTERNATIONAL CIVIL AVIATION ORGANIZATION

ICAO

International Aviation Building, Montreal, Canada (with regional offices in Lima, Paris, Cairo, and Melbourne).

The International Civil Aviation Organization came into being on April 4, 1947, when the required number of states (26) ratified the Convention on International Civil Aviation which was drawn up at the International Civil Aviation Conference held at Chicago, U.S.A., in November-December, 1944. On July 1, 1953, 60 states were members of ICAO:—Afghanistan, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Burma, Canada, Ceylon, Chile, Colombia, Cuba, Czechoslovakia, Denmark, Dominican Republic, Egypt, Ethiopia, Finland, France, Greece, Guatemala, Haiti, Hon-

duras, Iceland, India, Indonesia, Iran, Iraq, Irish Republic, Israel, Italy, Jordan, Korea, Lebanon, Liberia, Libya, Luxembourg, Mexico, Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Paraguay, Peru, Philippines, Poland, Portugal, Salvador, Spain, Sweden, Switzerland, Syria, Thailand, Turkey, Union of South Africa, United Kingdom, United States and Venezuela.

The objectives of the Organization are described in the Preamble to the Convention on International Civil Aviation as "to ensure that international civil aviation should be developed in a safe and orderly manner and that international air transport services should be established on the basis of equality of opportunity and operated soundly and economically."

ICAO's governing bodies are the Assembly and the Council. The Assembly is the legislative body, composed of delegates from member states with each state being entitled to one vote; the Council is the executive body, composed of 22 members elected by the Assembly. The first meeting of the Assembly was held in Montreal from May 6 to 27, 1947. The Third Council of ICAO was elected by the Seventh Session of the Assembly in 1953.

President of the Council, Dr. Edward Warner.
Secretary-General, E. C. R. Ljungberg.

INTERNATIONAL LABOUR ORGANIZATION

ILO

International Labour Office, Geneva, Switzerland.

The ILO, established in 1919 as an autonomous institution associated with the League of Nations, is a tripartite organization, in which governments, employers and workers are directly represented. It seeks through international action to improve labour conditions, raise living standards, and promote economic and social stability. In 1946, the United Nations and the ILO concluded an agreement under which the ILO was recognized as the specialized agency responsible for international action in the above fields towards the accomplishment of the purposes set forth in the ILO's Constitution.

The ILO consists of the International Labour Conference, which usually meets yearly, the Governing Body, and the International Labour Office.

The Conference is composed of national delegations comprising two government representatives and one delegate each from the most representative worker and employer organizations within each country, together with their advisers.

The 32-member Governing Body is composed of the representatives of 16 Governments, eight worker members and eight employer members. It is selected by the Conference every three years. It selects items for the agenda of the Conference, and supervises the work of the Office and of the various committees and commissions.

Eight Governments hold seats on the Governing Body because of their industrial importance. These are at present Brazil, Canada, China, France, India, Italy, the United Kingdom and the United States. Belgium, Chile, Finland, Iran, Mexico, Pakistan, Portugal and Venezuela hold the remaining eight Government seats by election.

The Office undertakes research on labour, social and economic questions, acts as an advisory service to Governments, and prepares documents on the items of the agenda of the various conferences and meetings. It also publishes a number of periodicals, including the *International Labour Review*, *Occupational Safety and Health*, *Industry and Labour*, *Legislative Series*, and the *Year Book of*

Labour Statistics. In addition, it issues frequent reports on a wide range of social and economic questions. Most of these are published in English, French and Spanish.

In 1940 the Office's principal working centre was transferred from Geneva to Montreal and in 1948 was re-established at Geneva. Its liaison office with the United Nations is in New York.

One of the ILO's principal functions is the formulation of international standards in the form of International Labour Conventions and Recommendations. Member countries are required to submit Conventions to their competent national authorities with a view to ratification. If a country ratifies a Convention, it agrees to bring its laws into line with its terms and to report annually how these regulations are being applied. More than 1,350 ratifications of 103 Conventions have been deposited to date. Machinery is available to ascertain whether Conventions thus ratified are effectively applied.

Recommendations do not require ratification, but Member States are obliged to consider them with a view to giving effect to their provisions by legislation or other action. Member States also undertake to report regularly on their position in regard to Recommendations and unratified Conventions.

In addition to its usual activities in the fields of study and research, advice to Governments and the setting of international labour standards, the Organization has initiated a worldwide manpower programme. This programme has aimed at assisting the Organization's member countries to make more efficient use of their labour resources to the end that productivity may be increased, and it has sought to stimulate the transfer of labour from manpower-surplus areas to fill manpower needs elsewhere. It has furnished technical aid in the fields of employment service organization, vocational guidance, vocational training and retraining, and migration.

The following States are at present Members of the ILO: Afghanistan, Albania, Argentine Republic, Australia, Austria, Belgium, Bolivia, Brazil, Bulgaria, Burma, Canada, Ceylon, Chile, China, Colombia, Costa Rica, Cuba, Czechoslovakia, Denmark, Dominican Republic, Ecuador, Egypt, El Salvador, Ethiopia, Finland, France, Federal Republic of Germany, Greece, Guatemala, Haiti, Hungary, Iceland, India, Indonesia, Iran, Iraq, Republic of Ireland, Israel, Italy, Japan, Lebanon, Liberia, Libya, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Pakistan, Panama, Peru, Philippine Republic, Poland, Portugal, Syria, Sweden, Switzerland, Thailand, Turkey, Union of South Africa, United Kingdom, United States, Uruguay, Viet Nam, Venezuela and Yugoslavia.

OFFICERS OF THE GOVERNING BODY

Chairman, A. M. Malik (Pakistan—Government Member).

Vice-Chairman, Pierre Waline (France—Employers' Member); Léon Jouhaux (France—Workers' Member).

Director-General, David A. Morse.

Deputy Director-General, Jef Rens.

Asst. Directors-General, Raghunath Rao; C. Wilfred Jenks; Luis Alvarado; Jean Morellet; W. Yalden-Thomson.

Treasurer, F. H. Wheeler.

Director, London Branch Office, Frank Pickford, 38-39 Parliament Street, S.W.1.

Other branch offices are located at Ottawa, Washington, D.C., Paris, New Delhi, Bonn and Rome.

INTERNATIONAL TRADE ORGANIZATION ITO

c/o ICITO, Palais des Nations, Geneva.

The Economic and Social Council of the United Nations established, on February 18, 1946, a Preparatory Committee of the International Conference on Trade and Employment to prepare an agenda and a draft convention for an International Trade Organization for consideration at the Conference. The ITO was designed for the expansion of world trade and the removal of trade barriers on a world-wide scale.

The draft convention, or Charter, was worked out by a Preparatory Committee which met in 1946 and 1947. During the second session at Geneva in 1947, it was decided to proceed with multilateral tariff negotiations among the members of the Committee.

The Charter was discussed at a conference held at Havana (Nov. 1947–March, 1948), the final act being signed by 54 States. Early in 1951, however, the United States Government indicated that it did not intend to ratify the Havana Charter, but was looking towards the strengthening of the General Agreement on Tariffs and Trade (GATT). An interim Commission, ICITO, was created to carry out liaison duties and to prepare for the first Conference of ITO. Since 1951, the Secretariat of ICITO has been performing services for the contracting parties to GATT.

The 1947 tariff reductions were incorporated in GATT, which is both a framework to protect the tariff concessions and a treaty affording most favoured nation treatment to the signatories. Thirty-three countries, comprising four-fifths of the world's trade, have become contracting parties to GATT, within the limits of their existing legislation. A second series of tariff negotiations was held at Annecy from April to October, 1949, and a third series at Torquay from September, 1950 to April, 1951, bringing to 55,000 the number of tariff items consolidated under GATT. The contracting parties have held seven sessions, at which trade problems, arising out of the Agreement, have been dealt with.

WORLD HEALTH ORGANIZATION WHO

Palais des Nations, Geneva.

The World Health Organization of the United Nations came into being on April 7, 1948, after its constitution had been ratified by 26 U.N. members. On July 15, 1952, WHO had a total of 80 members and 3 associate members (Southern Rhodesia, Morocco and Tunisia). The non-members of the United Nations are italicised:—Afghanistan, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Burma, Cambodia, Canada, Ceylon, Chile, China, Costa Rica, Cuba, Denmark, Dominican Republic, Ecuador, Egypt, El Salvador, Ethiopia, Finland, France, Germany (Federal Republic), Greece, Guatemala, Haiti, Honduras, Iceland, India, Indonesia, Iran, Iraq, Irish Republic, Israel, Italy, Japan, Jordan, Korea (South), Laos, Lebanon, Liberia, Libya, Luxembourg, Mexico, Monaco, Nepal, Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Panama, Paraguay, Peru, Philippines, Portugal, Saudi Arabia, Spain, Siam, Sweden, Switzerland, Syria, Thailand, Turkey, Union of S. Africa, U.K., U.S.A., Uruguay, Venezuela, Viet Nam, and Yugoslavia. Albania, Bulgaria, Byelorussia, Czechoslovakia, Hungary, Poland, Roumania, Ukraine and U.S.S.R. have at various times notified the Director-General that their States no longer consider themselves

members of the organization. Since the constitution does not provide for withdrawal, they remain on the list of member States.

Since 1948, six World Health Assemblies have been held, five of them in Geneva and one in Rome. The 1953 Assembly was held in Geneva from May 5 to 22. Dr. Murchad Khater (Syria) was President. *Director-General*, Dr. M. G. Candau (Brazil). *Deputy Director-General*, Dr. P. Dorolle (France).

UNIVERSAL POSTAL UNION

UPU

Schoshaldenstrasse 46, Berne, Switzerland

The Universal Postal Union was founded at Berne, Switzerland, by the Postal Convention, October 9, 1874. The Union was extended and improved by the Postal Congresses of Paris (1878), Lisbon (1885), Vienna (1891), Washington (1897), Rome (1906), Madrid (1920), Stockholm (1924), London (1929), Cairo (1934), Buenos Aires (1939), Paris (1947) and Brussels (1952), and by the conferences of Berne (1876), Paris (1880), Brussels (1890), Zermatt (1921), Nice (1922), Cortina d'Ampezzo (1925), The Hague (1927), Paris (1928) and Ottawa (1933).

The Union is composed of all the countries of the world with the exception of Nepal, the Maldives and Laccadive Islands and Mongolia. In accordance with the resolution of the General Assembly concerning agencies in relationship with the United Nations, Germany is temporarily suspended from the privileges of membership. The international Bureau functions as the central office of the Union. The Union was established to alleviate the uncertainty, confusion and excessive cost of international postal communications by uniting its member countries in a single postal territory for the reciprocal exchange of mail. The Bureau acts as a liaison organ, and furnishes information and advice to the countries belonging to the Union.

The 12th Congress of the UPU, following negotiations with a committee of the Economic and Social Council of the United Nations, approved in May 1947 an agreement establishing the relationship between the two organizations. The agreement was approved by the General Assembly of the United Nations on November 15, 1947. It came into force on July 1, 1948.

Between meetings of the Congress, an executive committee, set up by the Paris Congress of 1947, maintains the continuity of the work of the UPU.

INTERNATIONAL TELECOMMUNICATION UNION

ITU

Geneva, Switzerland.

The ITU came into being in 1865, when the International Telegraph Union was created in Paris. In 1932, in Madrid, this convention was combined with the International Radiotelegraph Convention of 1906, so as to form the International Telecommunication Convention, the basic instrument of the International Telecommunication Union.

The ITU was set up to organize and regulate exchanges of international telecommunications by telegraph, telephone, and radio. For this purpose appropriate regulations have been drawn up.

A plenipotentiary Conference of the ITU met at Atlantic City, N.J. in 1947, in order to revise the Madrid Convention (1932). Annex 1 of the

Atlantic City Convention (1947) contains a list of 78 countries which are ITU Members with full rights upon signature and ratification of, or accession to, this Convention.

The former ITU Convention provided for a Bureau which acted in Berne (Switzerland) from 1868 to 1948 as the Central Office of the Union. Until the end of 1948 it was under the control of the Swiss Government. Since 1948 it has been under the supervision of the new Administrative Council. The ITU Central Office moved in October, 1948, from Berne to Geneva and its official name is now: General Secretariat of the ITU.

The Atlantic City Convention came into force on January 1, 1949. A new Convention was signed in Buenos Aires on Dec. 22, 1952. It comes into force on January 1, 1954.

Secretary-General, L. Mulatier (France).

THE UNITED NATIONS ASSOCIATION OF GREAT BRITAIN AND NORTHERN IRELAND

UNA

25 Charles Street, W.x.

The general purpose of UNA is to encourage people to think seriously about international affairs and the need for popular understanding and support for the attempt to organize a just and peaceful international system through the United Nations.

Its policy is: (1) to promote friendship, understanding and co-operation among the peoples of the world; (2) to win active public support for the United Nations; (3) to ensure justice for all nations and the welfare of all peoples by the full use and development of the United Nations; (4) to see that Great Britain carries out her obligations under the Charter, including, if necessary, the use of arms to uphold the law.

CHIEF OFFICERS

Hon. Life President, The Viscount Cecil of Chelwood.

Hon. Presidents, The Rt. Hon. C. R. Attlee, C.H. M.P.; The Lady Violet Bonham Carter, D.B.E.; The Rt. Hon. Sir Winston S. Churchill, K.G., O.M., C.B., M.P.

Joint Presidents, Gilbert Murray, O.M., D.C.L., LL.D., D.Litt.; Miss K. D. Courtney, C.B.E.

Chairman of the Executive Committee, Maj.-Gen. L. O. Lyne, C.B., D.S.O.

Director-General, C. W. Judd.

Hon. Treasurer, M. Lubbock.

Secretary, D. H. Ennals.

SCOTTISH NATIONAL COUNCIL

3 Rutland Square, Edinburgh 2.

President, Sheriff Sir George Morton, K.B.E., Q.C.

Secretary, R. A. Robinson.

WELSH NATIONAL COUNCIL

Welsh National Temple of Peace and Health.
Cathays Park, Cardiff.

President, Rev. Gwilym Davies.

Secretary, W. Arnold.

COUNCIL FOR EDUCATION IN WORLD CITIZENSHIP

President, Gilbert Murray, O.M., D.C.L., LL.D., D.Litt.

Secretary, T. Lawson.

Foreign Countries

The following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Courts, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies, Legations, and Consulates-General in London for various corrections and additions.

Salaries and Allowances.

The Salaries of Officers of Branch "A" of H.M. Foreign Service are shown below. In addition foreign allowances and furnished accommodation (or rent allowances in lieu thereof) are assigned to Officers serving abroad:—

Grade I—£4,500.	Grade V—£2,000.
Grade II—£3,250.	Grade VI—£1,500 to £2,000.
Grade III—£2,850.	Grade VII—£1,000 to £1,375.
Grade IV—£2,500.	Grade VIII—£615 to £750.
Grade IX—£400 to £560.	

ABYSSINIA. See Ethiopia.

AFGHANISTAN

(Afghānistān)

King of Afghanistan, H.M. Zahir Shah, born Oct. 15, 1914, acceded Nov. 8, 1933 (on the assassination of his father, Nadir Shah); married Nov. 7, 1931, Humaira, daughter of Sardar Ahmad Shah Khan, and has surviving issue four sons and two daughters: H.R.H. Prince Ahmed Shah Khan, b. Sept. 23, 1934; H.R.H. Prince Mohammad Nadir, b. 1941; H.R.H. Prince Shah Mahmud Khan, b. 1946; H.R.H. Princess Bilqis, b. 1932; H.R.H. Princess Maryam, b. 1936; and H.R.H. Prince Daud, b. 1949.

EMBASSY IN LONDON.

31 Princes Gate, S.W.7.
[Kensington: 7507.]

Ambassador in London, H.R.H. Marshal Shah Wali (1950).

Minister-Counsellor, Mir Mohammed Siddiq Hussaini.

1st Secretary, Sayyed Masoud Pohanyar.

3rd Secretary, Mohammed Sharif Agier.

Press Attaché, Rahman Pazhwak.

Cultural Attaché, Mohammed Ishaque.

Attché, M. Sikander.

Afghanistan lies to the N. and W. of Western Pakistan. Its ancient name was Aryana, by which title it is referred to by Strabo, the Greek geographer who lived in the 1st century B.C. The estimated area is 250,000 sq. miles, and the population is estimated (1946) at about 10 to 12 millions. The population is very mixed. The Duranis have predominated since 1747, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Moslems, except the Hazaras and Kizilbashes, who belong to the Shia sect.

Afghanistan is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1896-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the N.W. Frontier Province (boundary fixed 1895). The northern boundary runs from Zulfiqar on the Persian frontier to Kushk, the Russian railway terminus, to the Oxus (or Amu Darya, "Mother of Rivers"), which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier

on the branch line from Merv, and thence N.E. was fixed by the Pamir agreement of 1895. The Russo-Afghan frontier was demarcated by the Tashkent Boundary Commission in 1948. The Indo-Afghan frontier was settled by the Durand agreement of 1893. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by Mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures.

Afghanistan is divided into seven major provinces, Kabul, Mazar, Kandahar, Herat, Eastern, Southern and Qataghan, and five minor provinces, the Farah-Chakhansur, Girishk, Qhazni, Badakshan and Maimana. Each province is under a Governor (called in major provinces *Naiib-ul-Hakumah*, and in minor provinces *Hakim-i-Ala*).

Government.—Amir Abdurrahman (1880-1901) established a strong central government, with a regular civil and military organization, including offices for public works, posts, police, finance, trade, &c. The Army has been reorganized and is recruited by annual calls; service is for two years with the colours and eight with the reserve. The peace strength is about 64,000. A military academy and military colleges are located in Kabul; and provision is made for training of regular officers abroad. A small Air Force is maintained. Factories for munitions, and for various commercial products, have been erected in Kabul and elsewhere.

As the result of a British mission to Kabul in 1904-5, the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of March 21, 1905. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence. The Amir Habibullah Khan was assassinated on February 20, 1919; his brother, Nasrulla Khan, seized the throne by a *coup d'état* and temporarily held the reins of government at Kabul, but the Amir's third son, Amanulla Khan, soon after declared himself, and was recognized as King. Afghan troops crossed the Indian frontier on May 2, 1919, on which the Indian Government took immediate steps to expel them; fighting followed and Dakka was occupied by British troops, but overtures were made by King Amanulla and a treaty of peace was signed in August. By this treaty Afghanistan is left formally free and independent. By treaty of Nov. 22, 1921, Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognize boundaries then existent, subject to a slight re-adjustment near the Khyber; and to establish Legations and consular officers. As successor state to the British Government in India, Pakistan has agreed that her relations with Afghanistan shall be based on the 1921 treaty. Afghanistan applied in September, 1946, for admission to the United Nations Organization and has since been admitted.

Under the Constitution of Oct. 31, 1931, there is a Senate of 43 nominated members and a National Council of 171 elected members, with a Grand Assembly (*Loe Jirgeh*) which is summoned on important occasions. The administration is entrusted to a Council of Ministers.

The laws of Afghanistan are based on the "Shariat," or Islamic law, and tribal custom.

Production.—Agriculture and sheep raising are the principal industries. There are generally two

crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and dal. Sugar beet and cotton are grown. Afghanistan is rich in fruits. Sheep, including the Karakuli, and transport animals are bred. Silk, woollen and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapis lazuli, gold, chrome and talc are found.

The following main roads are open to motor traffic, but are mostly unmetalled—Kabul-Khyber (175 miles); Kabul-Gardez (80 miles); Kabul-Kandahar-Chaman (380 miles); Kandahar-Farah-Herat (400 miles); Kabul-Bamian (140 miles); Kabul - Mazar - i - Sharif (380 miles); Mazar-i-Sharif-Maimana-Herat (500 miles) and Kabul-Khanabad-Falzabad (450 miles). A network of minor roads fit for motor traffic in fine weather links up all important towns and districts.

Goods are still conveyed by pack animals, but motor transport is rapidly taking the place of pack transport as the chief means of conveyance. The chief trade routes to Pakistan and India are the Khyber Pass route, from Kabul to Peshawar (190 miles), and the road from Kandahar to Chaman (70 miles).

Language and Literature.—The languages of the country are Persian and Pushtu and Turki (spoken by Uzbaks and Turkoman tribes in the North). Education is free and nominally compulsory, elementary schools having been established in most centres; there are secondary schools in large urban areas and a university (established in 1932) at the capital.

FINANCE. *Afghanis.*

National Income..... 250,000,000

The annual revenue consists largely of payments in kind. There are taxes on land, sales of animals, a grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories and mining royalties.

Afghani (of 100 *Puls* = about 5*d.* at official rate of exchange).

353.44 *Afghanis* = 100 Indian Rupees.
508.71 " = 100 Pakistani Rupees.
47.04 " = £1.
16.8 " = \$1.

TRADE.

Imports from U.K. (1952)..... £426,539
Exports to U.K. (1952)..... 315,458

Exports are mainly Persian lambskins (Karakuli), fruits, cotton, raw wool, carpets and spices, while the imports are chiefly cotton yarn and piece goods, metals, leather goods, tea, sugar, jute manufactures, paper and cement.

CAPITAL, Kabul (about 200,000). The chief commercial centres are Kabul and Kandahar (77,000). Other provincial capitals are Herat (75,000), Mazar-i-Sharif (42,000), Jalalabad (22,000) and Khanabad (18,000).

FLAG; Green, red and black, with white device in centre.

BRITISH EMBASSY. (Kabul.)

Ambassador Extraordinary and Plenipotentiary, His Excellency Daniel William Lascelles, C.M.G. (1953).

1st Secretary, W. B. Ledwidge.

Military Attaché, Col. R. A. Conner.

2nd Secretaries, G. K. Dulling; C. W. Martin.

Kabul is distant 7,500 miles from London, transit 21 days; by air 4-6 days.

ALBANIA

Head of the State, Hadji Lechi, assumed office, July 24 1953.

Prime Minister, General Enver Hodja, recognized by Gt. Britain, U.S.A. and U.S.S.R., Nov. 10, 1945.

On Nov. 10, 1945, the British, U.S.A. and U.S.S.R. governments decided to recognize the Albanian administration under Colonel-General Enver Hodja as the provisional government of Albania on the understanding that free elections would be held at an early date, in order that a truly representative government could be formed.

Elections were held in December, 1945, and on Jan. 11, 1946, the Constituent Assembly declared Albania an independent Republic, and on Aug. 7, 1946, Albania applied for admission to the United Nations, but its entry was vetoed by Great Britain and the U.S.A., who had broken off relations with the Albanian Government. The area of the Republic is estimated at 10,700 sq. miles, with an estimated population (1947) of 1,150,000.

Albania is almost entirely an agricultural country and the staple crops are wheat and maize, the estimated production of which in 1946 was 60 and 80 thousand metric tons respectively.

TRADE.

	1949
Imports from U.K.....	£7,000
Exports to U.K.....	nil

CAPITAL: Tirana (pop. 30,000).

ANDORRA

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 5,200; it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a judge, and two lay vicars (*viguers*) appointed by France and the Spanish Bishop of Urgel. The franchise was enlarged after a bloodless revolution in April, 1933. The language of the country is Catalan. French francs and Spanish pesetas are the accepted currency. Imports from U.K. (1952) £11,300. Andorra, the Capital, has about 600 inhabitants.

FLAG: Three horizontal bands, azure, yellow, red; crown on yellow band.

ARABIA

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30'—60° E. long. and 12° 45'—34° 50' N. lat. The north-western limit is generally taken from Akaba at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, Dahana, and Rub' Al Khali deserts),

and the total population is believed to be about 10,000,000.

Language and Literature.—Arabic is spoken not only in Arabia, but in many other countries, either as the principal or auxiliary tongue, notably in Egypt and the Sudan, Libya, Morocco, Algeria, Iraq, Palestine, Jordan, Syria, Lebanon; and to some extent also in Nigeria, Madagascar and Zanzibar. Owing to Moorish incursions it was formerly spoken in Spain, the Balearic Islands and Sicily. There are anthologies of pre- and post-Islamic poetry and a considerable prose literature, including popular romances and story cycles (such as "The Thousand Nights and One Night"), historical and biographical studies, and resulting from the westernizing movement, there is a general revival of learning among Arabic speaking peoples. Many daily newspapers are published in Arabic and there is a native Arabic drama.

THE KINGDOM OF SAUDI ARABIA

(al Mamlaka al Arabiyya as-Sa'udiyya.)

King of Saudi Arabia, Ibn Saud (H. M. Abdul Aziz Ibn Abdul Rahman al Faisal Al Saud), G.C.B., G.C.L.E., born about 1880. The family of Ibn Saud previously ruled in Nejd but was deposed by Ibn al Rashid and took refuge in Kuwait; Ibn Saud occupied Riyadh in 1900 and conquered the larger part of Nejd in 1913. In 1921 he became Sultan of Nejd, conquered the Hejaz and became King in 1926. He changed the name of his Kingdom to *Saudi Arabia* in 1932.

Heir Apparent, H.R.H. the Amir Saud Ibn Abdul Aziz Al Saud, G.B.E., born 1902.

Foreign Affairs, H.R.H. Amir Faisal, G.B.E.

Finance, Sheikh Abdulla Suleiman al Hamdan.

Interior and Health, H.R.H. Amir Abdulla al Faisal.

Defence and Aviation, H.R.H. Amir Misha'al al Saud.

EMBASSY IN LONDON.

30 Belgrave Square, S.W.1.

[Sloane: 3898.]

Ambassador in London, His Excellency Sheikh Hafiz Wahba, K.C.V.O. (1930).

1st Secretary, Abdul Rahman Helaissi.

2nd Secretaries, Hasan Jamal al-Husseini; Fuad A. Nazir.

Press Attaché, Moustapha Wahba.

The Kingdom of Saudi Arabia, so named since Sept. 20, 1932, is a personal union of two countries, the Sultan of Nejd being also King of the Hejaz.

By the *Treaty of Jeddah* (May 20, 1927) Great Britain recognized Ibn Saud as an independent ruler, King of the Hejaz and of Nejd and its Dependencies.

The total area of the Kingdom is about 927,000 sq. miles, with an estimated population of not more than 6 millions.

In the 18th century Nejd was an independent State and the stronghold of the Wahhabi sect. It subsequently fell under the Turkish yoke, but in 1913 the present King threw off Turkish rule and captured from the Turks the Province of Hasa. In 1921 he added to his dominions the territories of the Rashid family of Jebel Shammar, which he captured by force of arms; in 1925 he completed the conquest of the Hejaz, and in 1926 accepted the surrender of the greater part of Asir, the whole of which is now part of the Kingdom.

Nejd ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahana Deserts, and reaches eastward to the Persian Gulf (Hasa). The population is largely nomadic

and is estimated at close on 3,000,000, the majority being Moslems of the Wahhabi movement. There is little agriculture, but wheat and barley are grown, and there is an experimental farm, irrigated from natural deep pools and covering 3,000 acres, at al-Kharj, about 50 miles south of Riyadh. The principal occupation of the bulk of the population is camel and sheep raising, but oil makes by far the largest contribution to the economy of the country. Oil was found in commercial quantities at Dammam, near Dhahran in the Hasa in 1938, and by 1952 production had reached a rate of 380,860,000 barrels per annum. Exports other than oil are negligible. The capital is Riyadh (60,000), and the principal trading centres are Hofuf (the chief town of the Hasa province) (100,000), Ψ Al Khobar and Ψ Dammam on the Persian Gulf littoral, Anaiza, Buraida, Hail (20,000), and Jauif. The old ports (Persian Gulf) were Ψ Qatif, Ψ Uqair and Ψ Al Khobar, which were suitable only for sailing craft, but the Arabian-American Company, which is exploiting the Hasa oil under a 60 years' lease, has built a deep-water port for its own purposes at Ψ Ras Tannura, and a new civil deep-water port, with a pier seven miles long, was brought into use at Ψ Dammam in 1950. A railway is now in operation from Dammam through Hofuf to Riyadh, and it is proposed to extend it to Jeddah via Hail and Medina.

The *Hejaz* ("The Boundary"—between Nejd and Tihamah) extends from Asir in S. to Transjordan in N., and from the Red Sea, the Gulf of Akaba in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 112,500 sq. miles, with a population of from 1,000,000 to 1,500,000, including many nomad tribes. On the coast are the small ports of El Wejh, Yanbu', Rabegh, Gizan and Ψ Jeddah, the main port of Saudi Arabia, where a new deep-water pier and port buildings were brought into use in 1950. Jeddah contains the ruins of the reputed "tomb of Eve, the mother of mankind"; and inland are many settlements through which runs the course of the now disused Saudi-Arabian section of the Hejaz Railway. The *Oasis of Khaiibar*, east of the railway, contains a considerable population, descendants of former negro slaves, with a centre at Kasr el Yahudi. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. In each of the years 1948-51, the pilgrims to Mecca from overseas numbered about 100,000, and in 1952 the number was about 140,000. *Medina* (al-Madinat al-Munawwarat, "The City of Light"), once the terminus of the Hejaz Railway, 820 miles from Damascus, has a permanent population of about 20,000 and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabi'a, A.H. 12). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. *Mecca*, the birth-place of the Prophet, is 45 miles east of the seaport of Jeddah, by road, and about 200 miles south of Medina, and has a fixed population estimated at 100,000. The city contains the great mosque surrounding the *Kaaba*, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. Ψ Jeddah (100,000) is the principal port and commercial centre.

A British company, in which there are U.S., Canadian and Saudi Arabian Government interests, is working the ancient gold mines located in the hills of the Hejaz.

Asir ("The Inaccessible") extends, geographically, from a line drawn inland from Birk on the southern limit of Hejaz to the northern boundary of the Yemen, some 12 miles N. of the port of Meidl. Its breadth extends about 180 miles eastwards to Bisha in the north and to the boundary of the Beni Yam in the south. According to ancient Arab geographers, Asir used to be considered as a part of the Yemen. The territory includes the Farsan Islands, where prospectors have searched for oil, but without success. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. Capital, Abha.

Trade and Finance.—Formerly the annual pilgrimage to the Holy Places of the Hejaz provided Saudi Arabia with virtually the whole of her means of payment for imports; it is estimated to have brought £10,000,000 in foreign exchange to the Hejaz in each of the years 1948-50. It is therefore not surprising that the foreign trade of the country was largely conducted by the merchant communities of Jeddah and Mecca. Industry was, and is, non-existent. Imports are estimated to have averaged about £2,500,000 annually before 1939, of which the United Kingdom contributed less than £100,000. India was traditionally Saudi Arabia's principal commercial connexion; and indeed the legal tender of Saudi Arabia, the silver riyal, is of the same weight and fineness as the old Indian rupee. Religious objections to usury have affected the development of banking in Saudi Arabia. No paper currency is in use. Gold coin is still employed as a means of payment for large transactions and as a standard of value. Exchange rates are subject to violent fluctuations. The country shared the inflationary experiences of other Middle East countries during the war years. The effect of oil developments and of investment, mainly American, in Saudi Arabia has been to revolutionize the country's foreign exchange position and greatly to increase the size of the market.

	1951	1952
Imports from U.K....	£3,680,000	£7,340,000
Exports to U.K.....	38,360,000	35,555,000

Communications.—The new railway from the new port of Dammam to the oilfields at Abqai and through Hofuf to Riyadh was opened late in 1951. The only completed metalled road connects Mecca with its Port of Jeddah, but a new road from Jeddah to Medina (about 410 miles) has been partially completed by a British firm and the remainder is under construction by a local contractor. The Saudi Arabian Government employs Transworld Airlines as its agents for the operation of part of its internal air communications, together with 5 Bristol Wayfarers of its own, and scheduled services are flown between Jeddah, Taif, Riyadh, Hofuf and Dhahran. There are first-class airports at Dhahran, originally built by the United States Army as a military base, and at Jeddah. The other airfields named are being developed. Saudi Arabian airlines also maintain regular services to Cairo and Beirut. Twice-weekly services operated by Aden Airways, a subsidiary of B.O.A.C., Air Liban and Misrair call at Jeddah, the route of Aden Airways including Cairo-Luxor-Jeddah-Port Sudan-Asmara-Kamaran-Aden and return.

Education.—There are some thirty primary schools, five secondary schools, and one preparatory school which prepares students who have completed their secondary course for University training, in Egypt or elsewhere. There is no University in Saudi Arabia. With three exceptions, all schools are maintained by the Government. Instruction is given to boys only. There are no girls' schools.

SAUDI ARABIAN FLAG: Green oblong, white device in centre: "There is no God but God, Muhammad is the Prophet of God," and a white scimitar beneath the lettering.

CAPITAL, Riyadh, population about 100,000.

THE SHAIKHDOM OF KUWAIT

Ruler, Shaikh Abdulla as-Salim al Subah, K.C.M.G., C.I.E., born 1895, acceded Jan. 28, 1950.

Kuwait is an independent Arab Shaikhdom in special treaty relations with Her Majesty's Government. It extends along the shore of the Persian Gulf from Iraq to Saudi Arabia, with an area of about 3,650 square miles and a population estimated at about 160,000. The port of Kuwait, the capital (pop. about 150,000), is an entrepôt for goods for the interior, and for the export of pearls (in diminishing quantities), skins and wool. Imports, other than those for the Kuwait Oil Company, for the year 1952-53 amounted to £16,000,000, while exports, including re-exports, amounted to £2,449,009. Kuwait is traditionally a dhow-building centre, but the craft is declining. The centre of the Kuwait Oil Company's production is at Burgan, south of Kuwait. In 1952 37,000,000 tons of crude oil were exported from the new jetty constructed by the company at Mina al Ahmadi, about five miles from Ahmadi, the company's administrative and residential centre. In December 1951 a new agreement was reached between the Shaikh of Kuwait and the Kuwait Oil Company, under which the Shaikh became personally entitled to an equal share of the Company's profits. The Company is jointly owned by the Anglo-Iranian Oil Company and the American Gulf Exploration Company. The total local European and American population was about 2,000 in 1953. Oil was also struck in the Kuwait-Saudi Arabian Neutral Zone to the South of the State early in 1953. The concession for this area is held by the American Independent Oil Co. and the Pacific Western Oil Corporation.

In view of the very considerable oil revenues, the Kuwait Government has embarked on a large scale development scheme and plans for social services. The first major installation to be opened under the new scheme was a plant for distilling fresh water from the sea at the rate of 1,000,000 gallons a day.

Ships of eight lines make regular calls at Kuwait. B.O.A.C., Iraqi Airways, Cyprus Airways, Misrair, Air Liban, Middle East Airlines, Syrian Airlines and Iranian Airways operate scheduled air services; and other companies make non-scheduled flights to Kuwait under charter. Wireless communication is managed by Cable and Wireless, Ltd. The Post Office is run by the British G.P.O. Banking is done by the British Bank of Iran and the Middle East and the National Bank of Kuwait. The currency is the Indian rupee.

FLAG: Red, with white lettering.

British Political Agent, C. J. Pelly, C.M.G., O.B.E.
Assistant Political Agent G. C. Mayhew.

THE SULTANATE OF MUSCAT & OMAN

Sultan, H. H. Said bin Taimur, born, Aug. 13, 1910, succeeded his father (as 13th of his dynasty to be Sultan of Muscat and Oman), Feb. 10, 1932. The bicentenary of the Al Bu Said dynasty, to which the Sultan of Muscat and the Sultan of Zanzibar belong, was celebrated on Nov. 20, 1944.

The independent State of Muscat and Oman is situated at the easterly corner of Arabia. Its seaboard is nearly 1,000 miles long and extends from near Tibba on the west coast of the Musandam Peninsula round to Ras Darbat Ali. Ras Darbat Ali marks the boundary between the Sultanate and the territory of the Sultan of Qishin and Soqatra, a Sultanate within the Aden Protectorate. A small strip of the coast on the east side of the Musandam Peninsula from Dibbah to Khor Kalba belongs to chiefs of Trucial Oman. The Sultanate extends inland to the borders of the Rub'al Khali or "Empty Quarter" as the South-Eastern Arabian Desert is called. Physically, the Sultanate consists of 3 divisions, a coastal plain, a range of hills and a plateau. The coastal plain varies in width from 10 miles in the neighbourhood of Suwaiq to practically nothing in the vicinity of Matrah and Muscat towns, where the hills descend abruptly into the sea. The mountain range runs generally from north-west to south-east, reaching its greatest height in the Jebel Akhdar region where heights of over 9,000 feet occur. The hills are for the most part barren, but in the high area round Jebel Akhdar they are green and there is considerable cultivation. The plateau has an average height of 1,000 feet. With the exception of oases there is little or no cultivation. North-west of Muscat the coastal plain is known as the Batinah. It is fertile and prosperous, the date gardens extending for over 150 miles. Batinah dates (which ripen in the first half of July, well before the Basra dates) being famous for their flavour. The coast-line between Muscat and the province of Dhofar is barren and forbidding. The fertile province of Dhofar lies on the south-eastern coast of Arabia. Sugar cane is grown and cattle can be raised in this province. Frankincense is also exported. Its principal town is Salalah on the coast, while Ψ Murbat is the port. On the north coast of the Gulf of Oman is the port of Ψ Gwadar and a small tract of country surrounding the town belonging to the Sultan.

The town of Muscat is the capital and seat of Government of the Sultanate of Muscat and Oman. Possessing a natural harbour, though exposed to the north-west wind (*Shumal*), and at one time a town of some commercial importance, it has lost most of its trade, which has been transferred to the adjacent town of Matrah. Matrah is the starting point for the trade routes into the interior. Other ports on the Gulf of Oman are Sohar, Khaburah and Sur. None, however, provides sheltered anchorage.

The area of the Sultanate has been estimated as about 82,000 square miles and the population as 550,000. The inhabitants are for the most part Arab, but there is a strong infusion of negro blood, especially along the coast. The towns of Muscat (pop. 3,500) and Matrah (pop. 8,500) are composed of one third Indian, one third Baluch and one third Negro. The Baluchis have originally mostly migrated from Mekran and the Negroes from Zanzibar. There are few Arab residents in these two towns. In the valleys of the interior, as well as on the Batinah, date cultivation has reached a high level, and there are possibilities of agricultural development if the water supply were more certain. The inland tribes breed large numbers of camel,

which are prized in Arabia for their quality. There are no industries of importance.

The only port of call for steamers is Ψ Muscat (one of the ports on the mail route between Bombay and Basra) where in 1952 173 steamships with an aggregate gross tonnage of 974,701 entered and cleared. The mail service between Muscat and Basra is normally weekly in each direction, and Gwadar is also served by these steamers. The G.P.O., London, operates the post office in Muscat. The postage stamps are ordinary British stamps surcharged with their value in Indian currency. Cable and Wireless, Ltd., operates the telegraph office, and an automatic telephone service in Muscat and Matrah.

Inland transport is by pack animals. A motor road connects Muscat with Matrah and a motorable track extends to Khor Fakhan at the far end of the Batinah, a distance of 210 miles. Hajar and Boshar are also connected by motorable tracks with Matrah. Cars run frequently between Muscat and the towns in the Batinah. None of these routes should be used without previous arrangement.

In December 1951 a new treaty of friendship, to remain in force for 15 years, was signed between the United Kingdom and the Sultanate of Muscat.

FINANCE.

Annual Revenue (estimated).....Rs. 30,00,000

The common medium of exchange is the Maria Theresa dollar. On the coast the Indian rupee circulates, and is the official currency of the Sultanate, although not generally in use in the interior. There are also three denominations of copper coins, twenty, ten, and five, called "baizas." The normal rate of exchange is 200 baizas = 1 M.T. dollar = Rs. 2½ (approx.). The weights in use are one kiyas = the weight of six dollars or 5.9375 oz.; 24 kiyas = one Muscat maund; 10 maunds = one Farasaja; 200 maunds = 1 Bahar. Rice is sold by the bag, other cereals by the following measurement: 40 Palis = one Farrah; 20 Farrahs = one Khandi.

TRADE.

	1949-50
Total imports.....	£2,176,353
Total exports.....	2,282,780
Imports from U.K.....	159,400
Exports to U.K.....	Nil

Trade is mainly in the hands of Hindu Banias and Muslim Khojas, many of whom derive British nationality by descent, and is mainly to and from India and Pakistan. The chief imports are cereals, tea, cigarettes, matches, sugar and cotton piece goods. The chief exports are dates, limes, pomegranates and dried fish.

CAPITAL, Ψ Muscat, population (estimated) 3,500. *Muscat—British Consul-General*, Major F. C. L. Chauncy, O.B.E.

THE KINGDOM OF YEMEN

King of the Yemen, Imam Ahmed bin Yahya Muhammad Hamid Ud Din, born 1891.

YEMENI LEGATION IN LONDON.

41 South Street, W.1.

[Grosvenor: 5246]

Minister, His Excellency Assayed Hasan bin Ali bin Ibrahim.

The late King, Imam Yahya Muhammad Hamid Ud Din, was assassinated in February, 1948, and was succeeded as Imam for a short period by Seyid Abdullah Ibn Al Wazir, the leader of the *coup d'état*. The latter's forces were subsequently defeated by the present Ruler (latterly the Heir Apparent, Seif Al Islam Ahmed), son of the Imam Yahya, who was proclaimed King of the Yemen on March 14, 1948.

Yemen, "the land on the right hand" (of Syria) and the *Arabia Felix* of the ancients, occupies the S.W. corner of Arabia between Asir and the Aden Protectorate, with an estimated area of 74,000 square miles and a population of 3½ millions. It extends inland to the borders of the Hadramaut. The highlands and central plateau of Yemen, and the highest portions of the maritime range form the most fertile part of Arabia, with an abundant and regular rainfall. There are large exports of coffee, food-grains, hides, and raisins. Trade agreements have been concluded with a number of countries. The chief port of Yemen is Ψ Hodeida, which is noted for the export of coffee, shipped from Hodeida to Masawa and Aden, and thence to Europe. The Imam is the head of the Zeidi sect of the Shiah Division of the Islamic religion.

FLAG: Red, with white inscription.

CAPITAL, Taiz (pop. about 12,000); Sana'a has about 25,000 inhabitants, and Ψ Hodeida about 30,000.

British Chargé d'Affaires, M. Jacombe.

BAHRAIN

Ruler, H. H. Sheikh Sir Sulman bin Hamad Alkhalifah, K.C.M.G., K.C.I.E., born 1895; acceded February 3, 1942.

The Bahrain Islands form an archipelago in the Persian Gulf 20 miles from al Hasa on the Arabian coast. Bahrain ("Two Seas"), the largest island, is 27 miles long and 10 miles wide. Muharraq, to the north east, 4 miles long and 1 mile wide, is connected with Bahrain by a wide causeway nearly two miles in length carrying a motor road. The deep-water channel between the two islands is spanned by a swing bridge. Other islands are Sitra, to the east (3 miles long and 1 mile wide); Nabl Saleh (about 2 miles in circumference) and several uninhabited islets. The islands are low-lying, the highest ground being a hill in the centre of Bahrain 450 ft. high.

The total area is about 213 square miles with a population of 110,000, of whom about half are the original inhabitants belonging to the Shia sect, the remainder, including the ruling family, being Sunnis. The Sunnis live mainly in the towns of Manamah and Muharraq. There are a wealthy Indian community and a number of well-to-do Persian merchants. There is a community of nearly 2,000 British and Americans, including the staff of the Petroleum Company and other firms.

The ruling family (Al Khalifa) came originally from the neighbourhood of Kuwait and occupied Bahrain, which was then in the hands of the Persians, in 1782.

About a twentieth part of Bahrain is cultivated, dates, citrus fruits and lucerne being the chief crops. Bahrain is the centre of the famous pearl fishing industry of the Persian Gulf, which lasts for six months during the summer. During the pearling season, Bahrain is visited by numerous Arab, Indian and continental pearl merchants. Oil was discovered in the island in 1932, operations being conducted by an American-owned company, the Bahrain Petroleum Company, registered in Canada, under a concession granted by the Sheikh. Its refinery is the fifth largest in the world. Other island industries are boat-building, manufacture of sailcloth and reed mats and date cultivation.

The revenue of the State is derived from oil royalties and from customs duties which range from 5 to 25 per cent. *ad valorem* on all imports, and 1½ to 2 per cent. *ad valorem* on transit goods. Much of the trade of the Eastern Saudi Arabian territories, e.g. Nejd and Hasa, passes through Bahrain; it is in fact an entrepôt port. The chief

imports are foodstuffs, textiles and clothing, timber and building materials, vehicles, machinery and manufactured goods, some of which are re-exported, and the chief exports are petroleum products and pearls.

Ψ Manamah, the capital and commercial centre, extends 1½ miles along the northern shore of Bahrain Island. Steamships make periodical calls, and Bahrain is a port of call on the B.O.A.C. air route to India and Australia, and for the services of several other air lines. The British Bank of the Middle East and the Eastern Bank have branches in Manamah. There is radio-telephone service between Bahrain and the U.K. Electricity from the Government station in Manamah supplies light and power in Manamah and Muharraq. Water is obtained from artesian wells, and is supplied to houses within the limits of the municipality.

The principal coin in use is the Indian rupee (13.26 = £1). British weights and measures are used.

FLAG: Red, with vertical white bar next to staff.

CAPITAL, Ψ Manamah: population, about 30,000. British Political Agent, J. W. Wall, C.M.G. (1953). Adviser to the Bahrain Government, Sir Charles Dalrymple Belgrave, K.B.E.

QATAR

Shaikh of Qatar, Ali bin Abdullah bin Jasim al Thani succeeded August 20, 1949.

Qatar is an independent Arab Shaikhdom in special treaty relations with Her Majesty's Government. It covers the peninsula of Qatar from approximately the Northern shore of Khor al Odaid to the Eastern shore of Khor al Salwa. The area is about 8,000 sq. miles, with a population estimated at 25,000.

Oil deposits are being exploited by a British Company, under a concession granted by the Shaikh, and the first oil shipment was made on December 31, 1949. Considerable development has resulted from this source of income. Outside the oil company's installations, conditions in the country are primitive in the extreme. The inhabitants are semi-settled tribesmen and Bedouin; apart from employment with the oil company, pearling, which has greatly declined in recent years, and fishing, are the only alternatives to poor grazing as a means of livelihood. Such towns as exist are merely enlarged villages, with the exception of Doha, which boasts a bazaar, a good harbour for native craft, and an expanding population. The oil company has constructed a deep water port at Umm Said on the East coast of the peninsula. A regular air service connects Qatar with Bahrain and Sharjah on the Trucial Coast. The Shaikh has a British Adviser with a staff of British technical assistants. Wireless communications are managed by Cable and Wireless, Ltd. The Post Office is run by the British G.P.O. The currency is the Indian rupee.

Qatar is within the political charge of the British Political Agent, Bahrain, and a British Political Officer now lives in Doha.

CAPITAL, Doha. Population. Approximately 10,000.

FLAG: Maroon with white vertical bar. British Political Officer, W. B. M. Johnston. Adviser to the Government of Qatar, G. M. Hancock, O.B.E.

TRUCIAL COAST

Six Shaikhdoms, Ras al Khaimah, Umm al Qaiwain, Ajman, Sharjah, Dubai, and Abu Dhabi, on the Persian Gulf seaboard of the Oman promontory between Khor ash Sham and Khor al Odaid,

and Fujairah, on the Gulf of Oman, have treaty relations with the British Government to prevent piracy and slavery and to maintain a perpetual truce in regard to all hostile acts at sea. Their territories have a combined area of about 6,023 square miles with a population of 75,000 to 85,000. The main port is Ψ Dubai, other centres being the coastal towns of Sharjah, Ras al Khaimah, Umm al Qaiwain and Abu Dhabi. The British Political Resident in the Persian Gulf, at Bahrain, through the Political Agent, Trucial States, is the recognized arbiter and adviser of these shakhdoms, and peace is maintained by the British flag. Pearls and dried fish are the chief exports.

ARGENTINE REPUBLIC

(República Argentina.)

President, General Juan Domingo Perón, born Oct. 12, 1895, assumed office, June 4, 1946, re-inaugurated for second term, June 4, 1952.

CABINET.

(June 4, 1952.)

Vice-President (acting), Rear-Admiral Alberto Teislaire.

Interior, Angel Gabriel Borlenghi.

Foreign Affairs, Jerónimo Remorino.

Treasury, Dr. Pedro José Bonanni.

Justice, Dr. Natalio Carvajal Palacios.

National Defence, General Jose Humberto Sosa Molina.

Navy, Vice-Admiral Anibal O. Olivieri.

Agriculture, Carlos Alberto Hogan.

Public Works, Roberto M. Dupeyron.

Labour and Welfare, Alejandro Giavarini.

Industry and Commerce, Rafael F. Amundaráin.

Air, Brigadier Mayor Juan Ignacio San Martin.

Public Health, Dr. Ramon Carrillo.

Education, Dr. Armando Mendez San Martin.

Transport, Juan Eugenio Maggi.

Economic Affairs, Dr. Alfredo Gomez Morales.

Finance, Dr. Miguel Revestido.

Communications, Oscar Nicolini.

Political Affairs, Dr. Román Alfredo Subiza.

Army, General Franklin Lucero.

Ambassador in London, Dr. Domingo A. Derisi (1952).

Minister, Dr. Wilfredo Brunet.

Counsellor, Francisco Bengolea.

Economic Counsellor, Anselmo M. Viacava.

1st Secretary, Alberto Spagnuol.

3rd Secretaries, Jorge Sahores; Eduardo Bretón.

Attachés, Vicente Guillermo Arnaud; Iván P. Ivanisovich.

Military Attaché, Colonel Arnaldo Mutto.

Naval Attaché, Captain Bernardo F. Benesch.

Air Attaché, Vice-Comodoro Carlos Adolfo Soto.

Technical Attachés, Ing. Carlos A. Bontá; Ing.

Amílcar Romeo; Ing. Juan Gatto.

Administrative Assistant, Pascual Russo.

Consul-General, Fernando Taurel.

Consulate-General, 53, Hans Place, S.W.1.

There are also Consulates in Liverpool and Cardiff.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and

on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. (For the statue of Christ the Redeemer, see Chile.) On the west the mountainous Cordilleras, with their plateaus, extend from the northern to the southern boundaries; on the east are the great plains. Those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahía Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course in Argentina; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic is composed of 26 provinces and 8 territories, comprising in all 1,112,743 square miles, with an estimated population of 18,246,448 (Dec. 31, 1952).

In 1952 births numbered 447,035 and deaths 157,779.

Immigration is encouraged, but applications are examined by an advisory committee composed of representatives of the Ministries of the Interior, Foreign Affairs and Agriculture, and permission is granted or withheld according to the suitability of the applicants. In 1952, 60,939 were admitted. The climate is moderate.

Government.—The estuary of La Plata was discovered in 1515 by Juan Diaz de Solís, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9) the Independence of Argentina was declared by the Congress of Tucumán. The constitution dates from 1853 (revised 1859 and 1949) and is modelled on that of the U.S. of America, but each province enjoys a large measure of autonomy. The executive is in the hands of the President, who selects his Cabinet. The National Congress consists of a Senate of 30 members, and of a House of Deputies of 149 members, with 11 non-voting delegates from the National Territories.

Agriculture.—Of the total area about one-third is suitable for agriculture and cattle raising. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool, hides, cattle, sheep, horses, goats and pigs. The results of the harvest of 1950-51 and the estimated harvest of 1951-52 are shown below:—

Crop	1950-51	1951-52
	Tons	Tons
Wheat.....	5,796,000	2,100,000
Maize.....	2,670,000	2,040,000
Linseed.....	559,200	343,400
Oats.....	733,000	438,000
Barley.....	762,500	336,300
Rye.....	631,000	..
Birdseed.....	60,400	16,300
Sunflower Seeds.....	1,021,000	692,000

Mineral Production.—Oil has been found in various parts of the Republic and is worked to a considerable extent in the neighbourhood of Comodoro Rivadavia, and other districts. The oil output in 1952 was estimated at 3,949,000 cubic metres, an increase of just over 1 per cent. over 1951. Tin, gold, silver, copper, tungsten, lead, zinc and coal are mined.

Industries.—Meat-packing is one of the principal industries; flour-milling, sugar-refining, and the wine industry are also important. In recent years great strides have been made by the textile industry and the development of a wide range of heavy and light industries is actively encouraged by the Government. A gas pipeline from Comodoro Rivadavia to Buenos Aires was completed during Sept., 1949. This pipeline, including branches, is 1,604 kms. long and has been built to ensure protection against corrosion and wear.

Communications.—There are 27,000 miles of railways, all of which are now State property. The road network, including national highways and provincial and municipal roads, covers 261,000 miles; 3,000 miles are macadam surfaced, 15,000 miles are improved roadways for permanent traffic; the remainder are of natural or graded earth. There are air-services between Argentina and neighbouring Republics, Europe and the U.S.A. The tonnage of vessels entering Argentine ports fell from 9,462,200 tons in 1950 to 9,245,800 tons in 1951. Of the latter figure 1,264,600 tons were U.S., 1,673,600 tons were British, and 1,747,100 tons Argentine. There are 55 medium and short-wave broadcasting stations.

Defence.—The Army is organized in 6 divisions, and numbers about 3,000 officers, 5,000 N.C.O.s and 34,000 men on a peace footing.

The Navy consists of 2 battleships, *Moreno* and *Rivadavia*, 3 cruisers, 16 destroyers, 4 coast defence ships and auxiliary vessels, 10 minesweeping sloops, and 3 submarines; 3 squadrons Naval Air Arm. Strength about 1,000 officers and 16,000 men.

Education.—Primary Education is free and compulsory for four years between the ages of 6 and 14. The scattered population of the country districts constitutes a problem in attendance which is being gradually solved. Illiteracy of adults has fallen in the last 20 years; it is now almost non-existent except in the north and far south, where it is still about 42 per cent. Secondary Education is controlled by the National Government in National Colleges, in Normal Schools, and in Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are National Universities at Córdoba, Buenos Aires, La Plata, Tucumán, Santa Fé and Mendoza, and Faculties at Rosario and Paraná. A Worker's University has recently been inaugurated, and university tuition been made accessible to the working people by special Acts of Parliament.

Language and Literature.—Spanish is the language of the Republic and the literature of Spain is accepted as an inheritance by the people. There is little indigenous literature before the break from Spain, but all branches have flourished since the latter half of the nineteenth century, particularly journalism, and until recently Argentina was distinguished among South American countries for the standard of its newspapers, 26 major daily papers being published in Buenos Aires, but under the Perón régime many newspapers and reviews have been closed down, over 130 of them in December-January, 1949-50.

[Sloane 5153-5.]

Ambassador in London, Dr. Lothar Wimmer (1951).

Counsellor, Dr. Johannes Coreth.

and Sec., Dr. Clemens Weichs.

3rd Sec., Dr. Walter de Comtes.

Austria is a country of Central Europe bounded on the north by Czechoslovakia, on the south by Italy and Yugoslavia, on the east by Hungary, on the north-west by Germany and on the west by Switzerland.

Before the war of 1914-18 the area of Austria was 125,533 square miles with a population of nearly 30,000,000. The Austrian Empire was then joined to Hungary to form "The Dual Monarchy" which sided with Germany in the First World War, at the close of which the Austrian Empire was dismembered and the area was reduced to 34,064 square miles with a population of 6,933,905 (1951 Census).

Government.—The Emperor Francis Joseph, head of the Dual Monarchy from 1848, died on Nov. 21, 1916, and his successor abdicated in November, 1918, dying in exile in 1922.

On March 13, 1938, Austria (*Oesterreich*) was annexed by Germany and incorporated into the Reich under the name *Ostmark*.

At the Moscow Conference (Oct. 19-30, 1943) Great Britain, the United States and the Soviet Union pledged themselves to restore the Independence of Austria. After the liberation of Vienna, it was announced on April 29, 1945, that a Provisional Government had been set up in Vienna, with the object of restoring an independent Austrian Republic.

Austria was recognized as a State with the same frontiers as in 1937 (pending a final definition of the frontiers) on Jan. 7, 1946, by the four occupying Powers (Britain, U.S.A., U.S.S.R. and France), and within its 1937 frontiers is, for purposes of occupation, divided into four zones, one allotted to each Power as follows:—

North-eastern (Soviet) zone—Province of Lower Austria with the exception of the city of Vienna, that part of the province of Upper Austria situated on the left bank of the Danube, and the province of Burgenland. *North-western (U.S.A.) zone*—Province of Salzburg and that part of the province of Upper Austria situated on the right bank of the Danube, and the district of Aussee. *Western (French) Zone*—Provinces of Tirol (excluding Ost-Tirol) and Vorarlberg. *Southern (U.K.) Zone*—Province of Carinthia, including Ost-Tirol, and the province of Styria, excluding the district of Aussee. The city of Vienna within its 1937 boundaries is jointly occupied by the armed forces of the four Powers, and its administration is directed by an inter-allied governing authority consisting of four commandants appointed by their respective commanders-in-chief.

On Sept. 16, 1947, H.M. Government announced that the state of war with Austria had come to an end, having decided to take this step owing to the long delays in the signing of a peace treaty, and at the same time a credit of £10,000,000 was granted to Austria.

There is a National Assembly of 165 Deputies. A general election was held in February, 1953, at which the Government coalition of Austrian People's and Socialist Parties increased its large majority by three seats. The Communist Party won only four seats.

Religion and Education.—The predominant religion is Roman Catholic. Elementary education is free and compulsory between the ages of 6 and 14, and there are good facilities for secondary, technical and professional education. There are Universities at Vienna, Graz and Innsbruck.

Language and Literature.—The language of Austria within the boundaries at the date of annexation by Germany (1938) was principally German, the non-German portions of the Austro-Hungarian dual monarchy having been severed at the close of the war of 1914-18. Before the annexation there was a vigorous press with 17 daily papers in Vienna, but under Nazi rule the press came under control and some of the papers were suppressed. But on Oct. 1, 1945, the Allied Council promulgated its Press Law under which the democratic press in Austria was granted the maximum amount of freedom on condition that democratic principles and the fight against Nazism, pan-Germanism and militarism were maintained, and that nothing was published likely to endanger military security, disturb the unity of the Allies or cause public disorder. Newspapers and periodicals may be sold throughout the whole of Austria, irrespective of the zone of publication, and are no longer subject to censorship. There are now eleven daily papers in Vienna including those published by the Occupation Powers, and 24 dailies in the Provinces, as well as numerous weeklies.

Production and Industry.—Agriculture is the most important industry, the arable land producing wheat, rye, barley, oats, maize, potatoes, sugar beet, turnips, and miscellaneous crops. Many varieties of fruit trees flourish and the vineyards produce excellent wine. The pastures support horses, cattle and sheep, normally in great quantities, but the country was denuded during the late war by German requisitions. Timber forms a valuable source of Austria's indigenous wealth with about

35 per cent. of the total land area consisting of forest areas. Coniferous species predominate and account for more than 80 per cent. of the timber under cultivation. Hard-wood trees are mainly confined to the Vienna and Burgenland areas. Spruce is the most common among the conifers (about 60 per cent. of the total) and beech is the most prevalent of the broad leaf trees.

Hydro-electric power offers great possibilities in Austria. Much has already been done to complete large scale projects begun during the period of German occupation.

Minerals.—There are large iron ore deposits which almost entirely support a thriving iron and steel industry. In addition there are useful deposits of brown coal, oil, magnesite, salt and lead. There are also limited deposits of copper.

FINANCE.

	1951 (Schillings)
Revenue.....	18,669,000,000
Expenditure.....	18,786,000,000

Baron Jean d'Anethan.

A Kingdom of Western Europe, with a total area of 11,750 square miles and a population, Dec. 31, 1938 (including Eupen and Malmédy) of 8,386,553 (4,142,064 males, 4,244,489 females). The population on December 31, 1951 was estimated at 8,703,119 (4,287,701 males, 4,415,418 females). The Kingdom of Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea.

Belgium has a frontier of 831 miles, and a sea-board of 42 miles. The Meuse and its tributary, the Sambre, divide it into two distinct regions, that in the west being generally level and fertile, while the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dykes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 526 feet. The principal rivers are the Scheldt and the Meuse. Brussels has a mean temperature of 50° F (summer 65°, winter 37°).

Belgium is inhabited by two distinct races, the Flemish, of Germanic stock, and the Walloons, of Latin stock. Since 1938 there has been an increase in the Flemish population by 100,000 and a decrease in the Walloon population of about the same number. Nearly all the inhabitants are Roman Catholics.

GOVERNMENT.—The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium, in violation of the terms of the treaty.

The Kingdom was again invaded by Germany on May 10, 1940. The whole Kingdom eventually fell into enemy hands and was occupied by Nazi troops until the victorious advance of the Allies in September, 1944. A monument at Hertain in the province of Hainault (where British forces crossed the frontier on Sept. 3, 1944), set up by the Anglo-Belgian Union, was unveiled on St. George's Day, 1949.

According to the Constitution of 1831 the form of government is a constitutional representative and hereditary monarchy with a bicameral legislature, consisting of the King, the Senate and the Chamber of Representatives. The Senate is partly directly and partly indirectly elected (or co-opted) for 4 years. 106 members out of 175 are directly elected. The Chamber of Representatives

consists of not more than 1 per 40,000 inhabitants and is elected directly by all adult nationals.

The elections of June, 1950, returned to the Senate 90 Christian Socialists (Catholics), 62 Socialists, 19 Liberals, 3 Communists and 1 Independent, total 175; and to the Chamber of Representatives 108 Christian Socialists (Catholics), 77 Socialists, 20 Liberals and 7 Communists, total 212.

PRODUCTION.—Agriculture and forestry are important industries, the chief crops being oats, rye, wheat, potatoes, barley and sugar-beet. Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. Coal production in 1951 averaged 101,820 metric tons per working day. Other minerals include iron, zinc, lead and copper. The leading industries are collieries, quarries, and metallurgic (Mons, Charleroi, Liège, Namur, Hainaut, Brabant, and Limburg), glass, textiles (Ghent and Verviers), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, breweries, &c.

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 108 State grammar and high schools, and 13 others under the control of local government authorities. In addition there are 152 State modern schools, and 5 under local authorities. There are numerous private colleges and secondary schools. The Universities of Ghent and Liège are maintained by the State; those of Brussels and Louvain are free institutions. After considerable opposition, Ghent University was in 1930 turned into a purely Flemish institution.

LANGUAGE AND LITERATURE.—Flemish is spoken in the provinces of West Flanders, East Flanders, Antwerp, Limburg, and the northern half of Brabant, and French in the provinces of Hainaut, Namur, Luxembourg, Liège, and the southern half of Brabant. The town of Brussels is bilingual, and the upper classes everywhere speak French. The official languages are both Flemish and French, and also German in the districts acquired after the war. The literature of France and the Netherlands is supplemented by a current of indigenous Belgian literary activity, mainly in the French tongue. Maurice Maeterlinck (1862-1949) was awarded the Nobel Prize for Literature in 1911. Louvain library, which ranked among the great libraries of the world, was destroyed by German invaders in the war of 1914-18; reconstructed, mainly by American funds, after peace was declared, it was again destroyed in May, 1940, by German invaders. There are about 58 daily newspapers (French and Flemish) in Belgium.

FINANCE.

Francs

Revenue (1953 Ordinary Budget estimate).....	77,955,800,000
Expenditure (1953 Ordinary Budget estimate).....	77,745,900,000
Extraordinary Expenditure (Original 1953 Extraordinary Budget Estimate).....	20,500,600,000
Debt (July 31, 1952).....	260,805,000,000

The unit of currency is the Belgian franc. On Sept. 19, 1949, the Bank of England official rate of exchange was 140 francs = £1. (See also p. 83.)

TRADE.

	1951	1952
Total Imports	Fr. 127,022,299,000	Fr. 123,022,796,000
Total Exports	132,567,833,000	122,550,071,000

	1951	1952
Imports from U.K....	£56,193,000	£56,877,000
Exports to U.K.	87,260,000	91,787,000

COMMUNICATIONS.—In 1951 there were 5,030 kilometres of normal gauge railways operated by the National Railway Company; the length of light railways (narrow gauge) operated in 1951 was 3,898 kilometres (of which 1,527 were electrified). On Dec. 31, 1951, there were 522,638 telephone subscribers in Belgium. Ship canals include Ghent-Terneuzen (18 miles, of which half is in Belgium and half in the Netherlands; constructed 1825-1827); Roupel (20 miles, by which ships drawing 18 ft. reach Brussels from the sea; opened in 1922); and Bruges (from Zeebrugge on the North Sea to Bruges, 6½ miles; opened in 1922). The Albert Canal (79 miles), which figured prominently in the fighting (Sept. 1944), for the relief of Belgium and the Netherlands and for the invasion of Germany, links Liège with Antwerp; it was completed in 1939 at the cost of £13,500,000, and accommodates barges up to 1,350 tons. There are 9,335 kilometres of State and provincial roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine consisting (1951) of 96 vessels (449,129 tons), in addition to which there are 427 fishing boats (25,985 tons).

There are regular Belgian air services between Brussels and London, Paris and The Hague, as well as overseas services to the U.S. and the Congo. In addition, many foreign air-lines call at Brussels.

The Capital, BRUSSELS, had a population (Dec. 31, 1951) of 927,801 (with suburbs). Other towns are Ψ Antwerp, the chief port (477,490); Ψ Ghent (218,081), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; Liège (250,604), the centre of the iron industry, and Charleroi (253,580), the important coal-mining and metallurgical centre; Mechlin or Malines (61,712); Ψ Bruges (51,805); Ψ Ostend (51,156). Brussels is 224 miles from London; transit, 8 hours.

NATIONAL FLAG: 3 vertical bands, black, yellow, red.

THE BELGIAN CONGO

Governor-General, His Excellency M. Léon Petillon.

The Independent State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908. Situated between long. 12°-31° E. and lat. 5° N.-13° S., the colony comprises an area of 909,654 sq. miles, with a native population (Dec. 31, 1952) of 11,788,711 and a non-native population of about 75,764, of which about 78 per cent. are Belgians.

It is administered by the Minister of the Colonies at Brussels, assisted by a Colonial Council of 14 members, of whom 8 are nominated by the King, 3 by the Senate and 3 by the Chamber. The Governor-General in Leopoldville is assisted by a Government Council of nominated members.

The Congo River is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 227 miles in length. A narrow-gauge line runs from Boma to Tchela in the Mayumbe (87 miles). Above Leopoldville the river and its numerous affluents are navigable by steamer for about 7,000 miles, the falls on the Upper River being avoided by a metre-gauge line from Stanleyville to Ponthierville (78 miles). Another line from Kindu to Albertville on Lake Tanganyika (444 miles) connects the West Coast of Africa with British East Africa and the East Coast. The Katanga-Bukama Railway (443 miles) links up the Rhodesian Railway system with the steamers plying on the Upper Congo River, connecting with both the East and the West Coast. The Bukama-Port Franqui Railway (702 miles) makes it possible to travel by train direct from Cape Town to Port Franqui, a distance of 3,400 miles. This new route plays an important part in the export of copper from the Katanga mines, its possibilities being limited only by the capacity of the Port of Matadi. Other railways are Aketi-Kombwa-Mungbere (447 miles), Kwomba-Bondo (75 miles); Tenke-Dilolo (324 miles), which joins the Benguela Railway in Portuguese Angola; Charlesville-Makumbi (56 miles) and Manono-Mayumba (32 miles), making a total for the Colony of 3,427 miles. Regular internal air services are established from Leopoldville to Costermansville, Libenge, Coquilhatville, Luluabourg, Stanleyville, Lusambo and Elisabethville, and Elisabethville to Costermansville and Irumu. External air services are operated to Kano, Tripoli, Rome, Lisbon, Cairo, Athens, Brussels and Johannesburg, and to New York (Pan-American). Two local lines operate feeder lines and a charter service to various smaller centres.

Motor roads total 89,405 miles. The most important motor road is the *Route Royale Congo-Nil* (563 miles) from Djamba, on the Rubi, to Redjaf, on the Nile. Another runs from Bukama (*via* Kanda-Kanda and Luebo) to Port Franqui, on the Kasai (1,000 miles). A complete system of telegraphic communication has been established throughout the Colony and is connected with the international system.

The West Coast District has rather scanty rain

(40 inches), but on the Mayumbe Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile and productive. There was much volcanic activity in Kivu Province in 1948. Sleeping sickness, once very prevalent and destructive, is now decreasing.

Extensive forests cover the central districts.

Production (including Ruanda-Urundi).—Oil palms are plentiful, and supply an increasing trade in palm-oil and palm-kernels. Cotton, cocoa, rubber and coffee are successfully planted. The Colony is rich in minerals. The metallic mineral output in 1952 was: copper, 205,749 tons; raw zinc concentrates, 189,355 tons; calcined zinc concentrates, 57,905 tons; coal, 252,385 tons; manganese ore, 127,978 tons; cobalt (alloys), 7,977 tons; (granulated), 3,321 tons; cassiterite, 14,803 tons and smelted tin, 2,809 tons. In 1948 a new uranium bearing mineral (named sengierite after its discoverer) was found in the Katanga mines. Refined gold (in kilograms) amounted in 1952 to 11,348; diamonds (in carats) from Lubilash, 11,033,840 and from Kasai 594,988, silver (in tons), 147. Extensive radium deposits exist in the Elisabethville Province, where there are enormous deposits of copper. Bukamas is the centre of an extensive tin-belt, and alluvial and reef gold are found in the North-eastern Congo. Diamond-bearing gravels are worked in the south. A 10-year plan, covering the needs of the population, public equipment, and agricultural and industrial development, was approved by the Belgian Legislature in 1950. The plan is financed from loans not exceeding 20,000,000,000 Belgian francs (about £143,000,000). The Belgian Information Service reported in March, 1946, that, as compared with 1935, the rubber production was 12 times greater; copper, tin and coffee had increased by 60 per cent.; the output of diamonds (7,534,000 carats) and of gold had doubled; and that of palm nuts and palm oil had also doubled. In addition, the Congo produced 50,000 tons of locally processed cotton and, all food crops and live-stock breeding showed considerable increases.

Language, Religion and Education.—The people are mainly of Bantu-Negro stock, divided into semi-autonomous tribes, each speaking a Bantu tongue. Swahili, a Bantu dialect with an admixture of Arabic, is the nearest approach to a common language. It is estimated (1952) that there are 3,712,635 native Christians in the Colony (Roman Catholic 3,068,284, Protestant 644,351). Missionaries co-operate with the Government in educational matters, and more than half the total expenditure on native education consists of grants to schools established by the various missions. Determined efforts are being made to lower the illiteracy figure. There are public libraries in urban centres for the white population and for such of the natives as can read French, English, or other European languages.

CAPITAL, Leopoldville (pop. 257,197; 13,045 whites), Principal towns, Ψ Matadi (48,351); Elisabethville (117,879); Jadotville (55,960); Stanleyville (47,315); Luluabourg (27,252); Coquilhatville (25,457); Kolwezi (33,462); Bukara (26,792) and Ψ Boma (20,531).

Total Exports.....	20,085,416,000
Imports from U.K.....	£10,509,000
Exports to U.K.....	£10,526,000

* Including Ruanda-Urundi.

The chief exports are palm-kernels and palm oil, cotton, cocoa, gum-copal, rubber, ivory, copper, gold, tin, radium, wolfram, rubber and jute substitutes, and diamonds.

Ruanda and Urundi (Mandated July, 1919, now Trust Territory), formed the N.W. corner of German East Africa from 5° S. lat. to the S. borders of (British) Uganda and have an area of about 20,540 square miles, with a total native population (1948) of 3,793,922, 4,461 Europeans, and 1,488 Asiatics. They lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The soil is poor, and the only exports are live-stock and hides. The administrative capitals are Nianza (Ruanda) and Kitega (Urundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urundi). There are 4,870 miles of roads and no railways. Finance (1952): Revenue 417,443,000 francs; Expenditure 435,706,000 francs.

CONSULAR OFFICES.

There are British Consular Offices at Leopoldville and Elisabethville.

BHÜTAN

Bhutan (area, about 18,000 sq. miles; pop. about 300,000, mainly Buddhists) lies on the S.E. of the Himalayas, and its products resemble those of Nepal. In 1863, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance being paid by the Indian Government as compensation. By a treaty in 1910 this allowance was fixed at £6,667. This figure was doubled in 1942 for the duration of the war, and the larger sum has continued to be paid. The present ruler is Maharajh Jigme Dorji Wangchuk (succeeded 1952). The estimated annual revenue is £30,000. Bhutan's total trade with India is estimated at over £65,000 a year. There is no British Representative.

CAPITAL, Punakha.

BOLIVIA

(República de Bolivia)

President of the Republic, Dr. Victor Paz Estenssoro, assumed office, April 16, 1952.

EMBASSY IN LONDON.

106 Eaton Square, S.W.1

[Sloane: 3231.]

Ambassador in London, Dr. Justo Rodas Eguino, Consul-General, Señor Felipe Seleme Vargas.

There are Bolivian Consular Offices in Liverpool, Birmingham, Hull, Cardiff and Glasgow.

The Republic of Bolivia extends between lat. 10° and 23° S. and long. 57° 30' and 69° 45' W., and its area is estimated at 475,000 square miles with an estimated population (1946) of 3,787,800. The Republic derives its name from its liberator, Simon Bolivar (born 1783, died 1830.)

The executive power is vested in a President elected for 4 years by direct popular vote. A

President is ineligible for re-election for a further term until 4 years have elapsed after a former term has ended. In May, 1951, a military *coup d'état* took place and a junta of senior officers was formed under the leadership of General Ballivian. In April 1952, after three days of heavy fighting, the National Revolutionary Movement took over the government of the country.

The National Congress consists of a Senate of 27 members elected for 6 years, and a Chamber of Deputies of 112 members elected for 4 years. One-third of the Senators and one-half of the Deputies retire every two years. The Congress, however, is in suspense.

The chief topographical feature is the great central plateau (65,000 square miles) over 500 miles in length, at an average altitude of 12,500 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu, Illimani, and Sajama, three of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamore, and Madre de Dios.

Mining and agriculture are the principal industries, the mineral productions being very valuable. The ancient silver mines of Potosi are now worked chiefly for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after that of Malaya, the largest in the world, 37,899 fine tons (metric) being exported in 1948: copper, antimony, wolfram, bismuth, salt and sulphur are also found, and petroleum is being produced in growing quantities. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, indigo, indiarubber, cacao, potatoes, cinchona bark, medicinal herbs, &c. Manufactures are in a very undeveloped state, but are being fostered by protection and exchange control restrictions. There are 1,454 miles of railways in operation; the construction of a line from Cochabamba to Santa Cruz (400 miles), is proceeding very slowly, only some 126 miles being completed, of which 80 miles are open to traffic. On the line connecting Santa Cruz with Corumbá, across the Brazilian frontier, some 250 miles have either been completed or are nearing completion. The Government also contemplates the construction of other lines linking up Santa Cruz with the central plateau and with the Argentine, with a total length of over 1,000 miles. There are about 10,950 miles of telegraph wire, and wireless services between Riberalta, La Paz, Cobija, Capitandí (Chaco). There is direct railway communication to the sea at Antofagasta (32 hours), Arica (20 hours), and Mollendo (2 days), and also to Buenos Aires (3½ days); branch lines run from Oruro to Cochabamba, and from Río Mulato to Potosi, and from Potosi to Sucre, the legal capital. The principal railway line is the Antofagasta and Bolivia railroad (749 miles), which is British owned. Communication with Peru is effected by rail to Guayaquil and thence by steamer across Lake Titicaca to the railroad at Puno.

Commercial Aviation in Bolivia is conducted by Pan American-Grace Airways and Braniff International Airways (American) and Lloyd Aéreo Boliviano (Bolivian), the two former providing international connexions with U.S.A., West coast South American countries, Canal Zone, Brazil and Argentina; Lloyd Aéreo Boliviano, attending to local flights, links La Paz with Oruro, Cochabamba, Santa Cruz and Trinidad, &c., and connects with "Panair do Brasil" for transport of passengers and mails in Brazil.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones,

and Antofagasta by the "Pacific War" of 1879-1882. The Peace Army amounts to about 5,000 all ranks, the War Effective being about 105,000.

Language and Literature.—The official language of the country is Spanish, but the Indian inhabitants (about two-thirds of the population) speak either Quichua or Aymará, the two races being more or less equal in numbers.

The Roman Catholic religion is established and subsidized. Elementary education is compulsory and free and there are secondary schools in urban centres. The high percentage of illiterates is yielding to modern methods; all illiterates under 21 are nominally compelled to attend school. Provision is also made for higher education; in addition to St. Francisco Xavier's University at Sucre, founded in 1624, there are many other institutions offering university instruction. Bolivian literature has not yet produced authors of world-wide renown. There are six daily newspapers in Bolivia.

FINANCE.

Estimated revenue (1953).....	Bs.6,335,039,402
Estimated expenditure (1953)...	Bs.6,335,039,402
Public debt (Dec. 31, 1952).....	Bs.4,151,382,019
Bs.—Bolivianos.	

Until May 14, 1953, there were four official rates of exchange, Bs.60=United States \$1, Bs.100=U.S.\$1, Bs.130=U.S.\$1 and Bs.245=U.S.\$1. The rate of exchange in any particular transaction depended on the degree of necessity of the import in question in terms of the Bolivian national economy. Non-essential goods could be imported with privately acquired foreign exchange. On May 14, however, the Government issued eight Supreme Decrees which, among other things, established a single official rate of exchange of Bs.190 U.S.= \$1 for a wide range of imports together with a free market for less essential imports. Licences are required for all imports.

TRADE.

Exports to U.K.....	£16,153,231
Imports from U.K.....	1,870,079

The principal exports are tin, lead and antimony ores, wolfram, cocoa and hides; the chief imports are wheat and flour, sugar, iron and steel products, machinery and textiles.

SEAT OF GOVERNMENT, La Paz. Population (1946) 300,000. Other large centres are Cochabamba (76,500), Potosí (40,000), Santa Cruz (33,000), Sucre, the legal capital and seat of the judiciary (30,000), Tarija (17,000), and Oruro (50,000).

POSITION AND EXTENT.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Álvares Cabrai, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. Brazil extends between lat. 5° 26' N. and 33° 45' S. and long. 34° 45' and 73° 59' 22" W., being 2,685 miles from north to south, and 2,690 from west to east, with a coast-line on the Atlantic of 4,604 miles. The Republic comprises an area of 3,289,440 square miles, with a population of 52,645,479 (1950 Census).

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of the Mato Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. The principal ranges are *Serra do Mar* in São Paulo; the *Serra Geral* (Caparaó 9,393 feet) between Minas Gerais and Espírito Santo.

the *Serra do Mantiqueira* (Itatiaia, 9,163 feet), and the *Serra do Espinhaço* (Itacolomi, 5,748 feet), in the south-east of Minas Gerais; the *Serra do Paranan*, between Goiaz and Minas Gerais, the *Serra dos Aymores*, which divide Espirito Santo from Minas Gerais; and the *Serra do Gurguela, Branca and Araripe*, which envelop Piaui.

Brazil is unequalled for its rivers. The River Amazon has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its principal northern tributaries are the *Rio Branco, Rio Negro, and Japura*; its southern tributaries are the *Jurua, Purus, Madeira and Tapajos*, while the *Xingu* meets it within 200 miles of its outflow into the Atlantic. The *Tocantins and Araguaya* flow northwards from the Plateau of Mato Grosso and the mountains of Goias to the Gulf of Para. The *Parnaiba* flows from the encircling mountains of Piaui into the Atlantic. The *Sao Francisco* rises in the South of Minas Gerais and traverses Bahia on its way to the Eastern coast, between Alagoas and Sergipe. The *Paraguay*, rising in the south-west of Mato Grosso, flows through Paraguay to its confluence with the *Parana*, which rises in the mountains of that name and divides Brazil from Paraguay. On the *Iguassu*, which unites with the Upper Parana at the Brazil-Argentine-Paraguay boundary, are the majestic Falls of the *Iguassu* (200 ft.), and on the *Sao Francisco* are the no less famous falls of *Paulo Affonso* (260 ft.).

GOVERNMENT.—Brazil was colonized by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King Joao VI. of Portugal. On Nov. 15, 1889, Dom Pedro II., second of the line, was dethroned and a republic was proclaimed. Constitutional Government, under the Constitution of 1891, was suspended after the revolution of 1930. Dr. Getulio Vargas, who had been Chief of the Provisional Government since 1930, was elected President and assumed office on July 20, 1934. By a *coup d'etat* of Nov. 20, 1937, he closed Congress, abolished the old political parties and issued a new Constitution. On Sept. 18, 1946, the *Estado Novo* established by Vargas was superseded by a new constitution, limiting the Presidential term to 5 years (in place of 7) and restoring a Congress of two chambers. Gen. Dutra, who was the first President elected under the new Constitution, was succeeded, as a result of elections held in October, 1950, by Dr. Vargas.

PRODUCTION.—The minerals are very considerable and valuable, comprising among others coal, manganese, iron pyrites, gold, diamonds and precious and semi-precious stones and as yet the surface has been little more than scratched. Some oil has been found in Bahia and a second large refinery will be completed shortly. Brazil's national steel works at Volta Redonda produced, in 1952 476,234 tons steel ingots, 358,979 tons pig iron and 360,088 tons rolled steel. A new blast furnace was installed in 1952. The national production of iron ore in 1952 was over 2 million tons.

Brazil's agriculture and vegetable extractive produce is abundant, coffee, cotton, maize, sugarcane, cocoa, rice, citrus fruits and bananas, being the main agricultural products and timber, rubber, carnauba wax, herva-mate, jute and other fibres being the main vegetable extractives.

The export of coffee (valued at Cr.19,212,708,000 in 1952) is government regulated in order to stabilize its price. It comes mainly from the States of Sao Paulo and Parana and is exported through the Ports of Santos, Rio de Janeiro and Paranagua.

National industry is expanding but is limited in many districts by shortage of electrical power.

The main types of production are textiles, food-stuffs, metallurgical, hides and leather, construction (cement, etc.), wooden manufactures, chemical and pharmaceutical, ceramics and glass, electrical, etc.

DEFENCE.—The peace effective of the Army is about 200,000 all ranks. The Navy consists of 2 cruisers, 15 destroyers and escorts, 11 corvettes, 3 submarines, 15 submarine chasers, 2 sail training ships, 3 ocean-going tugs, 2 survey vessels, 2 river monitors and various auxiliaries. The strength of the Navy is about 25,000 officers and men. The Air Force has about 800 aircraft, and is the largest in South America.

EDUCATION.—Primary education is carried out by private initiative and at the cost of municipalities and States, in some cases with a Federal subsidy; there were 2,862,655 pupils in 1935. Secondary and Technical education is carried out by Federal and State governments at the State University of Brazil (founded in 1937) and at private colleges. All private schools are slowly passing under the control of the Board of Education. In 1940 there were over 3,000,000 pupils enrolled at elementary schools, 250,000 at secondary and special schools and 28,000 students at the Universities. Higher education is carried out by Federal and State governments at the State Universities of Rio de Janeiro and Sao Paulo, and at the University colleges at Manaos (Amazonas) and Curitiba (Parana) and other private colleges.

LANGUAGE AND LITERATURE.—Portuguese, with dialectal varieties, is the language of the country, foreign languages being read and spoken in the following order: French, Italian, English, German and Spanish. Until the second quarter of the nineteenth century Brazilian literature was dominated by Portugal. French influence is traceable for the next half century, since when a national school has come into existence and there are many modern authors of high standing. Public libraries have been established in urban centres and there is a flourishing national press with widely circulated daily and weekly newspapers; 25 daily newspapers are published at Rio de Janeiro.

COMMUNICATIONS.—In 1950 there were 36,685 kilometres of railway open, mostly of metre gauge. In August, 1941, the President approved expenditure of on a line 435 miles in length from Corumba, Brazil, to Santa Cruz, Bolivia, a link in the Trans-Continental Line from Rio and Santos to Arica (Chile) on the Atlantic coast. Work has progressed well beyond the Brazilian border and is expected to be completed during the present year. Length of telegraph 42,100 miles (1948). In 1950 12,095,564 tons of shipping entered Rio and 11,028,717 entered Santos. These two ports handle the great bulk of Brazil's import trade.

Seven foreign airlines, BOAC, Air France, SAS, KLM, Aerolneas Argentinas, Iberia and Alitalia (in addition to Panair do Brasil) operate services between Brazil and Europe. Pan American World Airways, Braniff and Aerovas Brasil operate services between Brazil and U.S.A., and there are connexions with all Latin American countries. Eight major domestic airlines, as well as the Brazilian Air Force, maintain services throughout the country.

FINANCE.		1953
Estimated Revenue.....	Cr.	34,295,000,000
Estimated Expenditure.....		34,005,000,000
External Debt (Dec. 31, 1952).		£41,900,000
	U.S.	\$131,600,000
Internal Debt (Dec. 31, 1952) .	Cr.	20,450,000,000

On Nov. 1, 1942, the *Cruzeiro* of 100 Centavos was substituted for the *milreis* (of 1,000 Reïs) at 83.648 *milreis*=£1. The official market selling rates of the Bank of Brazil (June, 1952) were Cruz, 52.42=£1; Cruz, 18.72=U.S. \$1. Early in 1952 a free market was legalized for certain transactions, including some exports, remittance of capital and dividends, etc. Free market quotations average about Cr.120=£1. (See also p. 83.)

TOTAL TRADE (1952)

Total Imports..... Cr.37,178,622,000
Total Exports..... 26,064,999,000

	1951	1952
Imports from U.K....	£54,418,552	£52,312,955
Exports to U.K.....	66,362,186	15,582,485

The principal imports are machinery, iron and steel manufactures, vehicles, chemicals, wheat and flour, petrol, fuel oils and paper. The principal exports are coffee, cotton, timber, cocoa, hides and skins, tobacco and maize. Coffee accounts for over one-half of total export values.

LEGATION IN LONDON.

12, Queen's Gate Gardens, S.W.7.

[Western: 9400.]

Minister, Nalden Nikolov (1950).

The Republic of Bulgaria is bounded on the north by Roumania, on the west by Yugoslavia, on the east by the Black Sea, and on the south by Greece and Turkey. The total area is approximately 43,000 square miles, with a population (1947) of 7,022,206. The prevailing religion of the Bulgarians is the Eastern Orthodox Church (83 per cent.); Moslems (Turks and Pomaks) (14 per cent.), and various others (3 per cent.). For secular purposes the Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the Treaty of Berlin (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912-13 a successful war of the Balkan League against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of Southern Dobrudja to Roumania. On Oct. 22, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on

Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the *Treaty of Neuilly*, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

Nazi troops entered the country on March 3, 1941, and occupied Black Sea ports, but Bulgaria was not officially at war with the Soviet Union. On August 26, 1944, the government declared Bulgaria to be "neutral in the Russo-German war" and delegates to Cairo sought terms of peace from Great Britain and the United States. The Soviet Union refused to recognize the so-called "neutrality" and called upon Bulgaria to declare war against Germany, and no satisfactory reply being received on Sept. 5, 1944, the U.S.S.R. declared war on Bulgaria. Bulgaria then asked for an armistice and on Sept. 7 declared war on Germany, hostilities with U.S.S.R. ending on Sept. 10. Armistice with United Nations was signed in Moscow, Oct. 28. On Sept. 9 a *coup d'état* gave power to the Fatherland Front, a coalition of Communists, Agrarians, Social Democrats and Republican officers and intellectuals. In August, 1945, the main body of Agrarians and Social Democrats left the Government. The Peace Treaty with Bulgaria was signed on Feb. 22, 1947, and came into force on Sept. 15, 1947. It recognized the return of Southern Dobrudja to Bulgaria.

GOVERNMENT.—On Sept. 8, 1946, a referendum was held, at which, according to the published results, an overwhelming majority declared for the abolition of the Monarchy and the setting up of a Republic. On Oct. 27, a general election to a Grand National Assembly (with power to make a constitution) was held; the Opposition won 101 seats out of 465. According to the new Constitution the legislature is a single chamber National Assembly or *Subranie* elected by adult suffrage on the basis of one deputy to every 30,000 inhabitants for a maximum term of four years. The opposition Agrarian Party was suppressed on Aug. 24, 1947, following the pronouncement of the death sentence on its leader, Nikola Petkov. The opposition newspapers ceased to appear after April, 1947. Nine opposition Social Democrats continued to sit in the National Assembly until they were placed under restraint in July, 1948. The Government Social Democratic Party fused with the Workers' (Communist) Party on Aug. 11, 1948.

Bulgaria linked herself to the other countries of Eastern Europe by a series of treaties of Friendship, Collaboration and Mutual Aid, the first of which was signed with Yugoslavia on November 27, 1947. This was followed by similar treaties with Roumania (January 16, 1948), the Soviet Union (March 18), Czechoslovakia (April 26), Poland (May 30) and Hungary (July 6). The treaty with Yugoslavia was abrogated in 1949.

PRODUCTION.—Bulgaria is essentially agricultural, the principal crops being beet, rye, wheat, barley, oats, maize, tobacco, oleaginous seeds, soya beans, fodder, fruits, vegetables and cotton. The livestock includes sheep, goats, cattle, pigs, horses, asses and mules. There are brown and black coal deposits, certain of which produced (1947) 4,046,000 tons. The present annual production is approximately 5,500,000 tons. There is a large variety of thermal and mineral springs, several of which have been modernized. Certain areas are well mineralized with copper, lead, zinc, iron and manganese, and the Government announced special efforts to develop these ores on account of the present shortage of agricultural exports. There are large deposits of bituminous shale and indications of petroleum. Alluvial gold is found in

many places. Local industry has been encouraged by a Two Year Plan followed by a Five Year Plan covering all aspects of the country's economic life.

DEFENCE.—Under the Peace Treaty signed between Bulgaria and the Allies, the Bulgarian Army is limited to 55,000 men, but it is believed at present to be at least 200,000 strong.

EDUCATION.—Free basic education is compulsory for children from 7 to 15 years inclusive. The Bulgarian educational system was reorganized on Soviet lines in September, 1950, and is now stated to comprise more than 6,000 primary schools and 250 secondary schools. In 1950-51 there were nearly 900,000 school-children. The study of Marxism-Leninism is compulsory. Technical institutes were attended by 70,000 students in 1950-51.

The gymnasias are of two kinds: general (261 schools giving day and evening classes), and technical (249 schools and institutes).

Before September 9, 1944, illiteracy stood at 32 per cent. of the population. In 1950 it was claimed that only 19 per cent. of the population remained illiterate.

There are universities at Sofia, Plovdiv and Varna with 6, 2 and 3 faculties respectively; the Sofia State Polytechnic has 2 faculties and the Academy for Rural Economy has four. During the academic year 1950-51 there were stated to be 29,679 students at Bulgarian Universities. There are High schools at Rusé (technical), Svishtov (economics), and Sofia (Physiculture), and Academies of Music, Drama and Art—all in Sofia.

LANGUAGE AND LITERATURE.—Bulgarian is a Southern Slavonic tongue, closely allied to Russian (see U.S.S.R.) with local admixtures of modern Greek, Albanian and Turkish words. There is a modern literature, chiefly educational and popular. The alphabet is Cyrillic, as in Russia. In 1953 there were 6 daily newspapers in Sofia.

COMMUNICATIONS.—On Jan. 1, 1941, there were 13,366 miles of road open, and new roads have since been built to an estimated length of 560 miles. There were 2,676 miles of normal and 327 miles of narrow-gauge railway open. On Dec. 31, 1940, there were 870 post offices, 669 telephone exchanges and 877 telegraph offices. In 1941 vessels cleared at Black Sea ports numbered 7,424 (665,239 tons), and 17,626 vessels (4,075,118 tons) cleared at Danube ports.

FINANCE. 1953

	leva (gold)
Budget revenue (estimated)	19,021,000,000
Budget expenditure (estimated)....	17,973,000,000

Debi (Mar. 31, 1947):—

External.....	leva 44,385,108,595
Internal Consolidated	44,669,645,905
" Non-Consolidated.....	25,226,538,401
" Total.....	68,896,184,306

Leva: 797 = £1 (June, 1950). Revaluation of the *lev* was decreed on May 10, 1952. 19.04 (new) *leva* = £1. For budget purposes 100 old *leva* will equal 4 new *leva*.

TRADE. 1948

Total Imports	leva 35,119,000,000
Total Exports.....	34,113,500,000

Before the war the principal imports were raw, semi-manufactured and finished textiles, metals and manufactures, industrial and agricultural machinery, implements and tools, chemicals, tanning materials, mineral and vegetable oils, greases, fats, gums, wax, paper, hides, leather, glassware, china and porcelain, drugs and medicines, colonial

goods, sawn timber, rubber. The principal exports were cereals and flour, bran, tobacco, eggs, beans, poultry and dairy produce, sunflower seed and cake, vetches, goat, sheep and lamb skins, attar of roses, live-stock, nuts, fruits, silk cocoons, charcoal, hardwoods, copper matte and lead ore. Trade up to 1944 was principally in the hands of Germany and at the present time 92 per cent. of trade is with the U.S.S.R. The 1951 harvest was excellent.

CAPITAL, Sofia. Pop. (1947), 434,888, at the foot of the Vitosha Range, the capital and commercial centre, is on the main railway line to Istanbul, 338 miles from the Black Sea port of ΨStalin (Varna) (77,792) (closed to foreign shipping) and 125 miles from Lom (15,182), on the Danube; ΨBurgas (43,684) is also a Black Sea port, those on the Danube being ΨRusé (53,420), ΨVrshetov (12,949), ΨVidin (18,580). Other important trading and industrial centres are Plovdiv (125,440) and Pleven (38,997).

FLAG: 3 horizontal bands, white, green, red.

BRITISH LEGATION.

British Minister, His Excellency John Eric Maclean Carvell, C.B.E. (1951).

Residence, 69 Boulevard Tolbuhin, Sofia.

BURMESE EMBASSY IN LONDON.

19A Charles St., Berkeley Square, W.1.

Amassador, His Excellency Thado Maha Thray Sithu U Ka Si (1952).

Area and Population.—Burma forms the western portion of the Indo-Chinese district of the continent of Asia, lying between 9° 58' and 28° N. latitude and 92° 11' and 101° 9' E. longitude, with an extreme length of approximately 1,200 miles

and an extreme width of 575 miles. In the north the frontier with Tibet and China has not yet been demarcated; the north-west frontier touches the Dominion of Pakistan and the Republic of India; the Bay of Bengal forms the western frontier and on the north-east and east Burma marches with the Chinese province of Yunnan, French Indo-China and Siam. The area of the Union includes Burma proper with the Chin Hill and Kachin Hill tracts (192,158 sq. miles), the Shan States (57,816 sq. miles) and the Karenni States (4,519 sq. miles) making a total of 254,493 sq. miles. The population of the 233,492 sq. miles of British Burma covered by the census operations of 1931 was 14,647,756 showing a density of 62 persons to the square mile. The population of the Union may be estimated at 17,500,000 to 18,000,000 for 1953, showing an estimated density of 61 persons to the square mile.

Physical Features.—Burma falls into three natural divisions, Arakan (with the Chin Hills region), the Irrawaddy basin and the old Province of Tenasserim, the last-named including the Salween basin and extending southwards to the Burma-Siam peninsula. Mountains enclose Burma on three sides, the highest point being Hka-kabo Razi (19,296 ft.) in the northern Kachin hills. Mt. Popa, 4,981 ft., in the Myingyan district is an extinct volcano and a well-known landmark in Central Burma.

Races, Language and Religions.—The indigenous inhabitants who entered Burma from the north and east are of similar racial types and speak languages of the Tibeto-Burman, Mon-Khmer and Tai groups. The three important non-indigenous elements are Indians and Pakistanis (about 800,000), Chinese (about 300,000), with Europeans and Anglo-Burmans numbering in all about 10,000. Burmese, Shan, Karen, Kachin and Chin are the chief languages. Buddhism is the religion of 85 per cent. of the people, with 5 per cent. Animists, 4 per cent. Moslems, 4 per cent. Hindus and rather less than 3 per cent. Christians.

Government.—Burma formed part of British India until April 1, 1937, when it became a separate territory with a considerable measure of self-government. The country was invaded by the Japanese in December, 1941, and until October, 1945, the Civil Government functioned in India.

In September, 1946, a new Executive Council was appointed, consisting of a coalition of the main political parties. By agreement in London this body subsequently became the Interim Government. In April, 1947, elections were held for a Constituent Assembly and in June, 1947, the Assembly adopted a resolution declaring that Burma's status should be that of an independent Sovereign Republic.

The Treaty which made Burma an Independent State outside the British Commonwealth was signed in London on Oct. 17, 1947, and came into force on Jan. 4, 1948. The Treaty regulated matters arising out of the transfer of power and defines the future relations of the two governments "in terms of complete freedom, equality and independence." The terms of the Treaty were implemented in the Burma Independence Act, which received the Royal Assent on Dec. 10, 1947. The Act also provided for the cessation of the suzerainty of the Crown over the Karenni States and under the new constitution all the frontier areas came within the federal framework of the Union. Provision was made as to option to retain British nationality. Appeals from Burma to the Privy Council ceased at Jan. 4, 1948.

In March, 1948, the Burma Communist Party went into open revolt against the Government. The President declared a state of emergency on

August 10, 1948, and martial law was applied to 26 districts of Central and Southern Burma a few days later. At the end of January, 1949, the Karens also rebelled, temporarily occupied Meiktila, Mandalay and Maymyo in Upper Burma, and seized Insein, a small town 11 miles from Rangoon, from which they were not dislodged until May, 1949. The Communists, People's Volunteer Organization and army mutineers set up a "People's Democratic Front" Government at Prome in March, 1949. In June the Karens proclaimed their own State with its capital at Toungoo. Toungoo, however, was retaken in March, 1950, and the Rangoon-Mandalay road, which had long been closed to traffic, was freed in April. In the following three years the Government carried out operations against the insurgents and by April, 1953, had virtually reduced the Communists and Peoples Volunteer Organisation to military impotence, although considerable areas of Central Burma remained under their control. "The hill areas of Western Burma remained quiet but the presence of Chinese Nationalists in the Eastern Shan States became an increasing military and political embarrassment which by May, 1953, remained unsettled.

Burma asked the British Government for financial assistance early in 1949, and accepted the offer of a loan of £6 million sterling from five Commonwealth countries (the United Kingdom, India, Pakistan, Ceylon and Australia) in March, 1950. Burma joined the Colombo Plan in 1952.

The first general election under the new Constitution, during the second half of 1951, resulted in the return to power of the "Anti-Fascist People's Freedom League," of which the Burma Socialist Party is the principal constituent.

Defence.—The Defence Agreement under the Treaty of 1947 provides for a British Mission of the three fighting services to work with the Union defence forces and accords to the latter certain training facilities in British establishments.

Education.—The literacy rate is high compared with other Asiatic countries, there is no caste system and women engage freely in social intercourse and play an important part in agriculture. Before the Japanese invasion there were over 8,000 recognized and about 19,000 unrecognized colleges and schools with an estimated total of 1,000,000 pupils, many of whom received elementary instruction in Buddhist monasteries. The University of Rangoon was founded in 1920, with a Medical College, an Engineering College and a Teachers' Training College attached. There was an Agricultural College at Mandalay, a Forestry Institute at Pyinmana and a Veterinary College and Technical Institute at Insein.

Finance.—The chief sources of revenue are land tax, customs duties, income tax, excise duties and forest service; the chief heads of expenditure are defence and police, civil works, superannuation and pensions, administration and social welfare. The estimates for 1941-42 were: income £12,849,000; expenditure £13,708,000.

Production, Industry and Commerce.—The chief agricultural products are rice, sesamum, maize, jowar (millets), cotton, beans, wheat and grain. Rice cultivation is the mainstay of Burma's economy; before the war Burma was the world's largest exporter of rice, her total production of some 6 million tons a year being raised from 12 million acres or 70 per cent. of the country's total cropped area. The pre-war yearly average of rice exports was over 3 million tons. In 1952 exports reached 1,300,000 tons. The net area sown in 1938-39 was 17,387, 241 acres, two-thirds of the popula-

tion being dependent on agriculture for their livelihood. Reserved forests covered 19,913,930 acres. 1,470,333 acres were irrigated. The principal export after rice is teak, of which some 200,000 tons were exported annually. Burma is fairly rich in minerals, especially petroleum, rubies, jadestone, and wolfram. Of these petroleum is the most important. In the decade ending 1939 the production was over 250 million gallons a year valued with by-products for export at £10 million a year. There were considerable exports by land to Western China.

The value of the seaborne trade (excluding Government stores, bullion and re-exports of foreign goods) in the last full year before the Japanese invasion exceeded £51,000,000 (imports £15,600,000; exports £35,860,000). Under the Treaty of 1947 existing preferential duties on Burmese goods are continued until denounced, "as if Burma were part of His Majesty's Dominions."

Communications.—The Irrawaddy and its chief tributary, the Chindwin, form important waterways, the main stream being navigable beyond Bhamo (900 miles from its mouth) and carrying much traffic.

ψ The chief seaports are Rangoon, Moulmein, Akyab and Bassein.

The Burma Railways had a total length in 1940 of 2,300 miles, extending to Myitkyina, on the Upper Irrawaddy. The *Burma Road* from Lashio to Kunming (in the Chinese Province of Yunnan) was constructed in 1937-39, with a total length of approximately 800 miles. Since the war a considerable network of internal air services has come into being.

Chief Towns.—The chief city of Lower Burma, and the seat of the government of the Union is Rangoon, on the left bank of the Rangoon river, about 21 miles from the sea. The city contains the Shwe Dagon pagoda, much venerated by Burmese Buddhists. Population (1950), about 700,000. Mandalay, the chief city of Upper Burma, had a population of (1952) 182,000. Moulmein one of 99,000 and Bassein 77,000. Pagan, on the Irrawaddy S.W. of Mandalay, contains many sacred treasures and objects of interest to antiquaries.

NATIONAL FLAG.

The Union flag is red, with a canton of blue bearing a large white five-pointed star surrounded by 5 smaller stars of like pattern and colour.

BRITISH EMBASSY.

(Rangoon.)

British Ambassador, His Excellency Paul Henry Gore-Booth, C.M.G. (1953).

There is a *British Consulate* at Maymyo. Transit from London to Rangoon; by sea, 26-35 days; by air, 2-5 days.

Representative of British Council, J. E. V. Jenkins, O.B.E., Rander House, Phayre Street, Rangoon.

CHILE

(República de Chile.)

President (1952-1958), General Carlos Ibañez assumed office, Nov. 4, 1952.

CABINET.

May 21, 1953

Interior, Oswaldo Koch.

Foreign Affairs, Oscar Fenner.

Economy and Commerce, Rafael Tarud.

Finance, Felipe Herrera.

National Defence, General Abdon Parra.

Public Works, Orlando Latorre.

Justice, Santiago Wilson.

Agriculture, Alejandro Sales.

Labour, Enrique Monti.

Health, Dr. Eugenio Suarez.

Land and Colonization, Jorge Munóz.

Education, Juan Gomez Millas.

Mines, Clodomiro Almeyda.

Secretary-General (Minister without Portfolio), René Montero.

EMBASSY IN LONDON

5 Audley House, 9 North Audley Street, W.1.

[Mayfair: 8382.]

Ambassador in London, Señor Don Enrique Balmaceda (1953).

Minister-Counsellor, Señor Don Higinio Gonzalez.

Counsellor, Señor Don Oscar Bustamante.

Commercial Counsellor, Señor Don Pedro Alvarez.

1st Secretary, Señor Don Ricardo Letelier.

3rd Secretary, Señor Don Pedro Daza.

Secretary, Señor Don Antonio Gandarillas.

Naval Attaché, Captain Rafael Mackay.

Assistant Naval Attaché, Commandante Fernando J. Porta.

Air Attaché, Comandante Máximo Errázuriz.

Civil Attaché, Señor Don Calixto Rogeis.

Consulate-General, 6 Audley House, 9 North Audley Street, W.1.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from just north of Arica to Cape Horn south, between lat. $19^{\circ} 15'$ and $55^{\circ} 59' S.$, and long. $66^{\circ} 30'$ and $75^{\circ} 48' W.$ Extreme length of the country is about 2,800 miles, with an average breadth, north of 41° , of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a greater height. The chain, however, lowers considerably towards its southern extremity. The Andes form a boundary with Argentina, and at the head of the pass where the international road from Chile to Argentina crosses the frontier, has been erected a statue of *Christ the Redeemer*, 26 feet high, made of bronze from old cannon, to commemorate the peaceful settlement of a boundary dispute in 1902. There are no rivers of great size, and none of them is of much service as a navigable highway. In the north the country is arid. Chile is divided into 25 provinces and the aggregate area is estimated at 285,100 square miles. In 1929 Chile signed a treaty ceding the province of Tacna to Peru but retained the province of Arica in return for a payment to Peru of £1,200,000.

Among the island possessions of Chile are the *Juan Fernandez group* (2 islands) about 360 miles distant from Valparaiso, where a wireless station has been erected. One of these islands is the reputed scene of Alexander Selkirk's (Robinson Crusoe) shipwreck. *Easter Island* ($27^{\circ} 8' S.$ and $109^{\circ} 28' W.$), about 2,000 miles distant in the South Pacific Ocean, contains stone platforms and hundreds of stone figures, the origin of which has not yet been determined. The area of the island is about 45 sq. miles.

The total area of the Republic is estimated at 290,000 square miles, with an estimated population of 5,915,376 (May, 1952). Included in the total are four racial divisions: (a) Spanish settlers and their descendants; (b) indigenous Araucanian Indians, Fuegians, and Changos; (c) mixed Spanish Indians; and (d) European immigrants, who were represented in 1935 by 23,439 Spaniards, 11,070 Italians, 5,292 British, 10,861 Germans, 5,007 French, 1,345 Syrians, 1,374 Swiss, 4,064 Yugoslavs, 272 Danes and 1,343 Russians. In 1951 the

registered births numbered 191,332; marriages 46,195; and deaths 92,728.

GOVERNMENT.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1810, when a revolutionary war, culminating in the *Battle of Maipú* (April 5, 1818), achieved the independence of the nation. Under the present Constitution (Aug. 30, 1925), the President is elected by direct choice of all Chilean citizens who have the right to vote. The National Congress consists of a Senate of 45 members, and of a Chamber of 147 Deputies. There is universal suffrage for persons who have attained the age of 21, can read and write, and are on the electoral roll. Chilean women obtained equal voting rights with men on Dec. 21, 1948, before which they only participated in municipal elections.

PRODUCTION, &c.—Agriculture and mining are the principal occupations, though industrial development is being actively encouraged by the Government. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, hemp, Chili-pepper, potatoes, onions and melons are grown extensively; the vine and all European fruit-trees flourish in the central zone and fruit is an important export item. Excellent wines are produced and exported and are becoming more widely known in world markets. There are large timber tracts in the central and southern zones of Chile, some types of which are being exported to Europe in increasing quantities. In 1951 there were estimated to be 2,186,000 cattle in the country. The mineral wealth is considerable, the country being particularly rich in copper-ore, iron-ore and nitrate. Uranium is also said to have been discovered in small quantities. The production of refined copper in 1952 was 404,000 metric tons. The rainless north is the scene of the only commercial production of nitrate of soda (Chile saltpetre) from natural sources in the world. Production in 1952 (including potassium nitrate) was 1,428,000 metric tons. Chile also produces iodine, manganese ore, coal, and a small quantity of gold. 2,417,000 metric tons of coal and 2,310,000 metric tons of iron were produced in 1952. The country has also large deposits of high grade sulphur, but mostly around high extinct volcanoes in the Andes Cordillera, difficult of access. Production of refined sulphur has hitherto been in relatively small quantities: in 1952 it was 30,000 metric tons. Local consumption is on the increase. Oil was struck in Magallanes (Tierra del Fuego) in December, 1945, and the Government has been promoting the industry ever since. By the end of 1951, over 70 wells had been drilled, most of which contain oil. An oleoduct 70 kilometres long now joins the principal field in Cerro Manantiales with Clarence Bay. Two thousand barrels of crude oil are at present being produced daily and it is hoped to increase this figure to 10,000 barrels a day. The first export shipment was made in February, 1950, and in 1951 a total of 95,000 metric tons was exported. A large steel plant was completed and started operation during 1950 at Huachipato, near Concepción. In 1952 the total of all iron and steel products amounted to 242,591 metric tons. Production in 1953 is expected to be nearly 300,000 metric tons.

In recent years a considerable cotton and woollen textile industry has developed, of which the spindles and looms now amount to 280,831 and 7,148 respectively. Minor industries include tanning, flour milling, lumbering, distilling, fish canning and whaling, brewing, and the manufacture of starch, soap, biscuits, rope, glassware, pottery, paint, boots and shoes, hosiery, millinery, cheese, furniture, matches, brushes, cordage, paper and

cigarettes. Domestic industries include weaving and embroidery.

COMMUNICATIONS.—The bulk of the country's commerce is distributed along its lengthy sea-board in Chilean ships, which have a virtual monopoly of cabotage. Foreign trade continues to be carried on mostly by foreign steamship lines operating either directly to the West Coasts of North and South America, or *via* the Panama Canal to Europe or *via* the Straits of Magellan. Chilean vessels have also been participating for many years in foreign trade with North America and Europe. The Chilean mercantile marine in 1949 numbered 90 vessels of a total gross tonnage of 172,771.

The first railway was opened in 1851 and there are now 6,100 miles of track, of which 849 miles are operated by British companies. A line runs from Pisagua in the north to Puerto Montt in the south. With the completion of a section of 435 miles from Corumbá, Brazil, to Santa Cruz, Bolivia, the Trans-Continental Line will link the Chilean Pacific port of Arica with Rio de Janeiro on the Atlantic. Another line from Antofagasta to Salta (Argentina) was opened in 1948. Further south, the Trans-Andine Railway connects Valparaíso on the Pacific with Buenos Aires, crossing the Andes at 11,500 ft. In 1949 there were 12,500 miles of telegraph, 1,302 post offices and 55,000 miles of telephone.

DEFENCE.—All able-bodied male citizens from 19th to 45th year must serve in one of the armed forces for a training period of 2 years in the Navy or one year in the Army or Air Force. In 1953 the Army had 6 infantry and artillery divisions and 1 cavalry division with a total strength of 1,980 officers, 10,000 regular other ranks plus 15,000 conscripts. The Air Force had 531 officers with 4,700 other ranks plus 1,000 conscripts with a strength of some 150 aircraft. The Navy consisted of 1 battleship, 2 cruisers, 6 destroyers, 3 frigates, 3 corvettes, 3 submarines, 1 submarine depot ship, 1 transport and various other small vessels with a complement of 956 officers and 15,521 regular ratings plus 1,000 conscripts. In addition there is a paramilitary police force of Carabineros of some 10,000 officers and men.

EDUCATION is free, elementary education being compulsory since 1920; there were (in 1950) 535,237 pupils at elementary, and about 150,000 at secondary schools. There are 5 Universities (2 in Santiago, 2 in Valparaíso, and 1 in Concepción). The religion is Roman Catholic.

LANGUAGE AND LITERATURE.—Spanish is the language of the country, with admixtures of local words of Indian origin. Recent efforts have reduced illiteracy and have thus afforded access to the literature of Spain, to supplement the vigorous national output. The Nobel Prize for Literature was awarded in 1945 to Señora Gabriela Mistral, for Chilean verse and prose. The National Library in Santiago contained (1939) over 500,000 volumes. There are over 100 newspapers and a large number of periodicals, including many devoted to professional, scientific and social subjects; 30 daily newspapers were published in 1940. A dictionary of the extinct *Yamana* language, once spoken in Tierra del Fuego, was deposited (1946) in the British Museum.

FINANCE.

	1952
	Chilean pesos
Revenue (Financial Year).....	36,184,100,000
Expenditure (Financial Year).....	41,948,000,000
External Debt (Dec. 31, 1952):—	
Direct—Long Term.....	8,813,913,435
Short Term.....	283,009,997
Indirect.....	1,128,378,036

External Debt (Dec. 31, 1952):—

Long Term:—

Sterling.....	£19,112,464
U.S.....	\$109,858,500
Swiss Francs.....	Fr. 86,496,200

Short Term:—

Sterling.....	£1,376,700
U.S.....	\$3,184,183
Indirect.....	U.S. \$95,371,078

Chile's official exchange rate registered with the International Monetary Fund is Ch. \$31=U.S. \$1, but there are several other depreciated official exchange rates as well as an official "free" exchange rate at which visible and invisible foreign trade may be transacted. Most of the non-Governmental invisible trade and about 40 per cent. of the visible trade is transacted at the official "free" exchange rate, which, in June, 1952, was Ch. \$339 = £1. The fixed official exchange rate at which most of the visible trade is transacted is Ch. \$168 = £1. (See also p. 83.)

EXTERNAL TRADE.

	1951	1952
	Gold pesos	Gold pesos
Total imports....	1,594,600,000	1,795,100,000
Total exports....	1,802,600,000	2,206,400,000
Imports from U.K....	115,000,000	157,200,000
Exports to U.K....	109,400,000	122,400,000

Since 1949 the gold peso has been worth about 15. 6d.

The principal exports in 1952 were metallic and non-metallic minerals (refined copper, ingots and bars, nitrates, etc.), cereals, vegetables, fruit and wool. The principal imports in 1952 were industrial oils, chemicals, machinery, tools, electrical and transport equipment and sugar.

CAPITAL. Santiago (June, 1952) 1,506,889 (Greater Santiago). Other large towns are:—Ψ Valparaíso (222,238), Ψ Concepción (133,573), Temuco (90,957), Viña del Mar (88,196), Chillán (67,311), Talca (63,602), Ψ Antofagasta (62,844), Ψ Valdivia (60,077), Ψ Talcahuano (63,133), Ψ Iquique (40,865), Ψ Punta Arenas (37,990). Punta Arenas, on the Straits of Magellan, is the southernmost city in the world.

FLAG: 2 horizontal bands, white, red; in top quarter a white star on blue square, next staff.

BRITISH EMBASSY.

(Calle Bandera 227, Piso 3° Santiago (Casilla 72D))

Ambassador Extraordinary and Plenipotentiary, His Excellency Charles Norman Stirling, C.M.G. (1951).

Chancery, Calle Bandera 227, Piso 3°, Santiago.

First Secretary and Consul, Hon. H. A. A. Hankey.

Naval Attaché, Capt. G. F. Renwick, R.N.

Air Attaché, Group-Capt. R. B. Ward.

First Secretary (Commercial), J. H. Wright.

First Secretary (Information), D. V. Bendall.

M.B.E.

First Secretary (Labour) (vacant).

Second Secretary (Commercial), H. J. Griffiths.

Third Secretary (Information), N. L. Shearman.

BRITISH CONSULAR OFFICES.

There are British Consular Offices at Santiago, Antofagasta, Tocopilla, Iquique, Valparaíso, Concepción, Coquimbo, Valdivia, Osorno and Punta Arenas. **BRITISH COUNCIL.**—Representative of the British Council, in Chile, D. A. A. Traversi, Casilla 154D, Santiago. There are Anglophil Societies at Santiago, Valparaíso and Concepción.

BRITISH CHAMBER OF COMMERCE IN THE REPUBLIC OF CHILE. Calle Bandera 227 (Piso 4°) Casilla 4087, Santiago and Calle Blanco 689,

Casilla 1676, Valparaíso (Branches at Concepción, Talcahuano and Punta Arenas).

Valparaíso is distant from London 9,000 miles *via* Panama, and 11,000 *via* the Strait; transit 28 to 45 days.

CHINA

(Ta Chung-Hua Jen-Min Kung-Ho Kuo—
The People's Republic of China.)

Chairman of the Central People's Government Council,
Mao Tse-Tung, born 1893, assumed office 1949.

EMBASSY IN LONDON.
(Now closed.)

AREA AND POPULATION.—Estimates vary considerably. The *League of Nations Statistical Year Book*, 1942-1944, gave a total area for China of 11,103,000 sq. kilometres (approximately 4,300,000 sq. miles) and a total population for China of 450,000,000. The latest estimate of population (1950) gives a figure of 483,870,000.

RESTORATION OF TERRITORY.—On Oct. 1, 1930, Weihaiwei, the island of Liu Kung and certain other islands were restored by Great Britain to China. In the Cairo Declaration of Dec. 1, 1943, it was agreed that all the territories which Japan had stolen from the Chinese, such as Manchuria, Formosa and the Pescadores, should be returned to the Republic of China. The former French leased territory of Kwang Chou Wan was restored to China by the Sino-French Convention of August 18, 1945.

GOVERNMENT.—On October 10, 1911, the party of reform forced the Imperial dynasty to a "voluntary" abdication, and a Republic was proclaimed at Wuchang.

Many years of internal dissension followed the establishment of the Republic, but in 1928 the Kuomintang (Nationalist Party) achieved supremacy and established a one-party government in Nanking which was accorded recognition by the Foreign Powers. After more than seven years of war with Japan (July 7, 1937, to Aug. 5, 1945), disputes arose between the Central Government and the Chinese Communists. There were hopes of a peaceful settlement in January, 1946, when, as a result of mediation by General George C. Marshall (then President Truman's special Envoy in China), an armistice was signed at Chungking and an all-party Consultative Conference was convened to resolve the disputed issues. These hopes of agreement were disappointed and hostilities broke out again.

On April 18, 1947, President Chiang Kai-shek attempted to unite the country by declaring one-party rule in China at an end and by announcing the formation of a new State Council to include representatives of the main political parties. The Communists declined to co-operate in the formation of this body and the Central Government's offer to reserve a number of seats for Communist representatives was later withdrawn.

A National Assembly was elected on Nov. 21, 1947, for six years. It had the power to elect and recall the President and Vice-President of the Republic, to amend the Constitution and to ratify amendments thereto proposed by the Legislative Yuan.

The year 1949 was marked by a rising tide of Communist successes. In January, 1949, Marshal Chiang Kai-shek resigned office as President and the authority of the Nationalist Government rapidly declined as province after province was occupied by Communist forces. The Nationalist Government abandoned Nanking on April 23, 1949, and headquarters were removed to Chungking. In August, the Communist forces advanced into

South China, and by January, 1950, the Nationalists retained control only in the islands of Formosa (Taiwan) and Hainan, and in some remote parts of Western China. Taipei, in Formosa, is now the Nationalist capital. On June 27, following the invasion of South Korea by North Korean Communist forces, President Truman announced that the U.S. Fleet would resist any attack on Formosa.

On Sept. 30, 1949, the "People's Political Consultative Conference" of 636 Delegates meeting at Peking elected a council of 56 members and a National Committee of 180 members to make proposals and recommendations to the Council. On October 1, Mao Tse-Tung, Chairman of the Central People's Government, proclaimed at Peking the inauguration of the People's Republic of China.

The Chairman of the Council and Minister of Foreign Affairs is Chou En-Lai. The flag of the People's Republic bears the date Aug. 1, 1927, with a large gold star for the Communist Party and four smaller gold stars for the workers, peasants, bourgeoisie and "patriotic" capitalists. The date is that of the Communist revolt against the Kuomintang.

The U.S.S.R. broke off negotiations with the Nationalist Government on October 2, 1949, and established diplomatic relations with the Central People's Government. The régime was recognized by all the Communist-dominated countries, by Great Britain on Jan. 6, 1950, and by a number of other countries.

RELIGION.—The indigenous religions of China are Confucianism (which includes ancestor worship), Taoism (originally a philosophy rather than a religion) and, since its introduction in the first century of the Christian era, Buddhism. All three are professed and practised by Chinese other than Moslems (who probably do not number more than about 20,000,000), Christians (Roman Catholics about 1,250,000; others 400,000) and Jews.

LOCAL GOVERNMENT.—In June 1950 the Communist Government passed legislation to set up provincial and city councils to be responsible for local government until provincial and city people's congresses should be elected.

THE PROVINCES OF CHINA.

The latest estimates for the 32 Provinces, which include Manchuria, Inner Mongolia, Taiwan and Yunnan, are shown in the following table:—

Province	Estimated Area sq. miles	Estimated Population 1952
†Anhui.....	87,930	24,500,000
Chahar.....	174,350	4,000,000
†Chekiang.....	64,000	19,900,000

* These 6 North-eastern Provinces constitute the district known as *Manchuria*.

† These 4 Eastern Provinces constitute the "East China People's Government" set up by the Communist Central Government in January, 1950. This regional régime includes the large centres of Shanghai, Nanking, Tsingtao and Foochow.

§ These 4 Provinces constitute the "North-Western China People's Government."

EDUCATION.—Under the Nationalist Government education was compulsory from the age of 6 to 12. This policy is stated to have been continued by the Communists. In 1952 there were about 550,000 primary schools in operation with about 45,000,000 pupils. There were also 5,100 secondary schools, with about 2,000,000 pupils. The majority of the 35 provinces have provincial universities in addition to national and private institutions. In August, 1950, the Communist Government took over all schools supported by foreign missions, and in October, 1950, closed the Roman Catholic University in Peking.

LANGUAGE AND LITERATURE.—The Chinese language has many dialects, Cantonese, Hakka, Swatow, Foochow, Wenchow, Ning-po and Wu, and most important, Mandarin (of which the standard form is Pekinese). There are many sub-dialects of Mandarin, some of which are closely allied while others diverge so much as to be almost separate dialects. Chinese literature is among the richest in the world and paper has been employed for writing and printing for nearly 2,000 years, movable wooden blocks having superseded carved wooden slabs many centuries ago. Confucian books of religion, histories, works dealing with philosophy and the arts, poetry, and literary criticism, novels and romances are abundant and many have been translated into other tongues. In 1937 there were 337 daily newspapers and 1,881 periodicals published at Nanking, Shanghai, Peking, Tientsin, Hankow, Canton and other large centres, but in June, 1949, the closing down of the American owned *Evening Post* and *Mercury* left Shanghai with only one English Language newspaper, *The North China Daily News*, which itself closed down in March, 1951.

EXCHANGE RATE.—On Jan. 10, 1950, the Chinese Communist news agency reported that the People's Bank of China had fixed official exchange rates at 23,000 "people's currency dollars" to U.S. \$1 and 64,000 to £1 sterling. In September, 1950, the rates were U.S. \$1=PCD. 31,000 and £1=PCD. 78,000.

PRODUCTION AND INDUSTRY.—China is essentially an agricultural and pastoral country. Wheat, barley, maize, millet and other cereals, with peas and beans, are grown in the northern provinces, and rice and sugar in the south. Rice is the staple food of the inhabitants and the currency slump of 1948 caused a rise in price to 2,200,000 Chinese dollars a *picul* (133 lb.); a special meeting of rice dealers was called to devise means to check the continued rise in price. Cotton (mostly in valleys of the Yangtze and Yellow Rivers), tea (in the west and south), with hemp, jute and flax,

are the most important crops. In February, 1950, a spokesman of the Communist Government admitted the existence of a grave famine situation in North China, and said that there were over 7,000,000 famine refugees. Later reports suggested that it was one of the worst famines in China for more than fifty years. In June, 1950, an Agrarian Reform Law, redistributing the land, was passed.

Livestock is raised in large numbers. Silk worm culture is one of the oldest industries. Cottons, woollens and silks are manufactured in large quantities, and flour and rice milling have grown important in late years. The mineral wealth of the country is very great, coal of excellent quality being produced; iron ore, tin, antimony, wolfram, bismuth and molybdenum are also abundantly found. Oil is produced in the province of Kansu and in South Manchuria.

TRADE.

The value of the Special Trade of China (Imports retained for home consumption and Exports of merchandise of home produce or manufacture) is shown below for a series of years in Standard Dollars.

Year	Imports	Exports
1939.....	\$1,333,654,000	\$1,037,247,000
1940.....	2,027,143,000	1,970,121,000
1942.....	1,444,340,000	191,700,000
1943.....	3,114,320,000	164,460,000
1946.....	1,501,160,000	412,110,000
1947.....	10,681,326,570	6,376,504,300

The principal articles of export in 1947 were animals and animal products; oils; textile fibres; ores and metals and tea. The principal imports were raw cotton, cotton yarn and thread; oils, fats and soap; motor cars and ships; books, paper and paper-making materials; chemicals; metals and ores; and dyes, paints and varnishes.

	1951	1952
Imports from U.K....	£2,675,000	£4,588,000
Exports to U.K.....	7,667,000	2,991,000

COMMUNICATIONS.—Of the total area of China about half consists of table lands and mountainous districts where communications and travel are generally difficult and dangerous, the highest point being *Minya Konka* (24,900 ft.) about 150 miles west of Chungking. To open up sea communications from the south-west the *Burma Road*, over 770 miles in length from Lashio, Burma, to Kunming in Yunnan, was constructed in 1937-39. The road was the chief highway for war supplies to China, until cut by the Japanese in 1942; the success of the Allies in Burma in 1945 restored the use of the road and of communication between Yunnan and Burmese ports. Motor lorries perform the journey in seven days, in contrast with the difficult and lengthy pack-mule transit before the road was constructed. There is motor road and railway connexion between Chungking and French Indo-China. In districts not served by roads the principal means of communication from E. to W. is afforded by the rivers, of which the principal are the Yangtze (3,400 miles), Hoangho or Yellow (2,600) and the West River (1,650), and from N. to S. by the Grand Canal. The course of the Yellow River was diverted in 1936 to stop the westward advance of the Japanese armies; in March, 1947, it was reported that (with the help of UNRRA, which included the supply of money and engineers) the Yellow River was again flowing in its old course and emptying into the Gulf of Chihli.

Railways.—The length of the railways is less than 8,000 miles, inclusive of the Manchurian

lines, or less than one-fifth (per 100 sq. miles) of those available in Turkey.

Shipping.—The China Merchants Steam Navigation Co. has a fleet of 31 ships of an aggregate tonnage of 60,000. In 1947 the number of vessels entered and cleared for abroad was 31,751 with a total tonnage of 9,980,000. Of these totals 19,366 vessels (1,412,260 tons) and 16,343 junks (1,325,994 tons) were under the Chinese flag and 3,682 vessels (8,997,219 tons) were under foreign flags.

Telegraphs connect Peiping with Europe and Tibet and the line is being extended to Lhasa. There are about 97,000 miles of land lines and several high-power wireless installations. Telephones, municipal and long-distance, are in general use in the settled and trade areas, and wireless telephony has been installed in the large centres.

SPECIAL TERRITORY

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly demarcated), from Kashmir to Burma, but is separated therefrom by the Himalayas. The area is estimated at 463,000 square miles with a population 3,000,000. About one-fifth of the male population are monks and polyandry is common. There is an army with an establishment of 10,000 all ranks, consisting of infantry serving on a militia basis and armed with modern weapons. India imports from Tibet wool, borax, salt, and musk; musk, horn and herbs are sent to China. The imports are chiefly cotton and woollen goods, grain, hardware, glass, sugar, biscuits, dried fruits and tobacco, with silver bullion and coined rupees to balance the excess of exports. The present currency is reckoned in *sangs* (mostly paper). The 1939 value was about 8 *sangs* = 2 rupee, which has risen in favour of Tibet to about 3½ *sangs* = 1 rupee (1946). Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces.

Between the 7th and 9th centuries A.D. Tibet was a successful military power whose boundaries extended far into Shensi (China) and for a time to the kingdom of Magadha (India). Later, the influence of Buddhism softened earlier military aggressiveness and Tibet remained in contact with, and was influenced (but not dominated) by, its Mongolian and Chinese neighbours until early in the 18th century when the Manchu Emperor of China, K'anghsi, taking advantage of internal dissensions in Tibet, invaded the country and established officers at Lhasa. Manchu authority in Tibet appears to have been always loose and by the end of the 19th century was merely nominal.

The Anglo-Chinese Convention of 1890 under which a trade mart was opened at Yatung was persistently flouted by the Tibetans and as a result a political mission was despatched from India, with a military escort. It reached the capital, Lhasa, after sharp fighting, on August 3, 1904. A new Convention was signed (Sept. 7), providing for the erection of boundary pillars between Sikkim and Tibet; for three trade marts, with British and Tibetan agents; for unrestricted traffic by existing routes, and for payment of an indemnity.

From 1906 the Chinese took advantage of the confusion which followed the withdrawal of the British expedition from Tibet to establish by force a greater degree of authority in Tibet than they had previously enjoyed. This lasted only until 1912 when the Tibetans took the opportunity provided by the Chinese Revolution against the Manchus to

evict the Chinese from Lhasa and to drive them beyond the Salween. They brought back the Dalai Lama who on the Chinese invasion had taken shelter in India.

In 1918 Chinese aggression on the border led to successful retaliation by Tibet in which the Chinese were driven beyond the upper waters of the Yangtze, but from 1931 to 1933 there was confused fighting on the China-Tibet border, as a result of which the Tibetans lost their hold on most of the territory to the East of the Upper Yangtze which they reoccupied in 1928. Since then the Upper Yangtze has remained roughly the *de facto* frontier between Tibet and China, no permanent settlement with China having been found possible.

In 1933 the great thirteenth Dalai Lama died at the age of 58 and since then a Regent has presided over the destinies of Tibet, the fourteenth Dalai Lama, installed in September, 1939, being of the age of 17 in 1951. In 1937 the Panchen Lama (Tashi Lama) the second religious dignitary of Tibet, died in China, whither he had fled in 1923 on account of disagreement with the Dalai Lama. A new incarnation has not yet been recognized.

In a New Year Message to the Army at the beginning of 1950, the Chinese Communist Government claimed that Tibet was "part of the Continental China," and that one of the Communist Army's tasks would be to "liberate" it.

In October, 1950, Chinese Communist forces invaded Eastern Tibet. The Dalai Lama later left Lhasa and set up his Government at Yatung, near the Sikkim frontier. On May 23, 1951, an agreement was reached whereby Tibet accepted Chinese suzerainty. The Communist army was allowed entry into Tibet and a Communist military and administrative headquarters set up.

PRINCIPAL CHINESE CITIES.—The Communist Government has reinstated Peiping as the National capital, under its old name of Peking. From 1928 to 1949 the capital was Nanking. Peking has an estimated population of 2,031,000. The population of the principal ports and trade marts is estimated as follows: Nanking, 2,020,000; Amoy, 240,000; Antung, 200,000; Canton, 1,496,000; Changsha, 700,000; Chefoo, 250,000; Chinkiang, 220,000; Chungking, 2,110,000; Foochow, 400,000; Hangchow, 600,000; Hankow (including Wuchang and Hanyang), 800,000; Harbin, 638,000; Hsinking, 420,000; Ichang, 110,000; Kirin, 150,000; Mengtsz, 200,000; Mukden, 1,551,000; Newchwang, 170,000; Ningpo, 300,000; Shanghai, 5,407,000; Shasi, 150,000; Soochow, 300,000; Swatow, 200,000; Tientsin, 1,795,000; Tsingtao, 756,000; Wanhsien, 300,000; Wenchow, 140,000; Wuchow, 100,000; Wuhu, 140,000.

FLAG OF "PEOPLE'S REPUBLIC."—The "Gate of Heavenly Peace" at Peking, superimposed on the national flag, with a large star and four small stars at the top, and a wheel at the base. The whole is encircled by ears of wheat and rice.

COLOMBIA

(República de Colombia.)

President, Gen. Rojas, assumed office June, 1953.

EMBASSY IN LONDON.

3 Hans Crescent, S.W.1.

[Kensington: 9277.]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. José María Villarreal.

Minister-Counselor, Dr. Francisco Gonzalez.

Counselor, Dr. Hernando Manrique-Alvarez.

1st Secretary, Dr. Antonio Pineros Corpas.

Consulate-General, 23 Pont Street, S.W.1.

Consul-General, Señor Alberto Cardonas.

Vice-Consul, Señor Juvenal Betancourt.

Chancellor, Señora Varinka Symington.

There are Colombian Consular Offices at Liverpool and Glasgow.

The Republic of Colombia lies in the extreme north-west of South America, having a coastline on both the Atlantic and Pacific Oceans. It is situated between $2^{\circ} 40' S.$ to $12^{\circ} 25' N.$ lat. and 68° to $79^{\circ} W.$ long., with an estimated area of 461,606 square miles, and a population (1951 estimate) of 11,641,586.

The Colombian coast was visited in 1502 by Christopher Columbus, and in 1536 a Spanish expedition under Quesada penetrated to the interior and established on the site of the present capital a government which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811-1824. In 1829 Simon Bolivar (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and is now a separate Republic. There is a Congress of two Chambers, Senate (56 members) and Chamber of Deputies (112 members).

There are three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast tablelands, cool and healthy. This temperate region is the most densely peopled portion of the Republic.

The principal rivers are the Magdalena, Cauca, Atrato, Caquetá, Meta, Putumayo and Patia. The Patia flows through the famous Minima Gorge of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guatara) is spanned by the Rumichaca Arch, or Inca's Bridge, of natural stone. On the Funza is the Great Fall of Tequendama, 480 feet in height.

The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; in 1952 some 38½ million barrels of petroleum were produced and prospecting for new sources of production is in progress in many parts of the Republic. The principal agricultural products are coffee, cotton, bananas, rice and maize, and in some parts tobacco, wheat and other cereals. Manufactures, mainly for home consumption, consist of woollen, cotton and artificial silk textiles, leather goods, chemicals, rubber goods, furniture, boots and shoes, confectionery, cigarettes and beer.

The Navy consists of 2 destroyers, 3 frigates, and some small craft, with personnel about 2,500; a battalion of the Colombian army is at present with the United Nations forces in Korea. The first railway was opened in 1855, about 1,914 miles being open in 1949, with 28,674 (1946) miles of telegraph; there were also (1948) about 8,700 miles of national roads, in addition to departmental (some macadam) and "dirt" roads (passable by motors in dry weather only). A large scale road-building plan is at present under way. A large volume of traffic is carried on the River Magdalena, which is navigable for 900 miles. The main port for Bogotá is Ψ La Doreda, 592 miles from Barvanquilla. There are daily passenger and cargo air services between Bogotá and Barranquilla, Bogotá and Medellín and Bogotá and Cali. There are also subsidiary services to Cartagena, Santa Marta, Manizales, Pereira, Armenia Pasto, Buenaventura, Barrancabermija, Popayan, Ipiales, Bucaramanga, Cúcuta and Villavicencio. There are daily services to the U.S.A., Lima and Quito, a weekly service to London via Jamaica and a daily service via New York. There are also weekly air services direct to Europe and a direct twice-weekly service to Caracas. New York can be reached in 2 days and air mail is delivered in England 5 to 7 days after leaving Bogotá. There are wireless stations at Barranquilla, Bogotá, Medellín, Cali and Cúcuta.

Roman Catholicism is the established religion, but all religions are tolerated.

Language and Literature.—Spanish is the language of the country and education has been free since 1870. Great strides have been made in reducing illiteracy and it is estimated that about 60 per cent. of those over 10 years of age can read and write. In addition to the National University at Bogotá (founded in 1572) there are universities in the towns of Medellín, Cartagena, Popayan and Manizales and the department of Nariño. There is a flourishing press in urban areas and a national literature supplements the rich inheritance from the time of Spanish rule.

COSTA RICA

(República de Costa Rica.)

GOVERNMENT.

A Revolutionary Junta which had governed the country since April, 1948, was replaced on November 8, 1949, under a new Constitution, by a government headed by Señor Otilio Ulate, who remains President for a standard period of four years.

LEGATION IN LONDON.

Minister in London (vacant)

Chargé d'Affaires and Consul-General, Mme. Ofelia Segreda de Wright.

Consulate-General, 65 London Road, Stanmore, Middlesex.

Consulate, Princess House, 95 Gresham St., E.C.2.
Consul, John C. Eggers.

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus, between 8° 17' and 11° 10' N lat. and from 82° 30' to 85° 45' W. long., contains an area of about 23,000 English square miles, and a population (1952) of 868,747. The Republic lies between Nicaragua and Panama and between the Caribbean Sea and the Pacific Ocean.

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at *Cartago*. In 1821 the country joined in the War of Independence, and from 1824-1839 it was one of the United States of Central America.

On Dec. 1, 1948, the Army was abolished, the President declaring it unnecessary, as the country loved peace.

The coastal lowlands by the Caribbean Sea and Pacific have a tropical climate but the interior plateau, with a mean elevation of 4,000 feet, enjoys a temperate climate. The capital is 103 miles from the Atlantic and 72 miles from the Pacific.

The principal agricultural products are coffee, bananas, rice, maize, sugar-cane, potatoes, cocoa beans and hemp, the soil being extremely fertile.

The chief ports are *Limón*, on the Atlantic coast, through which passes most of the coffee exported, and *Puntarenas* on the Pacific coast. Bananas are principally exported from *Golfito* and *Quepos*, ports which have been developed on the Pacific Coast by the United Fruit Co. In 1952 ships of a gross tonnage of 1,859,642 entered at Costa Rican ports. About 400 miles of railroad are open. In 1945 there were 430 post offices and 289 telegraph offices (19 wireless), with 1,903 miles of telegraph and telephone line. The country is well provided with airways, and Pan-American Airways, K.L.M., LACSA and TACA call at *San José*, while feeder services link the main centres of population with the capital.

Spanish is the language of the country. Educa-

tion is compulsory and free, but it is mainly from the leisured class that the executive, legislature and judicature are recruited.

FINANCE.

Minister of Information, Señor Ernesto de la Fe y Perez.

EMBASSY IN LONDON

27-28 Hyde Park Gate, S.W.7.

[Western: 3637.]

Ambassador in London, His Excellency Señor Dr. Roberto Gonzalez Mendoza y de La Torre.

Attaché, Señor Erasmo Pelles.

Consul-General, Señor Don Julio A. Brodermann.

Consul-General, Liverpool, Señor Eusebio Román.

Cuba (the largest of the "West India" Islands) lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq. miles and a population of 5,871,000 (1953 census).

The island or Cuba was visited by Christopher Columbus, during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. [The island was under British rule for one year, 1762-1763, when it was returned to Spain in exchange for Florida.] Separatist agitation culminated in the closing years of the 19th century in a fierce and blood-thirsty war. In 1898 the government of the United States intervened and despatched the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which remains an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from Aug. to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated. In 1933 a revolution was followed by provisional government until May, 1936, when a constitutional government was elected. A new Constitution was promulgated in 1940.

Of the total area of 28,000,000 acres, there were (1947), about 4,875,000 acres under cultivation, of which 52 per cent. was under sugar. Tobacco, sweet potatoes, bananas, rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco-nuts, pineapples, &c.) flourish. The chief agricultural products of the island are sugar and tobacco; sugar crop (1951) 5,589,232 long tons (estimated at over 6,500,000 long tons in 1952); tobacco crop (1951) 77,000,000 lb.; the chief product of the forests is mahogany. White cedar is also used for boxing the tobacco crop. The livestock includes 4,136,000 cattle and 407,925 horses,

the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

8,710 route miles of railroad are open (public service 3,059; private lines on plantations and in mining areas 5,651) and about 12,000 miles of telegraph line; there are about 2,200 miles of roads. The island forms an important stopping place for many international airlines.

Language and Literature.—Spanish is the language of the island, but English is widely understood. Education is compulsory and free. The University of Havana was founded in 1728 but until its enlargement under American auspices in the first quarter of the twentieth century no great progress was made in secondary or higher education. Public libraries have been established and there is a flourishing daily press with wide circulations.

FINANCE.

Area and Population.—Czechoslovakia, formerly part of the Austro-Hungarian Monarchy, declared its independence on Oct. 28, 1918 (Czechoslovak Independence Day), the territory thus affected having an area of 53,700 square miles.

Since the War of 1939-45 the territory and population of the Republic have undergone change. By a treaty with the Soviet Union (June 29, 1945) Ruthenia was ceded to U.S.S.R., thus reducing the area by over 4,000 square miles and the population by over 750,000. In addition, the expulsion of the Sudeten German minority sanctioned at the Potsdam Conference has been completed and the latest estimate of the population (Jan. 1, 1950) is 12,536,000.

In 1948 there were 101,238 gypsies (84,438 in Slovakia and 16,700 in the Czech Provinces).

Government.—In September, 1938, Adolf Hitler demanded the cession of the Sudeten districts. On Sept. 29, 1938, a Four Power Conference at Munich acquiesced in the annexation of the territory, on the understanding that no further demands would be made, but on March 14, 1939, Nazi troops invaded Czechoslovakia, in flagrant violation of the terms of the Munich Conference, and

two days later Adolf Hitler proclaimed that Czechoslovakia had "ceased to exist" and had become a Protectorate of the Reich under the names Bohemia and Moravia.

On July 22, 1940, Great Britain recognized the Czechoslovak National Committee set up in London as a provisional Czechoslovak Government, and on July 18, 1941, Great Britain fully recognized the Czechoslovak Government headed by President Benés.

Following the liberation of Eastern Slovakia by Soviet forces in 1945, President Benés and most of the members of his Government left London for Moscow for discussions with the Czechoslovak *émigré* movement in the Soviet Union on the formation of a new Government which would have its seat on Czechoslovak territory. The composition and programme of this Government, which was headed by M. Z. Fierlinger, were announced at Kosice in Slovakia on April 4, 1945.

The Kosice Government included equal representation of four Czech parties (Czech Socialists, Social Democrats, Communists and Popular Party) and two Slovak parties (Democrats and Communists). The main points of its programme were the expulsion of the German and Hungarian minorities and large-scale nationalization. At Potsdam, in July, 1945, it was agreed that the Germans of Czechoslovakia should be transferred to the American and Soviet zones of occupation in Germany, and the movement was completed, in the main by October, 1946.

The first elections in the liberated Republic were held on May 26, 1946, the Communists emerging as the leading party with 38 per cent. of the votes cast. On July 3, 1946, K. Gottwald, the Communist leader, formed a Government of parties participating in a National Front, whose programme was a continuation of the Kosice programme with a two-year plan of economic recovery and reconstruction superimposed. The uneasy alliance between the parties was terminated by a crisis precipitated by the mass resignation on February 20, 1948, of Ministers representing parties opposed to the Communists in protest against the widespread introduction of Communists into the police force by the Communist Minister of the Interior. The Communist Party, with the aid of Action Committees, seized power, and on February 25 a new Government, predominantly Communist was formed. On May 30, 1948, new elections were held, the choice lying between a single joint election list of parties in the National Front, and a blank vote. The Government claimed that 90 per cent. of the electorate voted and that 89 per cent. of the votes cast were for the National Front. Dr. Benés resigned from the Presidency on June 7. The Communist control of the country is now unqualified. The Government introduced a Five-Year economic plan for the years 1949 to 1953, aiming at raising the living standard of all sections of the working population and based on increased productivity of labour, large scale extension of heavy industry, and the industrialization of Slovakia.

Language and Literature.—Czech and Slovak are the official languages but the literature is mainly Czech in Bohemia, Moravia and Silesia. The Reformation gave a widespread impulse to Czech literature, the writings of Jan Hus (who was martyred in 1415) familiarising the people with Wyclif's teaching. This impulse endured to the close of the seventeenth century when Amos Komensky, or Comenius (1592-1670) was expelled from the country. Under Austrian repres-

sion, and with the outlawing of the national language, there was a period of stagnation until the national revival in the early nineteenth century. Modern prose drama and fiction are represented by several authors of international reputation, notably K. M. Capek-Chod (1860-1927), F. X. Svoboda (1860-1943), Jaroslav Hilbert (1871-1936), Viktor Dyk (1877-1931), Arnost Dvorák (1880-1933), Ivan Olbracht (b. 1882), K. Capek (1890-1938), and Vladimír Vancura (1891-1942). Liberty of the press ceased with the violation of independence in 1939. It was temporarily restored on the liberation of the country. After the Communist coup of February 20, 1948, however, freedom of the press was "curtailed." All papers and periodicals were forced to follow the party line and a number of publications were banned. On July 1 serious cuts were made in internal print distribution, causing a further decline in the number of papers and periodicals available.

Education.—Before the Nazi invasion there were about 16,000 public and private elementary schools, with about 1,800,000 pupils and about 400 secondary and technical schools with 160,000 students. The Czech University of Prague was founded in 1348. There is also a university at Brno and additional universities are being instituted in other important towns. The number of students is now several times the pre-war figure. In the 16th century there was a University at Olomouc which was closed by the Hapsburgs at the end of the Thirty-years War. In 1947, President Benés opened a new University at Olomouc. Slovakia has its own university at Bratislava.

Finance.—The Czechoslovak currency is the Czechoslovak *Koruna* (Kcs=Czechoslovak crown) of 100 heller. From the devaluation of the pound in 1949 up to May 30, 1953, the exchange rate was Kcs. 139.58=£1. From June 1, 1953 the rate has been Kcs. 20.16=£1. This change took place as the result of an internal currency reform when a new currency was issued at a basic exchange rate of Kcs. 1.00 of the new currency for Kcs. 5.00 of the old. The new foreign exchange rate represents an appreciation of the new crown by 38.94 per cent. The Budget estimates for 1953 (given in old crowns) are, for expenditure, Kcs. 530,910,000,000 (as compared with Kcs. 323,529,000,000 in 1952) and for revenue, Kcs. 435, 207,000,000 (Kcs. 324, 272,000,000 in 1952). The increase over the 1952 estimates is largely due to the inclusion of new items such as National Insurance.

CAPITAL, Prague (Praha), on the Vltava (Moldau), the former capital of Bohemia with a population (1948) of 922,000. Other towns are Moravská Ostrava (181,000), Brno (Brünn) in Moravia (273,000), Bratislava, where the Danube forms the southern boundary of the Republic (184,000), and Plzen (Pilsen) (121,000).

Vice-Consul, H. Macgaard Nielsen (Commercial Secretary).

Vice-Consul, C. Jacobsen.

AREA AND POPULATION.—A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zealand, Funen, Lolland, etc., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'–57° 45' N. lat., and 8° 5'–15° 12' E. long., with an area of 16,608 square miles, and a population estimated (January, 1953) at 4,352,500. In 1952 there were 76,943 births, 39,173 deaths and 35,724 marriages.

GOVERNMENT.—Under the Constitution of the Kingdom of Denmark Act of June 5, 1953, the legislature consists of one chamber, the *Folketing*, of not more than 179 members including 4 for the Faeroes and 2 for Greenland. The voting age is 23 years. The first elections for the new *Folketing* were held in the autumn of 1953. At the General Election of April 21, 1953, the Social Democrats, the largest party, increased its number of seats from 59 to 62. Other parties (with previous number of seats in parentheses), were as follows: Moderate

Liberals 34 (32); Conservatives 26 (27); Social Liberals 13 (12); Single Tax Party 9 (12); Communists 7 (7).

EDUCATION is free and compulsory, the schools being maintained by taxation. Special schools are numerous, technical and agricultural predominating. There are Universities at Copenhagen (founded in 1478) and Aarhus (1933).

LANGUAGE AND LITERATURE.—The Danish language is akin to Swedish and Norwegian. Danish literature, ancient and modern, embraces all forms of expression, familiar names being Hans Christian Andersen (1805-1875), Soeren Kierkegaard (1813-1855) and Georges Brandes (1842-1927), with Henrik Pontoppidan (1857-1943) and Karl Gjellerup (1857-1919), who shared the Nobel Prize for Literature in 1917, and Johannes V. Jensen (1873-1950), who received the same award in 1945. In 1952 there were 271 daily newspapers in Denmark, of which 12 were published in Copenhagen.

PRODUCTION AND INDUSTRY.—Twenty-four per cent. of the population live exclusively by agriculture, and about 48 per cent. by manufactures and trade. The chief products are wheat, rye, oats, barley, potatoes, seeds, cattle, horses, pigs and dairy produce; manufactures based on imported raw material cover most of the home consumption.

COMMUNICATIONS.—Mercantile marine (ships about 100 gross tonnage) (December, 1952) 576 ships, with a gross tonnage of 1,362,000. There are (1952) 4,772 kilometres of railway and 345,567 kilometres of telegraph and telephone lines.

FINANCE.

	1952-53

There are also Vice-Consulates at Aarhus, Esbjerg, Horsens and Odense.

BRITISH COUNCIL.

Representative, J. S. H. Clissold, Rosenvaengets Allé 32, Copenhagen.

Outlying Parts of the Kingdom

The outlying parts of Denmark have about 55,000 inhabitants. The FARØE, or Sheep Islands (540 sq. m. pop. (1950) 31,667), capital, Thorshavn, are governed by a Lagting of 25 members, and send 2 representatives to the Folketing at Copenhagen. On September 14, 1946, the Lagting with the consent of the Danish Government for its own guidance held a plebiscite on the Farøe. About one-third of the electors did not, however, take part in the voting: of the rest a little more than half the votes cast were in favour of separation from Denmark and the establishment of a republic. At a subsequent general election for the Lagting a great majority voted in favour of remaining a part of the Kingdom of Denmark with a certain extent of home rule. In 1948 the Farøe received a certain measure of home rule. Special Farøese affairs are administered by a council of 3 members. GREENLAND (ice-free portion about 132,000 sq. m., total area about 840,000 sq. m., population, 1952, 22,890), is divided into 3 provinces (West, North and East). Greenland is under the administration of the Prime Minister's Department. West Greenland (cap., Godthaab) has a Landsraad of 14 members and sends 2 representatives to the Folketing at Copenhagen. The trade of Greenland is mainly under the management of the Royal Greenland Trade Department; discoveries of lead were made in 1948. Imports from U.K. (1949) £56,387. The United States of America has acquired certain rights to maintain air bases in Greenland.

Copenhagen, distant from London 728 miles; transit 36 hours.

DOMINICAN REPUBLIC

(República Dominicana.)

President, General Hector B. Trujillo Molina, assumed office Aug. 16, 1952.

EMBASSY IN LONDON.

37 Eaton Square, S.W.1.

[Sloane: 6727.]

Ambassador Extraordinary and Plenipotentiary in London, Dr. Themistocles Messina (1952). Consulate-General, 24 Wilton Street, S.W.1. Consul-General, Señor Don Luis A. de Boyrie de Moya.

There are also Consular Offices at Liverpool Manchester, Nottingham, Grimsby, Southampton, Cardiff, Edinburgh, Glasgow and Belfast.

The Dominican Republic, formerly the Spanish portion of the island of Hispaniola, is the oldest settlement of European origin in America.

The island was discovered by Christopher Columbus in December, 1492, who named it "La Española" or "Little Spain." In 1496 he ordered

his brother, Bartholomew Columbus, to found the capital at the mouth of the Ozama River, on the south of the island, which city he called Santo Domingo. The island immediately became the objective for adventurous Spanish colonists, who exploited the native Indians for the sake of the gold found in the streams. African negroes were imported for the sugar and other plantations both in Santo Domingo and Haiti.

In 1821 Santo Domingo broke away from Spain and declared itself independent, but in 1822 it was invaded and subjugated by its negro neighbours from the west, the Haitians. The latter were driven out on Feb. 27, 1844, when the Dominican Republic was definitely proclaimed by the natives.

The country was occupied by American marines, from 1916 until the adoption of a new Constitution in 1924. A Provisional Dominican Government was in office from October 21, 1922, until July 12, 1924, when a properly elected Constitutional Government was installed, with complete authority over all matters except the collection of the Customs and the redemption of foreign obligations, which continued to be administered by an American official. On Sept. 24, 1940, a new convention was signed at Washington; this provided for the withdrawal of the U.S. Receiver-General, the Customs to be collected by the Dominican Government, and the whole public revenue to be deposited in an agreed bank, the service of the debt being recognized as a first charge on the deposit. Congress consists of a Senate of 19 members, elected for 5 years, and of a Chamber of Deputies of 45 members, also elected for 5 years.

The Dominican Republic lies between Cuba on the west and Puerto Rico on the east and covers an area of about 19,322 square miles, with an estimated population of 2,121,083 (1950). The climate is tropical in the low lands and semi-tropical to temperate in the higher altitudes. An extensive system of motor highways, totalling nearly 900 miles of first-class roads, has been built, and as a result of recent repairs, they are now in excellent condition for motoring. There are about 2,760 miles of mainly second-class and inter-communal roads. There is a direct road from Ciudad Trujillo to Port-au-Prince, the capital of Haiti, enabling the journey from capital to capital to be made in one day. There are about 150 miles of public railway, and a telephone system connects practically all the towns of the republic. There are 12 wireless stations, and the All America Cable Company maintains an efficient service with all parts of the world. Radio Communications of America have a wireless station in Ciudad Trujillo.

Spanish is the language of the Republic and education has made considerable progress. Native literature has not yet produced authors of world-wide reputation.

Sugar, cocoa beans, coffee and tobacco are the most important crops. Other products are mahogany, furniture woods, lignum-vitæ, log wood, divi-divi, cotton, wax, honey, maize, hides, turtle-shell and starch.

The Republic is served by five airlines, Pan-American, KLM, Caribair, Chicago and Southern Airlines and the Compania Dominicana de Aviacion, all using the General Andrews Field at Ciudad Trujillo, leased to Pan-American.

FINANCE

	1950	1951

ECUADOR

(República del Ecuador)

President of the Republic, Dr. J. M. Velasco Ibarra, assumed office, Sept. 1, 1952.
Foreign Affairs, Dr. Teodoro Alvarado Garaicoa.

EMBASSY IN LONDON

Flat 3B, 3 Hans Crescent, S.W.1

[Knightsbridge: 1367]

Ambassador in London (vacant).

Chargé d'Affaires, Señor Jorge Espinosa.

Counsellor, Señor Tristán de Avilés.

Consuls at Liverpool, Birmingham and Glasgow.

Area and Population.—Ecuador is an equatorial State of South America, the mainland extending from lat. 1° 38' N. to 4° 50' S., and between 75° 20' and 81° W. long., comprising an area, reduced by boundary settlements (Jan. 29, 1942) with Peru, to about 226,000 sq. miles.

The Republic of Ecuador is divided into 17 provinces and one territory. It has a population (Census of Nov. 27, 1950) of 3,076,933, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The territory of the Republic extends across the Western Andes, the highest peak of which is Aconcagua, in the Chilean sector (22,976 ft.), the highest peaks in Ecuador being Chimborazo (20,498 ft.), Iliniza (17,405 ft.), Carhuairazo (16,515 ft.), Cotacachi (16,301 ft.) and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,498 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,690 ft.) and Sinchalagua (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayas, Mira, Santiago, Chone, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common.

The *Galápagos* (Tortoise) Islands, forming the province of Colon, were annexed by Ecuador in 1832. The archipelago lies in the Pacific, about 500 miles from Saint Elena peninsula, the most westerly point of the mainland. There are 12 large and several hundred smaller islands with a total area of about 3,000 sq. miles and an estimated population of 1,346. The capital is San Cristobal, on Chatham Island. Although the archipelago lies on the equator, the temperature of the surrounding water is well below equatorial average owing to the *Antarctic Humboldt Current*. The islands export guano and orchilla moss. There is an increasing amount of fishing, mainly for the North American market.

Government.—The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Viceroyalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822). A new constitution was issued on Dec. 31, 1946. Elections were held in June, 1952, and Dr. Velasco Ibarra, who had already been President twice before was elected President.

Production and Industry.—The chief products are cocoa, petroleum, rice, vegetable ivory, bananas, balsa wood, cotton, coffee, indiarubber, sugar, orchilla weed, straw hats, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts.

Communications.—There are about 1,000 miles of permanent roads and 2,500 miles of roads which are only open during the dry season. There are 683 miles of railway, including the railway from Quito to Guayaquil. The main north-south railway is now being extended north-west towards the coast at San Lorenzo. Four commercial air lines operate (Panagra, Area, Braniff and Avianca) and there are services from Quito to Guayaquil, Cuenca, Loja, Manta, Tulcan, Esmeralda, Latacunga, Ambato and Riobamba.

Defence.—The standing army has a strength of about 8,000, and its organization is being modernized by a U.S. military mission. There is a small Air Force and there are a few training ships.

Language and Literature.—Spanish is the language of the country. The electorate of Congress is confined to adult male and female citizens who can read and write and in recent years considerable headway has been made in reducing the high figure of illiteracy. 6 daily newspapers are published at Quito and 6 at Guayaquil. Elementary education is free and compulsory. In 1949-50 there were 320,931 pupils at the 3,291 primary schools and 27,196 pupils at the 156 High Schools. The 4 Universities (at Quito, Guayaquil, Cuenca, and Loja) had 4,020 students in the same year.

FINANCE	1952

External Debt.....	\$U.S. 42,985,000
Sucre quoted at 42.42 = £1.	

As a result of advice given by a Mission composed of representatives of the International Monetary Fund and of the Federal Reserve Bank, New York, an emergency law concerning international exchange was promulgated on June 5, 1947, and extended on December 1, 1950. Under this law importations are restricted to categories of goods included in three lists—Essential, Necessary

and Luxury goods. Taxes are imposed upon the two latter categories.

TRADE	
	1951
Imports....	Sucres 885,585,000
Exports....	782,415,000
	1,170,398,900

Imports from U.K.	£1,181,510	£1,198,670
Exports to U.K.	134,290	171,400

In 1948 U.S.A. sent 78 per cent. of imports and received 40 per cent. of exports.

The chief exports are cocoa, bananas, rice, caoutchouc, vegetable ivory and gold, cinchona bark, Panama hats and coffee; the chief imports are textiles, machinery, foodstuffs, and manufactured goods.

CAPITAL, Quito. Population (1950), 211,566; Ψ Guayaquil (262,624) is the chief port; other centres are Cuenca, 46,425; and Riobamba 29,611.

FLAG: Three horizontal bands, yellow, blue and red (the yellow band twice the width of the others).

EGYPT

(Misr)

President and Prime Minister, General Mohammed Neguib, assumed office on deposition of King Ahmed Fuad II, June 18, 1953.

CABINET

(Sept. 7, 1952)

Deputy Prime Minister and Minister of the Interior, Col. Gamal Abdel Nasser.

War and Marine, Wing Cdr. Abdel Latif Boghdadi.
Commerce and Industry, Dr. Mohammed Sabry Mansour.

Public Works, Murad Fahmy.

**Wakfs, Hassan El Baquory.*

Communications, Dr. Hussain Abu Zeid.

Foreign Affairs, Mahmoud Fawzi.

Education, Ismail Qabbany.

Agriculture, Abdullah Salem.

Health, Dr. Nur Ed-Din Tarraf.

Finance, Dr. El Emary.

Propaganda, Dr. Abbas Ammar.

National Guidance, Maj. Salah Salem.

Minister of State, Fathy Radwan.

EGYPTIAN EMBASSY, LONDON

75 South Audley Street, W.1

[Grosvenor: 2401]

Egyptian Ambassador in London, His Excellency Abdul Rahman Hakki (1953).

Minister-Counsellor, Abdel Hamid Seoud.

2nd Secretaries, Abdel Aziz Taher; Ahmed Talaat; Mohamed Ezzat Madkour.

* Wakfs is an institution of Moslem Law similar to the "trust" of English Law. When property is made Wakf it is dedicated expressly or implicitly to some charitable or religious object, or for the benefit of private individuals. The nearest British equivalent is "The Public Trustee."

3rd Secretaries, Moustafa El-Dib Benshi; Dr. Ahmed Esmat Abdel Magid.

Military Attaché, Col. Mohammed Hamdi el Maghraby.

Air Attaché, Group Capt. Ali Attia.

Assistant Air Attaché, Wing-Comdr. Youssef Wassef.

Labour Attaché, Abdallah I. Darwish.

Attaches, Saad El-Fatary; Abd El-Rehim Azzet; Ahmed Tewfik Khalil; Abdel Halim Badawi; Youssef Hafez Hassan.

Commercial Counsellor, Ahmed Fuad.

Commercial Attachés, Mahmoud Abdel-Hamid Shalaby; Hani Abou Rida.

Agricultural Counsellor, Gamil Aboul Fetouh.

Hon. Attaché, Abdel Aziz Ghaleb.

Consulates-General, 26 South Street, W.1; 415 Derby House, Exchange Buildings, Liverpool.

AREA AND POPULATION.—The total area of Egypt is estimated at 1,000,000 square kilometres (386,110 square miles), the inhabited area being only 35,168 square kilometres (13,578 square miles), with a population enumerated in June, 1947, as 19,090,000 (including nomads).

There are three distinct elements in the native population. The largest, or "Egyptian" element, is a Hamito-Semitic race, known in the rural districts as *Fellahin* (*fellāh*—ploughman, or tiller of the soil). The *Fellahin* have been mainly of the Moslem faith since the conquest of the country in the 7th century, but there are about 1,000,000 Coptic and Greek Orthodox Christians in Egypt. A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts, of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated end of the Nile Valley and the Fayūm. The third element is the *Nubian* of the Nile Valley between Aswān and Wadi-Halfa, of mixed Arab and negro blood. The *Bedouin* and *Nubians* are Moslems.

The territory of Egypt comprises (1) *Egypt Proper*, forming the N.E. corner of the African continent, divisible into (a) the valley and delta of the Nile, (b) the Libyan or Western Desert, and (c) the Arabian or Eastern Desert; (2) *The Peninsula of Sinai*, forming part of the continent of Asia; and (3) a number of *Islands* in the Gulf of Suez and Red Sea, of which the principal are Jubal, Shadwan, Gafatin and Zeberged (or St. John's Island). This territory lies between 22° and 31° N. lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is coterminous with the Anglo-Egyptian Sudan. The western boundary runs from a point on the coast 10 kilometres N.W. of Sollūm to the latitude of Siwa and thence due S. along the 25th meridian to the parallel of 22° N. (the N. boundary of the Anglo-Egyptian Sudan) at 'Uweināt Mountain. The E. boundary follows a line drawn from Rālū on the Mediterranean (34° 15' E. long.) to the head of the Gulf of Aqaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aqaba and the Red Sea. The "settled land area" is stated officially at 7,667,000 *feddāns* (12,431 square miles) and the area of lakes at 641,000 *feddāns* (1,039 square miles), a total of 8,308,000 *feddāns* (13,470 square miles).

Physical Features.—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the

irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The Nile has a total length of 3,850 miles. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 13 feet. Westward from the Nile Valley into Tripoli stretches the *Libyan Desert*, an arid region, containing some depressions, whose springs irrigate small areas known as *Oases*, of which the principal, from S.E. to N.W., are known as Kharga, Dakhla, Farafra, Baharia, and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cairo stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 451 feet high. (A new pyramid, making 4 in all, was discovered by Prof. Selim Hassan in Feb. 1932). Close to the pyramids is the *Great Sphinx*, 189 feet long. In the Eastern Desert a great backbone of high and rugged mountains extends north-westwards from Ethiopia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by *wādīs* (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main *wādīs* from well to well, and here and there are to be found small encampments of wandering Arabs. The north (Mediterranean) coast of Sinai is flat and sandy. Inland, the ground gradually rises into a highly dissected limestone Plateau, which extends southward for about 150 miles and terminates in the great scarp of El Tih. South of El Tih the character of the country abruptly changes, the southern third of the peninsula being formed of rugged granitic mountains intersected by deep ravines. Springs and wells occur in fair abundance, mostly in the *wādīs*, and running water (mostly brackish) is found at a few points.

Religions.—At the Census of 1947 there were 19,037,984 Moslems, 1,273,371 Coptic and Greek Orthodox Christians, 50,200 Roman Catholics, 103,256 other Christians (Protestant and Reformed Churches), and 65,639 Jews. The chief Moslem religious authorities in Egypt are the *Sheik el Gamī el Azhar* and the *Mufti el Di-yor el Masriya*.

Government.—From 30 B.C. to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard. *Mohammed Ali*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811 and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of June 1, 1841.

In 1882, a military revolt, headed by an officer of the Egyptian Army (*Ahmed Arābi Pasha*), assumed alarming proportions and a British expedition was despatched to re-establish the authority of the Khedive. Meanwhile a revolt had broken out in the southern provinces, headed by *Sheikh Mohammed Ahmed*, of Dongola, who proclaimed himself a *Mahdi* of Islam, and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation until 1936 (see below).

During the War of 1914–18 a British Protectorate over Egypt was declared (Dec. 28, 1914) and

Khedive Abbas Hilmi was deposed. He was succeeded by Hussein Kamel, with the title of Sultan, and died Oct. 9, 1917, being succeeded by his brother, Ahmed Fuad. The British Protectorate terminated on Feb. 28, 1922, and Sultan Ahmed Fuad was proclaimed King of Egypt. Following closely on the accession of King Farouk, Egypt became a sovereign state by the *Anglo-Egyptian Treaty*, signed in London (Aug. 26, 1936); the military occupation by British troops was terminated and Ambassadors were duly accredited at the Courts of St. James's and Cairo. Provision was made in the Treaty for a reconsideration of its terms in 1956, and negotiations for revision were opened in 1946. For the progress of further negotiations during 1952-53, see "Events of the Year."

The security of Egypt was threatened after the outbreak of war in 1939 and reinforcements were sent from Britain and the Dominions. Axis troops invaded Egypt in 1940 and fierce fighting ensued, with Allied victories and reverses, until the decisive victory in "The Battle of Egypt" (Oct.-Nov. 1942) drove the enemy out of the country. In July, 1952, King Farouk abdicated in favour of his infant son, who became King Ahmed Fuad II. In June, 1953, however, Gen. Neguib's military council deposed the young king, and declared Egypt a Republic, Gen. Neguib himself assuming the Presidency.

Legislature.—Parliament (*Barlaman*) under the monarchy consisted of a Senate (*Maglis Al-Shuyukh*) of 180 members, of whom two-fifths were nominated by the King, the remainder being elected (for 10 years) on the basis of 1 Senator for every 180,000 inhabitants; and of a Chamber of 319 Deputies (*Maglis Al-Nuwwab*) elected (for 5 years) on the basis of 1 for every 60,000 inhabitants. Gen. Neguib has set up a committee to draft a new Constitution.

Local Government.—The chief towns constitute governorships (*muhāfazas*), and the remainder of the occupied country is divided into provinces (*mudariyas*), which are subdivided into districts (*markaz*), each under a *mamur*, who controls the head man (*omda*) of each village in his district. By the law of 1883 provincial councils were instituted, consisting of two representatives from each *markaz*, under the presidency of the *mudir* (or governor) of the province. These councils were reorganized in 1920 and were made the elementary education authority for the province, with certain restricted powers of local government.

Defence.—The Army, in which service is nominally compulsory, has been expanded from its pre-war (1939) strength of 23,000 and there is a small Air Force. Under the Treaty of 1936, British troops are responsible for the defence of the *Suez Canal Zone*. A small, but efficient, Navy has been built up during the last few years.

Language and Literature.—Arabic is the main language of Egypt and since the last quarter of the 19th century an Arabic daily press has modernized the spoken idiom. The rich literature of Arabia is an inheritance from Islam and in the past half century indigenous poetry and drama have given abundant evidence of vitality. French and English are secondary languages in urban areas. In 1951 16 daily newspapers were published in Cairo (7 Arabic, 1 English, 2 Armenian, 5 French, 1 Greek) and 9 at Alexandria (1 Arabic, 4 Greek, 4 French).

Education on native lines has long been given in elementary vernacular schools. The native system of education is completed by the more promising pupils at the Azhar University in Cairo, the principal University of the Moslem world. In

1940-41 there were 3,931 *Maktabs* (elementary vernacular schools), with 563,170 male and 491,320 female pupils.

Agriculture.—The principal crops grown during *Saifi* (summer) are cotton, rice, sugar cane, and sorgho (maize). *Nili* (flood) part of *Saifi*, has the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reaches its highest level in September—it generally begins in July; the principal crops are maize and rice. *Chitwi* (winter) begins in November and ends in June; the principal crops are cereals, bersem (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onions and helba.

Live Stock.—At the 1947 Census there were 28,000 horses, 1,126,000 asses, 1,321,000 cattle, 1,240,000 buffaloes, 1,875,000 sheep, 1,476,000 goats, 196,000 camels and 50,000 swine.

Fisheries.—The sea and lake fisheries employed 40,000 men and 17,000 boys in 1945, the product of the fisheries being valued at nearly £E5,000,000.

Minerals.—The riparian districts of the lower Valley of the Nile are ill-provided with workable mineral deposits, with the exception of abundant building materials. The mineral resources of Egypt, therefore, are situated in its otherwise barren deserts. Known deposits are chiefly situated at great distances from one another and from the Nile. This fact has retarded exploration and development, but of late years considerable progress has been made. Owing to lack of knowledge of mining, consequent upon their pursuits being entirely agricultural, the local industrial classes have had very little hand in the existing enterprises, whose capital and organization are chiefly foreign. The principal products in 1950 were petroleum, manganese ore, phosphate rock, gypsum, natron, and sulphate of sodium. In 1949 the U.S. Socony Vacuum Oil Company (working in conjunction with Anglo-Egyptian Oilfields) discovered wells about 20 miles south of Sudr, in Sinai on the Gulf of Suez.

Manufactures and Industries.—The principal articles of Egyptian manufacture are cotton and woollen fabrics, silks, embroideries, rayon yarns and fabrics, artificial fertilizers, glassware, soap, vegetable oils, brass, silver and copper ware, leather goods, rugs, pottery, alcoholic beverages, sugar, perfumery, cigarettes and cement.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Shellal, the First Cataract. At this point a steamer connection runs to Wadi Halfa, connecting the Egyptian State with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line to the frontier at Sollum, thus joining Tripoli to Egypt. The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt and the Western Oases Railway) on March 31, 1941, was 3,690 miles (including 157 miles of branch line and 1,000 miles of siding). In 1949-50 57,617,870 passengers and 5,972,007 tons of merchandise were carried, the total receipts being £E3,009,960 and the estimated working expenses £E11,758,160. The gauge is standard (4 ft. 8½ in.). There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 282 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oasis of Kharga with the Nile Valley. In addition to the Government lines, there are 883 miles of light railways exploited by public companies.

A swing bridge, constructed during the Second World War, across the Suez Canal at El Firdan, established connexion between Cairo and Beirut, Syria, over the northward extension of the Palestinian railway system from Halfa to Tripoli (Syria), and there is now a continuous line linking the Libyan port of Tobruk and the former Turkish capital of Istanbul, although, since the Palestine conflict, there has been no through traffic.

Roads and Caravan Routes.—A sea coast motor road exists from Alexandria to Mersa Matruh, with an extension along the coast to Sollûm and thence to connect with the coast road in Libya. The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arbain, leading to Dar Fûr and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir being probably the most frequently used.

Shipping.—For the SUEZ CANAL, see Index. —**Apart from the three great seaports of Alexandria, Port Said, and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollûm and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitia, Jemsa and Hurgada in the Gulf of Suez, and Safage, Qoseir and Halaib on the Red Sea. The Khedivial Mail Steamship Line has its headquarters at Alexandria and a dépôt at Suez. Other Egyptian shipping companies are the Alexandria Navigation Company and the Société Misr de Navigation Maritime. In 1946 11,091 mercantile steamers (42,664,000 tons) entered Egyptian ports.**

Posts and Telegraphs.—There were, in 1947, 6,193 post offices and stations. There were on March 31, 1947, 12,000 miles of State telegraph and 145,000 miles of State telephone wire. In addition, the Eastern Telegraph Company has lines throughout the country. A system of savings banks has been introduced, under the control of the Post Office, the actual deposits being collected in rural districts by the *sarrafi* (village tax-collector).

FINANCE

	1951-52	1952-1953*
Revenue (Budget).	£E212,415,000	£E206,000,000
Expenditure (do.).	231,000,000	206,000,000

*Estimated.

£E (Egyptian pound of 100 piastres) = £1 os. 6½d. sterling. Rate of Exchange (Nov. 8, 1946)—Piastres 97-50 = £1 (see also p. 83).

TRADE

	1951	1952
Total Imports ..	£E241,829,000	£E218,771,000
Domestic Exports	200,640,000	142,851,000
Imports from U.K.	41,927,000	32,465,000
Exports to U.K.	38,572,000	12,907,000

The principal imports are textiles, metals, and manufactures thereof, coal and coke, chemicals, machinery, vehicles, foodstuffs, timber and wood and paper. The exports are principally raw cotton, rice, mineral products and onions.

CAIRO, the capital (population 1947, 2,100,486) stands on the E bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel,

built by Saladin towards the end of the 12th century. The bazaars are always interesting, especially the Khân-el-Khalhî, the Hamzâwî, and the Brass Bazaar, though the Muski, which leads to them, is fast losing its oriental character. The Anglican Cathedral of All Saints overlooks the Nile and occupies a site presented to the British colony by the Egyptian government.

ψ **ALEXANDRIA** (pop. 1947, 928,237), founded B.C. 332 by Alexander the Great, was for over 1,000 years the capital of Egypt and a centre of Hellenic culture which vied with Athens herself. Its great *pharos* (lighthouse), 480 feet high, with a lantern burning resinous wood, was one of the "Seven Wonders of the World." Alexandria now contains two royal palaces, Ras-el-Tin and Montaza, while almost the entire cotton trade of the country is here controlled by the big dealers and brokers. Other towns are: Tanta (139,665), ψPort Said (178,432), Mansura (102,709), Asyût (90,378), Faiyûm (74,314), Zagazig (82,912), Mahalla el Kubra (115,509), Damanhur (84,983), Minya (69,667), ψSuez (108,250), Beni Suef (57,464), ψDamietta (68,520), Giza (53,620), Qena (43,037), Shibin el-Kom (41,836), Sohga (43,234), and ψRosetta (28,698).

CAPITAL, Cairo.

FLAG: Green, with white crescent (convex side to flagstaff), and three 5-pointed white stars (arranged in an equilateral triangle) between the horns.

BRITISH DIPLOMATIC OFFICERS

(The Embassy, Kasr-el-Doubara, Cairo)

British Ambassador, His Excellency Sir Ralph Skrine Stevenson, G.C.M.G. (1950).

Private Secretary and Comptroller, Capt. A. T. G. C. Peachey, C.B.E., D.S.O., R.N. (ret.).

H.M. Minister, M. J. Cresswell, C.M.G.

Commercial Minister, A. N. Cumberbatch, C.M.G., C.B.E.

Naval Attaché, Capt. H. P. Henderson, D.S.O., R.N.

Military Attaché, Brigadier G. W. Duke, C.B.E., D.S.O.

Air Attaché, Air Commodore A. P. Campbell, C.B.E.

Counsellor and Consul-General, J. F. R. Vaughan-Russell, C.B.E.

Oriental Counsellor, T. E. Evans, O.B.E.

Labour Counsellor, M. T. Audsley, C.M.G.

Counsellors, J. Hamilton, C.M.G., M.C.; C. B. Duke, C.L.E., O.B.E.

Counsellor (Legal), W. M. Graham, C.M.G., C.B.E.

1st Secretaries (Commercial), J. B. Flux, M.B.E.; L. M. Minford.

2nd Secretaries, R. A. Burroughs; M. Henderson; O. C. B. St. John; A. W. Sansom, M.B.E.; J. Lamb, M.B.E.; F. Smitherman, M.B.E.; W. B. Emery.

1st Secretary and Consul, M. E. Taylor, M.B.E.

1st Secretary (Information), J. Murray.

Civil Air Attaché, B. G. Barnard.

2nd Secretaries, A. J. Wilson, M.C.; Major A. W. Sansom; R. V. M. Stanbury; H. H. Hale.

Asst. Mil. Attaché, Major C. P. Tamlyn.

Asst. Air Attaché, S/Ldr. K. Johnson.

and Secretary (Information), F. Wells.

Attaché, C. J. H. Foulkes.

BRITISH COUNCIL.—

Representative in Egypt, C. D. Howell, C.B.E., 22 Sharia Adly, Cairo.

There are British Institutes at Cairo, Alexandria and Assiut.

BRITISH CHAMBER OF COMMERCE OF EGYPT, 20 Sharia Soliman Pasha, Cairo; 6 Rue de l'Antienne Bourse, Alexandria, and P.O. Box No. 65, Port Said.

CAIRO is 2,520 miles from London; transit *via* Trieste, 5 days; *via* Marseilles, 6 days.

ETHIOPIA

(Ya Ityopia Nigusa Nagast Mangist)

Emperor of Ethiopia, His Imperial Majesty Haile Selassie I, G.C.B., G.C.M.G., G.C.V.O., LL.D., son of the late Ras Makonnen, Governor of Harar; born July 23, 1892; married in July, 1911, Waizero (Lady) Manen, daughter of Degamatch Asfau Mikael, son of Negus (King) Mikael of Wollo; crowned as Negus Oct., 1928; proclaimed Emperor April 2, 1930; crowned as Emperor Nov. 2, 1930; in exile 1936-1940; led his patriot army 1940-41; returned to his capital May 5, 1941.

Crown Prince, H.L.H. Prince Asfa Wossen, G.C.V.O., G.B.E., eldest son of the Emperor, born July 27, 1916; married May 9, 1932, Walatta Israel daughter of Ras Siyum, whom he divorced in 1945, when he married Waizero Madferish Worq, daughter of Major-General Ababa Damtaw.

The Duke of Harar, H.L.H. Prince Makonnen Haile Selassie, second son of the Emperor, born Oct., 1923; married Feb. 20, 1946, Woizero Sara Gizaw

EMBASSY IN LONDON

17 Princes Gate, S.W.7

[Kensington: 7212]

Ambassador, H. E. Ato Abbebe Retta.

Counsellor, Ato Berhanou Tessema.

and Secretary, Ato Kifle Tesfaye.

3rd Secretary, Ato Seyoum Areru.

Position and Extent.—Ethiopia (or Abyssinia) is an inland country in North-Eastern Africa, bounded on the North by the former Italian Colony of Eritrea, which was federated with Ethiopia under the Ethiopian Crown in September, 1952, in accordance with the United Nations Resolution of Dec. 2, 1950; on the South by Kenya; on the West by the Anglo-Egyptian Sudan; and on the East by French and British Somaliland, and the former Italian portion of Somaliland, which is now being administered by Italy as a Trusteeship territory, the northern and eastern neighbours cutting it off from access to the Red Sea, from which it is distant about 40 miles along the greater part of the Eritrean boundary. The area is estimated at 350,000 square miles, with an estimated population of 10 to 12 millions, of whom fewer than one-half are of the ruling race of Amharas and the remainder mainly Gallas, Guraghi, negro tribes on the west and south frontiers, and Danakil and Somalis on the east.

Ethiopia is mainly a mountainous country, volcanic in origin, with several peaks of about 14,000 ft., notably in the centre and in the Simien range in the north; many other mountains exceed 20,000 ft. The lower country and valley gorges are very hot; the higher plateaux are well watered, with a genial climate. There are two main seasons in the year, a dry winter, October to May, and a rainy summer from June to September, with a season of "small rains" occurring generally in March. The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also rise in the Ethiopian highlands.

The Amharas, who inhabit the provinces of Tigre, Begemdir, Gojjam, Wollo, parts of Shoa, and many of the Gallas, are Christian (a branch of the Coptic Church). The head of the Coptic Church is the Coptic Patriarch at Alexandria, who appoints the Abuna (Metropolitan Bishop) of Ethiopia on the recommendation of the Council of the Ethiopian Church. Since 1950 Bishops have been appointed by the local Metropolitan Bishop, without direct recourse to Alexandria. Moslems predominate in some areas, notably Harar and Jimma, the Moslem centre being at Harar.

Government.—Under the Constitution of 1931, restored in 1942, the absolute power of the Emperor is subject to certain limitations. There is an Upper Chamber of Nobles, nominated by the Emperor, and a Lower Chamber nominated by nobles and local chiefs.

Production and Industry.—The principal pursuits are agriculture and cattle breeding. In the hotter regions, sugar-cane, cotton, &c., flourish; in the middle zone maize, wheat, barley, coffee, wild oranges and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. Coffee provides about one half of the country's total exports by value. The forests are a potential source of wealth. Horses, mules, donkeys, cattle, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people.

Communications.—A railway links Addis Ababa, the capital, *via* Dire-Dawa, with Jibuti, 486 miles away. Several roads were constructed before and during the Italian occupation; the principal road runs from Addis Ababa to Dessie and on to Asmara in Eritrea, with a branch from Dessie to Assab on the Red Sea Coast. Gondar is linked to Asmara by a road through Axum and Adua. Others run from Addis Ababa west to Leketiti, south-west to Jimma, Gore and Gambela, south to the Kenya frontier, and east to Jibouti. In September, 1950, Ethiopia was granted a loan of U.S. \$5,000,000 by the International Bank for Reconstruction and Development for the extension and repair of the highway system. The Ethiopian Air Lines maintain regular services from Addis Ababa to Jimma, Gore and Gambela; Dabra Markos and Gondar; Dire-Dawa; and certain other provincial towns. External services are operated to Jibouti, Aden, Asmara, Port Sudan, Cairo, Khartoum, Nairobi and Jeddah.

Defence.—Ethiopia was invaded by Italy and after a long and arduous campaign (1935-36) was annexed to the Italian East African Empire from 1936-1941. The country was freed from Italian rule by British and Imperial forces, with the assistance of Ethiopian patriot irregulars, Addis Ababa being captured and the Emperor proclaimed as the rightful ruler, May 5, 1941. Gondar, the last centre of Italian resistance, surrendered on Nov. 27, 1941. British and Imperial troops were subsequently withdrawn.

The armed forces comprise the Imperial Bodyguard, the Imperial Army and the Imperial Air Force. The Imperial Bodyguard consists of infantry and some artillery and is trained by Swedish officers. Since April, 1951, one of its five battalions has always been in Korea under the United Nations flag. The Imperial Army consists of infantry, artillery, engineers, signals, ordnance and supply services, and a squadron of light tanks has been formed. The Imperial Air Force comprises two mixed attack squadrons and a flying training school. The aircraft are of British and Swedish manufacture. The training staff is Swedish. The Police Force is under a British

Commissioner who is assisted by 44 British officers; the police training school is staffed by Swedish officers.

Education.—Elementary education is provided without religious discrimination, by Government schools in the main centres of population; there are also Mission schools. In or near the capital are two Secondary Schools, a Technical School, an Agricultural School, a Theological College, and a Teacher-training College; also cadet-schools for the Army, Imperial Guard, Air Force, and Police. Amharic is the official language of instruction, with English as the first foreign language. Arabic is taught in Koran Schools; and Ge'ez (the ancient Ethiopic) in Christian Church Schools, which abound. Adult education is met to some extent by Institutes which provide evening classes in Addis Ababa. The British Council was withdrawn from Ethiopia in June, 1951.

FINANCE

	1949-50	1950-51*
Revenue	£8,784,300	£7,858,571
Expenditure	8,454,800	7,555,478

* Estimated.

Currency.—A new Ethiopian currency was issued by the State Bank of Ethiopia in July, 1945, at an exchange rate of Ethiopian \$10 = £1, backed almost entirely by sterling securities. The East African shilling remained legal tender temporarily but not the Maria Theresa dollar, although it continued to be widely used in the Provinces. In November, 1946, a Proclamation was issued by which the use and possession of Maria Theresa dollars were forbidden, and all coins had to be surrendered to the Ethiopian authorities at a rate of two Maria Theresa dollars to three Ethiopian dollars. Ethiopia did not devalue her currency in line with sterling in September, 1949, and a rate of E \$7 = £1 has been maintained since that date.

TRADE

	1951-52
Total Imports	£15,972,785
Total Exports	16,295,360

The chief imports by value are cottons, salt, sugar, tyres, vehicle parts and petrol; the principal exports by value being coffee, hides and skins, oil-seeds, flour, cereals and pulses.

CAPITAL. Addis Ababa (estimated population 250,000), also capital of the province of Shoa; other provincial capitals are Makale (Tigré), Gondar (Begemdir), Dessie (Wallo), Debra Markos (Gojjam), Lekemti (Wallega), Goré (Ilubbabor), Jimma (Kaffa), Chencha (Gamu-Gofa), Yirgalem (Sidamo), Aselle (Arusi), and Harar (Harar). Besides these, Dire-Dawa, Gambela, and Aduwa are towns of some importance. There are ancient architectural remains at Aksum, Gondar, Lalibela and elsewhere.

ETHIOPIAN FLAG: Three horizontal bands; green, yellow, red.

BRITISH EMBASSY

(Addis Ababa)

Ambassador, His Excellency Douglas Laird Busk, C.M.G. (1951) £3,800
1st Secretary, C. O. I. Ramsden.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Addis Ababa, Harar and Mega.

ERITREA

A former colony of Italy, Eritrea extends from Ras Kasar, 8° 2' N., to Ras Demoiria, 12° 42' N., and is bounded on N.W. by the Anglo-Egyptian Sudan, on S. by Ethiopia, and on S.E. by French

Somaliland. It consists of a high, mountainous hogsback interposed between the Red Sea and the Sudan, flanked on east and west by flatter territory. The mountains range up to 10,000 ft. and Asmara, the capital (pop. 123,000, 14,500 Italians), stands at 7,800 ft. above mean sea level. Total area, 48,350 square miles, with a population of about 1,000,000, of whom about 20,000 are Europeans. Of the population about half are Coptic Christians and the remaining half are Moslems.

Eritrea was administered by Great Britain from the end of the Second World War until September 15, 1952, when in accordance with a resolution of the United Nations Assembly of December 2, 1950, it was federated with Ethiopia under the Ethiopian Crown. A new Constitution for Eritrea, drawn up by the U.N. Commissioner, and approved by the Eritrean Constituent Assembly, was ratified by the Emperor Haile Selassie on August 11, 1952. The Government of Eritrea has legislative, executive and judicial powers in domestic affairs, and its jurisdiction extends to all matters not vested in the Federal Government, including health, education, welfare, law and order, the levying of taxes and adoption of a budget. Defence, currency, foreign affairs, finance, foreign trade and communications (including ports) are within the jurisdiction of the Federal Government. The Federation of Eritrea with Ethiopia was ratified by the Emperor Haile Selassie on September 11, 1952, and came into effect with the final handing over of authority by the British Administration at midnight on September 15, 1952.

Full executive power is, subject to certain safeguards, in the hands of a Chief Executive elected by the Assembly to hold office during its own term, but not responsible to the Assembly. The single chamber Assembly is elected by all adult males of federal nationality. There is also in Eritrea a representative of the Emperor who has certain formal rights and prerogatives not affecting Eritrea's autonomy. English was adopted as the official language of the Eritrean Assembly.

Chief Executive of Eritrea, Ato Tedla Bairu, appointed Sept. 16, 1952.

ψ Massawa (pop. 27,000) is the chief port, where there is a good harbour, other centres being Keren (10,000), Decamere (9,000), Adi Ugri, Agordat and Tessenet. A railway from Massawa runs to Asmara and thence inland to Keren and Agordat, with projected extensions towards the S.E. boundary.

FINLAND

(Suomi)

President, Joho Kusti Paasikivi, born 1870, elected March 9, 1946, re-elected for term of six years, March 15, 1950.

CABINET

(March 17, 1950)

Prime Minister and Minister for Foreign Affairs, Dr. U. K. Kekkonen (Agrarian).

Deputy Minister for Foreign Affairs, Ralf Törngren (Swedish).

Agriculture, Martti Miettunen (Agrarian); Emil Luukka (Agrarian); Hannes Tialnen (Social Democrat).

Commerce and Industry, Penna Tervo (Social Democrat).

Finance, J. Nuikkanen (Agrarian).

Education, Reino Oittinen (Social Democrat).

Social Affairs, Väinö Leskinen (Social Democrat);

Lauri Murtomaa (Agrarian).

Justice, Sven Högström (Swedish).

Interior, V. J. Sukselainen (Agrarian).

Communications and Public Works, Eetu Korjalainen (Social Democrat); Kauno Kleemoia (Agrarian). Defence, Emil Skog (Social Democrat).

LEGATION IN LONDON

65 Chester Square, S.W.1

[Sloane: 0771]

Minister in London, His Excellency Monsieur Ernst Ossian Soravuo (1952).

Area and Population.—A country situated on the Gulfs of Finland and Bothnia, with a total area of 130,127 square miles, of which 70 per cent. is forest, 9 per cent. cultivated, 9 per cent. lakes and 12 per cent. waste and other land, population (Jan. 1, 1953) 4,116,000. In 1952 the birth rate was 22.9 per 1,000, death rate 9.6 per 1,000. The infant mortality rate is 31.6 per 1,000 live births. 96 per cent. of the people are Lutherans, 1.7 per cent. Greek Orthodox and 2.3 per cent. belong to other religious bodies. The loss of Karelia meant resettling about 480,000 refugees mainly on some 46,000 new farms provided by the Government, partly from holdings exceeding 62 acres and partly by purchase.

The Åland Archipelago (Åhvenanmaa), a group of small islands at the entrance to the Gulf of Bothnia, covers about 572 square miles, with a population (1949) of 23,008 (wholly Swedish-speaking). The islands have a semi-autonomous status.

Government.—Under the Constitution there is a single Chamber (*Eduskunta*) for which women are eligible, now composed of 200 members, elected by universal suffrage of both sexes. The legislative power is vested in the Chamber and the President. The highest executive power is held by the President who is elected for a period of 6 years.

The last general election was in July, 1951. The present state of the Parties is as follows: Agrarian 57, Social Democrats 53, People's Democrats (mainly Communists) 43, Conservatives 28, Swedish 15, National Party 20. 29 women were returned in 1951. The extreme Right, which was represented before the War, is banned by the Peace Treaty.

Defence.—By the terms of the Peace Treaty (Feb. 10, 1947) with U.K. and U.S.S.R., the army is limited to a force not exceeding 34,000. The Navy is limited to a total of 10,000 tons displacement with personnel not exceeding 4,500. The Air Force, including naval air arm, is limited to 60 machines with a personnel not exceeding 3,000. Bombers or aircraft with bomb-carrying facilities are expressly forbidden. The Defence Forces contain a cadre of regular officers and N.C.O.'s, but their bulk is provided by conscripts who serve for an average of 8 months.

Education.—Primary education is compulsory and free for all children from 7 to 15 years, and in 1950-51 there were 490,000 in attendance at primary schools, with 95,000 in secondary schools and 26,000 in colleges for vocational training. Evening courses for adults were attended by about 44,000 students (1949-50). There are 11 Higher Schools with 4,400 students, and in addition to the State University of Helsinki (about 9,000 students) there is a Finnish-speaking University (450 students) and a Swedish-speaking University (550 students) at Turku.

Language and Literature.—In 1950 all but 9 per cent. of the people were Finnish-speaking, 8.6 per cent. speaking Swedish and 0.4 per cent. other languages (mainly Lapps leading a nomadic life in the north). Since 1883 Finnish has been on an equal footing with Swedish as the official language of Finland, but since independence in 1917 Finnish has slowly been displacing Swedish. In literature

also, until the close of the eighteenth century, Swedish was dominant, but awakening Finnish nationalism in the early years of the nineteenth century and the establishment of an association for the promotion of Finnish literature in 1831 gave Finnish the status of a literary language. There is a vigorous modern literature. Eemil Sillanpää was awarded the Nobel Prize for Literature in 1939. There are 60 daily newspapers in Finland.

Production and Industry.—Agriculture and forestry are the principal occupations of the people. The cultivated area is small (about 6,000,000 acres in 1950, including 2,400,000 acres under hay). The main crops are hay, oats, wheat, rye, barley and potatoes. The *Live Stock* (1950) included 427,000 horses, 1,822,000 cattle, 1,329,000 sheep, 469,000 swine and 3,202,000 poultry. Reindeer (Feb., 1949) numbered 106,806, about 120,000 having perished during the war of 1939-45. The productive forest area covers 53,500,000 acres and is a great source of wealth, exceeding that of every European country except Russia. The growing stock comprises 48,384,000,000 cu. ft., including bark, of which 45.5 per cent. is pitch pine, 32.2 per cent. spruce, and the rest largely birch. Saw mills, wood pulp, cellulose and paper manufacture provide the chief industry with about 26,000 persons employed in the factories. There is no coal, and mineral resources, with the exception of copper ore, are limited. Reparations payable to U.S.S.R. proved a heavy draw on the country's economic resources, but they were completed in September, 1952.

Communications.—There are 3,117 miles of rail-road and a well-developed telegraph and telephone system. There is railway connexion with Sweden and U.S.S.R., passenger boat connexion with most of the countries of Western Europe, and telephone communication with most countries of the world. External civil air services are maintained by BEAC (as far as Stockholm), Aero O/Y (Finnish Airlines), Scandinavian Airlines System and Pan American Airways. Aero Flot (the Soviet State Airlines) maintains a service twice a week with Leningrad and Moscow, and Czech State Airlines twice a week with Prague. Internal air services are Finnish. The merchant fleet (March 1953) consists of 346 steamers (461,072 gross tons), 134 motor vessels (153,441 gross tons), and 130 sailing ships (including those with auxiliary engine) (12,334 gross tons).

FINANCE		1953
Revenue (Budget).....	Marks	185,599,200,000
Expenditure (do.).....		205,012,000,100
Debt (March 1953).....		124,233,000,000
Finnish Mark 646 = £1 (see also p. 83).		

TRADE		1952
Total Imports.....	Marks	182,186,300,000
Total Exports.....		156,829,200,000

	1951	1952
Imports from U.K.:	£50,200,000	£53,600,000
Exports to U.K.	89,700,000	58,200,000

The principal imports are raw materials, food-stuffs, machinery and manufactured goods. The exports are principally the output of the timber mills (timber, cellulose and paper).

CAPITAL, Ψ Helsinki (Helsingfors). Population (1952) 384,500; other towns are Ψ Turku (Åbo), 106,000; Tampere (Tammerfors), 105,000; Lahti, 45,000; Pori (Björneborg), 43,000; Oulu (Uleåborg), 38,000; Ψ Vaasa (Vasa), 35,000; and Kuopio, 33,000.

FLAG: White with blue cross.

NATIONAL DAY: December 6.

BRITISH LEGATION
Helsinki

British Minister's Residence, Itäinen Puistotie 8B.
Chancery Offices, E. Esplanadikatu 18.
British Minister, His Excellency Sir Andrew Noble.
Bt., C.M.G. (1951).

1st Secretary, I. D. Scott, C.I.E.

Naval Attaché, Capt. A. A. F. Talbot, D.S.O., R.N.

Military Attaché, Lt.-Col. G. C. M. Bowser.

Asst. Military Attaché, Capt. R. B. Hoskyn, M.C.

1st Secretary, J. D. Helps.

1st Secretary (Labour), P. C. D. Archer.

2nd Secretaries, D. G. Barr; J. E. Cable.

1st Secretary (Commercial), R. A. Daniell.

2nd Secretary (Commercial), G. S. McWilliam.

1st Secretary (Information), F. B. Aikin-Sneath,
C.B.E.

3rd Secretary (do.), D. M. Edwards, D.S.O.

Chaplain, Rev. H. Isherwood.

There are British Consular offices at Helsinki,
Tampere, Turku, Pori, Kotka, Oulu and Hamina.
British Council Representative (Lasipalatsi, Helsinki),
R. Washbourn.

FRANCE

(La République Française)

President of the French Republic (1947-1953),
Monsieur Vincent Auriol, born 1884; elected
Jan. 16, 1947.

CABINET

(June 28, 1953)

Prime Minister, Joseph Laniel (*Ind. Rep.*)
Deputy Prime Ministers, Paul Reynaud (*Ind. Rep.*);
P. H. Teitgen (*M.R.P.*), Henri Queuille (*Radical*).
Minister of National Defence, René Pleven
(*U.D.S.R.*).

Justice, Paul Ribeyre (*Peasant Party*).

Foreign Affairs, Georges Bidault (*M.R.P.*).

Labour and Social Security, Paul Bacon (*M.R.P.*).

(a), (b), (c). These Departments correspond with
the districts of Alsace and Lorraine.

AREA AND POPULATION.—The most westerly State of Central Europe, extending from 42° 20' to 51° 5' N. lat., and from 7° 45' E. to 4° 45' W. long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1914) at 207,076 square miles, divided into 90 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The territory ceded by the *Treaty of Frankfurt* (May 10, 1871) amounted to 5,604 square miles; that regained by the *Treaty of Versailles* (June 28, 1919) to 5,819 square miles, making the 1939 area of France (exclusive of Algeria) 212,895 square miles, with a population (census of March 10, 1946) (excluding 312,105 absent on service) of 40,517,923, of whom 1,670,729 were foreigners. (Estimated, Dec. 31, 1952, at 42,733,000, including Corsica.)

On Oct. 11, 1947, the State of the Saar voted for economic union with France and on Oct. 13, 1947, a plebiscite in the Tenda and Briga areas on the Franco-Italian frontier (225 square miles, 6,000 inhabitants) confirmed the decision of the Peace Treaty by 91 per cent. of the votes cast. A general election in Nov., 1952, gave a majority for economic union.

French National Statistical Service figures relating to births:—

Year	Number	Year	Number
1940.....	533,000	1947.....	863,000
1941.....	490,000	1948.....	864,000
1942.....	542,000	1949.....	865,000
1943.....	589,000	1950.....	855,620
1944.....	600,000	1951.....	822,000
1945.....	641,000	1952.....	815,000
1946.....	836,000		

In 1946, for the first time for eleven years, the birth rate was higher than the death rate, and in the three years 1946-1948 the natural increase in population was 983,000. The mortality rate in 1948, with 506,000 deaths, was the lowest on record. In 1950 the figure was 530,000. Infant mortality fell from 108 per 1,000 live births in 1945 to 55 in 1949, and 52 in 1950.

GOVERNMENT.—The monarchical system of government was overthrown by the *French Revolution* (1789-1793), and the *First Republic* endured until the Great Napoleon (born Aug. 15, 1769, died May 5, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the "Hundred Days" of Napoleon (March 20-June 29, 1815), until the *Second Republic* of 1848, which became the *Second Empire* on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III. (nephew of the Great Napoleon) was deposed, and the *Third Republic* was set up. The constitution of the Third Republic vested the legislative power in a Chamber of Deputies (numbering 618 in 1940) elected for 4 years, and a Senate (numbering 314 in 1940) elected for 9 years, one-third retiring every 3 years. The executive was vested in the President, who was elected for 7 years by the Senate and Chamber assembled in Congress. The President of the Republic selected a President of the Council of Ministers from among the leaders of the various political groups and confirmed his choice of colleagues.

On Sept. 1, 1939, Germany invaded Poland, thus precipitating war with France and Great Britain, who had (March 31, 1939) given an open pledge to support Poland against aggression.

On June 17, 1940, the late *Maréchal Pétain* sought terms of surrender from the Germans. A number of French troops had reached British ports after the

evacuation of the British Expeditionary Force from Dunkirk and St. Valéry, and on June 23, 1940, after stating that the French Government had capitulated before all means of resistance had been exhausted, General de Gaulle announced the formation of a Provisional National Committee "to defend that part of the French Empire which has not yet been conquered by Germany and to free that part of France still under the yoke of the invader."

On July 14, 1942, the name of the Free French movement was changed to *La France Combattante* (Fighting France).

On June 3, 1943, after prolonged negotiation, there was set up a *French Committee of National Liberation*, which was recognized by the United Nations on August 26, 1943.

Paris was liberated on August 25, 1944, and on October 13, 1944, the de Gaulle administration was recognized by the United Nations as the government of France.

Under the de Gaulle administration there was a single chamber legislature (The National Consultative Assembly) which met at Algiers until France was liberated. The enlarged Consultative Assembly met in the Luxembourg Palace (Paris), formerly the Senate House, on Nov. 7, 1944.

Following the Referendum of Oct. 21, 1945, a Constituent Assembly was elected with the task of drafting a new constitution.

On May 15, 1946, the Constitution drafted by the Constituent Assembly was rejected by a national referendum and the Assembly was dissolved. On June 2, 1946, another Assembly was elected for the duration of seven months and for the purpose of framing and submitting a Constitution to another national vote.

Under the new Constitution, adopted by a majority of 1,132,011 in a National Referendum on Oct. 13, 1946, the Legislature consists of the National Assembly and the Council of the Republic. Both Chambers are elected on a territorial basis, the National Assembly by universal direct suffrage and the Council of the Republic by the communal and departmental Councils through universal indirect suffrage. Laws are passed by the National Assembly only, but the Council of the Republic examines all bills given a first reading by the National Assembly in an advisory capacity. If the Council's advice is affirmative the bill becomes law. If the Council's advice disagrees, the Assembly gives the bill a second reading and if it rejects the Council's amendments, it must do so by a public ballot of all its members and by an absolute majority.

In June, 1951, a General Election was held, and the resulting composition of the National Assembly was:—

Party	Seats
Communists.....	103
Socialists.....	104
Radical Socialists.....	94
M.R.P.....	85
Moderates.....	98
R.P.F. (General de Gaulle)...	118
Miscellaneous and Colonial...	24
Total.....	626

On Jan. 16, 1947, the National Assembly and the Council of the Republic met and elected M. Vincent Auriol as President of the Republic.

PRODUCTION.—The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beet-root (for the manufacture of sugar), hops, &c. Rice is being grown in parts of the Camargue (Rhône delta). Fruit trees abound, and are very

productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c.

The Harvest in 1952 (provisional figures) was:—

	(Quintals)
Wheat.....	83,100,000
Oats.....	32,700,000
Barley.....	17,100,000
Rye.....	4,800,000

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orleans, consisting chiefly of oak, birch, pine, beech, elm, chestnut and the cork-tree in the south. The vine is cultivated to a very great extent, as the names Bordeaux, Burgundy, Champagne, &c., universally testify. Production in 1952 was 53,200,000 hectolitres. Cider-making is also an important industry, and the production in 1950 was 22,000,000 hectolitres. The live stock (1952) included 16,194,000 cattle, 7,662,000 sheep and lambs, 7,154,000 pigs, 2,333,000 horses, 201,000 asses and 88,000 mules. The mineral resources include coal, pig iron, copper, lead, silver, antimony and salt. Over 55,000,000 tons of coal were mined in 1952. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, woollens, carpets, linen, silk and lace.

LANGUAGE AND LITERATURE.—French is the universal language of France and of a large proportion of the people of Belgium, Luxemburg, Switzerland, Italy, Egypt, Tunisia, Algeria, Mauritius, Haiti, the Province of Quebec, Canada, and of the State of Louisiana, U.S.A., to whom the almost inexhaustible literature of France is a treasured heritage. The work of the *French Academy*, founded by Richelieu in 1635, has established *le bon usage*, equivalent to "The King's English" in Great Britain. French authors have been awarded the Nobel Prize for Literature on 7 occasions—R.F.A. Sully-Prudhomme (1901), F. Mistral (1904), Romain Rolland (1915), Anatole France (1921), Henri Bergson (1937), Roger M. du Gard (1937), and André Gide (1947).

DEFENCE.—The personnel of the Defence Forces on June 7, 1950, was—Army 456,000; Navy 54,000; Air Force 68,000. The French Navy included (1952) 2 battleships, 3 aircraft carriers, 5 cruisers, 21 destroyers and 13 submarines. The number of aircraft is not stated and is being supplemented by purchases in Great Britain and U.S.A.

EDUCATION.—The educational system is highly developed. Central Administration comprises (a) Ministry of National Education with Secretariats of State for Technical Education, Youth and Sports, and for Fine Arts; (b) Superior Educational Council, charged with the actual administration; (c) Consultative Committee (advisory); (d) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. Local Administration comprises (a) Territorial Academies, with inspecting staffs for all grades; and (b) Departmental Councils, presided over by the *prefet*, charged especially with primary education. (i.) Primary education is secular, compulsory and free, the school age being 6 to 14. Schools are for boys, for girls, or mixed. (ii.) Secondary: State lycées, communal colleges, and many private establishments, 7-yrs. course, either (a) purely classical; (b) purely modern; (c) Latin and sciences; or (d) Latin and modern languages. Sèvres school and the Sorbonne (University of Paris) are among the well known establishments. (iii.) Special Schools are numerous. (iv.) There are 17 Universities, with over 136,000 students at the beginning of 1951 (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix (A.D. 1409), Alger,

Besançon (1485), Bordeaux (1441), Caen (1432), Clermont (1808), Dijon (1722), Grenoble (1339), Lille (1530), Lyon (1808), Montpellier (1125), Nancy (1572), Paris (1150), Poitiers (1431), Rennes (1735), Strasbourg (1567), and Toulouse (1230).

ARCHAEOLOGY, ETC.—There are dolmens and menhirs in Brittany, prehistoric remains in Dordogne, cave drawings in Ariège, and throughout France various megalithic monuments erected by primitive tribes, predecessors of Iberian invaders from Spain (now represented by the Basques), Ligurians from northern Italy and Celts or Gauls from the valley of the Danube. Julius Cæsar found Gaul "divided into three parts" and described three political groups—Aquitani south of the Garonne, Celts between the Garonne and the Seine and Marne; and Belgæ from the Seine to the Rhine. Roman remains are plentiful throughout France in the form of aqueducts, arenas, triumphal arches, &c., and the celebrated Norman and Gothic Cathedrals, including Notre Dame in Paris, and those of Chartres, Reims, Amiens (where Peter the Hermit preached the First Crusade for the recovery of the Holy Sepulchre), Bourges, Beauvais, Rouen, etc., have survived invasions and bombardments, with only partial damage, and many of the renaissance and XVIIIth century châteaux survived the French Revolution.

COMMUNICATIONS.—The length of the *Routes Nationales* is about 50,000 miles, and of local roads 342,000 miles. The principal rivers of France are the Seine, Loire, Garonne, and Rhône, the navigable waterways having a length of 9,774 km. The Rhone is navigable for 1,200-ton vessels from the sea to Switzerland.

The system of railroads in France is very extensive. The length of lines of general interest, inclusive of local lines, open for traffic on January 1, 1951, was 40,600 km., of which about 4,100 km. were electrified. The lines left open in Sept. 1944 totalled only 11,125 miles, but the work of reconstruction then begun has restored the pre-war figure. Passengers and goods carried in 1950 were estimated at 542,000,000 and 39,000,000 tons respectively. In 1950 there were 2,320,000 telephone subscribers.

Civil Aviation.—In 1950 Air France flew 38,000,000 kilometres and carried 770,000 passengers.

TOURIST TRAFFIC.—It is estimated that upwards of 3,200,000 foreigners visited France during the 1951 tourist season, a record number.

Shipping.—The French mercantile marine in 1952 consisted of 735 ships of 3,393,090 gross tons. During the year 1950 the total tonnage of vessels handled in French ports amounted to 31,524,000 tons.

FINANCE 1950

Total revenue (Budget).... Fcs. 3,217,000,000,000
Ordinary expenditure (do.)... 2,237,000,000,000

The Public Debt on December 31, 1951, amounted, to Fcs. 4,287,000,000,000, of which the external debt accounted for Fcs. 1,254,000,000,000.

Currency.—The unit of currency is the franc of 100 centimes. In Feb., 1944, the exchange value of the franc was fixed (for the whole French Empire, except the Levant) at 200 francs=£1 sterling. In December, 1945, the franc was devalued (for Metropolitan France only) to 480 francs=£1 sterling. On Jan. 26, 1948, the rate was 864 francs=£1 and 214.392 francs=\$1 U.S. On Oct. 17, 1948, the rate was changed to 1,062 francs=£1 and 264 francs=\$1 U.S. The currencies of French territories in the Pacific and the French rupee were not affected by the change. The Bank of England Official rate on Sept. 18, 1949

(after devaluation). was francs 980=£1 sterling (see also p. 83).

COMMERCE

The principal imports are coal and coke, wool, cotton, cereals, petroleum chemicals, oleaginous fruits and seeds, machinery, raw skins, timber, caoutchouc, copper and coffee. The principal exports are chemical products, iron and steel, textiles (silk and cotton), automobiles, wine, soaps and perfumes, and glass.

FRENCH FOREIGN TRADE

1950

Imports .. *Fr.* 792,480,000,000

Exports .. 685,680,000,000

TRADE WITH UNITED KINGDOM

Year	To France	From France
1938	£23,334,000	£23,508,000
1948	45,000,000	46,500,000
1949	33,000,000	70,000,000
1950	40,000,000	99,000,000
1951	54,000,000	135,000,000
1952	60,000,000	87,000,000

ALGERIA

Algeria.—Algiers surrendered to a French force on July 5, 1830, and Algeria was annexed to France in Feb. 1842. Since 1881 the three northern departments of Algeria—Algiers, Oran, and Constantine—have formed an integral part of France, under a Governor-General, assisted by a Consultative Council of 15 official members and a Superior Council of 60 members. Algeria sends 14 Senators and 30 Deputies to Paris. Algeria lies between 8° 45' W. to 12° E. longitude, 37° 6' N. to an undetermined S. limit about 19° N., covering an area estimated at 222,120 square miles, with a population (1948) of 8,676,016. The total value of imports in 1951 was 203 billion francs, and of the exports 135 billion francs. The bulk of trade is with France. The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates, corkwood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1939 there were over 3,000 miles of railroad open for traffic; and in 1938 the number of ships engaged in foreign trade entering Algerian ports was 3,956. The principal town is Ψ Algiers, the capital (municipal population, 1948, 416,758), a most important coaling station and much frequented as a health resort; other large towns are Ψ Oran (362,295), Constantine (159,541), Ψ Bone (94,021), Sidi bel Abbès (78,679), Tizi Ouzou (27,897), Ψ Philippeville (53,242), Mascara (57,500), Tlemcen (85,345), Ψ Bougie (52,283), and Ψ Mostaganem (99,490).

Southern Algeria, consisting of the Territories of Ain Sefra, Ghardaia, Touggourt and the Saharan Oases, was formed into a separate colony on Dec. 24, 1902. The population of Southern Algeria at the census of 1948 was 816,993 (included in the figure given above).

Governor-General, M. Roger Léonard.

CAPITAL OF FRANCE. Paris, on the Seine.

Population (1947) 2,725,374. The seat of the l'Étain Government was Vichy. Twenty-two other cities exceeded 100,000 at the Census of 1946

— Ψ Marseilles 636,000, Ψ Lyons 571,000, Ψ Bordeaux 254,000, Ψ Nice 211,000, Toulouse 264,000, Ψ Nantes 200,000, Lille 189,000, Strasbourg 174,000, St. Etienne 178,000, Ψ Le Havre 107,000, Ψ Toulon 126,000, Ψ Rouen 107,000, Nancy 113,000, Reims 111,000, Roubaix 101,000, Clermont Ferrand 109,000, Rennes 114,000, Dijon 101,000, Grenoble 102,000, Limoges 108,000, Nîmes 104,000, Le Mans 100,000, Mulhouse 88,000, and Metz 70,000.

The chief towns of Corsica are Ψ Ajaccio 40,000 and Ψ Bastia 53,000.

Paris is distant from London 267 miles.

FLAG: The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff)

THE FRENCH UNION

The French overseas territories have a total area of approximately 3,750,000 sq. miles with an estimated population (1947) of 63,000,000.

FRENCH INDIA (see India).

INDOCHINA

Indochina comprises the three states of Viet Nam, Cambodia and Laos.

VIET NAM.—On May 22, 1949, the National Assembly ended the colonial status of Cochinchina and thus facilitated the unification of the three Ky (Provinces) of Tonkin, Annam and Cochinchina as the independent state of Viet Nam, within the French Union. The capital is Ψ Hanoi.

The recognition of the three states of Indochina by Great Britain and the U.S. was announced on Feb. 8, 1950. The Soviet Union and Communist China recognise the rebel Viet-Minh Communist front in Viet Nam, which for some time has been waging a guerrilla war against the Emperor Bao Dai.

North Viet-Nam, formerly *Tonkin*, a French Protectorate since 1883, has an established area of 43,000 square miles and a population (1942) of 10,000,000. Rice is the principal crop. The capital is Ψ Hanoi (160,000), the principal seaport being Ψ Haiphong (122,000).

Central Viet-Nam, formerly *Annam*, a French Protectorate since 1884, has an estimated area of 58,000 square miles and a population (1943) of 7,184,000. Rice is the principal product. The imports were valued in 1938 at 47,740,000 *Fr.* and the exports at 112,860,000 *Fr.* The capital is Hué (40,000), the seaports being Ψ Tourane (27,000) and Ψ Qui Nhon.

South Viet-Nam, formerly *Cochin-China*, ceded to France by the King of Annam in 1868 and a French Colony from 1868 to 1949, has an estimated area (including the Condor Islands) of 26,000 square miles and a population (1948) of 5,628,000. A Republican form of government was set up in 1947. Rice (3,720,000 metric tons in 1938) and sugar are the principal products. The capital and principal seaport is Ψ Saigon (pop. 111,000); Ψ Chalon (145,000).

Emperor of Viet Nam, Bao Dai (formerly Emperor of Annam); born 1913, succeeded Nov. 6, 1945; recognized as Head of Viet-Nam March, 1949.

LEGATION IN LONDON

14 Victoria Road, W.8

Envoy Extraordinary and Minister Plenipotentiary, M. Nguyen Khac Ve (1952).

CAMBODIA, a French Protectorate since 1863, has an estimated area of 70,000 square miles and a population (1950) of 4,150,000. Rice is the principal crop. Norodom Sihanuk, King of Cambodia, succeeded April 26, 1941, and in 1947

he granted a constitution with an elective assembly. The capital is Ψ Phnom Penh (260,000).

LAOS.—By treaty signed July 19, 1949, the King of Laos (Sisavang Vong) became an independent sovereign within the French Union. Laos, which includes the protected Kingdom of Luang Prabang and has been a French Protectorate since 1893, has an estimated area of 90,000 square miles and a population (1948) of 1,500,000. The capital is Vientiane (10,000).

BRITISH LEGATION Saigon

H.M. Envoy Extraordinary and Minister Plenipotentiary, His Excellency Sir Hubert Ashton Graves, K.C.M.G., M.C. (1951).

FRENCH TERRITORIES IN AFRICA

Algeria is an integral part of France. Morocco is a French (and partly Spanish) protectorate.

Tunisia has been a French protectorate since 1881. It lies between Algeria and Tripoli, and extends southwards to the Sahara, with a total area of about 45,000 sq. miles and a population (Census of 1948) of 3,230,952 (including 143,977 French civilian population and 84,935 Italians). The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The principal minerals are coal, copper, lead, zinc and iron, and phosphates and marble are also worked.

In 1951 the revenue was 36,058,000,000 Fr. and the expenditure 36,045,000,000 Fr.

The chief exports are phosphates, olive oil, wheat, esparto grass, barley, beans, blankets, sponges, and dates; the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. Eighty per cent. of the trade is with France and Algeria. In 1951 the imports were valued at 63,819,000,000 Fr. and the exports at 37,907,000,000 Fr. Ψ Tunis, the capital (connected by canal with La Goulette on sea-coast), had a municipal population of 370,333 at the Census of 1948; it occupies a site near that of Carthage; other towns are Ψ Sfax (144,615), Ψ Bizerta (27,000), Ψ Gabes (23,200) and Ψ Monastir (10,572).

Bey and Possessor of the Kingdom of Tunisia, H.H. Sidi Mohammed al Amini, born Sept. 4, 1881; acceded, May 15, 1943.

French Resident-General, M. Pierre Viozard.

The Federation of French West Africa extends from Mauritania to Dahomey, and has a total area of 1,799,159 square miles and a population (1945) of 16,000,000 (Europeans, 32,000). The capital of the Federation is Ψ Dakar (Senegal), which had a population (1948) of about 150,000. The revenue and expenditure of French West Africa were balanced in 1951 at 17,114,000,000 Fr. The trade of the Federation of French West Africa in 1951 was valued at 61,336,000,000 Fr. for imports and 38,704,000,000 Fr. for exports, the principal exports being ground-nuts (almost entirely from Senegal), palm kernels, palm oil, cocoa, cabinet woods, bananas, gold and cattle. French West Africa consists of Senegal (77,814 sq. miles, pop. 1,999,000), capital, St. Louis; Mauritania (322,244 sq. miles, pop. 560,000); French Guinea (96,865 sq. miles, pop. 2,262,000); Ivory Coast (189,029 sq. miles, pop. 2,224,000); Dahomey (47,144 sq. miles, pop. 1,505,000); and the inland colonies of French Sudan (582,437 sq. miles, pop. 3,350,000) and the Niger (483,526 sq. miles, pop. 2,162,000), Governor-General of French West Africa, M. Bernard Cornut-Gentille (1951).

Trustee Territories.—Between Dahomey and the

Gold Coast Colony lies the French sphere of the former German colony of Togoland (20,404 sq. miles, pop. 1,015,000); capital, Lomé (34,000); and between (British) Nigeria and the French Congo the French sphere of the former German colony of Kamerun (143,415 sq. miles with a population of 3,073,000). High Commissioner of French Cameroon, M. Soucardaux.

French Equatorial Africa (capital, Brazzaville), consists of the Gaboon (106,181 sq. miles, pop. 409,000), capital, Ψ Libreville (pop. 20,000), Ψ Port Gentil (12,000); Middle Congo (160,000 sq. miles, pop. 684,000), capital, Brazzaville (pop. 87,000); connected by railway with Ψ Pointe Noire (39,000); Ubanghi Shari (230,000 sq. miles, pop. 1,072,000), capital, Bangui (pop. 67,000) and Chad (481,000 sq. miles, pop. 2,241,000), capital, Fort Lamy (pop. 23,000).

French East Africa consists of French Somaliland (9,000 sq. miles, pop. 62,000, including 2,300 Europeans). Capital, Ψ Jibuti (pop. 17,000). French Somaliland is separated from the Aden Protectorate by the Straits of Bab el Mandeb and occupies the coast of N.E. Africa round the Gulf of Tadjara, extending about 80 miles inland (Ethiopia).

A railway from Jibuti crosses the S. boundary and runs *via* Diredda to Addis Ababa, the capital of Ethiopia.

Governor of French East Africa, M. Numa Sadoul.

Madagascar, 228,000 square miles, pop. (1950) 4,369,000, is 240 miles distant from the S.E. coast of Africa, and is the fifth largest island in the world. It has been a French Protectorate since 1890. In 1896 the Hova dynasty was suppressed and Queen Ranavalona III. (born 1861, died 1916, who had reigned since 1883) was exiled to Algeria, the administration being entrusted to a Governor-General. An insurrection was launched on March 20, 1947, by a native movement led by the Hovas. It was speedily crushed and the leaders arrested. Agriculture and cattle raising are the principal industries; the minerals include gold, silver, iron, copper, lead, and zinc. The chief exports are gold, cattle, bark, manioc (for arrow-root), beans, hides, skins, fibre, rice, timber and rubber; the chief imports are cottons, metal manufactures, wines and spirits, coal, clothing, lime and cement. The capital Antananarivo, has a population of 183,000; other towns are Ψ Tamatave (the chief port) 36,000, Ψ Majunga 38,000, Ψ Diego Suarez 30,000, Ψ Mananjary, Ψ Tulcar, Andoveranto and Vohemar. The trade of Madagascar (1951)—Imports, 22,887,000,000 Fr.; Exports, 13,332,000,000 Fr. High Commissioner, M. Bargues.

Dependencies of Madagascar are the Comoro Archipelago (capital, Zandzi), consisting of the islands of Great Comoro, Anjouan, Mayotte and Mohilla and of certain islets, the total area being about 800 sq. miles, with a population (1950) of 169,000. In the Mozambique Channel are Juan de Nova, Europe Island and Bassas da India, the last being uninhabited. La Réunion (formerly Ile de Bourbon), about 420 miles E. of Madagascar, has been in occupation since 1643, and has had the status of an overseas department. Area about 1,000 sq. miles, population (1950) 261,647; capital, St. Denis (39,000). Assigned to the administration of Réunion are the distant islands of St. Paul (3 sq. miles), New Amsterdam (27 sq. miles) and Kerguelen containing whaling and fishing stations (1,100 sq. miles). The Crozet Islands (200 sq. miles) and Adélie Land (see p. 723), in the Antarctic Continent are also dependencies of Réunion.

IN AMERICA.—Off the south coast of Newfoundland are two small groups of islands, of which the

largest are St. Pierre and Miquelon. In the West Indies is Martinique (capital, Ψ Port de France, pop. 66,006, with Ψ Trinité, 39,173 and Ψ Marin 37,369) and Guadeloupe (capital, Ψ Pointe à Pitre, 44,551, Ψ Basse Terre, pop. 13,638), with Marie Galante (Ψ Grand Bourg 12,827), Ile des Saintes, Petite Terre, St. Bartholomew, and St. Martin. In South America, is French Guiana (capital, Ψ Cayenne, 12,000). Included in French Guiana is a group of islands (St. Joseph, Ile Royal, and Ile du Diable) known as Iles du Salut. On Devil's Isle, Captain Dreyfus was imprisoned from 1894–1899. The total area of French possessions in North and South America is 35,320 square miles, with a population of 588,000.

Martinique, Guadeloupe, Réunion and French Guiana were raised to the status of *Departements* of France, as from Jan. 1, 1947.

In OCEANIA.—New Caledonia (7,200 sq. miles, pop. 65,000, capital, Ψ Noumea) is a large island in the Western Pacific, 700 miles E. of Queensland, with dependencies, the Isle of Pines, the Wallis Archipelago, the Loyalty Islands (Mahé, Lifou, Uvéa, &c.), the Huon Islands and Futuna and Alofi. New Caledonia was discovered in 1774 and annexed by France eighty years later; from 1871 to 1896 it was a convict settlement. The Society Islands (Tahiti, Moorea, &c., capital Papeete), an archipelago in the South Pacific, have an area of about 650 sq. miles, and a population of about 63,000; the Marquesas (Nukahiva, Hiva-oa, &c.), 500 sq. miles, pop. 3,000; Leeward Isles (Huahine, Raiatea, Tahaa, Bora Bora, Maupiti, &c.); the Gambier Islands (Mangareva, &c.); the Tubuai Islands (Rurutu, Raiavava, Rimatava, &c.); Rapa Island; Makatea; and Maiao Island.

BRITISH EMBASSY

(35 Faubourg St. Honoré, Paris 8c)

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Oliver Charles Harvey, C.M.G., G.C.V.O., C.B. (1947).....£14,000

BRITISH COUNCIL

Representative in Paris, H. Harvey Wood O.B.E., 28 Avenue des Champs Elysees, Paris, VIII.

GERMANY

* Deutsches Reich (German Realm)

THE HISTORY OF GERMANY from 1863–1945 is marked by wars of aggression. In 1864, Prussia, in company with Austria, attacked Denmark, and after a short campaign annexed the peninsula of Schleswig-Holstein. In 1866, as a result of war with Austria (the Seven Weeks' War), Prussia acquired the hegemony of the North Germanic Confederation from Austria. After the Franco-Prussian War of 1870, when Prussia wrested Alsace-Lorraine from France, the North Germanic Confederation and three South German States became the Germanic Confederation, the King of Prussia being proclaimed German Emperor at Versailles on Jan. 18, 1871.

At the outbreak of the War of 1914–1918, Germany was a Confederate League bearing the name German Empire (Deutsches Reich) under the hereditary presidency of the King of Prussia holding the title of German Emperor. At the close of the war, Germany lost most of the gains she had acquired since 1863, including all her colonies.

GERMANY BETWEEN THE TWO WARS.—On Nov. 9, 1918, two days before Germany sued for an Armistice from the victorious Allies, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. In January, 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female). The Assembly met at Weimar (Feb. 6, 1919), and elected Friedrich Ebert President of the Republic, a position he occupied until his death (Feb. 28, 1925) when Field Marshal Paul von Hindenburg was elected in his stead. Von Hindenburg was re-elected April 10, 1932, the rival candidate being Adolf Hitler, who was born at Braunau, Austria (April 20, 1889) and had migrated as a young man to Bavaria. After the

* Nazi historians referred to the National Socialist régime as *Dritte Reich*. The *First* was the Holy Roman Empire, established in A.D. 962 by Otto I of Saxony, enduring until 1806. The *Second* was established by Prince Otto von Bismarck, after the Franco-Prussian war in 1871, and endured until 1918. The *Third* was established by Adolf Hitler in 1933.

Presidential Election of 1932 (at which Hitler received 13,417,460 votes against von Hindenburg's 19,359,642) a General Election of 1933 provided Hitler's party, the *Nationalsozialistische Deutsche Arbeiter Partei* (National Socialist German Workers' Party, or Nazis) with an absolute majority in the legislature (*Reichstag*) and Hitler became Prime Minister (Chancellor), a position which became fused with that of President at the death of von Hindenburg (Aug. 2, 1934), and Adolf Hitler exercised supreme and uncontrolled authority in the Reich.

THE WAR OF 1939-1945.—After concluding a Treaty of Non-Aggression with Soviet Russia (Aug. 24, 1939), Germany invaded Poland (Sept. 1, 1939), thus precipitating war with France and Great Britain, who had (March 31) given a pledge to support Poland against aggression.

Germany invaded and occupied Denmark (April, 1940), Norway, Belgium, the Netherlands and Luxemburg (May, 1940); France was then attacked and sued for peace in mid-June. The lightning war against Britain began on August 11, 1940, but the *Luftwaffe* attack, which was to prepare the way for invasion, was defeated. In April, 1941, Yugoslavia was invaded and Germany joined Italy in attacking Greece and Crete. On June 22, 1941, the U.S.S.R. was invaded. In 1942 the Nazi empire reached its height. The boundaries of Greater Germany included Alsace-Lorraine, Luxemburg, Eupen-Malmédy, large areas of Poland, Memelland and Slovenia; Germany and her satellites controlled all European countries except the British Isles, Spain, Portugal, Switzerland, Sweden and parts of European Russia, as well as large tracts of North Africa. The turning point came in November, 1942, with the Soviet victory at Stalingrad and the British at El Alamein. In 1943 a Soviet offensive threw the invader back almost to the Polish frontier, and the Western Allies, after defeating the Axis in North Africa, landed in Italy. In June, 1944, the Second Front opened on the Normandy beaches and by September, 1944, Germany itself was the battlefield. On May 8, 1945, the unconditional surrender of all German forces was accepted by representatives of the Western Allied and Soviet Supreme Commanders.

Hitler committed suicide on April 30, 1945.

THE POST WAR PERIOD.—After the surrender the Allied Powers assumed supreme authority in Germany. Power was to be exercised by the Commanders-in-Chief, each in his own zone of occupation and jointly in matters affecting Germany as a whole through a Control Council. Berlin was to be governed jointly by the four occupying powers. The guiding lines of policy were laid down in the agreement reached between the U.K., U.S. and U.S.S.R. Governments at Potsdam in August, 1945, which was to remain in force until a Peace Treaty should confirm or revise its directives. It was decided that "for the time being no Central German Government shall be established," but that central German administrative departments acting under the direction of the Control Council should be established in the fields of finance, transport, communications, foreign trade and industry. The Eastern frontier of Germany was provisionally redrawn (pending final settlement in the Peace Treaty) to transfer the northern area of East Prussia, including Königsberg (now Kaliningrad), to the U.S.S.R. and the rest of East Prussia and all the area lying east of the Oder and Western Neisse rivers to Polish control. On Oct. 15, 1947, the Saar, enlarged at the expense of German territory, voted for economic union with France, but retained political autonomy (see p. 948). The Potsdam agreement also laid down that Germany

should be disarmed and prohibited from producing armaments, that production of certain other goods should be limited to the amount needed to support a peacetime economy and that existing capital equipment surplus to these requirements should be removed as reparations and distributed by the Inter Allied Reparations Agency among the nations who had suffered war damage, in proportion to their losses. (The proportions were fixed by the Paris Conference of November, 1945). The agreement further dealt with denazification, democratization, refugees, restitution, decartelization, etc.

Though certain details of the Potsdam agreement (not yet superseded by a Peace Treaty) have been carried out, differences in interpretation among the Allies have made it impossible to apply the provisions in full. Quadripartite control became a dead letter when the Russians withdrew from the Berlin *Kommandatura* in 1948.

Western Germany

Western German Federal Republic.

President, Theodor Heuss, elected for five years, Sept. 12, 1949.

CABINET

Federal Chancellor and Foreign Minister, Dr. Konrad Adenauer (C.D.U.).

Vice-Chancellor and Minister for E.R.P., Franz Blücher (F.D.P.).

Economic Affairs, Prof. Ludwig Erhard (C.D.U.).

Finance, Dr. Friedrich Schäfer (C.S.U.).

Interior, Dr. Robert Lehr (C.D.U.).

Labour, Anton Storch (C.D.U.).

Justice, Dr. Thomas Dehler (F.D.P.).

Housing, Fritz Neumayer (F.D.P.).

Food and Agriculture, Dr. Wilhelm Niklas (C.S.U.).

All-German Affairs, Jakob Kaiser (C.D.U.).

Refugees, Dr. Hans Lukaschek (C.D.U.).

Transport, Dr. ing. Hans Christoph Seebohm (German Party).

Posts and Telegraphs, Dr. Hans Schuberth (C.S.U.).

Affairs of the Federal Council, Heinrich Hellweg (German Party).

F.D.P.=Free Democrats; C.D.U.=Christian Democratic Union; C.S.U.=Christian Social Union.

CONSULATE-GENERAL IN LONDON

6 Rutland Gate, S.W.7

Chargé d'Affaires, Dr. Hans Schlange-Schöningen (with the personal rank of Ambassador).

Area and Population.—The area of the Federal Republic is approximately 96,700 square miles with a population estimated (1952) at 48,700,000, compared with 39,300,000 in September, 1939. The increase is largely due to the influx of refugees. Distribution of the population among the *Länder* in December, 1952, was:—

Schleswig-Holstein	(U.K. zone) ..	2,400,000
Hamburg	" " ..	1,700,000
Lower Saxony	" " ..	6,600,000
North Rhine Westphalia	" " ..	13,800,000
Bremen	(U.S. ") ..	600,000
Hesse	" " ..	4,400,000
Bavaria	" " ..	9,100,000
Baden-Württemberg	(U.S. and French zone) ..	7,000,000
Rhineland Palatinate	(French zone)	3,700,000

Western Berlin, with a population of 2,200,000, is represented in the Federal Parliament and is treated as a *Land* for the purposes of finance, but has no voting rights.

Population of the principal cities and towns in the Federal Republic (1950):—

Hamburg.....	1,604,600	Mülheim on	
Munich.....	831,017	Ruhr.....	148,606

Bielefeld.....	153,111		

Vital Statistics.—There were 15.7 live births per 1,000 inhabitants in the Federal Republic in 1952, compared with 19.8 per 1,000 for the same area in 1938. Deaths were 10.4 per 1,000 in 1952 and 11.4 per 1,000 in 1938, giving an excess of births over deaths in 1952 of 5.3 per 1,000 and in 1938 of 8.4.

Government.—The Federal Republic grew out of the fusion of the three western zones. The economic union of the U.K. and U.S. zones followed the Fusion Agreement of December, 1946. The Bizone was later joined by the French zone and in 1948-49 a Parliamentary Council, elected by the Diets of the three zones, drafted a provisional democratic federal constitution for Germany. This Basic Law came into force in the three western zones on May 24, 1949. It provides for a President, elected for a five-year term, and for two houses, with a four-year-term of office, the lower elected by direct universal suffrage and the upper composed of delegates of the *Länder*. The results of the election for the lower house (*Bundestag*) held on Sept. 6, 1953, were as follows:—

Party	Numbers
Christian Democratic and Christian	
Social Unions.....	244
Social Democrats.....	150
Free Democrats.....	48
All-German Bloc.....	27
German Party.....	15
Centre Party.....	3
Total.....	487

When the Federal Government took office the Allied Military Governors were replaced by High Commissioners. In 1952 a contractual agreement was signed between the Federal Republic and the western Allies, whereby the Republic, in return for certain promises regarding a defence contribution, a foreign debt settlement, and the continuation of allied policies concerning decartelization, democratization, restitution, etc., regains virtual sovereignty. This agreement, which has been ratified by all the parties concerned, will come into force when the European Defence Community (E.D.C.) has been ratified by all the contracting parties. The High Commissioners will then be replaced by Ambassadors. The present High Commissioners are:

United Kingdom, Sir Frederick Hoyer Millar, G.C.M.G., C.V.O. (with personal rank of Ambassador).
United States, Dr. J. B. Conant.
France, M. François Poncet.

Membership of International Organizations.—The Federal Republic is not yet a member of the United Nations, but is a member of some of the specialized agencies, such as the International Labour Office, the International Bank for Reconstruction and Development and the International Monetary Fund. She is also a member of the Organization for European Economic Cooperation, the European Payments Union, the Council of Europe and the European Coal and Steel Community. She is not a member of the North Atlantic Treaty Organization, but was the first country to ratify the European Defence Community Treaty.

Economic Position.—The division of the country gave rise to serious economic problems. The main areas of surplus food production were transferred to Poland and some of the principal centres of light industry (Berlin, Thuringia and Saxony) were lost to the Soviet zone. As the lost food could not be replaced from West German sources the Republic is therefore more dependent on food imports than was the pre-war Reich, but most of the light industries have been rebuilt in the west. With United States and British help, economic recovery became unexpectedly rapid after the currency reform of 1948. In terms of 1936 prices the Gross National Product increased between 1936 and 1952 by over 40 per cent., but because of the larger 1952 population the increase per head was only 12 per cent. Of the net national product, agriculture and forestry accounted for 11 per cent.; industry and handicrafts, 51 per cent.; trade and transport, 20 per cent.; and services, etc., 18 per cent.

Agriculture.—The total agricultural area amounts to 14,200,000 hectares, of which 8,100,000 hectares was under plough in 1952. The forest area is 7,000,000 hectares. The 1951-52 harvest yielded 6,600,000 tons of bread grains, 4,900,000 tons of fodder grains and 23,900,000 tons of potatoes. The livestock population at the end of 1952 included 11,600,000 cattle, 1,300,000 horses, 1,500,000 sheep and 13,000,000 pigs.

Industry.—The highly developed and diversified secondary industries are based on the great basic coal and steel industries of the Ruhr. The monthly average index of industrial production has developed as follows (1936=100):

	1948	1952
Basic Industry.....	56.7	130.8
Investment goods.....	51.4	170.0
Consumer goods.....	53.8	134.6
Food industry.....	76.6	127.4
Electric Power.....	112.2	198.9
Building.....	88.5	134.7

All industrial production 63.1 144.4

Hard coal production rose from 9,700,000 tons a month in 1936 to 10,300,000 tons in 1952; brown coal from 4,700,000 tons to 6,900,000 tons; pig iron from 1,000,000 tons to 1,100,000 tons; crude steel from 1,200,000 tons to 1,300,000 tons, and rolled steel from 822,000 tons to 892,000 tons. An average of 25,000 passenger cars a month were produced in 1952 (1936, 14,520), 8,818 commercial vehicles (1936, 3,558), 118,400 tons of sulphuric acid (1936, 88,166), 23,000 tons of chlorine (1936, 8,214), 24,369 tons of cotton yarn (1936, 22,983) and 7,461 tons of woollen yarn (1936, 3,942). 437,700 dwellings were completed in 1952.

Labour.—Of the 15,000,000 employed in 1952, 10,400,000 were men. 1,400,000 persons were unemployed, of whom 943,000 were men. In 1952,

5,500,000 (4,100,000 men) were employed in industry; coal mining absorbed 549,000; metal-lurgy, 256,000; mechanical engineering and vehicle production, 790,000; chemicals, 311,000; and textiles and clothing, 790,000. Productivity of labour in 1952 reached 105 per cent. of the 1936 level. 441,000 working days were lost through strikes in 1952.

Finance.—Under the Federal constitution the yields of indirect taxes accrue to the Federal Government, while direct taxes accrue to the *Länder*, who are obliged to transfer part of them to the central authorities. The principal items of central government expenditure are occupation costs and social charges (refugees, pensions, unemployment relief, etc.). In the 1953-54 Federal Budget estimates, revenue and expenditure are expected to balance at DM23.5 milliard. Occupation costs are put at DM9.9 milliard and social charges at DM8.0 milliard.

In 1952 an agreement was reached, though it has not yet been ratified, for the settlement of German pre-war and post-war foreign debts. An agreement was also signed whereby the Federal Republic will pay to Israel and Jewish organizations over a period of years reparations amounting to DM3.5 milliard.

Defence.—At present the Federal Republic does not participate in Western defence, except in so far as she contributes to the maintenance of Allied troops in Germany. When the Contractual Agreement comes into force it is intended that German forces shall be built up within the framework of the European Defence Community and that the German financial contribution to defence shall be comparable with that of the other major western powers.

Foreign Trade.—In 1952, imports were valued at DM16.2 milliard and exports at DM16.9 milliard. 37 per cent. of imports consisted of foodstuffs and 35 per cent. of raw materials; 19 per cent. came from the dollar area and 67 per cent. from the European Payments Union countries. 90 per cent. of all exports were manufactured goods. The dollar area took 9.5 per cent. of all exports and the E.P.U. area 74.5 per cent. Exports to the U.K. amounted to DM1.5 milliard in 1952 and imports from the U.K. to DM2.048 milliard.

Communications.—The railways of the Federal Republic measure 18,950 miles and the classified roads 47,038 miles. In 1952 the railways handled 268,000,000 tons of goods, the inland waterways 95,000,000 tons and ocean and coastal shipping 37,000,000 tons. Railway rolling stock included, in 1952, 10,900 steam locomotives, 457 electric locomotives, 22,500 passenger coaches and 246,200 goods waggons. In 1951 there were 681,573 passenger cars and 414,343 lorries. Ocean-going shipping under the German flag in June, 1953, amounted to 1,450,000 tons gross.

Social Welfare.—There is compulsory insurance against sickness, accident, old age and unemployment. Pension schemes for widows and orphans of public servants are in operation. Public assistance is given to persons unable to earn their living, or with insufficient income to maintain a minimum standard of living.

Law and Justice.—Judicial authority is exercised by the Federal Constitutional Court, the Supreme Federal Court, and the courts of the *Länder*. Judges are independent and subject only to the law. The death sentence has been abolished.

Language and Literature.—Modern (or New High) German has developed from the time of the Reformation to the present day, with differences of dialect in Austria and Alsace and in the German-speaking

cantons of Switzerland. The literary language is usually regarded as having become fixed by Luther and Zwingli at the Reformation, since which time many great names occur in all branches, notably philosophy, from Leibnitz (1646-1716) to Kant (1724-1804), Fichte (1762-1814), Schelling (1775-1854) and Hegel (1770-1831); the drama from Goethe (1749-1832) and Schiller (1759-1805) to Gerhart Hauptmann (1862-1946); and in poetry, Heine (1800-1856). German authors have received the Nobel Prize for Literature on five occasions—Theodore Mommsen (1902), R. Eucken (1908), P. Heyse (1909), Gerhart Hauptmann (1912), and Thomas Mann (1929). Circulation of daily papers reached 11,500,000 in 1951. There are now over 1,200 daily papers.

Education.—School attendance is compulsory for all children between the ages of 6 and 14. In May, 1950, there were 28,779 elementary schools, with 130,618 teachers and 6,314,452 pupils in the Federal Republic, excluding Bremen. There were 579 *Mittelschulen* with 6,000 teachers and 196,000 pupils and 1,488 secondary schools with 28,872 teachers and 620,488 pupils. In the summer of 1951 the 26 universities of the Republic had over 73,000 students. The largest universities are in Munich, Bonn, Mainz, Cologne, Münster, Hamburg, Göttingen, Frankfurt and Heidelberg.

Religion.—According to the 1950 census there were 24,400,000 Protestants in the Republic, 21,600,000 Roman Catholics and 1,500,000 others.

CAPITAL, Bonn, in North Rhine Westphalia, on the left bank of the Rhine, 15 miles distant from Cologne. Population, 111,287. Bonn is a cathedral and university town, the university buildings being the seat of the legislature.

Foreign Office

(German Section)

8 Cornwall Terrace, Regent's Park, N.W.1.

[Museum: 5040]

Office of the Allied High Commission (British element), Wahnheide

High Commissioner for West Germany, Sir Frederick Hoyer Millar, G.C.M.G., C.V.O. (with personal rank of Ambassador).

Deputy High Commissioner, J. G. Ward, C.M.G.

Chief Administrative Officer (vacant).

Head of Chancery, C. P. Hope.

Principal Advisers, G. C. Allen (Education); R. Jackling (Finance and Economics); M. E. Bathurst, C.M.G., C.B.E. (Legal); V. A. Goddard, C.B.E. (Labour).

Chiefs of Divisions, Maj.-Gen. J. M. Kirkman, C.B., C.B.E. (Intelligence); M. A. M. Robb (Information Services).

MILITARY SECURITY BOARD

U.K. Commissioner, Maj.-Gen. C. J. G. Dalton, C.B.E.

REGIONAL ORGANIZATION

Land Commissioners, Brig. J. Lingham, C.B., D.S.O., M.C. (ret.) (North Rhine/Westphalia); M. S. Henderson, C.M.G. (Lower Saxony); Brig. R. V. Hume, C.B.E., T.D. (ret.) (Schleswig Holstein); Dr. J. K. Dunlop, C.M.G., C.B.E., M.C., T.D. (Hamburg).

Commandant (British Sector, Berlin), Maj. Gen. C. F. C. Coleman, C.B., D.S.O., O.B.E.

Political Adviser and Deputy Commandant (British Sector, Berlin), E. M. Rose.

BRITISH COUNCIL

Liaison Officer, G. L. Hitchcock, Düsseldorf.

There are British Consulates at Berlin, Hamburg, Düsseldorf, Bremen, Frankfurt, Munich and Stuttgart.

Eastern Germany

Administration.—When the Federal Republic was formed, the People's Council of the Soviet zone, appointed in 1948, was converted into a Provisional People's Chamber. On Oct. 7, 1949, this Chamber enacted a constitution of the "German Democratic Republic," and a provisional Land Chamber was established consisting of fifty deputies appointed by the Diets of the *Länder*. The German Democratic Republic is not recognized by the governments of western countries. A number of governmental reforms has been introduced since the original constitution was drafted, including the abolition, in July, 1952, of the five Land governments and diets. In June, 1953, the main Government posts were held as follows:—

President, Wilhelm Pieck, born 1874, elected Oct. 11, 1949.

Minister-President, Otto Grotewohl.

Deputy Minister-Presidents, W. Ulbricht; H. Rau;

O. Nuschke; H. Loch; L. Bolz; P. Scholz.

Chairman, State Manning Commission, B. Leuschner.

Chairman, State Control Commission, F. Lange.

It was not until the summer of 1953 that the Soviet Commander-in-Chief was replaced in the civilian sphere by a High Commissioner. The first to hold the latter post was Vladimir Semionov, formerly Political Adviser to the C.-in-C. In September, 1953, the title of High Commissioner was altered to that of Ambassador.

Area and Population.—The area of Eastern Germany is 41,380 sq. miles and its population in October, 1946, was 17,300,000:—

Saxony-Anhalt...	4,200,000	Saxony...	5,600,000
Brandenburg...	2,500,000	Thuringia...	2,900,000
Mecklenburg...	2,100,000		

Principal cities and towns: Dresden (467,966); Leipzig (607,655); Magdeburg (236,326); Halle (222,505); Erfurt (174,633); Rostock (114,869); Zwickau (122,862), and Karlmarxstadt (Chemnitz) (250,188). Eastern Berlin, an integral part of the zone and its capital city, has a population of approximately 1,200,000.

In July, 1952, in the interests of "democratization" and the further centralization of power, the old *Länder* were abolished and replaced by 14 *Bezirke* (regions) as follows:

Land	Bezirke
Mecklenburg....	Rostock; Schwerin; Neubrandenburg.
Brandenburg....	Potsdam; Cottbus; Frankfurt.
Saxony.....	Karlmarxstadt; Dresden; Leipzig.
Saxony-Anhalt..	Halle; Magdeburg.
Thuringia.....	Erfurt; Gera; Guhl.

Each region has its own *Bezirksrat* (assembly) and *Bezirksrat* (council) to deal with purely regional affairs.

Economic Position.—From the economic point of view the Eastern zone is a more unbalanced area than the Federal Republic. It is more nearly self-sufficient in food, but has few industrial raw materials apart from brown coal and copper ore. Before the war its highly developed secondary industries were dependent on Ruhr coal and steel.

The Soviets claimed reparations from Germany to a value of \$ (1938) 10 milliard. Between 1945 and March, 1948, they removed considerable quantities of capital equipment to the U.S.S.R. and took over a number of important plants as Soviet

State Concerns (S.A.G.). S.A.G.'s now account for perhaps one-eighth of all industrial production in Eastern Germany. Their products are sold partly in Germany and partly to the U.S.S.R. and other foreign countries. In addition the zone pays reparations from current production to the U.S.S.R. and, although the amounts have been reduced, the obligation continues until 1965. Economic control has been centralized, industry subjected to rigid central planning, state ownership and trading greatly expanded at the expense of private interests and the basic industries given priority over secondary industries. Large new steel plants have been erected at Fürstenberg/Oder and at Calbe, and crude steel production is now greater than before the war. Ties with the other satellites have been strengthened; over 80 per cent. of the zone's foreign trade is now with the East, and in 1950 the zone became a member of the Council for Mutual Economic Assistance (C.M.E.A.). In 1951 a Five Year Economic Plan was introduced, designed to double the then level of industrial production by the end of 1955. It was alleged that this 1955 level would also be double that of 1936.

Religions.—At the census of 1946, Eastern Germany had 14,132,174 Protestants, 2,110,507 Roman Catholics and 75,578 others.

GREECE

(Hellas)

King of the Hellenes, Paul I, born Dec. 14, 1901; acceded (on the death of his brother King George II), April 1, 1947; married Jan. 9, 1938, Princess Frederika, daughter of the Duke of Brunswick (born April 18, 1917), and has issue:—

- (i) Crown Prince (*Diadoch*) H.R.H. Prince Constantine, born June 2, 1940.
- (ii) H.R.H. Princess Sophia, born Nov. 2, 1938.
- (iii) H.R.H. Princess Irene, born May 11, 1942.

CABINET

(Nov. 19, 1952)

Prime Minister, Field Marshal A. Papagos.
 Minister of Foreign Affairs, S. Stephanopoulos.
 Minister of Co-ordination, S. Markezinis.
 Finance, C. Papayannis.
 Interior, P. Lykourazos.
 Industry, A. Protopapadakis.
 Agriculture, A. Apostolides.
 Welfare, C. Adamopoulos.
 Labour, E. Gonis.
 Works, C. Karamanlis.
 Merchant Shipping, L. Lambrianides.
 Minister Governor-General of Northern Greece, A. Stratos.
 Communications, H. Psaros.
 Justice, D. Bombakos.
 Education, C. Kallias.

 Minister to Prime Minister's Dept., P. Siphnaiois.
 National Defence, P. Kanellopoulos.
 Without Portfolio, E. Tsouderos; J. Exindariis.

ROYAL GREEK EMBASSY IN LONDON

51 Upper Brook Street, W.1

[Mayfair: 0694]

Ambassador Extraordinary and Plenipotentiary, His Excellency Monsieur Vassilios Mostras (1953).
 Counsellors, J. Phrantzas; A. Sgourdeos.
 1st Secretary, Aristide Pilavachi.
 Hon. Attachés, P. P. Argenti; Spiro X. Constantini.
 Commercial Counsellor, Nicholas Pierrakos.
 Department of Information, Stelio Hourmouzios (Acting Director).

Military Attaché, G. Skaleos (acting).

Naval and Air Attaché, Captain A. Athanassiou, R.H.N.

Consulate General and Department of Information, 34 Hyde Park Square, W.2.

Consul General, A. Sgourdeos.

There is a Consulate at Cardiff and Honorary Consulates at Birmingham, Bradford, Bristol, Dover, Falmouth, Hull, Immingham, Liverpool, Middlesbrough, Milford Haven, Newcastle, Plymouth, Portsmouth, Sheffield, Southampton and Yarmouth, Swansea, Glasgow and Leth, and at Belfast.

A maritime Kingdom in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Libyan and Ionian seas, and on the E. by Turkey, with an estimated area of 51,180 sq. miles. A census was held throughout the country on April 7, 1951, which estimated the population at approximately 7,600,000, including the population of the Dodecanese (126,000).

The area of the mainland is 41,328 sq. miles, and of the islands 9,854 sq. miles. The main divisions are: Macedonia (which includes Mt. Athos), Thrace, Epirus, Thessaly, Continental Greece (which includes the island of Euboea and the Sporades, or "scattered islands," of which the largest is Skyros), the Peloponnese (or Morea), the Dodecanese or Southern Sporades (12 islands occupied by Italy in 1912 during the Italo-Turkish War and ceded to Greece by Italy in 1947) consisting of Rhodes, Astypalaia, Karpathos, Kassos, Nisyros, Kalymnos, Leros, Patmos, Kos, Simi, Khalki and Kastellorizo, the Cyclades (a circular group numbering about 200, with a total area of 923 sq. miles; the chief islands are Syros, Andros, Tinos, Naxos, Paros, Santorini, Milos and Serifos), the Ionian Islands (Cephalonia, Corfu, Lefkas, Ithaki, and Zante), the Aegean Islands (Chios, Lesbos and Samos). In Crete there was for over 1,000 years (3000 to 1400 B.C.) a flourishing civilization which spread its influence far and wide throughout the Aegean, and the ruins of the palace of Minos at Cnossos afford evidence of astonishing comfort and luxury. Greek civilization emerges about 1300 B.C. and the poems of Homer, the blind poet of Chios, which were probably current about 800 B.C., record the 20-year struggle between the Achaeans of Greece and the Phrygians of Troy (1194-1184 B.C.).

Government.—The independence of Greece dates from March 25, 1821, and was ratified by the Treaty of Adrianople (Sept. 12, 1829) and the Convention of London (Feb. 3, 1830), after a successful insurrection against the Ottoman Empire, to which the country had been subjected since the 15th century. After a succession of rulers of the Wittelsbach (Bavarian) and Glucksburg (Danish) dynasties the Kingdom was declared a Republic by the Constituent Assembly on March 25, 1924. On Oct. 11, 1935, it was again declared a Kingdom, and a plebiscite held on Sunday, Nov. 3, 1935, caused the return to the Throne of King George II. On October 28, 1940, Italy declared war on Greece and invaded the country from Albania, but within a month Greek troops, assisted at sea and in the air by Great Britain, expelled the invader and advanced in triumph into Albania. On April 6, 1941, Germany invaded Yugoslavia and Greece and came to the aid of the defeated Italian forces. British and Commonwealth ground forces were sent to the assistance of Greece, but the fresh onslaught led to her occupation by German, Italian and Bulgarian troops. By her own exertions and by Allied help Greece was freed in October, 1944.

There followed in December-January, 1944-5, a short period of civil war in which the Communists attempted to seize power by force. After a plebiscite held on Sept. 1, 1946, King George II was recalled. In 1947, Communist guerilla disturbances assumed the proportions of civil war, which continued with increasing damage and destruction to the country until the summer of 1949 when the Greek Army's victories overwhelmed the guerillas. Normal conditions were sufficiently restored throughout the country to enable a general election to be held on March 5, 1950. Since then, with the help of the Mutual Security Agency (formerly E.C.A.), Greece has been tackling the formidable task of rehabilitation and reconstruction after ten troubled years; and has made steady, if slow, progress, despite political instability. Further general elections were held in September 1951 and November 1952. At the latter 300 deputies were elected, of which 241 belong to the Greek Rally, the Government Party, 31 to the Liberal Party, 18 to the E.E.P.K. (National Progressive Union of the Centre) and the rest to various independent groups.

Defence.—The Navy has 70 ships in commission; the strength of the Army is approximately 145,000; and the Air Force consists of 8,200 men and 6 squadrons. In April, 1952, the British Military Mission and R.A.F. delegation left after seven years' service in Greece.

Production.—Agriculture is the principal industry and employs more than half the population, the most important product being tobacco, which accounts for nearly half the value of total exports of Greece. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-vine. Currants were originally grown round Corinth and were known as *vains de Corauntz*, anglicized as currants. The principal minerals mined are iron ore, iron pyrites, manganese, magnesite, chrome, bauxite, lead, zinc and emery. The chief manufactures are textiles (cotton, woollen, silk and rayon), chemicals, cement, glass, footwear and carpets. There are also metallurgical and ship-repairing industries. Many large projects are at present being carried out at the instigation of the American M.S.A. Mission. These are an electric power system covering most of the country, irrigation and land reclamation, the decentralisation of industry and the development of lignite mining and its use for fuel.

Communications.—In 1937 there were 2,650 miles of railroad open to traffic. By the end of 1950, the entire railway network had been restored in spite of delays due to band activities. Athens is linked by direct sleeping car services with Paris and Istanbul. Since 1947, 3,500 km. of main roads have been restored and resurfaced, and the secondary road system is being repaired and enlarged. The Corinth Canal, which had been blocked in 1944 by the retreating enemy, was fully re-opened in September, 1948. In December, 1951, the Greek mercantile marine consisted of 321 vessels (1,238,868 tons), apart from sailing vessels and motor craft.

Religion.—Over 96 per cent. of the people are adherents of the Greek Orthodox Church, which is the State religion, all others being tolerated and free from interference. The Greek church recognizes the spiritual primacy of the Ecumenical Patriarch at Constantinople, but is otherwise a self-governing body administered by the Holy Synod under the Presidency of the Archbishop of Athens and All Greece.

Education is free and compulsory from the age of 6 to 12 and is maintained by State grants. Secondary education is somewhat backward, particularly in the country districts. There are two

Universities, Athens and Salonika, that of Athens being of some repute.

Language and Literature.—The spoken dialects of Modern Greece are descended by a process of natural development from the "Common Greek" of Alexander's empire. In the field of literature, official and technical matter is mostly composed in *katharevusa* , a conservative literary dialect evolved by Adamantios Corais (Diamant Coray), who lived and died in Paris (1748–1833), but novels and poetry are mostly composed in *dimotiki* , a progressive literary dialect which owes much to John Psycharis (1854–1929). The poets Solomos, Palamas and Cavafis have won a European reputation.

CURRENCY

The Greek *drachma* has an official exchange rate of 84,000=£1 sterling and 30,000=U.S. \$1.
(See also p. 83.)

TRADE

	1951 \$ U.S.	1952 \$ U.S.

2nd Secretaries, S. Oates; E. G. Harman; J. M. C.

Vivian.

Military Attaché, Brig. A. Abel Smith, O.B.E.

Asst. (do.), Maj. D. C. M. Mather, M.C.

Air Attaché, Air Commodore F. R. Drew, C.B.E.

3rd Secretary (Information), F. A. Wise.

Attaché (Archivist), H. Williams.

Attaché (Commercial), M. D. W. McCann.

Embassy Chaplain, Rev. D. A. Duncan, M.C., M.A.

Hon. Attaché, J. M. Cook (Director, British School

of Archaeology).

BRITISH CONSULAR OFFICES

There are British Consular Offices at Athens, Salonika, Piræus, Patras, Canea, Rhodes and Samos.

BRITISH COUNCIL

27 Philikis Etairias, Athens. *Representative*, W. G. Tatham, M.C.

GUATEMALA

(República de Guatemala)

President, Colonel Jacobo Arbenz, assumed office March 15, 1951.

Minister of Foreign Affairs, Lic. Raul Osegueda.

LEGATION IN LONDON

21 Eaton Place, S.W.1

(Sloane: 8359)

Chancery, 19 Hanover Court, Hanover St., W.1

[Grosvenor: 6149]

Envoy Extraordinary and Minister Plenipotentiary in London, His Excellency Dr. Francisco Linares Aranda (1950).

There is a Consulate-General at Liverpool and Consuls at Glasgow and Belfast.

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 45' to 17° 49', and in W. long. from 88° 12' 49' to 92° 13' 43', and comprises an area of 45,452 square miles, and a population (at the census of 1950) of 3,546,624. There is a single chamber legislative assembly of 68 members and a cabinet of 10 of whom 9 are Ministers of State. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of 4,800 ft.) was destroyed by an upheaval in Dec., 1917. The country is well watered by numerous rivers; the climate is hot and malarious near the coast, temperate in the higher regions. The rainfall in the capital is 57 in. per annum. 740 miles of railway were open for traffic in 1943. The chief Ψ seaports are San José de Guatemala and Chamerico on the Pacific, and Livingston and Puerto Barrios on the Atlantic side.

Language and Literature.—Spanish is the language of the country, and since the establishment of the University at the capital in 1918 education has received a marked impulse and the high figure of illiteracy is being reduced. The National Library contains about 80,000 volumes in the Spanish tongue.

FINANCE

 R. McC. Andrew.

*Military Attaché, Col. C. Irving-Bell.

*Labour Attaché, H. A. N. Brown.

* Resident in Mexico City.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Guatemala,
 Quezaltenango and Puerto Barrios.

HAITI

(République d'Haiti)

President, Col. Paul Eugène Magloire, born 1907;
 assumed office, Dec. 6, 1950.

Foreign Affairs, M. Pierre Liautaud.

EMBASSY IN LONDON

12 Hans Crescent, S. W. 1.

Ambassador in London, H. E. Monsieur Love O.
 Léger (1953).

Secretary, M. Gerard Jean Baptiste.

Attaché, Mlle. Addline Maximilien.

The Republic of Haiti occupies the western third of the island of Santo Domingo, formerly known as Hispaniola, which, next to Cuba, is the largest island in the West Indies.

The area of the Republic is estimated at 10,500 sq. miles with a population (1950 census) of 3,111,973, negroes being in the great majority. There are, however, many mulattoes and others with varying admixture of white blood, especially in the towns. About 1,000 British subjects, chiefly of British West Indian origin, reside in Haiti.

A French colony under the name of Saint-Dominique from 1697, the slave population, estimated at 500,000, revolted in 1791 under the leadership of Toussaint L'Ouverture, who was born a slave and made himself Governor-General of the colony. He capitulated to the French in 1802 and died in captivity in 1803. Resistance was continued by Jean Jacques Dessalines, also a former black slave, who, on January 1, 1803, declared the former French colony to be an independent state. It was at this time that the name of Haiti was adopted. It is an aboriginal Indian word meaning mountainous. Dessalines became Emperor of Haiti, but was assassinated in 1806. Political chaos with a succession of tyrannies and republics continued until U.S.A. intervened in 1925, when a treaty was signed whereby certain public services were to be controlled by U.S. officials. On Oct. 1, 1931, the U.S. officials in charge of Public Health, Public Works, and the Agricultural Technical Service, were withdrawn. The last U.S. troops left Haiti on Aug. 15, 1934. U.S. control of the revenue of Haiti officially ended on October 1, 1947. The internal revenue service was handed back to the Haitian Government in 1934. A revolution took place in May, 1950, resulting in the overthrow of President Estimé, and the assumption of control by a Military Junta. The new President was elected by direct popular vote in Oct. 1950.

The present constitution (November, 1950) provides for a Senate of 21 members and a Chamber of Deputies of 37 members. The President is elected by popular franchise for a term of six years, and is not immediately re-eligible. Women are at

present restricted to voting in municipal elections, but the constitution contemplates the extension to them of full political rights in the near future.

Production, Industry, etc.—In French colonial times, Haiti was one of the most productive countries in the world and the richest French possession. Improvident methods of peasant agriculture succeeded the plantation system and resulted in the gradual impoverishment of natural resources through exhaustion of the soil, deforestation and erosion. In recent years measures for agricultural rehabilitation have been taken and a gradual restoration of the productiveness of the country may be expected. The main project in hand at present is a scheme for the irrigation of 100,000 acres of the Artibonite valley for which the Import-Export Bank has approved a loan of \$14,000,000. The principal products are coffee, bananas, logwood, cocoa, cotton, hides, sisal, sugar, honey, gums, and oil-seeds, these being the chief exports. There are said to be deposits of gold, silver, copper, tin, and iron, but little has been done to exploit mineral resources. Manufactures are relatively unimportant, but there is some production of cotton piece-goods, lard and handicraft articles of mahogany and sisal. A good rum is produced.

Communications.—Internal surface communications are poor. Except in the immediate vicinity of the capital and some other towns the roads are unsurfaced, and in the rainy season many places are inaccessible by road. A programme of road construction, begun in 1951, continues to make progress. Owing to the very mountainous nature of the country railway communications are negligible. Internal air services are maintained by the Aviation Corps of the Haitian Army. The principal towns are connected by telegraph and telephone.

Air services by Pan-American and other air lines are regular and frequent, and there are fairly frequent sea communications with New York for passengers and freight. Direct shipments to Port-au-Prince from U.K. ports and now made by the Saguenay Terminals Line. Sailings between Haiti and Jamaica are infrequent. External telegraph and postal communications are normal (air-mail transit U.K.—Port-au-Prince 3-4 days).

Climate.—The climate is tropical with comparatively little difference in the temperatures between the summer (March-Oct.) and the winter (Nov.-Feb.). The temperature at Port-au-Prince rarely exceeds 95° F., but the humidity is high, especially in the autumn.

Language and Literature.—French is the official language of the country, but most of the people speak a debased dialect known as Creole French. Education is free but estimates of illiteracy are as high as 95 per cent. In 1953 there were 6 principal French daily newspapers published at Port-au-Prince and 1 English weekly.

	1950-51 Gourdes	1951-52 Gourdes
Revenue	125,250,000	146,277,000
Expenditure	121,800,000	160,000,000
Total Debt (Sept.).....	32,269,000	37,561,000
5 Gourdes = \$1 (U.S.). (See also p. 83.)		
	1950-51 Gourdes	1951-52 Gourdes
Total Imports	222,585,000	253,477,000
Total Exports	247,978,000	264,623,000
Imports from U.K. ...	10,203,000	11,145,000
Exports to U.K.	12,879,000	2,422,000

The principal exports are listed above; the principal imports are cottons, foodstuffs, machinery, mineral oil and soap.

CAPITAL, Ψ Port-au-Prince, Population (1950 census), 195,672. Other centres are: Ψ Cap Haïtien (24,957); Ψ Aux Cayes (11,835); Ψ Goaïaves (13,534); Ψ Jacmel (8,545); Ψ St. Marc (10,485); Ψ Port de Paix (6,309); Jérémie (11,138).

1st Secretary and Consul, P. P. Caruana.

Pro-Consul, A. M. O'Meally.

Air Attaché (resident in Caracas), Wing-Cdr. P. D. W. Hackforth.

Labour Attaché (resident in Mexico City), H. A. N. Brown.

HEJAZ, see Arabia

HONDURAS

(República de Honduras)

President (1949-1955), Dr. Juan Manuel Galvez; assumed office Jan. 1, 1949.

LEGATION IN LONDON

15 Mount Street, W.1

[Grosvenor: 6153]

Minister in London, His Excellency Dr. Tiburcio Carias.

Chargé d'Affaires, Señor Don Carlos A. Suazo.

Attaché, Ing. Fernando Lanza.

Consulate-General in London, 15 Union Court, E.C.2.

Vice-Consul (in charge), Herbert C. Cock.

There is a Consulate General in Liverpool, and there are Consular Offices at Birmingham, Manchester, Newcastle and Glasgow.

Honduras, one of the five Republican States of Central America, lies between lat. 13° and $16^{\circ} 30'$ N. and long. 83° and $89^{\circ} 41'$ west, with a seaboard of about 400 miles on the Caribbean Sea and an outlet, consisting of a small strip of coast 77 miles in length on the Pacific. Its frontiers are contiguous with those of Guatemala, Nicaragua and El Salvador. The Republic contains a total area of approximately 44,482 square miles and a population of 1,533,625 (1950 census) of mixed Spanish and Indian blood. There is a strong foreign negro (British West Indian) element in Northern Honduras. The country is very mountainous, being traversed by the Cordilleras, but possesses well watered fertile valleys and wooded tablelands. The climate varies with the altitude, being tropical throughout the year in the coastal belts and temperate and healthy in the uplands.

Originally discovered and settled by the Spaniards at the beginning of the sixteenth century, Honduras formed part of the Spanish American Dominions for nearly three centuries until 1821 when independence was proclaimed.

Under the revised Constitution of 1936, the Legislature consists of a single Chamber Assembly of 49 members elected by popular vote in the ratio of one deputy per 25,000 inhabitants. The executive authority is vested in the President who is assisted by a Council of six Ministers. The Republic is divided into 17 departments and one

territory, La Mosquitia, which is inhabited by Indian tribes and largely unexplored.

The chief industry is the production of bananas. Other products are coffee, coconuts, tobacco, beans, maize, rice and tropical fruits. Cattle raising is becoming an increasingly important industry, a large number of cattle being exported to the neighbouring countries every year. Honduras is also a timber producing country, the most important woods being pine, mahogany and cedar. There are large tracts of uncultivated land.

The mineral resources of the country are reputed to be considerable, though still largely unexploited. In the year ending June 30, 1951, 3,828,719 oz. of silver and 31,123 oz. of gold in the form of bars, nuggets, amalgam and concentrates, were produced. The production of lead was approximately 1,000,000 lbs. Exports to the U.K. for the year 1950-51 were valued at £166,713 for gold amalgam and £57,075 for gold bars. The principal mines are American owned.

820 miles of railway were in operation in the year 1952, chiefly to serve the banana plantations and the Caribbean ports. The total road mileage is approximately 1,400, the greater part of which is in poor condition, but improvements are now being rapidly made and new roads built. In the Aviation Division there are 25 airports in use in Honduras, exclusive of numerous small landing and emergency fields. There are three international air services (TACA Internacional, PAA and TAN) and two domestic air services (SAHSA and TACA (Honduras)). There are 2,733 miles of telephone lines, 4,604 miles of telegraph lines and 349 post-offices.

Ψ The chief ports are Puerto Cortes, Tela and La Ceiba on the North Coast, through which passes the bulk of the trade with the United States and Europe, and Amapala, situated on Tiger Island in the Gulf of Fonseca, on the Pacific side.

Language and Literature.—The language of the country is Spanish. Primary and secondary education is free and compulsory and, although there is still a great deal of illiteracy, it is gradually diminishing. There is no recognized native literature.

Internal and Foreign Trade, József Bognár.

National Defence, Lt.-Gen. István Bata.

Heavy Industry, István Hidas.

Head of Politburo and Secretariat of Hungarian Workers' Party, Mátyás Rákosi.

LEGATION IN LONDON

(35 Eaton Place, S.W.1)

(Sloane: 4048)

Minister in London, János Katona (1953).

Area and Population.—The area of Hungary may be stated at approximately 36,000 sq. miles with a population (Dec. 1952) of over 9,500,000.

Government.—By unanimous vote of the National Assembly, Hungary was re-constituted a Kingdom in 1920, after having been declared a Republic on Nov. 17, 1918. Hungary joined the Anti-Comintern Pact on Feb. 24, 1939, and entered the War of 1939-45 on the side of Germany. In December, 1944, a Provisional Government of Liberation was set up in Debrecen under the leadership of General Bela Miklós. On Jan. 20, 1945, this government signed an armistice with the United Nations, under the terms of which an Allied Control Commission was set up in Budapest and the frontiers of Hungary were withdrawn to the limits existing in 1937.

The first four years of the Republic saw fundamental changes in the social structure. Under a Land Reform Act (March 15, 1945) all the former class of great landowners were dispossessed and the land was distributed among the peasants in small holdings with a maximum area of 1.422 acres. In 1946 the mines and heavy industry were nationalized and were followed in December, 1947, by the banks, and in 1948 by practically the whole of industry and by the schools. Towards the end of 1948 the Government began a campaign to liquidate the "Kulaks" with a view to forcing

the peasantry into co-operatives and ultimately establishing collective agriculture. In 1949 practically all the industries previously unaffected were nationalised. In May, 1949, the Democratic People's Party was dissolved, and a new election held in which no opposition was allowed to participate. The People's Front obtained 95.6 per cent. of the votes, and in June an overwhelmingly Communist Government was appointed. A decree of February 18, 1952, nationalising much house property, almost completed the socialisation of the entire economy. On May 17, 1953, general elections were held. As in 1949 only a single list of candidates was put forward. In June and July, 1953, the Party and Government structure were revised. Mr. Imre Nagy became Prime Minister instead of Mr. Rákosi, who remained Head of the Party. The Prime Minister put forward a new Government programme admitting serious economic and political errors in the past, providing greater stress on agriculture and the individual peasant, and proposing an amnesty for minor offenders, dissolution of internment camps and adjustment of conditions for deportees.

Production, Industry, etc.—The greater part of the area of Hungary consists of the Alföld or Great Plain, parts of which may be considered as among the most fertile for agricultural purposes in the world, producing grain of excellent quality and supporting a number of horses, cattle and swine. The 1948 crop of bread grains was considerably larger than that of the previous year, being officially estimated at 2,232,000 metric tons, and the maize crop was good (3,246,000 metric tons). 2,699,000 metric tons of potatoes, 1,685,000 metric tons of sugar-beet, and 2,402,000 metric tons of fodder-beet were grown. No figures have been published since 1948, but official claims were made that for 1951 production of all cereals was approximately 20 per cent. above the average of the ten years before the war. Late frost and summer drought badly affected the 1952 harvest, which was described as the worst for several decades. An extensive irrigation scheme is being carried out, and root crops, industrial crops and rice are to be grown in greater quantities. In the mountainous districts there are rich deposits of coal and bauxite and the latter supply an expanding aluminium industry. Oil wells situated mainly in Western Hungary feed local refineries whose products are sold at home and abroad. Crude oil is also exported. The output of coal in 1952 was claimed to be 18,700,000 tons, and an output of 24,000 tons of aluminium and 500,000 tons of oil may have been realized. The production of iron and steel is being augmented and the Three-Year Plan of reconstruction launched in July, 1947, was succeeded at the end of 1949 by a Five-Year Plan of industrialization designed to transform Hungary into a predominantly industrial country with a well-developed but subsidiary agriculture. In July, 1953, the Government admitted that this was not being achieved without considerable sacrifice and hardship, and that plans for heavy industry had been too ambitious.

No part of Hungary touches the sea. The length of navigable rivers is 687 miles, and the Republic possesses important fishery preserves in the Danube in addition to those in Lake Balaton.

Religion and Education.—About two-thirds of the Magyars are Roman Catholics, and the remainder mostly Calvinist. There are five types of schools under the Ministry of Education—infant schools 3-6, general schools 6-14 (compulsory), vocational schools (15-18), secondary schools (15-18), universities and adult training schools (over 18). It is estimated that there were approximately 50,000 university students in 1953.

Language and Literature.—Magyar, or Hungarian, is one of the Finn-Ugric languages and has retained its purity since its introduction into Western Europe in the ninth century. Magyar literature developed in relatively modern times (from the later years of the eighteenth century). Prose literature provides many famous names, including Nikolas Josika (1794–1865), Josef Eötvös (1813–1871), and Maurus Jókai (1825–1904). The teaching of Russian is compulsory in schools for children from the ages of 13 to 18 years. In 1953 there were 5 daily newspapers published in Budapest. The provincial newspapers were merely echoes of the Budapest party papers.

FINANCE 1953

Revenue (Budget Estimate). Forints 52,739,000,000
Expenditure (do.)..... 51,864,000,000

President (Aug. 1, 1952 to July 31, 1956), Asgeir Asgeirsson.

Prime Minister (Sept. 13, 1953), Olafur Thors.

Foreign Affairs, Prof. Kristian Gudmundsson.

LEGATION IN LONDON

17 Buckingham Gate, S.W.1

[Victoria: 5337]

Minister Plenipotentiary in London, His Excellency Agnar Klemens Jónsson (1951).

Iceland is a large volcanic island in the North Atlantic Ocean, extending from 63° 23' to 65° 33' N. lat., and from 13° 22' to 24° 35' W. long., with an estimated area of 40,500 square miles, or greater than that of Ireland. The population was 146,540 in 1951.

An Act for the creation of a Danish-Icelandic Federal Constitution, Denmark and Iceland to

be free and independent States under the same Sovereign, came into force on Dec. 1, 1918, but, since the constitution granted in 1904, the assembly (*Althing*) had been more or less independent of the Government at Copenhagen in internal questions. On the German invasion of Denmark in April, 1940, the Icelandic Government was temporarily invested with the royal power by a resolution of the *Althing*. On May 17, 1941, the *Althing* decided to elect a Regent to serve for one year at a time.

On May 23, 1944, by plebiscite, the Act of Union of Dec. 1, 1918, was repealed and a new constitution adopted under which a republican form of government was instituted. The new constitution was proclaimed on June 17, 1944, at Thingvellir, where the *Althing* was founded in 930 A.D. The membership of the *Althing* was maintained at a maximum of 52, of whom 14 are elected to form the Upper House.

The principal products of the island are fish, fish oils, mutton, wool and ponies. The principal exports are fish, herring oil, fish meal and sheepskins; the imports consist of almost all the necessities of life, the chief items being grain and meal, sugar, coffee, salt, coal, oil and petrol, cotton goods, tobacco, spirits, hardware, and timber.

The mercantile marine consisted (1952) of 654 steam and motor vessels (including 103 motor vessels of under 12 tons each) of 97,644 gross tons (motor vessels 590 of 58,640 tons, steam 64 of 39,004 tons). 614 of the total number are fishing vessels. Iceland is in direct telegraphic communication with Great Britain.

A regularly weekly air service is maintained between Prestwick or London and Reykjavik (about 5 hour journey). There are also air services from the island to Scandinavia and U.S.A. On June 26, 1948, the Final Act of the International Civil Aviation Organization conference was signed, pledging States concerned with North Atlantic air travel to share the cost of providing and maintaining equipment and facilities in Iceland essential to safety on that route. In 1949 Iceland was to contribute 17.5 per cent. of the necessary reimbursement.

Language and Literature.—The ancient Norraena (or Northern tongue) presents close affinities to Anglo-Saxon and as spoken and written in Iceland to-day differs little from that introduced into the island in the ninth century. There is a rich literature with two distinct periods of development, from the middle of the eleventh to the end of the thirteenth century and from the beginning of the nineteenth century to the present time.

FINANCE 1951

Revenue Krónur 414,458,000
Expenditure " 305,110,000
External Debt " 196,409,250
Internal Debt " 204,294,000

Assistant Cultural Attaché, Miss Suksesi Budiardjo.

Military Attaché, Lt.-Col. M. D. Djambek.

Situated between latitudes 6° North and 11° South and between longitudes 95° and 141° East, Indonesia comprises the islands of Java and Madura, the island of Sumatra, the Riouw-Lingga Archipelago (which with Karimoon, Anambas, Natuna Islands, Tambelan, and part of Sumatra, forms the "Residency of Riouw"), the islands of Bangka and Billiton, part of the island of Borneo, Celebes Island, the Molucca Islands (Ternate, Halmahera,

Buru, Ceram, Banda, Timor-Laut, Larat, Bachiam, Obi, Kei, Aru, Babar, Leti and Wetar), part of Timor Island, and the islands of Bali and Lombok, with a total area of 735,000 miles, and a population estimated at 80,000,000.

From the early part of the 17th century much of the Indonesian Archipelago was under Netherlands rule. Following the World War, 1939-45, a strong nationalistic movement manifested itself and sporadic fighting between Netherlands and Indonesians occurred throughout the Netherlands Colonies, the position being complicated by the presence of Japanese forces. British and Indian troops were landed in Java and Sumatra to assist in restoring order and suffered many casualties. The protracted failure to reach a political settlement led to military action by the Netherlands' government against the Indonesian Republic and on two occasions, in July, 1947, and December, 1948, the Security Council of the United Nations entered the dispute and set up a Good Offices Committee to assist in reaching a settlement. In the Netherlands a Bill providing for the transfer of sovereignty to Indonesia and ratification of the agreements reached at a Round Table Conference at The Hague was passed on December 21, 1949. Formal transfer of sovereignty by the Netherlands took place on December 27, 1949. A provisional federal constitution was adopted and the country named the United States of Indonesia.

On August 15, 1950, a new provisional constitution was proclaimed. The country, under the name of the Republic of Indonesia, is divided into ten provinces: West Java, Central Java, East Java, North Sumatra, Central Sumatra, South Sumatra, Borneo, Celebes, Lesser Sunda Isles and the Moluccas. Each province is constitutionally guaranteed broad regional autonomy. As an interim measure the Chairman and Members of the House of Representatives and Senate, the Republican Working Committee and the High Advisory Council of the United States of Indonesia formed a first People's Representative Council of the Republic of Indonesia.

Production.—Nearly 70 per cent. of the population of Indonesia is engaged in agriculture and related production. Copra, kapok, nutmeg and cinnamon are produced mainly by smallholders; palm oil, sugar, fibres and cinchona are produced by large estate companies. Rubber, tea, coffee and tobacco are also produced in quantity. Rice is a traditional staple food for the people of Indonesia and the islands of Java and Madura are important producers.

Indonesia is rich in minerals; petroleum, tin, coal and bauxite are the principal products; gold, silver, manganese phosphates, nickel and sulphur were produced in quantity before the Second World War and there are considerable deposits.

Transport.—Work is now in progress on the reconstruction and equipment of railways which were operated successfully in Java and Sumatra before the war. In Java a main line connects Djakarta with Surabaya in the East of Java and there are several branches, including an inland line from Semarang on the North coast to Djogjakarta in the South. In Sumatra the important towns of Medan, Padang and Palembang are the centres of short railway systems.

Sea communications in the archipelago have been maintained for many years by a Dutch shipping line and a Government Shipping Board assisted the establishment of a number of shipping companies which now operate services among the islands. Transport by small craft on the rivers of the larger islands plays an important part in the export trade. Air services in Indonesia are

operated by Garuda Indonesian Airways and the country is served by various international services including those of B.O.A.C.

CAPITAL: Batavia (Java) was renamed Djakarta and is the capital of the Republic of Indonesia. Other important centres are: (Java) Surabaya, Samarang, Bandung, Tjeribon, Surakarta and Djogjakarta; (Madura) Pamekasan (15,000); (Sumatra) Palembang (50,000), Medan (80,000) and Padang; (Celebes) Macassar (20,000) and Menado; (Borneo) Banjarmasin, Balikpapan and Pontianak; (Moluccas) Ternate (9,000); (Bali) Singaradja (9,500); (W. Timor) Kupang (10,000). **Flag:** Red and white. **LANGUAGE:** The official language of Indonesia is the Indonesian Language (*Bahasa Indonesia*). **NATIONAL ANTHEM:** *Indonesia Raya*. August 17 is celebrated as INDEPENDENCE DAY in Indonesia.

Over £12,000,000 of commodities were sold to the United Kingdom in 1952, the principal items being rubber, tea, copra and palm oil. The value of exports from the United Kingdom in 1952, mainly of machinery and electrical equipment, cars, cycles, and other vehicles, chemical and pharmaceutical goods, reached nearly £17,000,000. From February 4, 1952, the value of the Indonesian rupiah has been fixed at 32=£1 sterling.

Military Attaché, Brig. Ghazi Mohammed al-Daghistani.

Asst. Military Attaché, Maj. Sabih Ali Galib.

Air Attaché, Col. Abdul Khalik al-Saadoon.

Secretary, specially attached, Hikmet Abdulmejid.

Area, etc.—Iraq, lying between the Rivers Euphrates and Tigris, extends from Turkey on N. and N.E. to the Persian Gulf on the S. and S.E., and from Iran on E. to Syria and the Arabian Desert on W., the approximate position being between 37° to 48° E. long., and from 37½° to 30° N. lat.

The total area of Iraq is about 172,000 sq. miles, the distance from Basrah in the south to Mosul in the north being approximately 500 miles.

Population (1947 census):—

Liwa	Males	Females	Total
Bagdad.....	401,904	403,389	805,293
Hillah.....	125,998	125,905	261,903
Diyalah.....	134,282	139,054	273,336
Diwanayah...	163,129	220,658	383,787
Dulaim.....	96,708	96,586	193,294
Kerbalah....	133,346	143,324	276,670
Kut.....	104,715	120,077	224,792
Basrah.....	172,583	179,456	352,039
Amarah.....	139,987	168,121	308,108
Muntafik....	149,596	220,210	369,806
Mosul.....	290,597	310,992	601,589
Arbil.....	108,252	132,021	240,273
Kirkuk.....	132,079	153,799	285,878
Sulaimani....	99,994	122,738	222,732
Total....	2,253,170	2,546,330	4,799,500

The *Liwa* is the present Iraqi unit of administration, the *Vilayet* being the former Ottoman unit.

Of the total population there were in 1935 Moslems 3,136,632 (five-thirteenths being Sunni and eight-thirteenths Shiite), Christians 101,375, Jews 90,970, and other religions, 41,134 (Mandaeans, Yazidis, Bahais, &c.). Almost the entire Jewish population has now emigrated to Israel.

Excavations in 1948 at Tel Abu Shahrain, 14 miles south of "Ur of the Chaldees," confirm Eridu's claim to be the most ancient city of the Sumerian world.

Hillah, the ancient city on the left bank of the Shatt el Hillah, a branch of the Euphrates, about 70 miles south of Bagdad, is near the site of Babylon and of the "house of the lofty-head" or "gate of the god" (Tower of Babel).

Mosul *Liwa* covers a great part of the ancient kingdom of Assyria, the ruins of Nineveh, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul.

Qurna, at the junction of the Tigris and Euphrates, is the traditional site of the *Garden of Eden*. The "Tree of Knowledge," which had stood there "from time immemorial," withered and died in December, 1946.

The *Euphrates* (which has a total length of 1,800 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles), the latter rising in the north-west of Erzerum in the Dumlup Dagh. The *Tigris* has a total length of 1,150 miles from its source to its junction with the Euphrates at Qurna, 70 miles from the Persian Gulf, and rises in two

arms south of the Taurus mountains, in Kurdistan, of Diarbekir, Van and Bitlis conjoin.

Government.—Under the Treaty of Lausanne (1923), Turkey renounced the sovereignty over Mesopotamia. A provisional Arab Government was set up in Nov., 1920, and in Aug., 1921, the Emir Faisal (3rd son of ex-King Hussein of the Hejaz) was elected King of Iraq, to be enthroned on Aug. 23, 1921. The constitution is a Constitutional Monarchy, hereditary in the family of King Faisal, with a Chamber of Deputies of 135 members elected by manhood suffrage, and a Senate of not more than a quarter of the total number of Deputies; the Senators are appointed by the King. Under the decision of a Commission of Judges and Senators the heir apparent must be a male, and in the absence of a male the nation will select a successor.

Production and Industry.—Iraq is capable of supporting a considerably greater population if irrigation is developed and extended. Apart from the valuable revenues to be derived from oil the wealth of the country depends upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley, beans, rice, dates and Indian corn; wheat averages 464 lb. per acre, barley 612 lb., and rice over 370 lb. Cotton growing is successful in some years. Tobacco from the northern *liwas* is sufficient for the needs of the country. Crude petroleum production for 1946-51 was:—

	Metric Tons	Metric Tons
1946.....	4,680,000	1949..... 4,316,000
1947.....	4,702,000	1950..... 6,457,000
1948.....	3,426,000	1951..... 8,349,000

Communications and Trade.—The country is being rapidly opened up and communications improved and secured, particularly in the hitherto inaccessible northern districts. The expenditure of 70 per cent. of all oil royalties received is directed by a Development Board set up in 1950, with six Iraqi members, one British and one American. The Secretary-General is Sir Edington Miller, K.B.E., C.M.G. The port of Basrah is well equipped and able to handle expeditiously all sea-borne trade. Continuous dredging of the Shatt-al-Arab has provided a navigable channel of 22½ feet at low water (as compared with 9 feet before dredging was begun) giving easy access to the Port at all times. The desert route between Bagdad and the Mediterranean was opened up in 1923 and is now a main traffic artery.

Airports for the use of international air traffic have been provided at Bagdad and Basrah (Maqil). The latter serves as a terminus for air traffic originating in the oil fields of the Persian Gulf, and is used as a staging post by the main international airlines operating between Europe and the Far East. In addition to frequent services through Basrah, BOAC provides a twice weekly service between London and Bagdad, which is also served by Iraqi Airways and airlines of Egypt, Iran, the Lebanon, France, and the Netherlands. Iraqi Airways, run as a Department of Iraqi State Railways with BOAC technical assistance, operates a daily service to Basrah and the Persian Gulf and services from Bagdad to Beirut, Cairo, Damascus and Teheran.

The Bagdad Railway.—In 1899 the Anatolian Railway Company obtained a concession from the Sultan of Turkey for the construction of a railway from Konieh (the eastern terminus of the Anatolian Railway) to the Persian Gulf at Kuwait, *via* Bagdad, a total length of 1,550 miles, with a single track of 4 ft. 8½ in. gauge. Its projected course was from Konieh to Adana, thence

S.E. to Aleppo, Jerablus (where it would cross the Euphrates and enter Iraq), and Mosul, and thence S. down the right bank of the Tigris to Bagdad and the Persian Gulf. The section Konieh-Eregli-Bulgurlu (24 miles), was opened in Oct., 1904, and at the outbreak of War (1914) about 1,200 miles (out of the total of 1,550 miles) were in operation, with gaps in important sections (notably in the hills N.W. of Aleppo, and in the desert W. & S. of Mosul). The first through train from Basrah to Bagdad left Basrah on January 13, 1920. In 1936 the Iraq Government decided to link Bagdad with Mosul and Tell Kochek. The alignment chosen is a prolongation of the existing Bagdad-Baiji line and this construction was completed and opened in 1940, thus linking Mosul, Bagdad and Basrah with one another and with Europe.

Language and Literature.—The language is mainly Arabic (see Arabia) and English is widely used in commerce, science and the arts. In May, 1953, there were 17 daily newspapers published in Bagdad (one in English).

There is evidence that an advanced civilization had been reached in the alluvial valley of the Euphrates while Europe was in a state of barbarism. Astronomy, geometry, engineering and land surveying were cultivated by the Sumerians of Mesopotamia, and various arts reached a point of perfection by 3000 B.C., as recent investigations at Ur of the Chaldees have shown. Sumerian culture spread from Mesopotamia to Crete and Egypt and to Greece. In 1944 excavations at Tell Hassuna, near Shura (on the Tigris in North Iraq) unearthed abundant traces of culture dating back to 5000 B.C.

	FINANCE	1951-52
Total revenue (Budget)	£	ID36,754,985
Total expenditure (do.)	£	ID28,240,908
The Iraqi Dinar of 1,000 Fils = 5 Riyals = £1 sterling.		

	TRADE	1950	1951
Total imports	£	ID37,594,927	ID50,871,387
Total exports	£	20,051,340	27,010,175
Imports from U.K.	£	16,374,574	17,200,468
Exports to U.K.	£	3,220,855	8,257,827

The principal imports are cotton piece-goods, sugar, iron and steel, machinery, tea, electrical machinery and motor-cars; and the chief exports are crude petroleum, cereals, dates, raw wool, hides, live animals and raw cotton.

CAPITAL.—The chief city is Bagdad, the former capital of the Abbassid dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." Bagdad has a population of 552,047; of the other towns Mosul has a population of 340,541 and Basrah, 206,302.

BRITISH EMBASSY	
(Saleh Al Din Street, Karkh, Bagdad)	
Ambassador Extraordinary and Plenipotentiary, His Excellency Sir John Monro Troutbeck, K.C.M.G. (1951).

Health, Yosef Serlin (*Gen. Zionists*).

Development, Dr. Dov Joseph (*Mapai*).

Without Portfolio, Pinhas Lavon (*Mapai*).

NOTE:—*Mapai*=Labour Party.

EMBASSY IN LONDON

■ Palace Gate, Kensington, W.8

Ambassador in London, His Excellency Eliahu Elath (1952).

Consulate, 18 Manchester Square, W. 1.

Area and Population.—Israel lies on the western edge of the continent of Asia at the eastern extremity of the Mediterranean Sea, between lat. 29° 30'–33° 15' N. and long. 34° 15'–35° 40' E. Its political neighbours are Lebanon on the North, Syria on the North and East, Jordan on the East and the Egyptian province of Sinai on the South.

The area is estimated at 8,050 square miles out of the 10,429 square miles comprised in the whole of Palestine (the remainder being occupied by Jordan and Egypt). The population was estimated (Jan. 31, 1953), at 1,633,000, of whom 1,453,000 were Jews. These figures result from the gradual process of Jewish immigration during the 30 years preceding Israel's independence (in 1912 there were only 83,790 Jews in Palestine out of a total population of 752,048). During the upheavals of 1948–49 some 600,000 Arabs left the country as refugees and settled in neighbouring countries.

Hebrew is the official language of Israel. Arabic is also used extensively in Government publications and on coins and stamps. Arabs are entitled to transact all official business with Government Departments in Arabic, and provision is made in the *Knesset* for the simultaneous translation of all speeches into Arabic.

Physical Features.—Israel comprises four main regions: (a) the hill country of Galilee and Judaea and Samaria, rising in places to heights of 2,460 to 3,940 ft.; (b) the coastal plain from the Gaza strip to North of Acre, including the plain of Esdraelon

running from Haifa Bay to the south-east, and cutting in two the hill region; (c) the Negev, a semi-desert triangular-shaped region, extending from a base south of Beersheba, to an apex at the head of the Gulf of 'Aqaba; and (d) parts of the Jordan valley, including Lakes Hula, Tiberias and the south-western extremity of the Dead Sea. The principal river is the Jordan, which rises from a main source near Banyas at a height of 1,140 feet above sea-level and enters Lake Hula (Waters of Merom) 220 feet above sea-level. Between Lakes Hula and Tiberias (Sea of Galilee) the river falls 926 ft. in 11 miles and becomes a turbulent stream. Lake Tiberias is 696 ft. below sea-level and liable to sudden storms. Between it and the Dead Sea the Jordan falls 591 ft. The other principal rivers are the Yarkon and Oishon. The largest lake is the Dead Sea (shared between Israel and Jordan); area 405 sq. miles, 1,286 feet below sea-level, 51.5 miles long, with a maximum width of 11 miles and a maximum depth of 1,309 ft.; it receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation. The water, therefore, contains an extraordinary high concentration of mineral substances. The highest mountain peak is Mount Atzmon, 3,962 feet above sea-level, near Safad, Upper Galilee.

Climate.—The climate is variable, similar to that of Lower Egypt, but modified by altitude and distance from the sea. The summer is hot but is made comfortable in most parts by daily refreshing westerly winds from the Mediterranean. The winter is the rainy season lasting from November to April, the period of maximum rainfall being January and February.

Antiquities.—The following are the principal historic sites in Israel: Jerusalem: the Church of the Dormition and the Cenaculum on Mount Zion (the principal Christian and Moslem Holy Places of the Jerusalem area are in Jordan territory). Ain Karem: Church of the Visitation, Church of St. John the Baptist. Galilee: The Sea; Church and Mount of the Beatitudes, ruins of Capernaum and other sites connected with the life of Christ. Mount Tabor: Church of the Transfiguration. Nazareth: Church of the Annunciation and other Christian shrines associated with the childhood of Christ. There are also numerous sites dating from biblical and mediæval days, such as Ascalon, Cæsarea, Athlith and Megiddo.

History.—The early history of Palestine, from the time when Moses led the Jews from Egyptian bondage towards the *Promised Land* to the time of the *Diaspora* (Dispersion) in the second century of the Christian Era, can be found in the Books of the Old Testament and in the Works of Josephus. Before the dispersion it had become the cradle of Christianity and the *Holy Land* of the Christian World, but after the break up of the Roman Empire, into which it had been brought by Pompey in 65 B.C., it was conquered by Islamic Arabs (A.D. 634), remaining under the Crescent as part of the Ottoman Empire (except for a break from 1098 to 1187 under the Crusaders) until Allenby's victory over the Germano-Turkish forces in the plain of Armageddon (Megiddo) on September 29, 1917.

On November 2, 1917, a statement, afterwards known as *The Balfour Declaration*, was made by the British Government that Britain viewed with favour the establishment in Palestine of a home for the Jewish people. This principle was incorporated in the mandate to Britain, which came officially into force on Sept. 29, 1923. For 25 years Great Britain administered Palestine and laid the foundations of modern self-government.

The British mandate ended at midnight on

May 14, 1948, when the Jewish National Council proclaimed a Jewish State of Israel, with David Ben Gurion as Prime Minister. On the following day Palestine was invaded by Syrian and Lebanese troops in the north, by the Transjordan Arab Legion and the Iraqis in the east and by the Egyptians in the south. On June 30 the last British troops left Haifa, which was taken over by Israel.

Hostilities ceased in January, 1949. The four armistice agreements signed under United Nations auspices in 1949 left Israel in occupation of various areas originally allotted to the Arab State. The situation as at present governed by the terms of the armistices has not yet been stabilized by peace treaties between Israel and any of its neighbours. The Arab parts of Palestine occupied by Jordan were formally incorporated with the latter in April, 1950. Egyptian forces occupy the "Gaza strip," a small coastal area with an Arab population.

Recognition.—The State of Israel was officially recognized by the United Kingdom (Jan. 29, 1949) and by a majority of the countries of the world in 1948-49.

Government.—There is an Executive Council nominated by the leading political party and appointed by the President, and a Constituent Assembly (*Knesset Israel*) of 120 members. At the second general election on July 30, 1951, Labour (*Mapai*) secured 45 seats, General Zionist Party (right-wing middle-class) 20, *Mapam* (left-wing Socialist) 15, Religious parties 15, Freedom Movement (*Herut*, outgrowth of *Irgun Zvai Leumi*) 8, Communists 5, pro-*Mapai* Arab parties 5, Progressives 4, Sephardim 2, Yemenites 1. *Knesset Israel* held its inaugural session on Feb. 14, 1949. It is of interest to note that the Great Assembly, which was set up after the return from Captivity in Babylon, also consisted of 120 members.

Immigration.—The Declaration of Independence of May 14, 1948, laid down that "The State of Israel will be open to the immigration of Jews from all countries of their dispersion." The Law of Return, passed by the *Knesset* on July 5, 1950, provides that an immigrant visa shall be granted to every Jew who expresses his desire to settle in Israel. Since the establishment of the State 687,801 immigrants had entered Israel from 40 different countries by the end of January, 1952.

Education.—Elementary education for all children from 5 to 13 years is compulsory under a law passed in September, 1949. In the 1951-52 school year the number of pupils was 309,782 in 3,030 educational institutions, of which about 192 were Arab schools attended by 27,151 pupils. The Hebrew Technical College at Haifa provides courses in engineering, architecture, aeronautics and other technical subjects. The Hebrew University, at Jerusalem, has 383 professors, lecturers and assistants, with about 2,400 students.

Finance.—Government expenditure from April 1, 1952, to March 31, 1953, was £168,450,000 as Ordinary Budget and £115,000,000 as Development Budget and revenue during the same period £180,500,000.

The unit of account is the Israel pound of 1,000 *prutot*. There are three rates of exchange to the Israel pound: £1 = £2.80 for essential foodstuffs, £1 = £1.40 for diplomats and tourists and certain commodities (£1 = £12) and £1 = £1 for most capital investors and for all other commodities.

COMMUNICATIONS

Railways and Roads.—Israel State Railways started operating in August, 1949. Towns now served are Haifa, Tel Aviv, Jerusalem, Lydda,

Naharia and intermediate stations. In December, 1952, there were approximately 1,861 km. of paved roads. There were 40,931 licensed motor vehicles (including 11,799 private cars and 16,266 commercial vehicles).

Shipping.—Israel's merchant marine in 1952 totalled 34 vessels with an aggregate tonnage of 120,000. In 1952, 920 ships with a net tonnage of 1,605,239 entered Israel ports. Cargo unloaded during the year amounted to 1,115,495 tons and cargo loaded to 227,132 tons.

The chief ports are Ψ Haifa, a modern harbour, with a depth of 30 ft. alongside the main quay; Ψ Jaffa and Ψ Tel Aviv, where there are small craft harbours, and large vessels anchor at open roadstead. Ψ Acre has an anchorage for small vessels, and a fishing port is under construction at Ψ Caesarea.

Civil Aviation.—Two BOAC services operate once weekly into and through Lydda. These are London to Lydda via Rome, and London-Lydda-Teheran. Cyprus Airways operate three weekly services between Nicosia and Lydda, two of which have connections with the U.K. via Athens and Rome. This company also operates a weekly Nicosia to Haifa service. During 1952, 1,660 aircraft arrived at Lydda and Haifa airports, carrying 26,949 passengers and 1,388,994 kilograms of freight. 30,644 passengers left through the two airports.

PRODUCTION AND INDUSTRY

Agriculture.—The country is generally fertile and climatic conditions vary so widely that a large variety of crops can be grown, ranging from temperate crops, such as wheat and cherries, to sub-tropical crops such as sorghum, millet and mangoes. The famous "Jaffa" orange is produced in large quantities in the coastal plain for export; other kinds of citrus fruits are also grown and exported. The citrus yield during the 1952-53 season was 8,360,000 cases of about net weight of 40 kgs. each. Of the total, 5,325,000 cases were exported, of which 3,193,700 went to the U.K. Olives are cultivated, mainly for the production of oil used for edible purposes and for the manufacture of soap. The main winter crops are wheat and barley and various kinds of pulses, while in summer sorghum, millet, maize, sesame and summer pulses are grown. Large areas of seasonal vegetables are planted; potatoes can be grown in the autumn and in the winter. Since the establishment of the State of Israel, the production of mixed vegetables and of eggs and milk has greatly increased. Fishing has also been extended, and production (from fish ponds and coastal fishing) was 7,850 tons in 1952. All kinds of summer fruits such as figs, grapes, plums and apples are produced in increasing quantities for local consumption. Water supply for irrigation is the principal limiting factor to greater production, but the number of new deep wells is being extended and a plan to bring water to the Negev from the Yarkon river is now under way. A large part of the dairy industry is dependent on the production of fodder crops under irrigation; areas under fodder crops have doubled. The Israel land measure is the *dunam*, equivalent to 1,000 square metres (approximately a quarter of an acre).

Industry.—Among the more important industries are citrus and by-products, manufactured food products, pharmaceuticals, textiles and wearing apparel, artificial teeth, light engineering and the assembly of motor cars and trucks. Some 2,000 new factories of all sizes were built between 1948 and 1952.

TRADE

1951

Imports	£122,592,843
Exports	16,720,065
Imports from U.K.	12,226,615
Exports to U.K.	5,207,090

The principal imports are foodstuffs, crude oil, machinery and vehicles, iron, steel and manufactures thereof, and chemicals. The principal exports are citrus fruits and by-products, polished diamonds, artificial teeth, finished and semi-finished textiles and pharmaceutical drugs.

ISRAEL INDEPENDENCE DAY—*Iyar* 5, A.M. 5713 (April 20, 1953).

CAPITAL, Jerusalem, population (1952), 137,500. Other principal towns are Ψ Tel Aviv-Jaffa (350,000); Ψ Haifa and district (150,100); Nathanya (26,500); Nazareth, (20,780); Petah Tiqua (41,000) and Ramat Gan (42,000); Hadera (21,000); Holon (26,000); Rehovot (23,200); Rishon-le-Zion (25,000); Bnei Brak (20,500); Ψ Acre (16,680) and Ψ Tiberias (16,200).

FLAG: White, with two horizontal blue stripes, the Shield of David in the centre.

JERUSALEM

Jerusalem and District is at present divided between Israel and Jordan under the terms of the armistice arranged at the end of hostilities. The population of Jerusalem is estimated (1951) at 291,000, of whom 121,000 are Jews. The Old City, which contains 34 of the 36 recognized Holy Places is under the control of Jordan; the New City, with 2 Holy Places, is under Jewish administration. A resolution proclaiming Jerusalem as the capital of Israel was adopted by the Israel parliament on Jan. 23, 1950.

Air Attaché, Col. Cesare de Porto.

Financial Attaché, Signor Antonino Zecchi.

Press Attaché, Signor Francesco Antinori.

Italian Consulate, 38 Eaton Place, S.W.1.

Consul, Signor Piero Vinci.

AREA AND POPULATION.—Italy is a Republic in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba and about 70 islands (with certain dependencies hereinafter noted). Italy is bounded on the N. by Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia, etc., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area may be estimated (1945) at 301,000 sq. kilometres, about 131,000 sq. miles, with a population (Census, Nov., 1951) of 47,020,536.

Births in 1951 numbered 843,720, deaths 478,313, and marriages 321,252.

Sicily (Trinacria) was the first province gained by the Romans beyond the confines of the peninsula; Sardinia was added soon after, at the close of the Second Punic War (202 B.C.).

Physiography.—On the west of the peninsula are wide and fertile plains, with ample streams and sheltered seaports, but on the east the spine of the Apennines runs close to an inhospitable coast for the greater part of its length and except for the harbours of Brindisi and Otranto there is little shelter from the storms of the Adriatic. The Alps form the northern limit of Italy, dividing it from France, Switzerland, Austria and Yugoslavia. Mont Blanc (15,782 feet), the highest peak, is in the French Pennine Alps, but within the Italian borders are Monte Rosa (15,217 feet) and several peaks from 12,000 to 14,000 feet.

The chief rivers are the Po (220 miles) and Adige in the north, Arno (Florentine Plain) and the Tiber (flowing through Rome to Ostia). The Rubicon, a small stream flowing into the Adriatic near Rimini (and now usually identified with the Fiumicino) formed the boundary between Italy and Cisalpine Gaul: "crossing the Rubicon" (as Caesar did in 49 B.C., thus "invading" Italy in arms) is a step definitely indicating an aggressive course of action.

GOVERNMENT.—Italian unity was accomplished under the House of Savoy, after an heroic struggle

from 1848 to 1870, in which the great patriots Mazzini (born 1805; died 1872), Garibaldi (born 1807; died 1882) and Cavour (born 1810; died 1861) were the principal figures. It was completed when Lombardy was ceded by Austria in 1866 and Venice in 1870, and through the evacuation of Rome by the French in 1870. In 1872 the King of Italy entered Rome, and that city was declared to be the capital.

Benito Mussolini, known as *Il Duce* (The Leader), was born July 29, 1883, and was continuously in office as Prime Minister from June 30, 1925, until July 25, 1943, when the Fascist régime was abolished. He was captured by Italian partisans while attempting to escape across the Swiss frontier and was put to death on April 28, 1945.

Marshal Pietro Badoglio succeeded Mussolini in the office of Prime Minister and announced his intention to summon the Senate and the Chamber in order that a constitutional form of government on a democratic basis might be instituted.

In fulfilment of a promise given in April, 1944, that he would retire when the Allies entered Rome a decree was signed on June 5, 1944, by King Victor Emmanuel and Marshal Badoglio under which Prince Umberto, the King's son, became "Lieutenant-General of the Realm." The King remained head of the House of Savoy and retained the title of King of Italy until his abdication on May 9, 1946, when he was succeeded by the Crown Prince.

A general election was held on June 2, 1946, together with a referendum on the question of Republic or Monarchy. The Referendum resulted in 12,717,923 votes for a Republic and 10,719,284 for a Monarchy. The Royal Family left the country on June 13, and on June 28, 1946, a Provisional President was elected.

As a result of the General Election of April 18, 1948, in which the Christian Democrats were returned as the leading party with a majority in the Chamber, Signor de Gasperi formed a Coalition Government of Christian Democrats, Liberals, Republicans and those Right Wing Socialists who had left Nenni. The Cabinet has been re-formed several times since that date, the Liberals leaving the Coalition in January, 1950, and the right-wing Socialists in April, 1951. The elections of July, 1953, resulted in a position of deadlock, and after Signor de Gasperi had formed a short-lived minority Government, he was succeeded as Prime Minister by Signor Pella.

THE NEW CONSTITUTION.—On Dec. 22, 1947, the Constituent Assembly approved the new Constitution laying the foundation of the Italian Republic, Article 1 of which states "Italy is a Democratic Republic founded on work. Sovereignty belongs to the people who exercise it in the forms and within the limits of the Constitution."

PRODUCTION.—Agriculture (including the growing of grapes, olives, chestnuts and rice) is the principal industry. Italian wines are numerous and celebrated, and olives and olive-oil are produced in the South, chiefly in Apulia; while fruit abounds and is largely exported; wheat production had been greatly stimulated under Fascist régime. The cultivation of the silkworm forms an important industry. Italy is generally poor in mineral resources, but the discovery and rapid exploitation since the war of large quantities of natural methane gas in North Italy is likely considerably to reduce the costs of industrial production and the requirements of imported coal. The production of sulphur is important and among other minerals produced are iron pyrites, mercury, lead, zinc,

aluminium, potassic salts and iron ores. Marble is quarried in considerable quantities. Salt and tobacco are Government monopolies.

The chief manufactures are woollens, cotton, silk, rayon, hemp, and linen yarns and tissues, iron and steel and their products, shipbuilding, gloves, motor vehicles, rubber tyres and tubes, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption.

DEFENCE.—The Army has been reorganized. It consists of about 250,000 men. Limitations on manpower and equipment imposed by the Peace Treaty are still in force. The Navy consists of 2 battleships, 3 cruisers, 6 destroyers and some anti-submarine vessels and minesweepers. The Air Force must not exceed 350 aircraft and 25,000 men.

LANGUAGE AND LITERATURE.—Italian is a Romance language derived from Latin and has been classified as Gallic-Italian, spoken in the north and north-west (Piedmont, Lombardy and Emilia); Venetian; Tuscan and Roman, in central Italy (Tuscany, Latium, Umbria, the Marches, Campania, Abruzzi and Apulia); and Ibero-Italian in Sicily and Sardinia and in Calabria and Liguria. Italian literature (in addition to Latin literature, which is the common inheritance of the civilized world) is one of the richest in Europe, particularly in its golden age (Dante, 1265-1321; Petrarch, 1304-1374; and Boccaccio, 1313-1375) and in the renaissance during the fifteenth and sixteenth centuries (Ariosto, 1474-1533; Machiavelli, 1469-1527; Tasso, 1544-1595). Modern Italian literature has many noted names in prose and verse, notably Carducci (1835-1907) and Gabriele d'Annunzio (1864-1938). The Nobel Prize for Literature has been awarded to Italian authors on three occasions—G. Carducci (1906), Signora G. Deledda (1926), and Luigi Pirandello (1934). In 1949 there were 108 daily newspapers published in Italy, of which 16 were published in Rome, 8 in Genoa and 13 in Milan.

EDUCATION.—Primary education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the 26 Universities are of very ancient foundation, Bologna, Genoa, Macerata, Naples, Padua and Perugia in thirteenth century; Siena, Rome, Pisa, Pavia and Ferrara in fourteenth century; Catania and Turin in fifteenth century; Parma, Messina and Urbino in sixteenth century.

COMMUNICATIONS.—Serious damage was done to the Italian railway system by the war, but by the end of 1948 the work of restoring the tracks was almost completed. A large programme for rebuilding stations, replacing and increasing rolling stock, etc., was carried out in 1949 and a further programme is envisaged for 1952-53, including the building of new lines. By May, 1952, the Italian Mercantile Marine had been restored to just over 3,350,000 tons compared with 3,500,000 tons before the war.

CURRENCY

The Italian Lira (of 100 Centesimi) was quoted at 900=£1 sterling in February 1946. In May, 1952, the Lira was quoted at approx. 1,749=£1. (See also p. 83.)

TRADE 1951

Imports Lire 1,323,665,000,000
Exports „ 1,017,863,000,000

1951

Imports from U.K. £53,600,000
Exports to U.K. 45,600,000

Imports chiefly consist of coal, mineral oils, cotton, wool, wheat, machinery, apparatus and their parts, iron and steel, wood pulp, rubber goods, copper, coffee and timber.

The principal exports are cotton goods, artificial fibres, woollen goods and textile products in general, fresh fruit and vegetables and various preserved fruits, machinery, apparatus and their parts and motor vehicles.

The principal imports from the U.K. in 1951 were machinery, apparatus and their parts, vehicles, coal, iron and steel manufactures, wool and wool manufactures, chemical and electrical products; the principal exports to the U.K. in 1951 were fresh fruit, vegetables, cheese and other foods, artificial silk, woollen and cotton yarns and other textile manufactures, machinery, chemicals, oils and hides.

CAPITAL, Rome, founded according to legend by Romulus in the year now known as 753 B.C., is situated on the Tiber, 15 miles from its mouth. It was the focal point of Latin civilization and dominion under the Republic and afterwards under the Roman Empire, and became the capital of Italy when the kingdom was established in 1872. Population (1951), 1,687,735. Other towns are Milan (1,295,700), Ψ Naples (1,041,130), Turin (737,000) and Ψ Genoa (678,000); Florence (388,480), Bologna (350,000), Ψ Venice (323,400), Ψ Trieste (273,450) the administration of Trieste, which had been occupied by Yugoslav forces, was taken over by Allied Military Government on June 12, 1945), Ψ Bari (275,490), Verona (199,030), Ψ Livorno or Leghorn (148,810), Ψ Taranto (106,720), Brescia (153,180), Ferrara (138,700), Ψ Reggio di Calabria (143,890), Ψ Spezia (125,200), Ψ Ancona (188,130), Ψ Ravenna (90,810), Ψ Torre Annunziata (52,450), Ψ Salerno (93,685), Ψ Rimini (78,960), Ψ Savona (70,410), Ψ Torre del Greco (63,430), Ψ Brindisi (62,730); in Sicily, Ψ Palermo (506,150), Ψ Catania (298,855), Ψ Messina (231,430), Ψ Trapani (77,060), Ψ Marsala (75,890), Ψ Syracuse (71,710), and in Sardinia, Ψ Cagliari (140,520).

ITALY'S FORMER COLONIES, &c.

The future of the former Italian colonies was determined by the General Assembly in a resolution of November 21, 1949, and subsequent subsidiary resolutions.

For LIBYA see separate article.

In Somalia authority was transferred on April 1, 1950, by the United Kingdom to Italy. Somalia is to become an independent and sovereign state on December 2, 1960.

Under a United Nations resolution of December 2, 1950, Eritrea constitutes an autonomous unit federated with Ethiopia under the sovereignty of the Ethiopian crown. See ETHIOPIA.

Somalia comprises a coastal strip on the Gulf of Aden and the Indian Ocean, from 12° N. lat. to the Equator, and is bounded on the N. by the Gulf of Aden, on E. by the Indian Ocean, and on W. by British Somaliland, Abyssinia, and British E. Africa. The total area, including the territory of Jubaland (and the part of Ψ Kismayu), transferred from Kenya by Great Britain in 1925, is about 220,000 sq. miles, and the population is estimated at 1,254,000. The capital is Ψ Mogadishu, on the Indian Ocean, estimated population 70,000.

Pantellaria Island (part of Trapani Province) in the Sicilian Narrows, has an area of 31 sq. miles and a population of 10,000.

The Pelagian Islands (Lampedusa, Linosa and Lampione) are part of the Province of Agrigento and have an area of 8 sq. miles, pop. 3,000.

2nd Secretaries, Yasuhiko Nara; Yasuo Abe; Shigeharu Isse.

3rd Secretaries, Takaaki Hasegawa; Kuniyoshi Date.

Attachés, Kiyoko Kikuchi; Teruji Akiyama.

Area and Population.—The Japanese Empire consists of 4 large and many small islands situated in the North Pacific Ocean between longitude 136° 30' East and 110° 18' West, and between latitude 20° 25' and 50° 55' North, with a total area of 368,480 square kilometres (142,270 square miles) and a population (April 1, 1953) of 86,400,000.

Japan Proper consists of *Honshū* (or Mainland), 230,532 sq. k. (89,011 sq. m.), *Shikoku*, 18,773 sq. k. (7,248 sq. m.), *Kyūshū*, 42,079 sq. k. (16,247 sq. m.), *Hokkaidō*, or *Yezo*, 77,096 sq. k. (29,764 sq. m.). The various parts of China which had been throughout the years of Japanese expansion and aggression leased or annexed, e.g. Formosa and the Kwantung Province, reverted to Chinese sovereignty after the War of 1939-45.

After the unconditional surrender to the United Nations (Aug. 15, 1945), Japan was occupied by Allied forces under General MacArthur (Sept. 15, 1945), and the status of parts of the former Japanese Empire has yet to be determined. A Japanese peace treaty conference opened at San Francisco on Sept. 4, 1951, and on Sept. 8, 48 nations signed the treaty, which became effective on April 28, 1952.

British participation in the occupation of Japan was virtually over by May, 1950, at which date the British Commonwealth Occupation Force was reduced to 3,000 Australians. However, the outbreak of hostilities in Korea in June, 1950, resulted in the despatch to Korea of British Forces from the United Kingdom, Australia, New Zealand and Canada to participate in the United Nations action. The main base of this force is established in Japan at Kure, and the Japan element of the British Commonwealth Forces in Korea amounts to approximately 6,000 troops.

Vital Statistics.—Japan proper contained (on April 1, 1953) 86,400,000 inhabitants. The birth rate in 1952 was 23.3 per 1,000 and death rate 8.9 per 1,000 (the lowest recorded in Japan). The *Ainu*, remnant of the indigenous inhabitants, are still found in the island of Hokkaidō.

Physiography.—The coastline exceeds 17,000 miles and is deeply indented, so that few places are far from the sea. The interior is very mountainous, and crossing the mainland from the Sea of Japan to the Pacific is a group of volcanoes, mainly extinct or dormant. Mount Fuji, the loftiest and most sacred mountain of Japan, about 60 miles from Tokyo, is 12,370 ft. high and has been dormant since 1707, but there are other volcanoes which are active, including Mount Aso in Kyūshū. There are frequent earthquakes, mainly along the Pacific coast near the Bay of Tokyo. Japan proper extends from sub-tropical to sub-arctic zones. Heavy snowfalls are frequent on the western slopes of Hokkaidō and Honshū,

but the Pacific coasts are warmed by the Japan current. There is a plentiful rainfall and the rivers are short and swift-flowing, offering abundant opportunities for the supply of hydro-electric power.

Government.—According to Japanese tradition, Jimmu, the first Emperor of Japan, ascended the throne on Feb. 11, B.C. 660. Under the Constitution of Feb. 11, 1889, the monarchy was hereditary in the male heirs of the Imperial house. The ruler (*Nippon Koku Tenna*) is correctly described as Emperor; the archaic word *Mikado* is of doubtful etymology and appears to mean "August Gate," i.e. the entrance to the sacred precincts where the Emperor lived. A new constitution approved by the Supreme Allied Commander was published on March 6, 1946, superseding the "Meiji Constitution" of 1889 and containing many radical changes based on the constitutional practices of the United Kingdom, U.S.A. and France. Among the most important innovations are the abandonment of the doctrine of Imperial Divinity, the renunciation of war, and the establishment of a Supreme Court.

The new constitution came into force on May 3, 1947. Legislative authority rests with *The Diet*, which is bicameral, consisting of a *House of Representatives* and a *House of Councillors*, both Houses being composed of elected members. Executive authority is vested in the Cabinet which is responsible to the Legislature.

The Japanese peace treaty came into force on April 28, 1952, after ratification by Argentina, Australia, Canada, Ceylon, Mexico, New Zealand, Pakistan, the U.K., the U.S.A. and Japan herself. Japan thereupon resumed her status as a sovereign and independent power.

At the general election of October 1, 1952, Mr. Yoshida's Liberal Party was again returned to power but with a reduced majority. On March 14, 1953, however, following a split within the Liberal Party, Mr. Yoshida's Government was defeated in a vote of no-confidence and the Lower House was again dissolved. As a result of the general election on April 19, 1953, the composition of the Lower House was as follows.—Yoshida Liberals 199, Hatoyama Liberals 35, Progressives 76, Right Wing Socialists 66, Left Wing Socialists 72, Labour Farmers 5, Communists 1, Independents and minor parties 12. Half the seats in the Upper House came up for re-election on April 24 and as a result of this election the composition of the Upper House was as follows.—Yoshida Liberals 93, Green Breeze Society (Ryokufukai) 34, Right Wing Socialists 26, Left Wing Socialists 40, Progressives 15, Labour Farmers 2, Hatoyama Liberals 2, Independents 37. On May 19, 1953, Mr. Yoshida was again elected Prime Minister although his party is in a minority in the Diet. On May 21 he announced the formation of his fifth Liberal Administration.

Agriculture and Livestock.—Owing to the mountainous nature of the country not more than one-sixth of its area is available for cultivation. There were in 1952 over 60,000,000 acres of forest, which include the *Cryptomeria japonica*, *Pinus massoniana*, *Zelkova keaki*, and *Pawlonia imperialis* in addition to camphor trees, mulberry, vegetable wax tree and a lacquer tree which furnishes the celebrated lacquer of Japan. The soil is only moderately fertile, but intensive cultivation secures good crops. In 1952 there were 11,512,059 acres under cereals (rice 7,434,402 acres—64.6 per cent.). The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; rice is the staple food of the people, about 9,500,000 metric tons being produced annually. The floral kingdom is

rich, beautiful, and varied, though scented flowers are comparatively few. Fruit is abundant, including the orange, persimmon and loquat; European fruits, such as apples, strawberries, pears, grapes, figs, and peaches are produced, and the American navel orange is extensively grown. Mulberry trees are now cultivated on only 173,995 hectares (about a quarter of the pre-war area) and silk is playing a reduced part in Japanese exports.

Minerals.—The country has mineral resources, including gold and silver, and copper, lead, zinc, iron chromite, white arsenic, coal, sulphur, petroleum and salt, but iron ore and coal are among the principal pre-war imports to supply deficiencies at home.

Commerce and Industry.—Japan is the most highly industrialized nation in the Far East, with the whole range of modern light and heavy industries, including mining, metals, machinery, chemicals, textiles (cotton, silk, wool and synthetics), cement, pottery, glass, rubber, lumber, paper, oil refining and shipbuilding. The labour force of Japan at the end of 1952 was 39,380,000, about 15,220,000 being paid workers; of the remainder, some 10,340,000 were classed as proprietors, and another 13,350,000 were family workers, for the most part engaged in agriculture. About 40 per cent. of paid industrial workers were organized into trade unions.

Communications.—There were 29,380 kilometres of Government and private railroad (steam and electric) on March 31, 1953. The mercantile marine of Japan and her dependencies reached 6,000,000 gross tons in 1941, but more than three-quarters of it was sunk during the war. By the end of 1952 it had been rebuilt to 2,735,000 gross tons, and there was a domestic shipbuilding programme for 1953 of 3,000,000 tons.

Armed Forces.—After the unconditional surrender of August, 1945, the land forces were disarmed and disbanded and all aircraft were confiscated by the occupying forces. Between the attack on Pearl Harbour, Hawaii (Dec. 7, 1941) and VJ Day (Aug. 18, 1945), 328 Japanese warships were sunk or put out of action, including 12 battleships, 15 aircraft carriers, 4 escort carriers, 16 heavy and 20 light cruisers, 126 destroyers and 125 submarines. In October, 1945, the United Nations agreed to scuttle all surviving Japanese war vessels, except 38 destroyers and some coast defence vessels. Although the present Constitution of Japan prohibits the maintenance of armed forces, an internal security force, known as the National Police Reserve, came into being at the end of 1950. In October 1951, this Force was renamed the National Safety Force and together with a Coastal Safety Force was placed under a National Safety Agency. By January 1953, the National Safety Force had reached its authorised strength of 110,000; it possesses no heavy arms but trains with heavy weapons borrowed from the United States Security Forces. The Coastal Safety Force took over the mine-sweepers employed by the earlier Maritime Safety Agency and in addition received in 1952 the loan of 18 frigates and 50 support craft from the United States. The transfer and manning of all these vessels was due to be completed by the end of 1953.

Religion.—All religions are tolerated. The principal religions of Japan are Mahayana, Buddhism and Shinto. The Roman Catholic Church has an archbishop and three suffragan bishops. The Nippon Seikokai (Holy Catholic Church of Japan) has 8 Japanese bishops and is an autonomous branch of the Anglican communion. There is also an United Protestant Church.

Education.—According to the new laws passed in 1947, education on elementary level (6-year course)

and lower secondary level (3-year course) is free, compulsory and co-educational. Upper secondary schools (3-year course) are mainly established and maintained by prefectures, and are co-educational. They have several courses in general, agricultural, commercial, technical, mercantile marine, radio-communication and home-economics education, etc. There are 2- or 3-year junior colleges and 4-year universities. Some of the 4-year universities have graduate schools. By April 1, 1953, the total number of these junior colleges and universities was 454, 79 of which were established and maintained by the State, while 71 were established and maintained by prefectures and cities, and 304 were private institutions. The most prominent universities are the seven State Universities of Tokyo, Kyoto, Tohoku (Sendai), Hokkaido (Sapporo), Kyushu (Fukuoka), Osaka and Nagoya.

Language and Literature.—Japanese is said to be one of the Altaic group of languages and remained a spoken tongue until the fifth-seventh centuries A.D., when the Chinese characters came into use. Most Japanese who have received school education can read and write the Chinese characters in current use (about 1,800 characters) and also the syllabary characters called Kana. English is the best known foreign language. It is compulsory in almost all colleges and universities, and optional in almost all middle and high schools. In April, 1953, there were 1,550 libraries (972 public and 578 others) with about 6,000,000 volumes. In 1952 there were 190 daily newspapers in Japan, of which 24 were published at Tokyo; 16 at Osaka and 12 in the Nagoya region.

FINANCE

The draft Budget for the 1953-54 financial year, ending on March 31, was estimated to balance at Yen 968,285,000,000 for revenue and expenditure on the general account and at Yen 309,600,000,000 on the special account for Government investment.

The official rate of exchange is 1,008 yen = £1. The rate of yen 360 = 1 U.S.\$ was established on April 25, 1949, and (after Japan's accession to the International Monetary Fund) was confirmed by the Fund on May 11, 1953. The service of Japan's external bonded debt (except for certain small French franc issues) was resumed in December 1952. Interest on some £61,000,000 worth of outstanding sterling bonds and \$68,000,000 worth of U.S. dollar bonds is being paid at the full contractual rates, and arrears of interest are being paid concurrently.

FOREIGN TRADE

	1952
Total Imports.....	U.S. \$1,170,000,000
Total Exports.....	" 1,168,000,000
Imports from U.K.....	£8,838,924
Exports to U.K.....	£29,235,079

Being deficient in natural resources, Japan has had to develop a complex foreign trade. Principal imports consist of foodstuffs (wheat, rice, barley, soya beans, sugar, edible oils), cotton, wool, mineral oils, rubber, iron ore, coking coal, salt, wood pulp, hides, chemicals and machinery. Principal exports consist of cotton and rayon textiles, silk, heavy and light machinery, ships, steel, copper, canned goods, chemicals, pottery, tea, paper, bicycles, toys, sewing machines and cameras.

CAPITAL OF THE JAPANESE EMPIRE, Tokyo, formerly called Yedo, population Oct. 1, 1940, 6,778,804. Its population on May 1, 1953, was 6,330,146. The other chief cities had the following populations in 1950.

OTHER JAPANESE CITIES

Ψ Osaka, Honshū.....	1,956,136
Kyoto, Honshū, ancient capital.....	1,101,801
Ψ Nagoya, Honshū.....	1,030,635

JORDAN

(The Hashemite Kingdom of The Jordan)

King of the Jordan, Hussein, G.C.V.O., born May 2, 1935, succeeded on the deposition of his father, King Talal, Aug. 11, 1952, assumed constitutional powers, May 2, 1953, on coming of age.

Prime Minister and Minister of Defence, Fawzi al Mulki.

Minister for Foreign Affairs, Dr. Hussain al Khalidi, O.B.E.

EMBASSY IN LONDON

6 Upper Phillimore Gardens, W.8

[Western: 3685]

Ambassador (vacant).

Counsellor and Chargé d'Affaires, Medhet Jom'a.

3rd Secretary, Yacoub Tajj Farouki.

Military and Air Attaché, Capt. Saleh S. Shari.

Attaché, Mansour Sa'ad el Ali.

Area and Population.—The Hashemite Kingdom of the Jordan is made up of two areas: Western Jordan, which includes the districts of Hebron, Jerusalem and Nablus, and Eastern Jordan, which includes the districts of Ma'an, Kerak, Beiqa and Ajlun. The union of East and West Jordan was effected by a decision taken unanimously by both houses of the Legislature on April 24, 1950. The union was recognized a few days later by His Majesty's Government subject to certain reservations on the subject of Jerusalem. The Kingdom is bounded on the north by Syria, on the west by Israel, on the south by Saudi Arabia and on the east by Iraq. The majority of the population are Sunni Moslems and Islam is the religion of the state. The estimated population is 520,000 persons on the east bank, of whom about 120,000 are displaced Palestinians, and 730,000 persons on the west bank of whom about 330,000 are displaced Palestinians.

Government.—The Executive consists of a Council of eleven ministers and the legislature of a Council of Notables (20 persons nominated by the King) and a Council of Representatives, consisting of 40 elected members.

Production and Industry.—West Jordan is fertile, but severely eroded. East Jordan (the old Amirate of Transjordan), consists of a fertile mountainous area and the eastern half of the Jordan valley which are productive; the rest of the country is arid steppe.

Communications.—The Hejaz Railway runs (with the exception of the first few miles) through Jordan territory from Deraa to Ma'an. During the Second World War, 24 miles of line were laid from Ma'an to Ras Naqb; there are good roads to all the chief towns in the country.

KOREA

(Chosun.)

By a treaty of Aug. 23, 1910, Korea was annexed to Japan and became part of the Japanese Empire. It is situated between 122° and 128° E. long., and between 34° and 43° N. lat., and the coast is fringed with innumerable islands, of which the largest is Quelpart. The area of Chosun is 85,225 sq. miles with an estimated population, Dec. 31, 1946, of 19,369,000. The soil is fertile, but the arable land is limited by the mountainous nature of the country. The staple agricultural products are rice and other cereals, beans, cotton, tobacco and hemp. Given normal conditions, both fruit-growing and seri-culture would be capable of yielding good returns. Ginseng, a medicinal root much affected by the Chinese, is largely grown at Songdo (Kaijo) and forms a rich source of revenue. Gold, copper, coal, iron, graphite, tungsten and other minerals are distributed throughout the country. There are extensive forests in the extreme north. Normal trade relations with foreign countries were suspended during the war of 1939-45, but foreign business men have been permitted to return to South Korea since July 15, 1947. The principal exports before the war were rice, beans, silk, fish, fish-oil and manure, iron and iron ore, raw cotton, live-stock and hide. Before the war of 1939-45, some progress was being achieved in industries such as cotton-yarn, silk-reeling, sugar, paper, artificial fertilizers, cement and flour, but on the whole manufactures remained in a primitive condition.

Late in the fourteenth century the Emperor Li Tan, whose social reforms dominated Korea for five hundred years, changed the capital from Songdo to Seoul (Keijo), pop. est. 1,142,000; other centres are Ψ Pusan (Fusan) (400,000), Pyongyang (Heijo) (286,000), Taegu (Taiku) (269,000) and Ψ Inchon, formerly Chemulpo (Jinsen) (216,000).

U.S.A.—U.S.S.R. Occupation.—Korea was occupied by troops of the U.S.A. and the U.S.S.R. in 1945. The 38th parallel was fixed as the boundary between the two zones of occupation. The U.S. Government endeavoured to reach agreement with the Soviet Government for the creation of a Korean Government for the whole country and the withdrawal of all Russian and American troops. These efforts met with no success, and in September, 1947, the U.S. Government laid the whole question of the future of Korea before the General Assembly of the United Nations. The Assembly in November, 1947, resolved that elections should be held in Korea for a National Assembly under the supervision of a Temporary Commission formed for that purpose by the United Nations and that the National Assembly when elected should set up a Government. The Soviet Government refused to allow the Commission to visit the Russian Occupied Zone and in consequence it was only able to discharge its function in that part of Korea which lies to the south of the 38th parallel.

Republic of Korea.—A general election was held on May 10, 1948, and the first National Assembly met in Seoul on May 31. The Assembly passed a Constitution on July 12, and on July 20 elected Dr. Syngman Rhee as the first President of the Republic of Korea for four years. On August 15, 1948, the Republic was formally inaugurated and American Military Government came to an end. All U.S. troops were withdrawn by the end of June, 1949.

From the beginning of the occupation in September, 1945, up to July, 1949, the U.S. Government had spent over \$430 million in assistance to Korea.

The Republic of Korea has been officially recognized by the Governments of the United States, France, Great Britain, and most other countries except the U.S.S.R. and its satellites.

The budget for the financial year, 1950-51, was balanced at about 320 billion won (about 5,000 won = £1) and further E.C.A. help from the U.S.A. amounting to about \$100,000,000 has been promised. A general election was held on May 30, 1950, at which over 85 per cent. of the 8,000,000 enfranchised persons voted. The Republic of Korea has an army of 130,000 men, organized in 10 divisions, a small navy mainly for coast protection duties and a small air force.

Envoy Extraordinary and Minister Plenipotentiary of Republic of Korea in London, Hon. Myo Mook Lee (1951).

Peoples' Republic of Korea.—Meanwhile in the Russian-occupied zone north of the 38th parallel a Peoples' Republic had come into being with its Capital at Pyongyang and a Supreme Peoples' Soviet had been elected. Recognition has been given by the U.S.S.R., Mongolia, Poland, Czechoslovakia, Yugoslavia and Hungary. The flag of this Republic has two hammers crossed on two sickles. In January, 1949, the Soviet Government announced that all Russian troops had been withdrawn from Korea by the end of December, 1948.

In December, 1948, the General Assembly of the United Nations appointed a second Commission to visit Korea to endeavour to facilitate the re-unification of the country. The Commission

arrived in Seoul in February, 1949, and continued its work throughout the summer. Later in the year the General Assembly resolved that the Commission should continue its work for another year. Meanwhile the country remained effectively divided into two along the line of the 38th parallel, until the aggression of June 25, 1950, when the North Korean forces invaded South Korea. On the same day, at an emergency meeting of the United Nations Security Council, a resolution was adopted, calling for immediate cessation of hostilities, and the withdrawal of the North Korean armed forces to the 38th parallel, requesting the U.N. Korean Commission to keep the Security Council informed on the implementation of the resolution, and calling on all member states to render every assistance to the United Nations in the execution of his resolution, and to refrain from giving assistance to the North Korean authorities. On Sept. 4 the Commission officially reported that North Korea was responsible for the war. For the progress of the war in Korea, see "Events of the Year."

BRITISH LEGATION

Seoul (temporarily at Pusan)

Minister, Walter Gerald Cloete Graham, C.B.E. (1952).

1st Secretary and Consul, A. H. Birch.

Military Attaché, Major R. W. B. Cunningham.

Air Attaché, Group-Capt. S. S. Murray, O.B.E.

Economic Attaché, L. A. L. Humphreys, O.B.E.

2nd Secretary, D. H. Bolam.

LEBANON

President of the Republic of Lebanon, Camille Chamoun, elected Sept. 23, 1952.

CABINET

(Aug. 17, 1953)

Prime Minister, Interior, Defence and Information, Abdullah Yafi.

Foreign Affairs, Dr. Alfred Naccache.

Agriculture and Health, Kazem Khalil.

Education, Nicholas Salem.

Finance, Pierre Eddé.

Public Works, Gabriel Elmur.

Economic and Social Affairs, Rachid Kerame.

Justice and Posts and Telegraphs, Bashir Elawar.

EMBASSY IN LONDON

(21 Kensington Palace Gardens, W.8)

[Bayswater: 7265]

Ambassador, His Excellency Dr. Victor Khouri (1952).

Counsellor, M. Najati Kabbani.

1st Secretary, M. Souheil Freijy.

The republic of the Lebanon is in the Levant, covering a portion of the former Ottoman Empire taken from the Turks by British forces (with a small French detachment and some Arab forces under the Emir Faisal and Colonel Lawrence) in 1918, but following the Anglo-French Convention of September, 1919, Great Britain withdrew in favour of France, to whom a Mandate was granted by the Supreme Council of Allied Powers in 1920. The French authorities granted a Constitution and the first President of the Republic (under the Mandate) was elected in 1926.

In 1941 hostilities broke out between the French troops in Syria and Lebanon and the Allied Forces in the Middle East, the latter having been directed to prevent further Nazi penetration into French Mandated Territory. Hostilities ceased on July 11, 1941, and the French High Command agreed to remove the garrison.

In accordance with the undertaking given by the British and Free French Forces, Syria and Lebanon

were declared to be independent and separate States. In 1943 the amended Constitution came into force and the first President of the independent Lebanon Republic was elected.

Under an agreement signed by General Catroux (on behalf of the French Committee of National Liberation) and by representatives of Syria and Lebanon "all powers and capacities exercised hitherto by the French under mandate" were transferred to the Syrian and Lebanese governments as from Jan. 1, 1944.

Lebanon forms a strip, about 120 miles in length and varying in width from 30 to 35 miles, along the Mediterranean littoral, and extending from the Palestine frontier on the south to the Nahr al Kebir (15 miles north of Tripoli) on the north; its eastern boundary runs down the Anti-Lebanon range and then down the Great Central depression, the *Begaa*, in which flow the rivers Orontes and Litani. It is divided into 5 districts, North Lebanon, Mount Lebanon, Beirut, South Lebanon and Beqaa. The seaward slopes of the mountains have a Mediterranean climate and vegetation. The inland range of Anti-Lebanon has the characteristics of steppe country. There is a mixed Arabic-speaking population of Christians, Moslems and Druses.

Area and Population.—The total area of Lebanon is about 4,300 sq. miles, the population being estimated at 1,300,000 in 1951.

Production.—Fruits are the most important products and include olives, citrus fruit and apples. Tobacco, silk and cotton are also produced. There is little remaining of the famous cedars of Lebanon.

Railways.—A narrow-gauge railway runs from Beirut to Damascus, connecting at Rayak with the standard-gauge line which runs from Tripoli through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotchek. A standard gauge railway also runs up the coast from Nakoura on the Palestine border, through Beirut to Tripoli, but the Beirut-Nakoura sector is not in use at present.

Roads.—All the principal towns in the country are connected by roads, for the most part very good.

Rivers.—The Orontes flows northwards from the Lebanon range across the northern boundary to Antioch; the Litani flows southwards from Lebanon, turns westwards round the southern extremity of the range and flows into the Mediterranean.

Archæology, etc.—Lebanon has some important historical remains. Baalbek (Heliopolis), contains the ruins of I-III century Roman temples (the Circular Temple, the Great Temple, and the Temple of Bacchus) and nearby is the largest cut stone in the world (60 by 17 by 14 ft.), weighing 1,500 tons.

Language and Literature.—Arabic is the principal language (see Arabia), and French is also widely used, 42 daily newspapers (34 in Arabic, 4 in French, 1 in English and 3 in Armenian) and numerous weekly and monthly journals are published in Beirut.

Education.—There are a French (R.C.) University, an American (undenominational) University and a Lebanese National University (which is chiefly a teachers' training college) in Beirut; there are several other higher educational institutions including an agricultural college in the Bekaa.

CHIEF TOWNS.— Ψ Beirut (population about 450,000) is the capital of the Lebanon. Ψ Tripoli (100,000), Ψ Sidon (25,000), Ψ Tyre (20,000) are other towns of importance.

FINANCE

Receipts and Expenditure, 1952 (Estimated), £L94,250,000.

Currency. The monetary unit is the Lebanese £(L); official rate £1=£L6.13. There is also an officially recognized free market in foreign currencies, which is used for nearly all commercial transactions. The free market rate for sterling varies in turn £L 9 and £L 10=£1.

TRADE

Principal imports: Gold and precious metals, cereals, cotton and woollen textiles, artificial and cotton yarns, iron and steel goods, petrol, oils, wood, pharmaceuticals, raw hides, sugar, motor-vehicles, live-stock.

Principal exports: Gold and precious metals, citrus fruits, wool, onions, cotton, textiles, apples and pears, scrap metal, vegetables, hides and skins, soap and butter.

There is also a considerable transit trade through Beirut, mainly in gold and crude oil. Lebanon is the terminal for two oil pipe lines, one, belonging to the Iraq Petroleum Company, debouching at Tripoli, the other, belonging to the Trans-Arabian Pipeline Company, at Sidon. There is a small petroleum refinery at Tripoli producing about two-thirds of the needs of Lebanon and Syria.

LEBANESE FLAG.—Red, white and red with a green cedar of Lebanon in the centre of the white band.

BRITISH EMBASSY

Beirut

British Ambassador, His Excellency Sir Edwin Arthur Chapman-Andrews, K.C.M.G., O.B.E. (1952)

£6,800

1st Secretaries, E. J. W. Barnes; D. U. Jackson (Consul and Commercial Secretary); F. Stallwood; G. R. Gauntlett (Information); M. Arab, M.B.E.

2nd Secretaries, J. L. Taylor; F. S. Fielding; W. F. H. Roblou (Vice-Consul).

Military Attaché, Lt.-Col. J. du M. Kenyon.

The British Embassy also houses the Development and Information Divisions of the British Middle East Office headed respectively by W. F. Crawford, C.M.G., O.B.E. (Counsellor) and L. C. Glass (Counsellor).

BRITISH COUNCIL.—Representative of the British Council in Lebanon, T. W. Morray, M.B.E., Beit Kurani, Sh. Ma'mari, Beirut.

LIBERIA

(Republic of Liberia)

President, Hon. William V. S. Tubman, elected May 6, 1943; installed Jan. 1, 1944; re-elected May 1, 1951, for period till Dec. 31, 1955.

Vice-President, William R. Tolbert.

Secretary of State, G. L. Dennis.

Treasury, William E. Dennis.

Attorney-General, C. Abayomi Cassell.

Postmaster-General, McKinley A. Deshield.

War, Ernest C. B. Jones.

Education, Ernest J. Yancy.

Interior, Harrison Grigsby.

Public Utilities, Henry B. Duncan.

Agriculture and Commerce, John W. Cooper.

EMBASSY IN LONDON

[Kensington: 9405]

Ambassador Extraordinary and Plenipotentiary, His Excellency Henry Ford Cooper.

Consul-General, S. Edward Peal, 13 New Burlington Street, W.1.

her former agreements with Luxemburg in respect of the customs union, etc., and in 1922 a tariff union was made with Belgium. The Grand Duchy was again invaded and occupied by Germany on May 10, 1940. The constitution of the Grand Duchy was modified on April 28, 1948, and the stipulation of permanent neutrality was then abandoned. Luxemburg is now a fully effective member of the Western association of powers and a signatory of the Brussels and North Atlantic Treaties. She is also a member of the European Coal and Steel Community, the High Authority and Court of which have their seat in Luxemburg.

The area is 1,000 square miles; the population (Dec. 31, 1950) 296,000, nearly all Roman Catholics. There is a Chamber of 52 Deputies, elected by universal adult suffrage for 6 years, one-half renewable every 3 years. Legislation is submitted to the Council of State. The Grand Duchy is rich in iron-ore and possesses an important iron and steel industry. The revenue for 1952 was estimated at *Francs* 3,783,177,000, expenditure *Francs* 4,158,783,000. The Luxemburg franc has at present the same value as the Belgian franc and the latter is legal tender in the Grand Duchy, but the reverse does not apply. There are approximately 340 miles of railway. The capital, Luxemburg, pop. (1951) 63,951, is a dismantled fortress. The country is well wooded, with many deer and wild boar. The language is Letzeburgesch, but French is the official language.

FLAG: Red, white, blue in horizontal bands.

EMBASSY IN LONDON

48 Belgrave Square, S.W.1

[Sloane: 4037]

Ambassador in London, His Excellency Señor Lic Francisco A. de Icaza (1952).

Minister-Counsellor and Acting Consul-General, Señor Don Gustavo Luders de Negri.

3rd Secretaries, Señor Don Enrique Llano; Señor Don Arturo López Ortigosa.

Commercial Counsellor, Señor Don Francisco Quijano.

Area and Population.—Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 15° to 32° 30' N. lat. and 87° to 117° W. long., and comprising one of the most varied zones in the world. It comprises 29 states, 2 territories, and the federal district of Mexico, making in all 32 political divisions, covering an area of 758,000 square miles, with a population (1953 estimate) of 27,262,421.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing Isthmus of Tehuantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of Lower California, with a mountainous surface, separated from the mainland by the Gulf of Lower California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltepetl ("El Pico de Orizaba") on the east. In February, 1943, a new volcano (*El Parícutin*) was in eruption about 250 miles from Mexico City and 20 miles from the town of Uruapan and is still active. The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 feet), the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 6,000 feet), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 6,000 feet). The only considerable rivers are the *Rio Grande del Norte*, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Rio Grande de Santiago*, the *Rio Balsas* and *Rio Papaloapan*. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas." The largest fresh-water lakes are *Chapala* (70 miles long and 20 miles wide), and *Pátzcuaro*. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude, the rainy season lasting from June to October.

Government.—The Toltec invaders of Mexico gave place in the 13th century to the *Aztecs*, who were conquered in the 16th century by Spanish adventurers under *Hernán Cortés*, whose remains have been definitely located in the Temple of Jesus, Mexico City. They are contained in a marble vault, with the funeral garments.

Spanish rule was established at Tenochtitlan, a 14th century Aztec city (now Mexico City), and Mexico remained a Spanish dominion until its freedom was asserted by a revolutionary war, 1810-1821. In 1820 a Republic was proclaimed, but Iturbide declared himself Emperor in 1821. He was shot in 1824, and a Republic was again established. From 1837-1848 the province of Texas gave rise to hostilities with the United States, terminating in a three years' war and a cession of the disputed territory to the victorious northern States. In 1862 the French troops came to Mexico, and in 1864 an Empire under Ferdinand Maximilian of Austria was declared. In 1867 the downfall of the Empire and the execution of the Emperor gave rise to the new Republic, which has endured to the present day. The most prominent of modern Presidents was Porfirio Díaz who ruled (except during 1880-4) from 1876 to May 25, 1911. Following upon the revolution which brought about his

fall there was much internal disturbance, but the political situation has been stable for many years. Presidents are now elected for six years only. There is no re-election.

Under the Constitution of Feb. 5, 1917 (subsequently amended in detail) Congress consists of a Senate of 58 members, elected for 6 years, and of a Chamber of Deputies at present numbering 145 elected for 3 years.

Archaeological Remains.—Mexico is rich in archaeological remains, and work is proceeding in every district to remove the earth covering which for many centuries has kept them from view. Near the City of Mexico at Teotihuacán are a number of pyramids built to a great extent with boulders from the river beds. The *Pyramid of the Sun* (now called "Tonatiuh") is 761 feet from N. to S., and 725 feet from E. to W., and rises to a height of 216 feet. The *Pyramid of the Moon* (now called "Mextli") is 426 feet by 511 feet, and rises to 180 feet. The staircases vary in construction between terrace and terrace and are found to be intact. Other places of interest are near Oaxaca, Papantla, Zempoala, and Uxmal, Chichen-Itza and other points on the E. side of Yucatan.

Communications.—Veracruz, Tampico, Progreso, and Coatzacoalcas (Puerto Mexico) are the chief ports on the Atlantic, and Mazatlán, Guaymas, Acapulco, Manzanillo and Salina Cruz on the Pacific. Registered merchant marine amounted at the end of 1951 to 272,000 tons. There were 23,382 kilometres of railway track open in Mexico in 1952. Work is proceeding on the reorganization, rehabilitation and re-equipment of the systems, notably the National Railways of Mexico, and railway communications in the East and South-East of the Republic are in process of development. Various loans from the United States have recently enabled the railways to buy certain quantities of rails, diesel locomotives, shop equipment and spare parts. The South-Eastern Railway, providing the first land communication between the peninsula of Yucatan and the rest of Mexico, was opened in 1950. Early in 1952 the Government bought the U.S.-owned Southern Pacific Railway of Mexico.

The total length of paved road under federal maintenance at the end of 1952 was 19,557 kms. In addition there were some 30,605 kms. of roads unpaved or under construction. The Pan-American Highway, providing through communication from the U.S. border at Ciudad Juarez to the Guatemalan border, was opened in May, 1950. Other main routes which it is planned to complete during the term of office of the present Government are Ciudad Juarez-Mexico, Mexico-El Ocatil (to be continued to Guatemala City), Guadalajara-Nogales, Veracruz-Puerto Mexico, Guadalajara-Manzanillo, Tampico-Tuxpan, Salina Cruz-Puerto Mexico, Chetumal-Escarce-Campeche-Mérida-Puerto Juarez, and Durango-Mazatlán.

The National telegraph system's lines were 429,053 kms. in length in 1951. International telegraph services to the U.S. border are provided by the nationalized Mexican Telegraph Company, and thence through the U.S. to Canada and Europe. Telephone communications with Canada and Europe are similarly effected through the United States. There is an extensive internal network of air services, its routes measuring over 86,500 kms. The principal international air services are Mexico-New York *via* San Antonio and Dallas; Mexico-Los Angeles; Mexico-Chicago *via* Monterrey, San Antonio and Dallas; Mexico-Havana *via* Veracruz

or Mérida; and Mexico-Guatemala City with connexions to Central American countries.

Production.—The total acreage of arable land is estimated at 60,000,000 acres, though only some 25,000,000 acres are considered arable without artificial irrigation. Approximately 13,000,000 acres are under cultivation. Grazing land is estimated at 80,000,000 acres and about 50,000,000 acres are under forest. The principal agricultural crops are maize, beans, wheat, barley, Chile-pepper, sugar, coffee, cotton, tobacco, chick peas, rice, vanilla and all kinds of tropical fruit. The maguey, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal-hemp (henequen). About half the world's supply of henequen comes from the province of Yucatan. The forests abound in mahogany, rosewood, ebony, and caoutchouc trees.

The live-stock in 1945 was estimated at 12,000,000 cattle, 4,800,000 sheep and 7,000,000 goats. In 1943 horses were estimated at 2,000,000, mules 750,000, asses 2,000,000 and swine at 4,000,000. An outbreak of foot-and-mouth disease late in 1946, led to the closing to cattle of the Northern border, over which some 500,000 head per year had previously been exported. A mixed Mexican-U.S. Commission, set up to combat the disease by a process of inoculation, reported in March, 1952, that its work had been successful, and live cattle exports were resumed, but further outbreaks occurred in May and June, 1953, and the U.S. border was again closed.

The principal industry (apart from agriculture) is mining. The mineral wealth is very great; silver and gold, copper, lead, zinc, and quick-silver, iron and petroleum are the leading products.

PRINCIPAL MINERALS

In 1938, the Government expropriated the properties of the principal foreign oil companies operating in Mexico. The oil industry is now being operated by a Government organization called *Petrleos Mexicanos*, the board of which consists of five representatives of the Government and four of the petroleum workers.

On April 18, 1942, Mexico agreed with U.S. Government as to the amount of indemnity to be paid for U.S. oil companies which had not already reached agreement with the Mexican Government, and payment of this indemnity was completed in 1946. On Sept. 1, 1947, it was announced that the Mexican Government would pay \$81,250,000 in compensation to the shareholders, predominantly

An independent Negro Republic of Western Africa, occupying that part of the coast between Sierra Leone and the Ivory Coast, which is between the rivers Mano in the N.W. and Cavalla in the S.E., a distance of about 350 miles, with an area of about 43,000 square miles, and extending to the interior to latitude 8° 50', a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognized since 1847 as an independent State. The population is estimated at 2,500,000.

The executive power is vested in a President elected for 8 years, assisted by a ministry; there are two houses of Legislature, the Senate, with 10 members elected for six years, and the House of Representatives with 24 members elected for four years. There is no regular army, but there is an enlisted frontier force of about 750 men. In 1927 arrangements were made with the Finance Corporation of America for a loan of \$5,000,000 dollars, of which one-half has been issued. The previous 1912 loan, in which British financial interests preponderated, was paid off from the proceeds of the new loan, which is secured by a first lien on all Government revenues in excess of \$525,000. The Loan Agreement also provides for financial supervision by American officials and additional experts to be employed by the Liberian Government. The new artificial harbour and free port of Monrovia was opened on July 26, 1948. There are 9 ports of entry, including 3 river ports. In 1952, 442 vessels entered Liberian ports, handling 107,367 tons of cargo.

Liberia is to receive assistance under President Truman's Point Four Programme and technicians are being sent from U.S.A. to carry out various projects. A loan of \$5,000,000 has been negotiated with the Import-Export Bank to finance road construction. UNESCO has sent a team of teachers to start scientific education at Liberia College.

LIBYAN LEGATION IN LONDON

17 South Street, W.1.

Minister, Essayed Mansour Gaddara (1953).

Libya, on the Mediterranean coast of Africa, is bounded on the East by Egypt and the Anglo-Egyptian Sudan, on the South by French Equatorial and French West Africa, and on the West by Algeria and Tunisia. It consists of the three provinces of Tripolitania, Cyrenaica and the Fezzan, with a combined area of approximately 820,000 square miles and a population estimated (1951) at 1,150,000. The people of Libya are principally Arab with some Berbers in the West and African negroes in the Fezzan, and there is a considerable Italian minority in Tripolitania. Islam is the official religion of Libya, but all religions are tolerated. The official language is Arabic.

Vast sand and rock deserts, almost completely barren, occupy the greater part of Libya. The Southern part of the country lies within the Sahara Desert. There are no rivers and, as rainfall is precarious, a good harvest is infrequent. Agriculture is confined mainly to the coastal areas of Tripolitania and Cyrenaica, where barley, wheat, olives, almonds, citrus fruits and dates are produced, and to the areas of the oases, many of which are well supplied with springs supporting small fertile areas. Among the important oases are Gadames, Jofra, Sebha, Gat, Jalo, Bir Hakim and the Kufra group in the South-East. Exports from Libya include wool, cattle, sheep and horses, esparto grass, olive oil, sponges and hides and skins. Principal imports are foodstuffs, including sugar, tea and coffee and most constructional materials and consumer goods.

The ancient ruins in Cyrenaica, at Cyrene, Ptolemais and Apollonia, are interesting to archaeologists, as are those at Leptis Magna near Homs, 70 miles from Tripoli and at Sabratha, 40 miles west of Tripoli.

Communications in Libya are good in the coastal area, where a motor road runs from the Tunisian frontier through Tripoli to Benghazi, Tobruk and the Egyptian border, serving the needs of the main population centres. Elsewhere roads

are poor and the transport inland is confined to caravan and occasional motor bus routes. Small railway systems exist in the Tripoli and Benghazi areas. There are airports near Tripoli (Idriss el Awal) and Benghazi (Benina) regularly used by commercial airlines, and at El Adem (near Tobruk).

Government.—Libya was occupied by Italy in 1911-12 in the course of the Italo-Turkish War, and under the Treaty of Ouchy (Oct., 1912) the sovereignty of the province was transferred by Turkey to Italy. In 1939 the four Provinces of Libya (Tripoli, Misurata, Benghazi and Derna) were incorporated in the national territory of Italy as *Libia Italiana*. After the Second World War Tripolitania and Cyrenaica were placed provisionally under British and the Fezzan under French administration, and in conformity with a resolution of the General Assembly on Nov. 27, 1949, Libya became on Dec. 24, 1951, the first independent state to be created by the United Nations.

Libya has a federal form of government and an hereditary monarchy. Government is by a two-chamber parliament. The Senate of 24 members, equally divided between the three Provinces, is nominated half by the King and half by the three Provincial Legislative Councils. The first Senate was wholly nominated by the King, but in future half the members are to be nominated every four years. The House of Representatives is an elected body at present consisting of 55 members, 35 from Tripolitania, 15 from Cyrenaica and 5 from the Fezzan. Members are elected on a basis of one for every 20,000 inhabitants and elections of all members are to be held every four years. Legislation may be initiated by the King, the Senate or the House of Representatives, except laws concerning the Budget or taxation, which may not be introduced by the Senate.

The three Provinces of Tripolitania, Cyrenaica and the Fezzan are each administered by a Governor assisted by an Executive and a Legislative Council.

Currency.—Libya entered the Sterling Area on January 3, 1952, and a new currency was introduced on March 24, 1952. The £ Libyan is equal to the £ Sterling and is divided into 100 piastres and 1,000 millîmes. There are seven denominations of notes (£10, 5, 1, ½, and ¼, 10 piastres and 1 piastres) and five denominations of coins (2 and 5 piastres, 5, 2 and 1 millîmes).

Grants have been made by the United Kingdom, France, Italy and the United States to foster Libya's economic development and technical assistance is being provided by the United Nations and the United States.

A treaty of alliance and friendship between the United Kingdom and Libya, together with military and financial agreements, was signed at Benghazi on July 30, 1953. The United Kingdom will provide financial aid to Libya for 20 years, paying her in each of the first five years £1,000,000 for economic development and £2,750,000 to assist the Libyan budget. Libya will make military facilities available to British troops (including the R.A.F.) which will be stationed in Libya under certain conditions.

CAPITAL. Tripoli and Benghazi are the joint capitals of Libya.

The principal towns with the latest available estimates of populations are Tripoli (142,000); Misurata (63,000); Benghazi (60,000); Homs-Cussabat (56,000); Derna (16,000); Barce (16,000); Tobruk (3,000); Sebha (1,000).

FLAG. The Libyan National flag is a tricolour of red, black and green horizontal stripes, bearing a white crescent and star in the centre.

BRITISH LEGATION IN LIBYA

Envoy Extraordinary and Minister Plenipotentiary. His Excellency Sir Alec Kirkbride, K.C.M.G., O.B.E., M.C. (1951).

Counsellor and Consul-General (Benghazi), T. C. Ravensdale, C.M.G.

1st Secretary (Tripoli), R. A. Clinton-Thomas.

Counsellor (Economics), C. J. Pyke, C.M.G.

There are British Consular Offices at Benghazi and Tripoli.

LIECHTENSTEIN

(Fürstentum Liechtenstein)

Prince, Franz Josef II., b. Aug. 16, 1906; *suc.* Aug. 25, 1938; *married* March 7, 1943, Countess Gina von Wilczek.

A Principality on the Upper Rhine, between Vorarlberg (Austria) and Switzerland; area 59.61 square miles, pop. (1950) 13,757. The main industries are machines and tools, cotton spinning and weaving, calculating machines, pottery, artificial sausage casings and artificial teeth, various apparatus and other textiles, and the chief products are potatoes, maize, cereals, vegetables, fruit and cattle. Revenue (1952) 4,419,686 Swiss francs; Expenditure 3,346,475 Swiss francs.

The language of the Principality is German.

FLAG: Blue and Red (blue at the top, red at the bottom, with a gold crown in the blue part).

CAPITAL, Vaduz. Pop. (1950) 2,735.

British Consul-General, C. H. A. Marriott, C.B.E. (1949) (resides at Zürich, Switzerland).

LUXEMBURG

(Grand-Duché de Luxembourg)

Grand Duchess, H.R.H. Charlotte, G.C.V.O., born Jan. 23, 1896, *succeeded* (on the abdication of her sister) Jan. 9, 1919; *married,* Nov. 6, 1919, Prince Felix of Bourbon-Parma (H.R.H. the Prince of Luxembourg, K.B.E.). *Heir Apparent,* The Hereditary Grand Duke (Prince Jean), born Jan. 5, 1921, *married,* April 9, 1953, Princess Joséphine-Charlotte of Belgium.

Prime Minister, Minister of Finance and Minister of Agriculture, M. Pierre Dupong.

Foreign Affairs, Foreign Trade and Armed Forces, M. Joseph Bech.

Justice, Transport and Public Works, M. Victor Bodson.

Education and Interior, M. Pierre Frieden.

Economic Affairs, M. Michel Rasquin.

Labour and Social Security, M. Nicolas Biever.

LEGATION IN LONDON

27 Wilton Crescent, S.W.1.

[Sloane: 6231]

Envoy Extraordinary and Minister Plenipotentiary and Consul-General in London, Monsieur André J. Clasen (1944).

Secretary, M. Camille W. Dumont.

A Grand Duchy in Western Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815-66, and was included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, Nov. 23, 1890, it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the beginning of the war in 1914, but was liberated in 1918. By the Treaty of Versailles, 1919, Germany renounced

British, of the Mexican Eagle Oil Co., Ltd., with 3 per cent. interest from Mar. 18, 1938, to Sept. 18, 1948. Four annual indemnification payments of \$8,600,000 were made in September, 1948, 1949, 1950 and 1951.

Woollen and cotton spinning and weaving, the making of footwear, and other branches of industry, are encouraged by high protective duties.

Defence.—The Army has a strength of one Infantry Division, one mechanized brigade, the Presidential Guard and 48 regular infantry battalions, 20 regiments of cavalry and a small number of artillery and engineers. The Navy has some 38 ships of all kinds, and the Air Force some 210 aircraft.

Language and Literature.—Spanish is the official language of Mexico and is spoken by about 90 per cent. of the population. About 2,500,000 inhabitants speak Indian languages; but half of these speak Spanish as well. Of those speaking indigenous languages only, about 30 per cent. speak Nahuatl, 9 per cent. Maya, 8 per cent. Zapotec, 7 per cent. Otomi and 10 per cent. Mixtec, the remainder speaking other varieties of the minor linguistic families. The National Library at the capital contains about 500,000 volumes. The Press of Mexico is in a flourishing condition with many daily newspapers in the capital and in other urban centres. The first printing press and the first regularly issued newspaper in the New World were established by the Spaniards in Mexico City.

Education.—Education is divided into primary, secondary and university. Primary education is free, secular and nominally compulsory. In 1943 there were over 15,000 primary schools with 1,400,000 pupils, and about 200 secondary schools with 30,000 pupils, and 30 technical and commercial colleges. The National University of Mexico was founded in 1533 and re-organized in 1910. There are 9 other Universities, including one exclusively for women. The prevailing religion is Roman Catholic. According to the 1940 census approximately 60 per cent. of the population above 10 years old were illiterate. Since then, Mexico has instituted an intensive literary campaign which has become a model for U.N.E.S.C.O. and future figures are expected to show a considerable improvement.

FINANCE

	1953
Estimated revenue (Budget)...	Pesos 4,200,000,000
" expenditure (do.)...	" 4,158,100,000
Bonded Internal Debt	" 2,117,460,000
Debts of Mexican States	" 13,721,000
External Debt	" 675,700,000
Total Consolidated Public Debt.....	Pesos 2,806,881,000

As from June 17, 1949, by agreement with the International Monetary Fund, the Rate of Exchange has been fixed at 8.65 pesos = 1 \$U.S. (See also p. 83.)

TRADE

	1952
Total Imports	Pesos 6,394,200,000
Total Exports	" 5,125,800,000
Imports from U.K.	£166,300,000
Exports to U.K.	£99,300,000

The imports (mainly from U.S.A.) consist largely of machinery and implements for industry, mining and agriculture, and raw materials for the woollen, rayon and rubber industries. Principal exports are lead, silver, gold, copper, zinc, antimony and other metals, crude oil and petroleum products, fish, shrimps, coffee, tomatoes, chickpeas, bananas,

linseed, sugar, molasses, timber, raw cotton and sisal (henequen).

CAPITAL, Mexico City, Population (1950) 2,942,594.
Other towns are Guadalajara (382,710), Monterrey (340,625), Puebla (229,976) Ψ Mérida (159,405), Leon (157,379), Ψ Tampico (99,441), Aguascalientes (117,000), San Luis Potosí (156,850), Torreon (142,201), Ψ Veracruz (123,000), Chihuahua (110,779), Culiacán (144,500).

FLAG: Three vertical bands, green, white, red, with shield of Mexico in centre.

CENTRAL BRITISH CHAMBER OF COMMERCE San Juan de Letran 21 (Oficina 713), Mexico, D.F. Manager, M. Field.

Transit from London to Mexico City:—By sea, U.K.—New York, 5 to 10 days; New York—Mexico City, by rail, 3 days. By air, 10½ hours. There is a direct freight service from Liverpool to Vera Cruz.

MONACO

(Principauté de Monaco)

Sovereign Prince, H.S.H. Rainier III—Louis-Henri-Maxence Bertrand, born May 31, 1923, succeeded his grandfather (H.S.H. Prince Louis), May 9, 1949.

Mother, The Hereditary Princess Charlotte Louise Juliette (Duchesse de Valentinois), born Sept. 30, 1898; mar. March 19, 1920, Prince Pierre de Monaco (Count de Polignac), and has issue a daughter, Princess Antoinette, born Dec. 28, 1920, and a son, the Sovereign Prince.

Minister of State, M. Voizard.

Secretary of State and Director of Prince's Household, M. A. Crovetto.

CONSULATE-GENERAL IN LONDON

18 Austin Friars, E.C.2

[London Wall: 1774]

Consul-General, R. Le Mesurier.

Consul (vacant).

Chancellor, F. W. Bates.

A miniature Principality on the Mediterranean, with land frontiers joining France at every point, and consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the famous casino. The Principality comprises a narrow strip of country about a miles long and half-a-mile

broad (area approx. 360 acres), with (1950) about 20,000 inhabitants, and a yearly average of over 65,000 visitors. The whole available ground is built over, so that there is no cultivation, though there are many public and private gardens. Monaco has a small harbour (20 ft. alongside quay), and the import duties are the same as in France. There is an Assembly of 18 elected members and a Council of Government of the Minister of State and three State Counsellors. There is a local police force of 161 men.

CAPITAL, Monaco.

FLAG: Red and white.

BRITISH CONSULAR OFFICES

Monaco—Consul-General, Nigel O. W. Steward (1952).

MONGOLIA

(Mongolian People's Republic)

Prime Minister, Tse Den-bal (May, 1952).

Area and Population.—Mongolia is an almost entirely unsurveyed tract in Asia, bounded by the Siberian provinces of U.S.S.R. in the north, the Chinese province of Sinkiang and the Great Wall of China in the south, by Manchuria on the east and by the Tarbagatai Mountains and the Turkestan provinces of U.S.S.R. on the west.

The total area is estimated at 1,750,000 to 2,000,000 square miles with a total population (not yet enumerated) of 3,000,000 to 5,000,000, of whom the greater number are traditionally adherents of Lamaism, a form of Buddhism.

North-West Mongolia consists of an elevated plateau bounded by the Russian Altai range (N.W.), the Sayans (N.E.), the Kentei (S.E.), and the Ektagh Altai (S.W.). The plateau contains many lakes and is watered by numerous rivers, among which are the headwaters of the Yenisei, the Irtysh and the Selenga. Agriculture is almost unknown, but excellent pasture provides grazing grounds for numerous cattle and sheep, and particularly for transport animals (camels and oxen). The exports are wool, hides, skins, and gold.

The principal town of North-Western Mongolia is Ulan Bator (Ulan-Bator-Khoto, "Town of the Red Knight") which has an estimated population of 80,000 to 100,000; other centres are Uliassutai, and Kobdo, of importance as trading posts on the main caravan routes. Part of North-Western Mongolia has been incorporated in the Soviet Union as the *Tannu Tuva* autonomous Province which lies between the Sayan and Tannu Ola ranges, the capital being Kyzyl.

South-East and South Mongolia include the Gobi ("Desert"), or *Sha-mo* ("Sand Desert"), which covers nearly one-third of the total area, and in the extreme south-east the *Ordos* Desert, bounded on the south by the Great Wall of China, and encircled on the north by part of the main stream of the Hwangho river. Agriculture is carried on wherever Chinese influence has been exerted, but is mainly confined to the south-eastern borders. The principal industry (as in North-West Mongolia) is sheep and cattle raising and the breeding of camels, oxen and horses for transport, in order to supply the caravan routes from China to Siberia. The centres of population depend mainly upon the overland commerce of China and Eastern Russia across the Gobi. Of recent years this trade has been organized and financed by Soviet Russia. The principal centres are: Kalgan, Kukukhoto, Kuku-erghi, Dolon-Nor

and Birukhoto. In the north-east, Keru-lun (on the river of that name), is a junction of the southern routes from the Chinese province of Perchill and the western routes from Urga, in N.W. Mongolia.

Government.—In 1915 Mongolia threw off its allegiance to China, and by the Treaty of Kiakhta was recognized as an Autonomous Republic. Negotiations with Russia, after the 1917 revolution, led to an alliance, and by Treaty (May 31, 1924) the U.S.S.R. acknowledged the suzerainty of China over Outer Mongolia, but by the Russo-Chinese Treaty of Aug. 25, 1945, China recognized the complete independence of Outer Mongolia.

MOROCCO

(El Maghreb el aksa—"The Farthest West")

French Protectorate, and Spanish and International Tangier Zones

Sultan, Mohammed ben Moulay Arafa; proclaimed Aug. 20, 1953.

Morocco, one of the Barbary States, is situated in the north-west of the African Continent, between 28°-36° N. latitude and 1°-11° 40' W. longitude, with an area estimated at 173,150 square miles, and a population of about 9,000,000. Morocco is traversed from the Atlantic coast in the south-west to the Algerian frontier in the north-east by five parallel ranges, known generally as the *Atlas Mountains*. Between the various ranges lie well-watered and fertile plains, the lower slopes of the northern flanks of the mountains being well wooded, while the southern slopes are exposed to the dry winds of the desert and are generally arid and desolate. The most northerly point of Morocco is the peninsula of Ceuta, which is separated from the Continent of Europe by the narrow strait of Gibraltar. The Jebel Musa (also known as Ape's Hill) dominates the promontory, and with the rocky eminence of Gibraltar was known to the ancients as *The Pillars of Hercules*, the western gateway of the Mediterranean. Between 32° N. and 30° N. is the headland Ghr, which encloses a bay containing the port of Agadir, formerly known as the "Gate of the Sudan."

The climate of Morocco is generally good and healthy, especially on the Atlantic coast, the country being sheltered by the Atlas Mountains from the hot winds of the Sahara. The extremes of temperature in Tangier and Mogador are 92° Fahrenheit in the summer and 37° in the winter, with a rainy season from November to April, but the summer-heat figures at all the intervening ports (Larache, Port Lyautey-Mehedia, Rabat-Sale, Fedala, Casablanca, Mazagan, and Safi) are markedly higher; the last-named port being the hottest. The Mediterranean coast is drier and less temperate, but not unhealthy, while the plains of the interior are intensely hot in summer.

Government.—Morocco is divided into three zones—the French Zone, the Spanish Zone, and the International Zone of Tangier. Until her collapse in the War of 1939-45, France was the paramount power, and represented the Sultan of Morocco in all foreign relationships. She regained her position in 1945. Spain has had relations with Morocco for many centuries. The northern portion of Morocco, as defined in the Franco-Spanish Treaty of 1912, forms a Spanish "sphere of influence" which extends over a strip of Northern Morocco, with the exception of the International Zone round Tangier; and is under the Sultan's Khalifa and a Spanish High Commissioner and Commander-in-Chief. In this sphere occurred the joint

Franco-Spanish military operations against Abd el Kerim the Rif leader, which culminated in the surrender of Abd el Kerim in May, 1926, and the final pacification of the French and Spanish zones in the following year. Ceuta and Melilla are (Spanish) "State Territories" and both are "free" ports. *Ceuta* (on the Mediterranean coast, opposite Gibraltar), in 35° 54' N. lat. and 5° 18' W. long., has been a Spanish possession since the close of the 16th century, and forms part of the administrative province of Cadiz. *Melilla*, on a rocky promontory of the Rif coast, has been a Spanish possession since 1492. The Peñon (Rock) of Alhucemas, Peñon de Velez, and Zaffarin islands are Spanish possessions. A special international régime was designed for Tangier before the War of 1914-18 by negotiations between the British, French and Spanish Governments, but the outbreak of the War prevented this régime from being put into operation. A new Convention instituting the *International Zone of Tangier* was, however, signed by the three governments at Paris on Dec. 18, 1923, and was brought into force on June 1, 1925. The Convention was modified by a Protocol signed at Paris, July 25, 1928, by the three Powers and Italy, who thereby adhered to the Convention. The Convention provided for a complete international administration of the zone, except as regards native affairs, which were reserved to the Shereefian authority. British capitulatory rights in the French Zone were abolished as from January 1, 1938, by a Franco-British Convention of July 29, 1937, but they are still retained in the Spanish Zone.

In March, 1941, Spain suppressed the International Administration, deposed the Sultan's representative in Tangier and substituted Sidi Muley el Hassan ben el Mehdi, the Sultan's *Khalifa* in the Spanish Zone.

In August, 1945, a conference was held at Paris at which the United Kingdom, United States, France and Russia were represented, to discuss the re-establishment of the international régime in Tangier. It was decided to put into force with modifications the Statute of 1928 and on Oct. 11, 1945, the last Spanish troops left the zone and the Sultan's representative, the Mendoub, returned to take up residence. In November, 1952, the Committee of Control, which now consists of the representatives of Belgium, France, Holland, Italy, Portugal, Spain, the United Kingdom and the U.S.A., agreed on administrative and judicial reforms, subject to the approval of the Sultan.

In the French Zone since the war of 1939-45 there have been parallel administrations of the Sultan and the protecting power (France) and on July 6, 1947, General Juin (the French Resident-General) announced the signature by the Sultan of three ordinances reorganizing the Council of Government (*Maghzen*). The main reforms thus introduced authorized the Grand Vizier to appoint Moorish delegates to the French heads of the five principal departments; created the post of legal adviser, to be held by a Moor; and permitted the emergence of a single governing body for the Protectorate. Other reforms are promised and the Resident-General characterized them as evidence of French determination to lead the people of Morocco along the path to self-government.

During 1951 it was announced that arrangements had been completed with France for the use of air bases in French Morocco by the U.S. Air Force. Bases have already been constructed at Noussaour, Sidi-Slimane and Benguerir. Work has also started on two bases at Boulhaut and El Djema Sahim.

Production, Industry, &c.—Among the agricultural products are wheat, barley, maize, beans, peas, birdseed, linseed, coriander, cummin, fenu-greek, esparto, and hemp, and the northern slopes of the Atlas produce many fruits, principally figs, almonds, pomegranates, lemons, olives, oranges, and grapes, the latter growing also in the plains. An irrigation canal (15 miles) linked with the river Oum Er-Rabia (French Zone) was opened in 1938. The present programme of public works allows for the intensive irrigation of 400,000 hectares. The live stock includes large quantities of horses, cattle, sheep and goats, while the egg industry is of importance. Important deposits of coal, manganese, iron ore, lead and zinc, as well as other and are being increasingly exploited. Gold and silver are also found. Phosphates are exported in increasingly large quantities and constitute a great source of wealth for the French Zone. The trade of Morocco is now chiefly with France and Algeria, Great Britain, U.S.A., Spain and Belgium. The chief imports are cotton, sugar, motor vehicles, petroleum, building materials, soft goods, tea and edible oils; the exports are chiefly grain, phosphates, eggs, hides and skins, wool, vegetable fibre and early vegetables and fruit. The Spanish Zone exports iron ore (from Melilla neighbourhood), lead, preserved fish, skins, cork and vegetable fibre; the chief exports from Tangier are preserved fish, skins, vegetable fibre, eggs and Morocco leather. The unit of currency in the French protectorate is the Moroccan franc, which is closely allied to the French franc, while in the Tangier Zone the Moroccan franc and Spanish peseta are legal tender. In the Spanish Zone the Spanish peseta is current.

Communications.—The French Protectorate authorities are engaged in the serious development of normal gauge railways in their zone, and 1,713 kilometres of normal gauge track are in working order. In addition, the Tangier-Fez normal gauge system gives through service between Tangier and the principal towns of the French Zone, and a normal gauge line links Fez to the Algerian frontier at Oujda. Telegraphic communication is established from Tangier by submarine cables to Gibraltar, Ceuta-Málaga and Arzila-Cádiz, and by land to Casablanca. There are wireless stations at Tangier, Ceuta, Melilla, Tetuan, Rabat, and Casablanca; inland lines have been built by the French connecting all important places in their zone, as well as to the borders of the Spanish Zone, and the latter line has been extended to Tangier. The Spanish and Tangier Zones are in telephonic communication with Spain and also with Gibraltar and Western Europe generally. The chief roads in the Tangier and Spanish Zones are those linking Tangier to Ceuta via Tetuan, linking Melilla to the Muluya International Bridge (French Zone), and the Tetuan-Melilla road, via Targuist and Villa Sanjurjo in the North; and Tangier to Arzila, Larache, and the French Zone in the South. The French Zone is well equipped with good main and secondary roads. An embryonic system of secondary or military roads exists in the Spanish Zone. There is a daily *Air Service*, Madrid-Seville-Tetuan, which continues to Melilla and Málaga six times a week. A thrice-weekly service runs from Madrid to Tangier, and back. Gibraltar Airways operate four air services a day between Tangier and Gibraltar. Air France and Air Atlas operate air services between Paris, Tangier and the French Zone. Aero Portuguese has a weekly service between Lisbon, Tangier and Rabat.

Language and Literature.—The majority of the inhabitants speak Arabic (see Arabia), with French and Spanish as auxiliary tongues in their respective zones, and Shilha, the Berber language, in the

mountains. In 1953 there were 7 daily newspapers in the French Zone (5 French and 2 Arabic).

Education.—There are numerous Koranic schools in all zones, with a few secondary schools attached to mosques and at Fez there is a religious university of great repute in the Moslem world. European and a few native schools have been established in the French and Spanish Zones and special schools have been opened for Jewish pupils. In 1953 there were 157,000 Moroccan pupils in the French Zone, and there are higher education facilities in Rabat.

Finance.—The ordinary budget estimates for the French Zone in 1953 were: Receipts 61,751,000,000 francs and expenditure 61,750,188,000 francs. The budget of the Spanish Zone balanced at 290,500,000 pesetas in 1951, with the aid of a 141,500,000 peseta loan from the Spanish Exchequer. The ordinary budget estimates for the Tangier Zone in 1952 balanced at 1,557,855,000 francs.

External Trade.—Imports into the French Zone in 1952 were valued at 180,533,000,000 francs, and exports, 95,117,000,000 francs, of which imports from the U.K. were valued at 4,414,000,000 francs and exports to U.K. at 7,808,000,000 francs. The imports into the Spanish Zone were valued at 629,000,000 pesetas in 1950, and the exports at 361,600,000 pesetas. The imports into the Tangier Zone (1952) were valued at 12,823,387,000 francs and the exports from the zone at 1,207,066,000 francs, both record totals.

CAPITAL OF French Zone, Ψ Rabat, population 170,000 (Fez in the North, and Marrakesh in the South are the old capitals of the Sultans). Other towns (with populations exclusive of French army of occupation) are Fez (210,000), Marrakesh (250,000), Meknes (170,000), Ψ Casablanca (600,000), Ψ Mazagan (24,391), Ψ Saffi (25,159), Oujda (34,523), Ψ Kenitra or Port Lyautey (21,000) and Ψ Mogador (16,000) with Ψ Agadir (6,000) in South Morocco.

Commander-in-Chief in North Africa and Resident-General of French Morocco, General Guillaume (August 28, 1951).

The total population of the Spanish Zone (1950 census) is 1,010,127. Its capital is Tetuan, population 80,732; other towns being Ψ Ceuta (69,652), Ψ Melilla (95,841), Ψ Larache (41,917) and Alcazarquivir (31,919). **Spanish High Commissioner,** General Rafael Garcia-Valiño y Marcén, appointed April, 1951. **Khalifa,** Muley el Hassan Ben el Mehdi, who represents the Sultan of Morocco and resides at Tetuan.

CAPITAL OF International Zone, Ψ Tangier, population 150,000. The Sultan's representative (the Mendub) resides in Tangier.

FLAG OF THE SULTAN OF MOROCCO: Red, with green pentagram (the Seal of Solomon).

EMBASSY IN LONDON

12A, Kensington Palace Gardens, W.8

(Bayswater: 1594)

Ambassador, His Excellency General Shanker Shamsher Jang Bahadur Rana, C.B.E. (1949).

First Secretary, Iswary Raj Misra.

Military Attaché, Major-Gen. Sridhar Shamsheer Jang Bahadur Rana.

Nepal (area about 54,000 sq. miles; pop. 7,000,000) lies between India and Tibet on the S. slopes of the Himalayas, and includes Mt. Everest (29,141 ft.). Amid the sterile mountains lie many fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, etc., are grown. Nepal is divided into four provinces. Its exports to India are estimated to amount to about £4,000,000, and its imports to £2,000,000 a year. The chief trade route is that between Katmandu and the Bihar and Orissa frontier (77 miles). Nepal exports rice and other grains, hides, oilseeds, ghi, cattle, jute, large quantities of timber, &c., and imports cotton goods and yarn, sugar, salt, spices, petrol, metals, &c. The revenue realized chiefly from land rent, forests, customs, &c., is over £1,000,000. The aborigines are Mongolian in type, and their religions are Buddhism and Hinduism. The aboriginal stock is Mongolian with a considerable admixture of Hindu blood from India. They were originally divided into numerous hill clans and petty principalities, one of which, Gorkha or Gurkha, became predominant in about 1769 and has since given its name to all. During the 1914-18 and the 1939-45 wars, the Nepal Government rendered unstinting and unconditional assistance to the British Government in men, money and material.

Following the advice of a committee set up in April, 1947, the hereditary Prime Minister announced in February, 1948, the setting up of a constitution based on manhood suffrage according to the citizens the civil rights enjoyed in modern democratic states.

In January, 1951, Maharaja Mohun Shamsheer, Prime Minister of Nepal, announced that the time had come for the liberalization of the Government, and on February 18, 1951, the Sovereign, as Constitutional Monarch, proclaimed that Nepal would henceforth be governed according to the provisions of a democratic constitution to be framed by a Constituent Assembly elected on adult suffrage. An Interim Government was formed consisting of a Cabinet of 10 members. Maharaja Mohun Shamsheer retained the post of Prime Minister, but five ministers were nominated from the Nepali Congress Party, which had for some time been pressing for reforms. An Advisory Council of 40 members (one from each district in Nepal) is to be formed, and a census is to be held

and electoral rolls drawn up. It was planned to hold an election for the Constituent Assembly before the end of 1952. In November, 1951, Maharaja Mohun Shamsher resigned the office of Prime Minister, and a new Cabinet was formed by Matrika Prasad Koirala, President of the Nepali Congress. The majority of the members of the Cabinet belonged to this party, but two members of the ruling Rana family and some independents were included. As a result of discussion within the Congress Party, however, Mr. Koirala resigned in August, 1952. An Advisory Council governed the country till June, 1953, when Mr. Koirala was again appointed Prime Minister.

CAPITAL, Katmandu (est. pop. 175,000).

BRITISH EMBASSY

British Ambassador, His Excellency Christopher Henry Summerhayes, C.M.G., M.B.E. (1951).

NETHERLANDS (or HOLLAND)

(Koninkrijk Der Nederlanden)

Queen of the Netherlands, Her Majesty JULIANA, born April 30, 1909; married Jan. 7, 1937, Prince Bernhard of Lippe Biesterfeld, G.C.V.O., G.B.E. (PRINCE OF THE NETHERLANDS), born June 29, 1911. Her Majesty has issue:—

- (1) H.R.H. Princess Beatrix Wilhelmina Arm-gard, born Jan. 31, 1938.
- (2) H.R.H. Princess Irene Emma Elizabeth, born Aug. 5, 1939.
- (3) H.R.H. Princess Margriet Francisca, born (at Ottawa, Canada), Jan. 19, 1943.
- (4) H.R.H. Princess Maria Christina, born Feb. 18, 1947.

Queen Juliana, the fifth monarch of the Netherlands and of the Royal House of Orange Nassau, was solemnly inaugurated in the New Church at Amsterdam on September 6, 1948. Following the abdication of QUEEN WILHELMINA, her mother (who succeeded her father King William III, after a regency, Sept. 6, 1898, and abdicated Sept. 4, 1948, after a happy reign of 50 years, reverting to the title of Princess Wilhelmina), the succession passed onward by force of law and under the compact with the people of the Netherlands which William I first entered into in 1814, represented by the oath to the Constitution taken by the Queen in the presence of both houses of the States General.

CABINET

(As at Sept. 1, 1952)

Prime Minister, W. Drees, Labour.
 Vice-Premier and Minister for the Interior, Professor L. J. M. Beel, Catholic.

 Overseas Parts of the Realm, W. J. A. Kernkamp, Liberal Protestant.
 Social Welfare, F. J. F. M. van Thiel, Catholic.

EMBASSY IN LONDON

Hereford House, 117 Park St., W.1

(Mayfair: 8806)

Ambassador in London, His Excellency Dr. Dirk Uipko Stikker, G.B.E. (1952).

Counsellor, Baron W. J. G. Gevers, C.V.O.

Counsellor of Embassy, Dr. H. C. Schoch, C.V.O. and Secretaries, Dr. J. Kneppelhout; Jonkheer J. L. R. Huydecoper.

Military Attaché, Col. P. T. A. Goossens.

Naval Attaché, Capt. P. A. Mulock van der Vlies Bik, C.V.O.

Assistant Naval Attaché for Air, Lt.-Comm. J. C. Petschi.

Air Attaché, Lt.-Col. C. J. M. Nass.

Press Attaché, R. C. Pekelharing.

Special Attaché, Dr. Jane de Jongh.

Commercial Counsellor, Dr. H. van Blankenstein, and Secretaries (Commercial), W. F. Pelt; Dr. A. G. Jonker.

Civil Air Attaché, Dr. D. Goedhuis.

Agricultural Attaché, Dr. Tj Bakker.

Asst. Agricultural Attaché, L. W. Binkhorst.

Financial Counsellor, J. M. Fehmers.

Chancellor, Miss M. L. Zaalberg.

Consular Section, 117 Park St., W.1.

1st Secretary (Consular), N. Brat.

Attaché, S. Hettinga.

Area and Population.—The Kingdom of the Netherlands is a maritime country of Western Europe, situate on the North Sea, in lat. 50° 46'–53° 34' N. and long. 3° 22'–7° 14' E., consisting of 11 provinces plus the North-East Polder (reclaimed part of the Zuider Zee) and containing a total area of 34,830 sq. kms. The population on Jan. 1, 1953, was 10,435,631. The live birth-rate in 1952 was 22.4 per 1,000 of the population, and the death-rate 7.3.

The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Schelde. The chief agricultural products are wheat, rye, barley, oats, beans, peas, flax-seed, potatoes, sugar beet, cattle, horses, swine, butter, cheese, poultry, eggs, vegetables, fruit and flower bulbs and there is an important fishing industry. Among the principal industries are engineering, motors, shipbuilding, iron and steel, incandescent lamps, radio, electrical and telecommunications equipment, cotton, woollen, linen and rayon spinning and weaving, earthenware, glass, leather goods, boots and shoes, chemical and pharmaceutical products, oils, paper and board, cigars, sugar, "genever" liqueurs, beer, clothing, bicycles, tyres and rubber products. Coal production (1952) was 12,532,000 metric tons. Diamond-cutting, though still an important industry, has declined considerably in importance, now employing only about 1,500 hands, compared with about 3,500 before the war.

Government.—In 1815 the Netherlands became a constitutional Kingdom under King William I, a Prince of Orange-Nassau, a descendant of the house which has taken a leading part in the destiny of the nation since the 16th century. The States-General comprise the *Eerste Kamer* (First Chamber) of 50 members, elected for 6 years by the Provincial Diets; and the *Tweede Kamer* (Second Chamber) of 100 members, elected for 4 years by men and women voters of 23 years and upwards. Members of the *Tweede Kamer* are paid.

Defence.—The post-war army is being formed as a component of the North Atlantic Treaty

Organization. The Royal Netherlands Navy suffered considerable losses during the war and consists now of 4 cruisers, 1 aircraft carrier, 6 modern destroyers, 9 submarines, 16 frigates and destroyer-escorts and a number of small vessels including minesweepers and escort vessels. The Air Force and Naval Aviation have been reconstituted since the war, and now form an integral part of the air defences of the N.A.T.O. countries. They are in process of expansion.

Language and Literature.—Dutch is a West-Germanic language of Saxon origin, closely akin to Old English and Low German. It is spoken in the Netherlands and the northern part of Belgium. It is also used by many people in the Netherlands West Indies. The South African language has Dutch as its origin, but differs from it in grammar and pronunciation. There are eleven national papers, four of which are morning papers, and there are several regional daily papers.

Education.—Illiteracy is practically non-existent. Primary and secondary education is given in both denominational and State schools, the denominational schools being eligible for State assistance on equal terms with the State schools. Attendance at primary school is compulsory. Secondary schools for working classes are numerous, well equipped and well attended. The principal Universities are at Amsterdam, Groningen, Leiden, Nijmegen (R.C.), and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (economics), Wageningen (agriculture), and Tilburg (R.C.) (commercial).

Communications.—The total extent of navigable rivers and canals is 4,400 miles (large rivers comprising 721 miles) and of main roads 1,870 miles. On January 1, 1953, the total length of the railway system amounted to 2,000 miles, of which about 655 miles were suitable for electric traction. The mercantile marine on Jan. 1, 1953, consisted of 1,288 ships of total 3,233,569 gross registered tons, of which all but about 100 ships were registered in metropolitan ports.

The Bank of England Official Rate of Exchange (January 1, 1952) was 10.63 florins = £1. See also p. 83.

TRADE 1952 AND 1953

In 1952 Dutch imports amounted to fls. 8.5 milliard and exports to fls. 8.0 milliard, so that imports were covered by exports to the extent of 94 per cent. The Netherlands have removed quantitative restrictions on the great majority of imports in accordance with the agreement between O.E.E.C. countries. Liberalized items amount to 92 per cent. of total imports. Under the terms of an agreement with the Netherlands, imports of non-liberalized goods from the United Kingdom are admitted for the period April 1, to December 31, 1952, up to three-quarters by value of the 1951 imports from that source, plus some additional quantities covered by special quotas. The agreement also provided for United Kingdom imports from the Netherlands, mainly foodstuffs, but on a

reduced scale compared with that covered by previous agreement. No agreement has been concluded for 1953, but United Kingdom goods have been admitted on the same scale as in 1952. There is a gradual increase in production in most industries; the index of overall production for 1952 was 147, and productivity per worker was 98 (1938 = 100).

Imports from U.K..... 1952 Fl.744,600,000
Exports to U.K..... 990,600,000

BRITISH COUNCIL

Representative, R. P. Hinks, 268 Heerengracht,
Amsterdam.

OVERSEAS TERRITORIES

1. Netherlands New Guinea:—

The territory of Netherlands New Guinea (estimated population 1950, 1,000,000), comprises the western half of the island of New Guinea. Mount Wilhelm is the highest point in Oceania.

It was decided at the Round Table Conference between Holland and Indonesia that the future status of New Guinea would be decided by negotiation between the two parties within a year of the transfer of sovereignty to Indonesia on December 27, 1949. A joint Dutch-Indonesian Commission was formed to investigate the facts of the case, and reported back to the two Governments in 1950. As a result of the failure of the two sides of the Commission to agree, the position of New Guinea remains unchanged under Dutch sovereignty. Governor of Netherlands New Guinea: Dr. J. van Baal.

2. Netherlands' West Indies:—

"Nederlandsch West-Indie" comprise Surinam (Dutch Guiana) in South America, and certain islands in the West Indies known as the Netherlands West Indies (Curaçao, Bonaire, Aruba, part of St. Martin, St. Eustatius, and Saba). The area of Surinam is about 54,000 sq. miles, with a population of about 200,000; area of the Netherlands West Indies, 436 sq. miles, population, 160,000. Bauxite is an important export of Surinam. The administrative capital of Surinam is Paramaribo (pop. 75,000); the capital of Curaçao is Ψ Willemstad (pop. 75,000); of Aruba, Ψ Oranjestad; of Bonaire, Ψ Kralendijk; of St. Martin, Philipsburg; of

Statius (St. Eustatius), Oranjestad; and of Saba, Bottom. Governor of Netherlands West Indies, A. A. M. Struycken, Governor of Surinam, J. Klaasesz.

NICARAGUA

(República de Nicaragua)

President (1950-56), General Anastasio Somoza, elected May 21, 1950.

Foreign Affairs, Dr. Oscar Sevilla Sacasa.

NICARAGUAN EMBASSY IN LONDON

Ambassador and Consul-General, Dr. Don Rubén Darío (1953).

CONSULATE-GENERAL IN LONDON

18 Mount Street, W.1

[Grosvenor 6844]

Auxiliary Consul, Herbert C. Cock.

Area and Population.—Nicaragua is the largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45'–15° N. lat. and 83° 40'–87° 38' W. long., containing an area of 57,145 English square miles and a population (1950 Census) of 1,053,189, of whom about three-quarters are mixed blood. Another 15 per cent. are white, mostly of pure Spanish descent, and the remaining 10 per cent. are Indians, negroes or mulattoes. The latter group includes the Mosquitos, who live on the Atlantic Coast and were formerly under British protection.

Government.—Nicaragua was discovered by Columbus in 1502, and was overrun by the Spaniards under Davila in the first quarter of the 16th century, forming part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution took effect on May 1, 1951. The President is elected by direct suffrage for six years. Congress comprises a Senate of 15 members (together with ex-Presidents of the Republic) and a Chamber of Deputies of 55 members.

Agriculture and Industry.—The country is mainly agricultural. The major crops are coffee, cotton, sesame, sugar, rice and maize. Bananas, beans, cocoa and ipecacuanha are also important. Live-stock and timber production, already considerable, are capable of unlimited expansion. Nicaragua possesses deposits of gold and silver, both of which are mined and exported by United States and Canadian concessionaires.

Communications.—There are 270 miles of railway, all on the Pacific side, 3,159 miles of telegraph and 3,216 miles of telephone, and there is a powerful wireless station at Managua. Transportation, except on the Pacific slope, is still attended with difficulty but many new roads have either been opened or are under construction. The Inter-American Highway runs from the Honduras frontier in the north to the Costa Rican border in the south; the interoceanic highway, running laterally to Rama, whence there is a natural waterway to Bluefields on the Atlantic, is progressing and admits of a through passage in dry weather.

Until the advent of aircraft, the Atlantic littoral was practically isolated from the rest of the Republic and the chief centres of population, but NICA Airways now have a daily service between Managua and the Atlantic littoral.

Language and Literature.—The official language of the country is Spanish. In 1952 there were 6 daily newspapers published at Managua, and 3 in the provinces. Education is backward, at least 60 per cent. of the population being illiterate. There is a University at León.

FINANCE

	1951-52	1952-53
Estimated revenue.	C \$238,309,467	C \$177,246,473
Estimated expenditure	138,309,467	177,246,473

Consul-General, Jørgen Galbe.

Consul, A. A. Boustoun.

Attaché, Pål Aklstad.

Area and Population.—Norway ("The Northern Way"), a kingdom in the northern and western portion of the Scandinavian peninsula, was founded in 872. It is 1,752 km. in length, its greatest width about 430 km. The length of the coastline is 2,650 km., and the frontier between Norway and the neighbouring countries is 2,561 km. (Sweden 1,632 km., Finland 734 km. and U.S.S.R. 195 km.). It is divided into 20 counties (*fylker*) and comprises an area of 324,222 sq. km. with a population (1950) of 3,280,000. In 1951 there were 61,564 births (18.4 per 1,000 inhabitants), 27,736 deaths (8.6 per 1,000) and 27,180 marriages (8.3 per 1,000); the infant mortality rate in 1951 was 25.7 per 1,000 live births.

The Norwegian coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. At the North Cape the sun does not appear to set from the second week in May to the last week in July, causing the phenomenon known as the *Midnight Sun*; conversely, there is no apparent sunrise from about Nov. 18 to Jan. 23. During the long winter nights are seen the multiple coloured *Northern Lights* or *Aurora Borealis*, which have a maximum intensity in a line crossing North America from Alaska to Labrador and Northern Europe to the Arctic coast and Siberia. A similar phenomenon occurs in the Antarctic and is known as *Aurora Australis*.

Production.—The cultivated area is about one-fourth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains.

The *Gulf Stream* pours from 140 to 170 million cubic feet of warm water per second into the sea around Norway and causes the temperature to be higher than the average for the latitude. It brings shoals of herring and cod into the fishing grounds and causes a warm current of air over the west coast, making it possible to cultivate potatoes and barley in latitudes which in other countries are perpetually frozen.

The chief industries are agriculture and forestry, mining, manufactures, fisheries, whaling and shipping. The most recent figures showed that 31 per cent. of the population lived on industry, 25 per cent. on agriculture and forestry, 10 per cent. on trading, 9 per cent. on transport and communications and 6 per cent. on fishery and whaling. Manufactures are aided by great resources of water power, estimated at 9,200,000 kw. at 75 per cent. efficiency, of which over 2,000,000 kw. are utilized. In normal years the quantity of fish caught by Norwegian fishing vessels is greater than that of any other European country. In 1952 the total catch amounted to 1,668,500 metric tons. Whale oil production, chiefly from pelagic whaling in the Antarctic, was, in 1952, 1,151,400 barrels.

Government.—From 1397 to 1814 Norway was united with Denmark, and from Nov. 4, 1814, with Sweden, under a personal union which was dissolved on June 7, 1905, when Norway regained complete independence. Under the constitution of May 17, 1814, the *Storting* (Parliament) itself elects one-quarter of its members to constitute the *Lagting* (Upper Chamber), the other three-quarters forming the *Odelsting* (Lower Chamber). Legislative questions alone are dealt with by both parts in separate sittings.

On April 8-9, 1940, Germany invaded Norway, and it was not until June 7, 1945, that the King was able to return from Great Britain to Oslo.

Defence.—Norway is a member of the North Atlantic Treaty Organisation, and the Headquarters of Allied Forces, Northern Europe, is situated near Oslo. Extensive reorganization of the Norwegian armed forces is in progress. Compulsory national service lasts 18 months in the navy and air force and 12 months in the Army. The Norwegian Brigade which participated in the occupation of Germany was withdrawn on May 1, 1953.

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. Secondary schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Oslo (opened in 1811) was attended by 3,694 students and the University of Bergen (opened in 1948) by 352 students in 1951. The Norwegian Technical High School in Trondheim possesses University status and awards degrees in engineering and architecture. In 1951 it was attended by 1,050 students.

Language and Literature.—Norwegian is a branch of the Scandinavian languages and is the language of the mainland and of Svalbard. Old Norse literature is among the most ancient (and the richest) in Europe. Modern Norwegian became formed in the time of the Reformation and Ludvig Holberg (1684-1754) is regarded as the founder of Norwegian literature, although modern Norwegian literature dates from the establishment of a national university at Christiania (Oslo) in 1811 and with the writings of Wergeland (1805-1845). Some of the famous names are Henrik Ibsen (1828-1906) the dramatist, Bjørnstjerne Bjørnson (1832-1920) journalist, dramatist and novelist and Nobel Prize-winner in 1903, Jonas Lie (1833-1908) novelist, Knut Hamsun (1859-1952) novelist and Nobel Prize-winner in 1920, and Sigrid Undset (1882-1949), champion of Norwegian womanhood and herself a Nobel Prize-winner in 1928. In 1950 there were 95 daily newspapers in the country.

Communications.—The total length of railways open in 1952 was 4,474 km., of which 82 were

private lines. The length of telegraphs and telephones in 1952 was 72,982 km. (State, 65,086) with 2,262,000 km. of wire (State, 1,957,000).

Civil Aviation.—On scheduled airlines operated by Det Norske Luftfartsselskap (DNL) (a partner in Scandinavian Airlines System) and Braathens South American and Far East Airtransport (SAFE), in 1952:—kilometres flown, 9,724,000; passengers carried, 167,540.

Mercantile Marine.—The Mercantile Marine, March 31, 1953, consisted of 5,682 vessels of 6,357,000 gross tons (vessels above 25 gross tons). The total amount of tonnage lost by acts of war between Sept. 3, 1939, and May 8, 1945, was 2,296,000 gross tons or about 50 per cent. of the fleet at Sept. 3, 1939. The fleet now ranks third among the merchant fleets of the world.

FINANCE 1953-54

SVALBARD

(Spitzbergen and Bear Island)

By Treaty (Feb. 3, 1920) the sovereignty of Norway over the Spitzbergen ("Pointed Mountain") Archipelago was recognized by the Great Powers and other interested nations, and on Aug. 14, 1925, the Archipelago was officially taken over by Norway. In September, 1941, Allied forces (British, Canadian and Norwegian) landed on the main island. After destruction of the accumulated stocks of coal and dismantlement of mining machinery and the wireless installation, the Norwegian inhabitants (about 600) were evacuated to a British port and the Russians (about 1,500) to the U.S.S.R. After the war the Norwegian mining plants were rebuilt. The production of coal, the chief mineral of the archipelago, rose from 6,000 tons in 1945 to 436,000 in 1948, and 457,000 in 1949. In 1952 the production was 453,000 tons.

The Svalbard Archipelago lies between 74°-81° N. lat. and between 10°-35° E. long., with an estimated area of 24,295 square miles. The archipelago consists of a main island, known as West Spitzbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the mainland by Olga Strait; Barents and Edge Islands, separated from the mainland by Stor Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group. In addition to those engaged in coal-mining, the archipelago is also visited by hunters for seal, foxes and polar bears.

South Cape is 360 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsö, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsö to Green Harbour 2½ to 3 days; from Aberdeen 5 to 6 days.

JAN MAYEN, an island in the Arctic Ocean (70° 49'—71° 9' N. lat. and 7° 53' 9' 5' W. long.) was joined to Norway by law of Feb. 27, 1930.

Norwegian Antarctic

BOUVET ISLAND (54° 26' S. lat. and 3° 24' E. long.) was declared a dependency of Norway by law of Feb. 27, 1930.

PETER THE FIRST ISLAND (68° 50' S. lat. and 90° 35' W. long.) was declared a dependency of Norway by resolution of Government, May 1, 1931.

PRINCESS RAGNEILD LAND (from 70° 30' to 68° 40' S. lat. and 24° 15' to 33° 30' E. long.) has been claimed as Norwegian since Feb. 17, 1931.

On Jan. 14, 1939, the Norwegian Government declared the area between 20° W. and 45° E., adjacent to Australian Antarctica, to be Norwegian territory.

Consul-General (Liverpool), Señor Don José
Antonio Grimaldo.

There are Consular Offices of the Republic at
Newcastle, Glasgow, Birmingham and Belfast.

Panama on the Isthmus of that name which connects N. and S. America, was formerly one of the nine Departments of Colombia. After a revolt (Nov. 3, 1903) it declared its independence and established a separate Government, with a single chamber legislature elected every four years and now consisting of 42 elected members. The area of the Republic is 31,890 sq. m., the population (1950) was 805,285 (excluding Canal Zone). The soil is extremely fertile, but nearly one-half of the land is uncultivated. The chief crops are bananas, coconuts, cacao, coffee, and cereals. A railway 47 miles in length joins the Atlantic and Pacific oceans.

Education is compulsory and free from 7 to 15 years and there were about 105,884 children enrolled in 1950-51. There are 79 secondary schools and technical and commercial colleges. The national university, established in 1935, had an enrolment of 1,778 students in 1951-52.

Language and Literature.—The official language is Spanish. There are 6 daily newspapers published in the capital, 3 of which print editions in English.

THE PAPAL STATE

(Stato della Città del Vaticano)

Sovereign Pontiff (261st), His Holiness Pope Plus
XII. (Eugenio Pacelli), born in Rome, March 2,
1876, elected Pope (in succession to Pius XI.)
March 2, 1939.

The office of the ecclesiastical head of the Roman Catholic Church (*Sancta Sede* or Holy See) is vested in the Pope of Rome, the Sovereign Pontiff. For many centuries the Sovereign Pontiff exercised temporal power, and in 1859 the Papal States had an area of 17,218 square miles, with a population of 3,124,688. During the reign of Pius IX. (1846-1878), the Papal States of Romagna, Umbria and the Marches were incorporated in the Kingdom of Sardinia and with the remaining States (Rome, Comarca, Viterbo, Civita Vecchia, Velletri and Frosinone) became part of Unified Italy in 1870. The territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Gandolfo, and the temporal power of the Pope was in suspense until the treaty of Feb. 11, 1929, which recognized the full and independent sovereignty of the Holy See in the City of the Vatican. Accompanying the treaty were conventions regulating the condition of religion and of the Catholic Church in Italy and agreeing to pay 750,000,000 lire in cash and the income at 5 per cent. on 1,000,000,000 lire State bonds as a final settlement of the claims of the Holy See against Italy for the loss of temporal power. The population of the Vatican City at the census in March, 1947, was 940.

BRITISH LEGATION

EMBASSY IN LONDON
52 Cornwall Gardens, S.W.7
[Western: 5618]

Ambassador in London, Senor Don Pedro Godinot de Vilalre (1951).

Consul-General, Señor J. Porfirio Cristaldo.

Area and Population.—Paraguay is an inland sub-tropical State of South America, situate between Argentina, Bolivia and Brazil. The area is computed at 157,000 square miles, with a population (1950 Census) of 1,600,000.

Paraguay proper consists of a series of plains, intersected by abrupt ranges of hills, some of which reach an altitude of 2,000 to 3,000 feet above sea level. The Paraguay and Alto Paraná rivers are navigable at all seasons for vessels of 6 to 7 feet draft. Many of the tributary streams are also navigable for much of the year. The Pilcomayo river is navigable for small craft for 180 miles from Asunción; but is liable to shrink unduly with drought. Paraguay is a country of grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as "Neembucu," or "endless," is drained by *Lake Ypoa*, a large lagoon, south-east of the capital. The *Chaco*, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, formed the subject of a long-standing dispute with that country and led to war between Paraguay and Bolivia from 1932 to 1935. The Chaco is practically a dead level, though a slight and uniform rise westward is now known to exist; it suffers much from floods and still more from drought.

Government.—Paraguay was visited in 1527 by Sebastian Cabot, and in 1535 was settled as a Spanish possession. In 1811 Paraguay declared its independence of Spain, and from 1814-1840 was governed by Francia, a Paraguayan despot, who was succeeded by Lopez, 1840-1862. In 1862 Francisco Solano Lopez succeeded his father, and in 1864 declared war against Brazil—Argentina and Uruguay being involved in the struggle. Against these three nations Lopez conducted a five years' war, which terminated in his defeat and death at the *Battle of Cerro Corá*, March 1, 1870. This dogged struggle reduced the country to complete prostration, and the population, which was 800,000 in 1857, is alleged to have fallen in 1870 to 250,000, of whom barely 30,000 were men.

The Senate was abolished under the constitution adopted in 1940 and replaced by a Council of State nominated by the government.

Production.—About three-quarters of the population are engaged in agricultural and pastoral pursuits, cattle breeding being the principal industry. In addition to canned meat, timber, quebracho extract, cotton, hides, *yerba maté*, tobacco, and *petit grain* essence (which are the principal exports), mandioca, sugar, maize, rice, citrus fruits and edible oils are also produced for home consumption. Grape fruit is now exported. The production of rice, wheat and ground nuts is being encouraged by the government. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad.

Communications.—A railway, 985 miles in length, connects Asunción with Buenos Aires. The journey takes 60 hours. Train ferries enable the run to be accomplished without break of bulk. River steamers also connect Buenos Aires and

Asunción (3 to 5 days). There is also an infrequent riverboat service between Montevideo and Asunción, and a bi-monthly service between Corumbá and Asunción. Five air lines operate services from Asunción. *Aerolineas Argentinas* operate a service with Sunderland flying-boats five times weekly between Asunción and Buenos Aires, stopping at Corrientes. Twice a week this service also calls at the river ports of Rosario and Formosa, and once a week at Posadas. *Braniiff* (American) have a bi-weekly service through Asunción between Buenos Aires and the United States (calling also at Lima and La Paz). *Panair do Brasil*, a Brazilian company affiliated to Pan American Airways, operate a weekly service between Rio de Janeiro and Santiago through Asunción, and a weekly service between Rio de Janeiro and Buenos Aires, stopping at Sao Paulo and Asunción. *Pluma* (Uruguayan) carry on a thrice-weekly service between Montevideo and Asunción, while *Real*, another Brazilian airline, operate a thrice-weekly service between Montevideo and Sao Paulo, stopping at Asunción and other places en route.

Defence.—There is a permanent military force of about 8,000 all ranks. Two gunboats and a number of torpedo boats patrol inland waters.

Language and Literature.—Most of the inhabitants are bi-lingual, speaking Guarani (the language of the extinct tribe of Indian inhabitants at the time of the Spanish occupation) and Spanish. In 1950 there were 3 daily newspapers published at Asunción.

Education.—Primary education is free and compulsory. There are a few secondary and special schools and a national university with close on 1,000 students.

FINANCE

1953

Estimated Revenue	<i>Guaranies</i> 346,219,000
Estimated Expenditure	" 344,284,000
External Debt (Dec. 1952)	" 35,207,000
Internal Debt (Dec. 1952)	" 240,215,000

Paraguay continues to pay interest on the External Sterling Debt (3% Loans of 1886-96, and 1915).

Currency.—On August 1, 1952, a basic exchange rate of 15 *Guaranies*=£1 U.S. was established. The effective rate for imports and exports varies, however, from 15-30 *Guaranies*=£1, because of subsidies and revaluation surcharges. Official free market rates on May 1, 1953, were 55 and 56 *Guaranies* (buying and selling)=£1 U.S.

IRANIAN EMBASSY IN LONDON

At present withdrawn. Iranian interests in Great Britain are supervised by the Swedish Embassy, Division for safeguarding Iranian interests, 50 Kensington Court, W. 8. Head of Division, Otto Johansson.

Area and Population.—Persia comprises an area of 628,000 sq. miles, with a population variously estimated between 14,000,000 and 19,000,000. It is mostly an arid table-land, encircled, except on the east, by mountains, those in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert.

The Persians are mostly Shi'ah Moslems but amongst them are a few hundred thousand Zoroastrians, Bahais, Sunni Moslems and Armenian Christians. Civil and Penal codes based on those of France and Switzerland are in force.

Government.—Persia was ruled from the end of the 18th century by Shahs of the Qajar Dynasty, with despotic power, subject only to the influence of interpreters of the sacred law. A nationalist movement became active in Dec., 1905, and in Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution, which set up a Legislature of 2 houses, a Senate of 60 Members (half nominated, half elected), and a National Assembly of 136 Members, elected for 2 years. After the war of 1914-18, the subsequent troubles and the signature of the Soviet-Persian Treaty of 1921, a vigorous Prime Minister,

Reza Khan, formerly an officer of the Persian Cossack Regiment, re-established general order. On Oct. 31, 1925, the last representative of the Qajar Dynasty, Sultan Ahmed Shah, who had been absent from the country for some time, was deposed by the National Assembly, which handed over the government to the Prime Minister, Reza Khan Pahlevi, who was elected Shah on Dec. 13, 1925, by the Constituent Assembly.

Owing to Nazi German penetration before and during the early part of the war of 1939-45, the Shah and his Government tended so far to favour the Axis powers that, after the German invasion of the U.S.S.R. in 1941, counter-measures became necessary; British and Soviet Forces entered the country from south and north on August 25, 1941, and expelled the agents of the Axis. On September 16, 1941, Shah Reza abdicated and left the country, nominating the Crown Prince as his successor. After negotiations with the National Assembly the Prince ascended the throne as a Constitutional Monarch, under the title of Mohammed Reza Shah. The ex-Shah died in South Africa on July 26, 1944.

Under the Anglo-Soviet-Persian Treaty of Alliance of January 29, 1942, the independence and territorial integrity of the country were guaranteed by the United Kingdom and the U.S.S.R. Evacuation by the forces of both powers was to take effect within six months of the signature of the armistice with Germany and her associates. On September 9, 1942, Persia declared war on the Axis powers and on February 28, 1945, on Japan. During the remainder of the war with Germany, Persia became one of the principal routes of aid to the Soviet Union. Her integrity and independence were further guaranteed in a Declaration signed by Mr. Churchill, President Roosevelt and Marshal Stalin, at the Conference of Tehran in December, 1943. United States Forces, which had joined British and Soviet troops in Persia to participate in the delivery of aid to Russia, were withdrawn from the country at the end of 1945. British troops evacuated Persia, in accordance with the Anglo-Soviet-Persian agreement, by March 2, 1946, six months after the conclusion of hostilities with Japan. Soviet troops, nevertheless, remained; and when Communist disturbances took place in the north-west part of Persia known as Azerbaijan, they refused to allow Persian forces to enter the area, with the result that an autonomous government was established at Tabriz. However, after an appeal to the Security Council of the United Nations and the accession of a new Prime Minister, Qavam es Sultaneh, who entered into direct negotiations at Moscow, Soviet forces eventually left the country in the month of May. This belated evacuation took place in accordance with an agreement which included provision for the formation of a Perso-Soviet Oil Company to operate in the north of Persia and an understanding that the question of Azerbaijan should be peaceably settled. In December, 1946, Persian Government forces entered the province, virtually unopposed by the partisans of the autonomous Government, which itself collapsed upon the flight of the revolutionary leaders into the Soviet Union; and the authority of the Central Government has been restored.

In 1947 the people of Persia elected a new Parliament, which in October, 1947, repudiated the agreement for the formation of a Perso-Soviet Oil Company. On February 4, 1949, a young man, later identified as a member of the Tudeh (Communist) Party, attempted to assassinate the Shah. This led to the suppression of the Party and the condemnation of most of its leaders to

* On Oct. 26, 1949, it was announced that foreigners might henceforth use the name Persia.

death or to long terms of imprisonment. The most prominent, however, had already disappeared into hiding or exile. In March, 1949, the Shah issued an Imperial Firman convoking a Constituent Assembly to make certain revisions to the Constitution and the Assembly was duly elected and convened on April 21. At the same time the Majlis approved a Bill for the election of a Senate.

On March 17, 1951, the Majlis adopted a Bill for the nationalization of the Persian oil industry, and on March 20, the Bill was approved by the Senate. On April 28, the Majlis agreed to a resolution, which was passed next day by the Senate, recommending the immediate taking over of all installations, including those of "the late Anglo-Iranian Oil Company." The oil company sought arbitration, but this was rejected by the Persian government, and on May 26 the British government applied to the International Court of Justice at The Hague for a declaration that this refusal to submit to arbitration was illegal.

In August, 1953 after the Shah had appointed Gen. Zahedi as Prime Minister, fighting broke out between his followers and those of Dr. Mussadiq. The Shah temporarily left the country, but Gen. Zahedi's forces were successful, and Dr. Mussadiq was arrested together with a number of the members of his former Cabinet. See also "Events of the Year."

For the purposes of local government the country is divided into 10 Provinces (*Ustans*) comprising 76 Sub-Provinces (*Shahristans*), under Governors-General and Governors, respectively.

Defence.—The establishment of the Persian army is 129,000. The present strength is 130,000, though officers and regular N.C.O.'s are 30 per cent. under strength. The army, to which is attached a U.S. Advisory Mission, is well-equipped by 1939 standards. The Persian air force has about 200 machines, all of which are obsolete. Its present strength is 414 officers, 1,310 N.C.O.s and 2,500 conscripts, who complete two years' military service. The gendarmerie, to which is also attached a United States Military Mission, has been re-organized. The Persian Navy consists of a small fleet of sloops, gunboats and motor-boats in the Persian Gulf and a few motor-boats in the Caspian Sea.

Education.—Since 1943 primary education is compulsory and free. There are over 5,000 schools, with perhaps 300,000 pupils. There is a French School for girls in Tehran; there are Universities in Tehran and Tabriz, and University Colleges at Isfahan, Meshed and Shiraz. In 1949 there were 5,929 university students.

Language and Literature.—Persian, or Farsi, the language of Iran, and of some outlying districts formerly under Persian rule, is an Indo-European tongue, the written language having a Semitic origin with writing from right to left. Among the great names in Persian literature are those of Abu'l Kásim Mansúr, or Firdausi (A.D. 939-1020), Omar Khayyam, the astronomer-poet (died A.D. 1122), Muslihu'd-Din, known as Sa-di (born A.D. 1184) and Shems-ed-Din Muhammad, or Hafiz (died A.D. 1389). The Persian Press includes numerous ephemeral newspapers, but there are about 20 daily papers published regularly at Tehran (one in French), and 30 in the *Ustans* (provinces).

FINANCE.

	1952-53
Estimated Revenue.....	Rials 9,267,000
Estimated Expenditure....	12,278,000

The Rial of 100 Dinars was tied to the U.S. Dollar from Dec. 21, 1939, and the official rate is now fixed at Rials 32.5 = \$1 U.S. In Sept. 1949, the official rate was fixed at 89.4 Rials = £1,

although the "Export" rate, which applies to all private commercial transactions, is free, and in the first four months of 1952 fluctuated between 155 Rials and 220 Rials = £1. 20 Rials = 1 Toman (see also p. 83).

Production and Industry.—While petroleum is the principal product and until 1952 was by far the greatest export, Persia, except for its desert areas, is essentially an agricultural country and 80 per cent. of the inhabitants depend for their living on the land. Sheep and goats are numerous and good wool is produced. There are extensive forests in the north and west, the conservation of which is an urgent problem. A certain amount of progress has been made in the development of industry. Apart from petroleum, the principal industries are carpet weaving, cotton ginning, spinning and weaving (Isfahan, Tehran and Shahi areas), wool spinning and weaving, jute sacks, silk goods (Chalus), sugar, tea, fruit, caviar (Perso-Soviet Fisheries, Pahlevi), meat canning, distilling and brewing, tobacco and cigarettes. The A.I.O.C. (Anglo-Iranian Oil Company) had a concession valid (over an area of 100,000 sq. miles in south-west Persia) until 1993. These giant oilfields had produced over 200,000,000 metric tons of oil from their first output to Dec. 31, 1946, and subsequent figures (in metric tons) were 1946, 19,858,471; 1947, 21,737,949; 1948, 24,871,000; 1949, 26,807,000; 1950, 35,000,000; 1951 (to Oct.) 17,000,000.

Communications.—The principal roads are from the frontier of Iraq at Khusruvi to Tehran; from Tehran via Hamadan and Arak to Ahwaz and Khorramshahr; via Qum, Isfahan and Shiraz to Bushire; from Tehran into Azerbaijan, through Tabriz to Julfa (on the Soviet frontier) with branch roads into Turkey and Northern Iraq; from Tehran to Meshed; three roads through the Elburz mountains to the Caspian coast and the Soviet borders east and west of the Caspian Sea; and from Isfahan, via Yazd and Kerman to Zahidan and thence to Meshed. Zahidan is connected by road with Quetta (Pakistan). Some of these roads traverse extremely difficult mountainous country; others are desert tracks. Generally speaking, Persian roads are not asphalted but gravel-surfaced. Railways have been constructed since 1927. The *Trans-Iranian Railway*, from Bandar Shah, on the Caspian Sea, to Bandar Shapur, on the Persian Gulf, was inaugurated in 1938; this line has a total length of 872 miles, the total cost, after eleven years' work, being approximately £30,000,000. The branch line from Garm Sar towards Meshed has been completed as far as Shahrud. The extension from Tehran to Tabriz has been completed as far as Mianeh. In the southern section there are seven tunnels through the Zagros range, the longest exceeding 1½ miles. There are also railroads from Tabriz to Julfa and from Zahidan to Mirjawa and branch lines from Ahwaz to Khorramshahr and from Khorramshahr to Tanuma in Iraq (on the Shatt el Arab, opposite Basra) were opened during the war. An extension from Qum to Kashan is now in operation. The alignment of an extension from Shahrud to Meshed is complete and track laying has started. Work on another extension from Mianeh to Tabriz has made considerable progress.

Civil Aviation.—In May, 1946, a Department of Civil Aviation was created, subordinate to the Ministry of Roads. Progress has been made towards establishing first-class International Airports at Tehran and Abadan, with secondary airfields in accordance with ICAO standards. *Iranian Airways* (non-government owned) formed in May, 1946, run services to Bombay, Karachi, Bagdad, Kuwait, Damascus, Beirut and Cairo as well as internal services.

BOAC, Air France, KLM, Swedish Airlines, Misrair and Iraqi, operate services to Tehran.

TRADE	
1950-51	1951-52
Imports .. <i>Rials</i> 6,242,402,000	<i>Rials</i> 7,010,794,000
Exports .. " 3,493,623,000	" 4,289,432,000

These figures do not include imports and exports of the Anglo-Iranian Oil Company.

	1951*	1952
Imports from U.K....	£19,485,670	£5,607,000
Exports to U.K.....	33,064,795	2,994,000

*These figures include imports and exports of the Anglo-Iranian Oil Company, which account for most of the total exports, and about half the imports.

The leading imports into Persia are cotton and woollen fabrics, tea, sugar, motor vehicles, railway material, industrial machinery, chemicals and pharmaceuticals, electrical goods, hardware, china-ware and cement; the principal exports are heavy oils, petrol, carpets, opium, gum, fruits, hides and skins, animal casings, cotton, wood staves and rice. Import quotas and exchange restrictions are in force.

The principal countries trading with Persia are the U.K., U.S.S.R., U.S.A., India and Germany.

CAPITAL: Tehran, population (1950) 989,871. Other large towns are Tabriz (272,000), Isfahan (192,000), Meshed (191,000), Shiraz (114,000), Resht (110,000), Kerman (53,000), Hamadan (122,000), Yazd (56,000), Bushire (20,000), Kermanshah (106,000), Kazvin (80,000), Arak (64,000), Abadan (110,000).

FLAG: White, bordered with green (top) and red (bottom), with arms (lion and sun) in centre.

PERU

(República del Perú)

President of the Peruvian Republic, General Manuel A. Odria, elected for six years, July 2, 1950.

CABINET

(July 29, 1950)

President of the Council and Minister for War, General Zenón Noriega.

Foreign Affairs, Señor Ricardo Rivera Schreiber.

Home Affairs, Colonel Augusto Romero Lovo.

Justice, Dr. Alejandro Freundt Rossell.

Finance and Commerce, Dr. Emilio Romero.

Public Works, Ing. Eduardo Miranda Sousa.

Navy, Vice-Admiral Roque Saldías.

Education, Capitán de Corbeta Alfonso Balaguer.

Public Health, Dr. Luis N. Sacuz.

Agriculture, Ing. Alberto León.

Labour, General Armando Artoia.

Air, Lieut.-Colonel Mario Saona.

PERUVIAN EMBASSY IN LONDON

Ambassador Extraordinary and Plenipotentiary Señor Doctor Don Alberto Freundt (1952).

Counsellor, Señor Don Anibal Ponce.

Commercial Counsellor, Señor Don Federico Elguera.

and Secretary, Señor Don Andrés Aramburú.

Commercial Attaché, Señor Don Arturo B. Wells.

Consul-General, London (52, Sloane Street, S.W.1.), Señor Don Federico Elguera.

Vice-Consul, Señor Don Jaime Castro.

Consul-General, Liverpool (31 Dale Street), Señor Don Victor Pezet.

Vice-Consul, Señor Don Luis Elguera.

Consul, Glasgow (Morrison Court, Argyle Street), W. L. Lumsden.

There are Consulates at Cardiff, Hull, Birmingham, Newcastle upon Tyne and Belfast.

Area and Population.—Peru is a maritime Republic of South America, situated between $1^{\circ} 31' 29''$ and $19^{\circ} 13'$ S. latitude and between 69° and $81^{\circ} 19'$ W. longitude. The territory between $17^{\circ} 47'$ S. and $19^{\circ} 13'$ S. was occupied by Chile, as the result of the Pacific War of 1879-1882. In 1929 the Province of Tacna was returned to Peru, Chile retaining the Province of Arica. The area of the Republic (1932) was 482,616 square miles, and the population enumerated at the Census of 1940 (the first since 1876) was 7,023,111; boundary settlements (Jan. 29, 1942) with Ecuador increased the area by about 50,000 sq. miles and the population may be estimated (June 30, 1950) at 8,404,933. In the first six months of 1952 there were 120,257 births, 43,462 deaths and 8,413 marriages.

Physical Features.—The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points in the Peruvian sector being Huascaran (22,211 feet), Huandoy (20,855 feet), Ausangate (20,235 feet), Arequipa (or Misti) volcano (18,364 feet), Hualcan (20,000 feet), Chachani (19,037 feet), Antajasha (18,020 feet), Pichupichu (17,724 feet), and Mount Meiggs (17,583 feet).

There are five distinct regions, the Costa, west of the Andes, the Sierra or western slopes of the Andes, the Punas or mountainous wastes below the region of perpetual snow, the Montaña, or eastern foothills of the Andes, and the Selva, the boundless jungle forests of the Amazonian basin. The coastal area, lying upon and near the Pacific, is not tropical, though close to the Equator, being cooled by the Humboldt Current; its chief products are sugar, cotton, petroleum, wool, hides and skins, and it contains the chief towns and most of the white population. In the barren mountains section are to be found minerals in great richness and variety which await improved transport facilities before their production can be further increased; it is inhabited by Indians in a low state of civilization. Upon the eastern slope of the Andes are to be found very large tracts suitable for cultivation and stock raising.

Government.—Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541). He subjugated the Incas (the ruling caste of the Quichua Indians), who had invaded the country some 500 years earlier, and for nearly three centuries Peru remained under Spanish rule. A revolutionary war of 1821-1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended in 1860, 1919, 1933, 1936 and in 1939), and is that of a democratic Republic. The President is elected for six years by direct vote of the people. Congress is composed of a Senate and of a Chamber of Deputies, both Houses being elected for six years.

Production.—Agriculture and mining are the principal industries, employing over 70 per cent. of the inhabitants. The chief crops are maize (the staple food of the Indian population), cotton, sugar, wheat, rice and potatoes. Plantations have been made of rubber, quinine, and tea. There are vast reserves of various kinds of timber in the Amazonian country, which also produces wild rubber. At the census of 1940 the gainfully employed population numbered 2,475,000, of whom 1,293,000 were absorbed in agricultural and pastoral activities. About 4,000,000 acres were under cultivation in 1945, but it is probable that a very much larger area was tilled by the Incas and their predecessors for some centuries before the Spanish conquest,

and more intensive irrigation (a science with which the Incas were fully acquainted) would bring a larger area into cultivation and help to solve the problem of food supply, so much of which is at present imported. Minerals produced in 1951 were valued at *soles* 2,463,000,000 and included petroleum and its derivatives, gold, silver, copper, lead, zinc, vanadium (of which Peru is the largest producer in the world, with an output of 1,016 tons in ore and concentrates in 1939 and 1,170 tons in 1951) and antimony. The Lobos and other islands on the Pacific coast provide guano (250,000 metric tons in 1950 season).

Communications.—In recent years the coastal and sierra zones have been opened up by means of roads and air routes and there is air communication, as well as communication by protracted land routes, with the tropical eastern zones, which lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. The completion in 1944 of the trunk road of the *Andean Highway* from the Pacific port of Callao, *viâ* Lima, Oroya, Cerro de Pasco (14,700 ft.), Huanuco, Tingo Maria, to Pucallpa, the river port on the Ucayali, one of the largest tributaries of the Amazon and accessible all the year round to vessels of 3,000 tons, forms a link between the Pacific, the Amazon and the Atlantic. The trunk road runs through the *Boqueron del Padre Abad*, a pass rediscovered on July 22, 1937, in the backbone of the Blue Cordillera. The first railway was opened in 1850 and of the 2,350 miles of railways now operating, Government lines account for 645 miles, the Peruvian Corporation 1,062 miles and private enterprises about 643 miles. There is also steam navigation on the eastern rivers Ucayali (see *Andean Highway*, above) and Huallaga, and in the south on Lake Titicaca. The eastern rivers are also navigated to some extent by steam craft. Wireless telegraphy stations have been established in many places. Air services are maintained with Iquitos and other places in the interior. The coast district is served by several national companies and by the Chile-U.S.A. route *viâ* Peru.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription, and numbers about 30,000 of all ranks; the Navy includes 2 cruisers built at Barrow, 4 destroyers and 4 submarines, 3 frigates equipped with radar, 2 corvettes and 6 submarine-chasers. There are military aerodromes at Talara, Chiclayo and Las Palmas (near Lima), an air transport squadron at Lima and a seaplane base at Iquitos. The air force is equipped with P.47's, Catalinas, D.C. 3's, Beavers and A.T. 6's.

Education.—Elementary education is compulsory and free for both sexes between the ages of 6 and 14, with 900,000 pupils at the 10,807 schools in 1951. Secondary education is provided at 99 State schools with 5-year courses from 12 to 17 with nearly 42,000 pupils. There are also rural agricultural schools for Indians, mining schools and Polytechnics in the more populated centres. The University of San Marcos at Lima, founded in 1551, had about 7,000 students in 1951, and there are smaller universities at Arequipa, Trujillo and Cuzco. There are 125 institutions conducted by religious orders, including the Catholic University of Lima.

Language and Literature.—Spanish is the official language of the country and notably of the original Spanish stock from which the governing and professional classes are mainly recruited, but more than half the nation is composed of Indians, whose principal languages (Quichua and Aymara) are

widely spoken. Before the arrival of Pizarro, the Incas had attained a high state of culture, some traces of which survived three centuries of Spanish oppression, ending with the Declaration of Independence (July 28, 1821). Modern Peruvian literature includes a national drama in the Spanish tongue and many Peruvian writers have attained international fame. The national library founded at Lima in 1821 was pillaged by Chileans in the Pacific War of 1879-1882, but many of the scattered manuscripts and books have since been recovered. The greater part of the historical section of the library was destroyed by fire in 1943. The first printed news-sheet in South America was issued at Lima in 1594 and in 1952 there were 3 main national daily papers, and 20 provincial ones with a small and purely local circulation. A chair of English was established in 1938 at the Universidad Mayor de San Marcos in Lima.

PHILIPPINE LEGATION IN LONDON

9 Palace Green, W.8

[Kensington 3646]

Minister in London, His Excellency Señor José E.
Romero (1949).

Area and Population.—The Philippines are situated
between 21° 20'-4° 30' N. lat. and 116° 55'-
126° 36' E. long., and are distant about 500 miles
from the south-east coast of the continent of Asia.

The total land area of the country is 114,834
square miles, of which total 106,914 square miles
are contained in the eleven largest islands, the
7,079 other islands having a combined area of
7,920 square miles.

The principal islands are:—

Name	sq. miles	Name	sq. miles
Luzon.....	40,422	Mindoro.....	3,759
Mindanao..	36,538	Leyte.....	2,786
Sanitar.....	5,050	Cebu.....	1,703
Negros.....	4,906	Bohol.....	1,492
Palawan...	4,550	Masbate.....	1,262
Panay.....	4,446		

Other groups in the Republic are the Sulu
Islands (Capital, Jolo), Babuyan and Batanes;
the Catanduanes; and Cullion Islands.

A census taken in October, 1948, showed the
population of the Islands to be 19,234,182.

The inhabitants, known as Filipinos, are basically
all of Malay stock, with a considerable admixture
of Spanish and Chinese blood in many localities,
and over 90 per cent. of them are Christians, pre-
dominantly Roman Catholics. There is a small
proportion of Mohammedan Moros in the south
and of Pagans, mainly in the north.

Government.—The Philippine Islands were dis-
covered in 1521 by the Portuguese navigator
Magellan who was slain by the natives of Mactan,

a small island near Cebu. In 1565 Spain under-
took the conquest of the country which was named
"Filipinas," after the son of the King of Spain,
and in 1571 the city of Manila was founded by the
conquistador Legaspi, who subdued the inhabitants
of almost all the islands, their conversion from
barbarism and paganism being undertaken by the
Augustinian friars in Legaspi's train. In 1762 the
capital of the Spanish colony was occupied by a
British force, but in 1764 the newly-acquired
territory was restored to Spain. In the nineteenth
century there were frequent disturbances in the
islands, and at the outbreak of the Spanish-American
War of 1898 a rebellion under Aguinaldo, a native
leader, had just died down. After the Spanish
fleet had been destroyed in Manila Bay (May 1,
1898), Manila was captured by American troops
with the help of Filipinos, on Aug. 13, 1898, and
the islands were ceded to the United States by the
Treaty of Paris of Dec. 10, 1898. However, the
Filipinos, under Aguinaldo, rose up in arms on
Feb. 4, 1899, against the U.S. Government, main-
taining a desultory rebellion until it was quelled
in 1902. Following this, the form of government
was a Commission consisting of a Governor-
General and Commissioner appointed by the
President of the United States, who exercised a
large measure of both executive and legislative
authority.

This form of government gave way to a greater
measure of local independence under the Jones Act
of August 29, 1916, which was followed on
March 24, 1934, by the Tydings-McDuffie Law,
which gave the Philippines a "Commonwealth"
Status. The Republic of the Philippines came into
existence on July 4, 1946. The Constitution
provides for a President elected for a term of four
years, and a bi-cameral Congress consisting of a
Senate composed of 24 senators and a House of
Representatives of not more than 120 members.
No person may serve as President for more than
eight consecutive years. The term of office of
Senators is six years and the term of office of
Members of the House of Representatives four
years.

Japanese forces landed in the Philippines on
Dec. 13, 1941, and after a fiercely fought series of
battles, in which the invaders greatly outnumbered
the garrison, occupied the greater part of the
Commonwealth by April, 1942, the island-fortress
of Corregidor holding out until May 9.

The re-conquest of the Philippines was begun on
October 20, 1944, when the Japanese forces were
split in two by a major amphibious operation under
the direction of General Douglas MacArthur.
The expedition seized the eastern coast of Leyte
Island (between Luzon and Mindanao) and pushed
inland with very light losses, and the re-conquest
was soon complete.

Language and Literature.—The official languages
are English, Spanish and the National language (of
Malay origin) Tagalog. The teaching of all three
is compulsory. About one-third of the people
read or understand English. The literacy rate is
nearly 60 per cent. There is a National library
at the capital with branches in other urban centres,
and a flourishing English press. The expenditure
on education for the fiscal year ending June 30,
1954 is P. 161,661,185. Secondary and higher
education is extensive. There are 15 universities
recognized by the Government, including the
Dominican University of Santo Tomas (founded in
1611), the first in the Far East and 25 years older
than Harvard; the State supported University of
the Philippines at Manila (1908) and two Women's
Universities, also at Manila. At Dumaguete there
is Silliman University (Presbyterian).

Roads and Railways.—Communications suffered serious damage during the War of 1941-45 owing to the lack of proper maintenance during the Japanese occupation and to direct destruction by bombardment. The highway system of approximately 17,000 miles of roads and streets is undergoing rehabilitation and extension. Before the war the railways, which were largely Government owned operated approximately 845 miles of track of which some 600 miles were in operation in 1952. Rolling stock losses were also heavy.

Shipping.—The ports of entry are Manila, Cebu, Iloilo, Zamboanga, Davao, Jolo, Legaspi, Aparri, José Panganiban, San Fernando La Union and Tacloban. There are nearly 2,000 vessels of various types, totalling over 130,000 tons, engaged in coastwise and river traffic.

Civil Aviation.—Air transport plays an important role in inter-island travel and in communications overseas.

FINANCE

	1953-54.
Estimated Receipts.....	P.560,465,300
Estimated Expenditure.....	535,364,650*

* Balance of P.25,000,000 earmarked for Counterpart Fund Special Account.

P=Philippine Peso=50 cents U.S.

In 1946 the Congress of the United States appropriated \$520,000,000 for reconstruction and rehabilitation of the islands, to make good the damage done during the Japanese occupation. The Philippine War Damage Commission completed its work on March 31, 1951. The Commission paid out \$388,150,000 in private claims and \$56,800,000 for war damage to public property.

TRADE

	1951	1952
Total Imports...	P.959,032,606	P.852,223,856
Total Exports...	831,484,057	704,812,419
Imports from U.K.	12,728,850	10,461,870
Exports to U.K.	25,259,278	15,300,978

The Philippines is a predominantly agricultural country, the chief products being rice (in which it is almost self-supporting), coconuts, maize, sugarcane, abaca (manila hemp), fruits, tobacco and lumber.

Imports from the U.S.A. are, by Treaty, admitted into the Philippines free of duty. Consequently imports are preponderantly of American origin.

The principal Philippine exports in both natural and manufactured states are coconuts, sugar, abaca, lumber, base metals, embroideries, pineapples, tobacco and gold.

Towns.—Capital, Ψ Manila, in the island of Luzon; population (1948), including the adjoining areas of Quezon City and Rizal City, 1,120,611. The next largest cities are Ψ Cebu (167,503), Davao (111,263), Basilan (110,297), Ψ Iloilo (110,122), Ψ Zamboanga (103,317) and Bacolod (101,432).

Military, Naval and Air Attaché, Lt.-Col. Leon Herzog.

Area and Population.—At the Census of Dec. 3, 1950, the population was 24,977,000, in a Census area of 121,000 sq. miles. The new frontiers of Poland will be finally determined by the Council of the United Nations, but some changes have already taken shape, as foreshadowed at the Tehran Conference (Nov. 28-Dec. 1, 1943). In compensation for territories occupied by U.S.S.R. east of the Curzon Line, about 69,500 sq. miles, Poland received 40,400 sq. miles of Eastern Germany. The southern boundary is not affected,

except that part formerly dividing Poland from Ruthenia (Czechoslovakia); the northern boundary is the Baltic Sea, from west of Königsberg (former capital of East Prussia) to west of Stettin in Pomerania; the western boundary is formed by the Rivers Oder and Neisse.

Government.—The Republic of Poland (reconstituted within the limits of the old Polish Commonwealth) was proclaimed at Warsaw in November, 1918, and its independence guaranteed by the signatories of the Treaty of Versailles. The Polish Commonwealth had ceased to exist in 1795 after three successive partitions in 1772, 1793 and 1795, in which Prussia, Russia and Austria shared. During the Napoleonic wars, the small Grand Duchy of Warsaw was created but was dissolved by the final act of the Congress of Vienna. The so-called "Congress Kingdom" was then established on the Polish territory which had fallen to Russia's share and the Tsar assumed the title of King of Poland. Prussia acquired Poznań and Polish Pomerania, Austria acquired Galicia and the small Republic of Cracow came into existence under the joint control of Prussia, Russia and Austria. In 1831, after an insurrection, the Congress Kingdom was dissolved and annexed by Russia and in 1848 the Austrians absorbed the Cracow Republic, Poland as an independent state ceasing to exist until the end of the War of 1914-18, when she became independent once again, after 150 years of foreign rule.

In March, 1939, Great Britain entered into a treaty with Poland (France had done so in 1921) guaranteeing Polish territory against aggression, and on Hitler's invasion France and England implemented their guarantee. On Sept. 17, 1939, Russian forces invaded Eastern Poland and on Sept. 21, 1939, Poland was declared by Germany and Russia to have ceased to exist and a line of demarcation was established between the German and Russian armies. This line passed along the River Pissa up to its confluence with the River Narew, then along this river, the Bug, the Vistula and the San. Under this fourth partition the U.S.S.R. received 77,000 sq. miles, with 13,000,000 inhabitants, and Germany 73,000 sq. miles, with 22,000,000 inhabitants. Shortly afterwards the demarcation line was moved further east. In 1939 the area of the Polish Republic was 150,572 sq. miles with a population of about 35,000,000 of whom 30 per cent. were National minorities (including 3,000,000 Jews). The predominant religion was Roman Catholic. In 1938 there were 849,873 births (24.6 per 1,000 inhabitants), 472,602 deaths (13.9 per 1,000, and 278,713 marriages (8.1 per 1,000). The infant mortality rate was 140 per 1,000.

In 1947, in accordance with the newly adopted Constitution, a general election was held, but the *Sejm* thus chosen was not regarded by Great Britain and the United States as representative of the free and unfettered choice of the Polish people owing to intimidation and other irregularities. Representatives of Great Britain and U.S.A. were absent by instruction from the opening of the *Sejm* on Feb. 4, 1947. In December, 1948, the Polish Workers' Party and Polish Socialist Party fused in the new United Workers' Party (Communist). This party now closely controls every branch of State activity.

In January, 1952, a draft for a new Polish Constitution was published and thrown open to public discussion. The draft, which is modelled upon the Soviet Constitution of 1936, changes the title of the country to the Polish People's Republic (*Polska Rzeczpospolita Ludowa*). It makes no provision for

the Presidency of the Republic. Private ownership of land is recognized in the draft and freedom of religion is supported. Church and State are to be separate. The draft was adopted on July 22, 1952. Elections to the *Sejm* were held in the following October, and the new Government took office in December 1952.

Defence.—At the outbreak of war in 1939, the Polish Army was the sixth largest amongst those of the United Nations. After the collapse of Poland, the Polish army was organized under General Sikorski in France and took part in the French campaign. Remnants of this Army arrived in Great Britain. Polish airmen operated with the R.A.F. and the Polish Navy with the Royal Navy. In 1941, a Polish Army was formed in the U.S.S.R. under a treaty signed by General Sikorski and Marshal Stalin. A part of this army, under General Anders, was transferred to the Middle East and took part in the Italian campaign. The Polish army operating from Britain took part in the campaigns in France and Germany in 1944, and another Polish army was formed in the U.S.S.R. which, in a short time, developed into a considerable force and fought alongside the Russian Army, taking part in the liberation of Warsaw, in the battles of East Prussia and in the capture of Berlin.

Education.—Elementary education is compulsory and free. In 1949 there were over 3,000,000 pupils in elementary schools, and about 200,000 students in secondary, professional and trade colleges and schools. In addition to the Universities of Warsaw, Cracow, Poznań and Lodz there are 27 other seats of higher study.

Language and Literature.—Polish is a western Slavonic tongue (see U.S.S.R.), the Latin alphabet being in use, as in Czechoslovakia. Polish literature developed rapidly after the foundation of the University of Cracow (a printing press was established there in 1474 and there Copernicus died in 1543). A national school of poetry and drama survived the dismemberment and the former era of romanticism was followed by realistic and historical fiction, including the works of Henryk Sienkiewicz (1846-1916), Nobel Prizewinner for Literature in 1905, Bolesław Prus (1847-1912), and Stanisław Reymont (1868-1925), Nobel Prizewinner in 1924. In 1939 there were 70 daily newspapers published in Poland, 21 of them at Warsaw.

Production and Industry.—On January 3, 1946, a decree was issued to provide for the nationalization of mines, petroleum resources, water, gas and electricity services, banks, textile factories and large retail stores. It was proposed to increase the contribution of the "Socialized Economy" to the country's total production to 82.1 per cent. in 1953.

FINANCE

1953

Estimated revenue, Złote 101,069,000,000

Estimated expenditure, „ 97,125,000,000

Consul-General and Commercial Counsellor to the Embassy, Senhor João Rodrigues Simões Afra.

Area and Population.—Continental Portugal occupies the western part of the Iberian Peninsula, bounded on north and east by Spain, and on south and west by the Atlantic ocean; it contains an area of 34,500 square miles, with an estimated population (including the Azores and Madeira) of 8,490,455 (1950). It lies between 36° 58'–42° 9' 12" N. lat. and 6° 11' 48"–9° 29' 45" W. long., being 302 miles in length from N. to S., and averaging about 117 in breadth from E. to W. The

Azores and Madeira Islands in North Atlantic are politically an integral part of the Republic.

In 1952 there were 218,871 births, 109,222 deaths and 66,845 marriages.

Government.—From the eleventh century until 1910 the government of Portugal was a monarchy, and for many centuries included the Vice-Royalty of Brazil, which declared its independence in 1822. In 1910 an armed rising in Lisbon drove the *King and Royal family into exile, and the National Assembly of Aug. 21, 1911, sanctioned a Republican form of government. Under the Constitution of 1933 the President is elected for seven years by direct vote of the electors. The Prime Minister is appointed by the President, who also appoints the other Ministers on the recommendation of the Prime Minister. The Government is responsible only to the President. There is a single Chamber Legislature (*Assembleia Nacional*) of 120 members elected by direct vote of the electors. There is also a "Corporative Chamber" consisting of representatives of local authorities and industrial, commercial, cultural and religious interests, to which all bills introduced into the Chamber must be submitted for its opinion. The Legislature is in session for three months in the year. In the recess the Government legislates by decrees or decree-laws, of which the latter only must be confirmed by the legislature. Both men and women enjoy the franchise; but there are certain educational or tax-payment qualifications.

Production.—The chief agricultural products of Portugal are cork, wheat, maize, rye, rice, oats, barley, potatoes, beans, chickpeas, onions, olives, oranges, lemons, figs, almonds, resinous products, timber and wine (including the rich red "port" shipped from Oporto). Sardine fisheries are important.

There are extensive forests of pine, oak, cork, eucalyptus and chestnut, covering about 20 per cent. of the total area of the country, and lumbering is the second largest industry.

The mineral products are principally wolfram, lead, tin, antimony, iron pyrites, iron ore, coal, manganese, kaolin, arsenical pyrites and slate. The manufactures are textiles, pottery and chemical products.

Defence.—Military service is compulsory for all men who are physically fit, less than 25 per cent. being exempted each year. The peace strength of the army is officers 2,499 (active list), and about 2,000 (reserve); other ranks—permanent cadre of 29,200 with a yearly class of 35,700. A considerable amount of modern equipment has been received from the U.S.A. The navy consists of 633 officers and 5,677 ratings to be increased during the next two years to 860 officers and 6,375 ratings, manning a total of 40 destroyers, sloops, submarines and gunboats of which 5 destroyers, 6 sloops, and 3 submarines, are of modern construction. All ships are of pre-war or wartime construction, though some of the more important units are being modernized. The total number of Service aircraft is 457. The establishment of the air arm of the Army and Navy is 157 officers and 2,166 men. Although a separate Air Force was formed on June 28, 1952, the officers and men are still shown in the establishments of the Army and Navy.

Language and Literature.—Portuguese is a Romance language with admixtures of Arabic and other idioms. It is the language of Portugal

* King Manuel II, of the House of Braganza, was born Nov. 15, 1889, and succeeded to the throne on the assassination of his father and elder brother, Feb. 1, 1908; died at Fulwell Park, Twickenham, Middlesex, July 2, 1932.

and Brazil. Portuguese language and literature reached the culminating point of their development in the *Lusiadas* (dealing with the voyage of Vasco da Gama) and other works of Camoens (Camoës) born in 1524, died in 1580. Until the second quarter of the nineteenth century Portuguese literature dominated that of Brazil. Modern literature, both prose and verse, is in a flourishing condition and there are more than twenty daily newspapers, of which 9 are published in Lisbon.

Education is free and nominally compulsory between the ages of 7 and 15, but is not strictly enforced, and about 40 per cent. of the population above 7 years old are illiterate. A ten-year plan (1941-50) to decrease illiteracy included the provision of 8,240 additional primary schools at a cost of about £5,000,000. Secondary education is mainly conducted in State lyceums, but there are also private schools. There are also military, naval, technical and other special schools. There are Universities at Coimbra (founded in 1290), Lisbon (1911) and Oporto (1911).

Communications.—In 1951 there were 2,230 miles of railway open for traffic, of which 475 miles were narrow gauge. The mercantile marine consisted (1951) of 273 vessels over 100 tons, with a total tonnage of 478,041. In 1951 24,224,473 gross tons of ocean-going shipping entered Portuguese ports, including 6,002,758 gross tons under the British flag.

Civil Aviation is controlled by the Ministry of Communications. There is an international airport at Portela, about 5 miles from Lisbon. There are 2 civil air lines, an inter-island service and services in Portuguese Africa. B.O.A.C. operates frequent two-way London-Lisbon services. Aquila Airways operate Southampton-Lisbon-Madeira once weekly. There are altogether 19 airlines operating a total of about 300 services a month through Lisbon airport.

FINANCE 1953

Revenue (Budget).....	Escudos	6,364,900,000
Expenditure (do.).....	"	6,351,800,000
Internal Debt (Dec. 1951)...	"	9,823,886,000
External Debt (Dec. 1951)...	"	629,894,000
Floating Debt (credit balance, Dec. 1951).....		382,898,000

The Six-Year Development Plan (1953-58) contemplates an expenditure of about 7,700,000,000 *Escudos* in Metropolitan Portugal, and about 6,000,000,000 *Escudos* in the Overseas Provinces, particularly on resettlement and on hydro-electric and irrigation projects.

Escudo (of 100 *Centavos*) = 3d.

Exchange Rate (stable) about 80 *escudos* = £1.

(See also p. 83.)

TRADE

	1951 Escudos	1952 Escudos
Imports.....	9,464,352,000	9,966,741,000
Exports.....	7,563,316,000	6,819,889,000
Imports from U.K.	£18,233,740	£19,817,610
Exports to U.K....	18,542,850	10,509,700

The principal exports in 1952 were cork and cork manufactures (12½ per cent.), textiles, mainly cotton goods, minerals, mainly wolfram and pyrites, fish, mainly sardines, wine and wool.

The principal imports were machinery, raw cotton, petroleum products, iron and steel, coal, sugar and wheat.

CAPITAL. Ψ Lisbon. Population (estimated, 1950), 784,000. Ψ Oporto 280,000; Ψ Setubal 55,000.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Lisbon, Oporto, Setubal and Villa Real de Santo Antonio (Portugal), Ponta Delgada (Azores), St. Vincent (Cape Verde Islands), Funchal (Madeira), Lourenço Marques and Beira (Portuguese East Africa), Loanda (Portuguese West Africa) and Macão.

BRITISH COUNCIL.—*Representative in Portugal*, M. W. Blake. The British Institute, Rua de Luis Fernandes 3, Lisbon.

There are British Institutes at Oporto (Rua de Breynier, 79) and Coimbra (Rua Alexandre Hercuano, 34).

BRITISH CHAMBER OF COMMERCE IN PORTUGAL, 4 Rua Victor Cordon, Lisbon (Branches at 6 Rua dos Clerigos, Oporto, and 13a Rua 5 de Junho, Funchal, Madeira).

Lisbon, distance 1,110 miles; transit, 50 hours; by air, 5 hours.

MADEIRA AND THE AZORES

Madeira and The Azores are administratively parts of Portugal. Great Britain obtained permission for the United Nations to establish bases in the Azores by treaty with Portugal (October 16, 1943).

The *Madeiras* are a group of islands in the Atlantic Ocean about 520 miles west of Lisbon, and consist of Madeira, Porto Santo and 3 uninhabited islands (Desertas). The total area is 314 square miles, with a population of 249,771 (1940). Ψ Funchal in Madeira, the largest island (270 square miles), is the capital, with a population of 39,558; Ponta do Sol (7,789); Machico (10,820).

The *Azores* are a group of 9 islands (Flores, Corvo, Terceira, Sao Jorge, Pico, Fayal, Graciosa, Sao Miguel and Santa Maria) in the Atlantic Ocean, with a total area of 922 square miles and a population of 284,755 (1940). Ψ Angra, in Terceira, the capital of the group, had a population of 12,465 in 1940; Ψ Ponta Delgada (21,048), where U.S. oil companies have installed tanks for refuelling shipping, and Ψ Horta (8,659).

PORTUGUESE COLONIES

CAPE VERDE ISLANDS, off the west coast of Africa, consist of two groups of islands, Windward (Santo Antao, Sao Vicente, Santa Luzia, Sao Nicolao, Bona Vista and Sal, the last-named having a South Atlantic air base, opened in 1949) and Leeward (Maio, Sao Thiago, Fogo and Brava) with a total area of 1,526 square miles and a population (Census of 1940) of 181,286. Estimated revenue and

expenditure (1953) *Escudos* 33,921,000; imports (1952) *Escudos* 259,836,000; exports *Escudos* 239,108,000; shipping entries (1952) 4,227,175 gross tons. Capital, Ψ Praia (6,000). Vessels take coal and oil at Ψ Mendello, Sao Vicente (pop. 20,000).

SAO THOMÉ and PRINCIPÉ ISLANDS, in the Gulf of Guinea (area 372 square miles, population (1941), 60,490). Estimated (1953) revenue and expenditure, *Escudos* 65,748,246; imports (1952) *Escudos* 134,633,000; exports, *Escudos* 194,341,000; shipping entries (1951) 916,494 gross tons. Capital, Ψ Sao Thomé (3,187). The fort of St. John Baptist on the Slave Coast is a dependency of the Province of Sao Thomé.

PORTUGUESE WEST AFRICA (Angola and Portuguese Guinea) has an area of about 502,000 square miles and a population of about 4,400,000. Angola, area 488,000 sq. miles, pop. 3,788,000, with present capital Ψ St. Paul de Loanda (pop. 40,000), and capital designate Nova Lisboa, includes also Kabinda and Portuguese Zaire (N. of Congo). Angola was restored to Portugal by the Netherlands in 1648. Estimated revenue and expenditure (1953)* *Angolares* 1,152,604,636; imports (1952), *Angolares* 2,627,049,000; exports, *Angolares* 2,750,112,000. Shipping entries (1951) 2,934,199 gross tons. Portuguese Guinea, area 14,000 sq. miles, pop. (1940) 351,000 (capital Ψ Bissau, population 6,000) estimated revenue and expenditure (1953) *Escudos* 861,107,274; imports (1950) *Escudos* 128,251,000; exports, *Escudos* 127,868,000; shipping entries (1950), 118,837 gross tons.

A transcontinental railway from Benguela (Lobito Bay) in Angola traversing the Katanga mineral district of the Congo and thence running southwards through Rhodesia to Bulawayo and eastwards to Beira is being developed under British, Belgian and Portuguese control. This line makes through communication from Lobito Bay on the Atlantic to Beira on the Indian Ocean.

PORTUGUESE EAST AFRICA, OR MOZAMBIQUE, Lourenço Marques, Inhambane, Quilimane, Tete, Mozambique, Cape Delgado and Nyasa, together with the territory of Manica and Sofala, has a total area of 297,657 square miles, with a population of 5,081,266. Capital Ψ Lourenço Marques (48,000). Estimated revenue and expenditure (1953) *Escudos* 1,846,127,161; imports (1951), *Escudos* 2,043,687,000; exports, *Escudos* 1,254,688,000; shipping entries (1949), 13,020,909 gross tons.

Ψ MACAU, in China, on the Canton River, has an area of 5 square miles and a population of 157,175. Estimated revenue and expenditure (1953), \$22,236,840.

FOR PORTUGUESE INDIA see India.

PORTUGUESE TIMOR (the northern portion of the island), in the Malay Archipelago, has an area of 7,329 square miles, with a population of 474,363. Estimated revenue and expenditure (1953) \$8,271,440; imports (1951), *Escudos* 45,129,000; exports, *Escudos* 32,415,000; shipping entries (1951), 79,968 gross tons. Capital, Ψ Dilly, pop. 7,000.

ROUMANIA

(Republica Populara Romăna)

LEGATION IN LONDON

26 Cadogan Square, S.W.1
[Kensington: 4836]

Envoy Extraordinary and Minister Plenipotentiary, His Excellency Pavel Babuci (1953).

Area and Population.—Roumania is a republic of South-Eastern Europe, formerly the classical *Dacia* and *Sythyia Pontica*, having its origin in the union of the Danubian principalities of Wallachia and Moldavia (and the addition thereto of a strip of Southern Bessarabia) under the Treaty of Paris (April, 1856). The Isle of Serpents (*Insula Serpilor*) in the Black Sea, ceded by Turkey in 1878, carries a lighthouse maintained by the Danube Commission; area about 50 acres, with 8 inhabitants. The area in October, 1945, was estimated at 91,600 sq. miles, with an estimated population (1953) of 17,000,000.

Government.—The principalities remained separate entities under Turkish suzerainty until 1859, when Prince Alexandru Ion Cuza was elected Prince of both, still under the suzerainty of Turkey. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown was vested. By the Treaty of Berlin (July 13, 1878) the Principality was recognized as an independent State, and part of the *Dobruja* (which had been occupied by the Roumanians) was incorporated. On March 27, 1881, it was recognized as a Kingdom.

The outcome of the War of 1914-18 added Bessarabia, the Bukovina, Transylvania, The Banat and Crisana-Mamurash, these additions of territory being confirmed in the Treaty of St. Germain, 1919, and the Treaty of Petit Trianon, 1920. In 1940, however, Roumania was forced to restore some of the added territory.

On June 27, 1940, in compliance with an ultimatum from U.S.S.R., Bessarabia and Northern Bukovina were ceded to the Soviet Government, the area affected being about 20,000 sq. miles, with a population of about 4,000,000.

In August, 1940, Roumania ceded to Bulgaria the portion of Southern Dobruja (about 3,000 sq. miles) taken from Bulgaria in 1919.

During 1947 the historical parties, the National Peasant Party and the National Liberal Party, were liquidated and the trials and condemnations of their leaders took place. On Dec. 30, 1947, King Michael was forced to abdicate and the establishment of the Roumanian Peoples' Republic was proclaimed. On February 23, 1948, the Social Democrats were swallowed up by the Communist Party when the two fused to form the Roumanian Workers' Party, since when the Social Democrat element has been steadily liquidated. On March 28, elections were held for the Grand National Assembly. The Front of People's Democracy, composed and dominated by the Roumanian Workers' Party, with its puppets the Ploughmen's Front, the National Popular Party and the Popular Hungarian Union, allocated itself 405 out of 424 seats; the new Constitution was passed and the Presidium and Council of Ministers appointed. Thereafter the progress of the new People's Democracy towards socialism was hastened by the nationalization law of June 11, which brought under State control all industrial enterprises, mining, banking, transport and insurance. In October the Uniate Church was forcibly suppressed. At the turn of the year the dictatorship of the proletariat was officially established. The landowners were dispossessed, disfranchised and exiled on March 2, 1949. In 1950 the creation of collective farms was intensified. The liquidation of the middle classes continued, and on April 20 most buildings owned by former members of the "bourgeoisie" were nationalized without compensation. The Headquarters of the Cominform was established in Bucharest in July, 1948, from when also dates the publication in Bucharest of the weekly Cominform Journal.

The currency reform of January, 1952, effectively wiped out the savings of the peasants. In May, 1952, several ministers were attacked for opposing the currency reform, following a deviationist policy of economic opportunism, and sabotaging the economic development of Roumania. They were replaced by other ministers, and the changes were made the occasion for a tightening of the Workers' Party organization, the elimination of the remaining Social Democrats from the Government and Worker's Party, and the elevation to supreme power of Gheorghiu-Dej.

A new Constitution, modelled on the Soviet Constitution of 1936, was adopted unanimously on September 24, 1952, by the Grand National Assembly. The Assembly was later dissolved and elections were held for a new Grand National Assembly on November 30, 1952; in each constituency there was only one candidate for election, representing the Front of People's Democracy.

Agriculture.—The soil of Wallachia and Moldavia is among the richest in Europe, producing wheat, maize, millet, oats, barley, rye, beans, peas and other vegetables. Grape vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax, and hemp. Agriculture and sheep and cattle raising are the principal industries of the kingdom, but the climate of this part of South-Eastern Europe is of the Continental character, and the intense winter cold and summer heat, and fierce summer drought sometimes defeat these principal industries. The

forests of the mountainous regions are extensive (17,851,401 acres), and the timber industry is important.

Natural Resources and Industry.—Petroleum is the backbone of Roumanian industry and of the country's general economy. Production in 1936 (the peak year) amounted to 8,700,000 tons. In the immediate post-war period, production declined to less than half this figure, but it is now gradually recovering. The country is also rich in other minerals, and produces in limited quantities coal, lignite, iron, gold, silver and mica. An ambitious five-year plan began in 1951, and the Government claims to have exceeded the plan for the first year by 4 per cent. and by 17 per cent. in 1952, in spite of shortcomings in individual industries. The value of industrial production in 1955 (by which time all capitalist elements are to be eliminated from industry) is planned to be 244 per cent. compared with 1950, particular attention being given to the further development of heavy industry. Production of crude oil is planned to reach 10,000,000 tons per annum. The mechanization and collectivization of agriculture will also continue. No absolute production figures and practically no other statistical economic information is now published. The chief branches of Roumanian industry are controlled by joint Soviet-Roumanian companies ("Sovroms").

Language and Literature.—Roumanian is a romance language with many archaic forms and with admixtures of Slavonic, Turkish, Magyar and French words. The folk-songs and folk-lore, composed by the people themselves, and transmitted orally through many centuries (and collected in the 19th century), form one of the most interesting of such collections. The publication of all books and reviews is controlled and authorized by the *Editura de Stat*, which comes under the jurisdiction of the Council of Ministers. In 1948 there were 40 daily newspapers, of which 17 were published in Bucharest. The dominating religion is that of the Greek (Orthodox) Church.

Education is free and nominally compulsory with 1,800,000 in attendance. Secondary schools are attended by 339,000 students. There are five Universities, at Bucharest, Jassy and two at Cluj, one Roumanian and one Hungarian. A "Marxist-Leninist" University was opened in Bucharest in 1951. There are four polytechnics at Bucharest, Timisoara, Craiova and Jassy, two commercial academies at Bucharest and Brasov, and one agricultural college at Bucharest. The Roumanian Academy has fourteen constituent Institutes in Bucharest, four at Jassy and two at Cluj.

Communications.—In 1939 there were about 7,000 miles of railway open for traffic, of which about 1,000 miles were in Bessarabia and Northern Bukovina, now ceded to the Soviet Union. The mercantile marine, as a result of war losses, seizure and reparations, has been reduced to a moderate-sized sea-going steamers and a number of coastal and river craft. The principal ports are Constantza (on the Black Sea), Giurgiu, Braila, and Turnu-Severin (on the Danube), and Sulina (on the Danube Estuary). A canal linking the Danube and the Black Sea just north of Constantza is in course of construction, and work started in 1953 on a canal linking Bucharest with the Danube.

FINANCE		1953
Estimated revenue.....	Lei	38,510,000,000
Estimated expenditure.....		37,510,000,000
Debt (March 31, 1947):—		
Internal.....		79,734,196,285
External.....		45,226,229,184

Up-to-date figures of the Public Debt are not available. No foreign loans (other than short-term commercial loans) are known to have been contracted since March, 1947. The internal debt was virtually wiped out by stabilization in August, 1947; there has been no internal loan issue since that date.

The Roumanian *Leu* (of 100 *Bani*) was revalued on Jan. 28, 1952, and one new *leu*=20 old *lei*, foreign exchange rates being fixed at £1=31.04 *lei* and 1 U.S. \$=11.20 *lei*.

	TRADE	1947
Imports.....	U.S. \$	\$61,300,000
Exports.....		34,300,000

No later figures have been published. Imports are chiefly semi-manufactured goods, raw materials, machinery and metals; exports consist principally of maize, wheat, barley, oats, petroleum, timber and cattle. Trade with U.K., and particularly exports to Roumania, increased considerably after the War, but has declined recently. In 1952 the value of U.K. exports was £1,495,540; that of Roumanian exports to U.K. £953,799. By far the greater part of Roumania's foreign trade is now with the Soviet Union and the other countries of Eastern Europe. Roumania is a member of the Soviet-sponsored "Council for Mutual Economic Assistance."

CAPITAL, Bucharest, on the Dimbovitza, population (1948) 1,041,807. Other towns are Jassy (110,000), Ψ Galatz (90,000), Timisioara (115,000), Ψ Braila (100,000), Arad (85,000), Ploesti (100,000), Ψ Constantza (80,000), Craiova (65,000), Ψ Ismail (27,000), Ψ Tulcea (26,000), Ψ Giurgiu (25,000), Ψ Turnu-Severin (30,000), Ψ Turnu-Magurele (11,000), Brasov (85,000), Cluj (120,000), Oradea-Mare (80,000), and Ψ Sulina (8,000).

FLAG: Three vertical bands, blue, yellow, red, with the emblem of the Republic (mountains, fir trees, and an oil derrick, with a rising sun in the background, the whole surrounded by ears of wheat, at the top a five-cornered star, and at the bottom a ribbon with the letters "R.P.R.") in the centre band.

BRITISH LEGATION

24 Strada Jules Michelet, Bucharest 3

British Minister, His Excellency William John Sullivan, C.M.G., C.B.E. (1951).

1st Secretary, H. C. Hainworth.

Military Attaché, Colonel A. W. Ward.

Air Attaché, Group Captain G. F. Rodney, D.F.C., A.F.C.

2nd Secretary (Commercial), J. F. Whitfield.

2nd Secretary and Vice-Consul, A. C. Dugdale.

2nd Secretary and Legation Medical Officer, T. V. Humphreys.

3rd Secretary, E. A. W. Bullock.

SAARLAND

(Republic of Saarland)

Situated on the North-Eastern frontier of France, Saarland is defined in its Constitution, adopted on November 8, 1947, as "an autonomous, democratic and social country, economically linked to France." It has an area of 800 square miles and a population (estimated 1953) of 975,476. Coal mining and steel production are the principal industries. By the Treaty of Versailles the Saar was placed for 15 years under control of the League of Nations and at the end of this period the territory reverted to Germany, following a plebiscite. Saarland was occupied by United States forces in March, 1945, and from 1945 to 1947 was incorporated in the French Zone of Occupation.

Government.—Saarland is governed by an elected legislative assembly of 50 members.

CABINET

(Dec. 23, 1952)

Prime Minister, Minister of Labour, Reconstruction and Public Works, and Minister of European and Foreign Affairs, Johannes Hoffmann.

Interior, Dr. Edgar Hector.

Finance and Forests, Erwin Muller.

Justice, Dr. Heinz Braun.

Public Worship and Education, Dr. Franz Singer.

Labour and Social Insurance, Richard Kirm.

Economic Affairs, Transport, Agriculture and Food, Franz Ruland.

Agreements between France and Saarland, concluded on October 20, 1950, provided that (1) Saarland possesses autonomy in legislative, administrative and juridical matters, exercised under the Constitution of 1947 and existing arrangements with France by which France is responsible for foreign relations and defence of Saarland and the maintenance of the economic and Customs union between the two countries; (2) both countries undertake not to discriminate against the other's products; the interests of Saarland will be considered in any negotiations with third parties; the Saarland Government undertakes to refrain from any measures which might give Saar producers an unfair advantage; a mixed economic committee would be set up to apply the economic agreement; (3) France's 1946 claim to the eventual ownership of the Saar coal-mines would be dropped and her support given to the claim of Saarland when a German peace treaty was negotiated, provided that French control of Saar coal output (over 15,000,000 tons a year) would be continued to a total duration of 50 years should ownership be given to Saarland by the peace treaty; Saarland would be associated with the administration of the coal-mines; (4) Saarland railways would be run by a mixed board of Saarland and French nationals and goods and passenger charges would be the same as those in France; (5) nationals of either country would be allowed to reside and work in the other, enjoying the same rights as nationals of the country in which they resided. Diplomatic missions in Saarbrücken and Paris were established by France and Saarland in January, 1952. A law introducing the French franc as currency in Saarland was introduced by the French National Assembly and the Saarland Legislative Council in November, 1947.

CAPITAL: Saarbrücken, population 115,276. Other principal towns are Neunkirchen (43,340), Saarlautern (32,286) and St. Ingbert (26,588).

FLAG: White cross on a blue and red background.

SALVADOR

(República de El Salvador)

President, Lt.-Colonel Oscar Osorio, elected March 26, 1950.

LEGATION IN LONDON

6 Roland Gardens, S.W.7.

[Fremantle: 2455]

Minister in London, Colonel Don José Arturo Castellanos.

Secretary, Señor Don Miguel A. Serrano.

Consul-General in London, Señor Don Miguel A. Serrano, 36 Moss Hall Grove, N.12.

Area and Population.—The Republic of El Salvador extends along the Pacific coast of Central America for 160 miles with a general breadth of about 50 miles, and contains an estimated area of 13,176 square miles, with a population (1951 estimated) of 1,954,000. El Salvador is therefore one of the most densely populated countries of the new world. It is divided into 14 Departments.

In 1951 there were 93,634 births, 29,030 deaths and 8,666 marriages. Infant mortality was 71 per 2,000 live births.

The surface of the country is very mountainous, many of the peaks being extinct volcanoes. The highest peaks are the Santa Ana volcano (7,700 ft.) and the San Vicente volcano (7,200 ft.). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot and unhealthy, but towards the interior the altitude tempers the severity of the heat and much has been done in recent years to improve sanitary conditions and services. There is a wet season from May to October, and a dry season from November to April. Earthquakes have been frequent in the history of El Salvador, the most recent being that of May 6, 1952, when the towns of Jucuapa and Chinameca were destroyed.

The principal river is the Río Lempa. There is a large volcanic lake (Ilopango) a few miles to the east of the capital, while farther away and to the west lies the smaller but very picturesque lake of Coatepeque, which appears to have been formed in a vast crater flanked by the Santa Ana volcano. The eastern spur of this volcano forms the peak of Izalco, which is in an almost constant state of volcanic activity, and (on account of its visibility from the ocean) is known as "The Lighthouse of the Pacific."

Government.—Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish vice-royalty of Guatemala until 1821. In 1839 the Republic broke away from the federation of Central American States. The Constitutional and Governmental system of the Republic was changed as a result of the *coup d'état* on December 14, 1948, when the previous president, General Salvador Castaneda Castro, was deposed and the Council of Revolutionary Government took over. The Council decreed that all earlier constitutions were null and void and that the country had entered into a pre-Constitutional era. It then adopted certain parts of the Constitution of 1886, amended as it considered necessary. Subsequently the Council appointed a Commission to re-write the Constitution. The Council of Revolutionary Government continued in office, and in March, 1950, elections were held for the presidency and for the National Assembly, with, for the first time in the country's history, universal male and female suffrage. Major Osorio, one of the members of the Council of Revolutionary Government, was elected President, and his supporters won 38 seats out of 52 in the new Constituent Assembly. On Sept. 14, 1950, the President was inaugurated and the new Constitution came into force.

Production and Industry.—The chief industry is the cultivation of coffee, which is grown under shade-trees principally on the slopes of the volcanoes; cane sugar is also produced, as well as maize, sesame, indigo, rice, balsam, etc. Cotton-growing is on a large scale. In the lower altitudes towards the east, sisal is produced and used in the manufacture of coffee and sugar bags.

Education.—Primary education is compulsory and free. Pupils registered at schools in 1949 were:—Kindergartens, 4,678; Primary Schools, 144,442; Secondary Schools, 4,872. There is also a national University in the capital with approximately 900 students.

Language and Literature.—The language of the country is Spanish. Indigenous literature has not yet produced work of international repute. In 1949 there were 5 daily newspapers published at the capital, and 3 in the provinces.

Communications.—A British railway (the Salvador Railway Co.), nearly 100 miles in length, connects Acajutla with the capital and with the important coffee centre of Santa Ana. The International Railways of Central America have a line from the port of La Unión (on the Gulf of Fonseca) to the capital and another one in the opposite direction which taps the richest coffee growing region in the country and proceeds to Zacapa (in Guatemala) thereby affording continuous railway communication between San Salvador and Guatemala City and Puerto Barrios on the Caribbean coast. The re-draining and re-paving of most of the capital has been completed, as has also the macadamizing or paving of several hundred miles of rural roads, many of which are now passable all the year round. There is a good motor road between the port of La Libertad and the capital (23 miles), while motor transportation is possible throughout the year between the capital and Guatemala City. The Pan-American Highway from the Guatemalan frontier follows this route and continues to the Honduran frontier. The highway is now completed through the country. Pan-American Airways, TACA and KLM connect El Salvador with the U.S., Mexico and Central American countries.

There are post and telegraph offices throughout the country, and there are now 18 broadcasting stations.

FINANCE

	1952 Colones	1953 Colones

Hon. Commercial Attaché, S. M. Stadler, O.B.E.

There is a Consular Office at La Libertad.
San Salvador is 5,700 miles from London.

SAN MARINO

(Republica di San Marino)

Regents, Two "Capitani Reggenti"

CONSULATE GENERAL IN LONDON

142 Sloane Street, S.W.1

Consul General, G. T. MacEwan.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century. The Republic always resisted the Papal claims and its integrity was respected by Italy, with which country it concluded (June 28, 1897) a treaty of *amicizia e buon vicinato*; a new treaty on similar lines was signed on April 29, 1953. The Republic is governed by a Council of 60, of whom two are elected as Regents for six months (1 April and 1 October), being thereafter ineligible for office for three years. A Council of Twelve forms a Supreme Court of Justice. The area is 38 square miles, the population 13,000. There is an army of 180. The city of San Marino, on the slope of Monte Titano, has three castles, a fine church and Government palace, a theatre and a museum. The principal industries are wine, cereals, cheese, olive oil, cattle and ceramics, in addition to the utilization and export of worked stone from Monte Titano and production of white and hydrated lime, at Serravalle. A Treaty of Extradition was concluded between the Governments of Great Britain and the Republic of San Marino on Oct. 16, 1899.

The revenue and expenditure (1952) balanced at 600,000,000 lire; there is no debt. The capital, San Marino, has a population of 2,000.

FLAG: Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

Press Attaché, Don José Brugada.

Agricultural Attaché, Don Serafin Sabucedo.

Labour Attaché, Don Manuel de Pablos.

Honorary Attaché, Don Francisco de Salas.

Consular Section, 21 Cavendish Square, W.1.

Area and Population.—A National State in the south-west of Europe, between 36°-43° 45' N. lat. and 4° 25' E.-9° 20' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees. Continental Spain occupies about eleven-thirteenth of the Iberian peninsula, the remaining portion forming the Republic of Portugal. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 196,700 square miles, with an estimated population (Dec. 31, 1950) of 28,039,112. In 1949 there were 594,986 births, 316,058 deaths, and 196,473 marriages. Infant mortality in 1949 was 68.3 per 1,000 live births.

Physical Features.—The interior of the Iberian Peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, Sierra Morena, Sierra Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho.

Government.—Phoenician traders visited the peninsula more than a thousand years before the Christian era, but they were traders rather than settlers, although Cadiz has preserved its identity and claims to be "the oldest city in the world." The Roman occupation of Spain was completed after the close of the Second Punic War (201 B.C.) and Hispania was divided into two provinces. After the decline of the Roman Empire the Italian elements, which had partly displaced the Celts and Iberians, were in turn disturbed by settlers of Germanic origin. After the union of Aragon and Castile in the 15th century Spain was ruled by sovereigns of the Aragon, Habsburg and Bourbon lines (with the intervention of a Republic 1873-74), Alfonso XIII. succeeding at birth in 1886. On April 14, 1931, following the results of the Municipal Elections, which showed anti-monarchical feeling to be extremely high in all the chief towns of Spain, King Alfonso XIII. left the country, and the Queen and other members of the Royal Family on the following day. A Republic was

immediately proclaimed and a Provisional Government, drawn from the various Republican and Socialist parties, was formed. The Republican Assembly (*Cortes*) was a single Chamber Congress of Deputies. Each Province had an Assembly (*Diputación Provincial*), and, with the approval of the *Cortes*, Provinces might combine to form an Autonomous Region within the Republic.

In 1936 a General Election resulted in favour of the Coalition of the Left, with a majority of 57 over the Right and Centre Parties. President Zamora resigned in April and on May 30 Don Manuel Azaña, the *Popular Front* Leader, was elected to succeed him.

On July 18, 1936, a counter-revolution broke out in many military garrisons in Spanish Morocco and spread rapidly throughout Spain. The principal leader was General Francisco Franco Bahamonde, formerly Governor of the Canary Islands, from which office he was dismissed by the Azaña Government. The struggle, in its later phases, threatened to embroil some of the European Powers, those of Nazi-Fascist tendency lending aid to General Franco (leader of the Military-Fascist fusion, or *Falange*) while those of Communist views supported the Azaña (*Popular Front*) government. In October, 1938, many of the supporting troops were withdrawn, and on March 29, 1939, the Civil War was declared to have ended, the *Popular Front* Governments in Madrid and Barcelona surrendering to the *Nationalists* (as General Franco's followers were then named). On June 5, 1939, the Grand Council of the *Falange Española Tradicionalista y de las Juntas Ofensivas Nacional-Sindicalistas*, which replaced the former *Cortes*, met at Burgos to legislate for the reorganization of the country under the Presidency of General Franco, who had assumed the title of *Caudillo* (Leader) of the Empire and Chief of the State. In the Civil War of 1936-39 over 1,000,000 lives were lost.

On July 1, 1942, General Franco announced the reinstitution of the *Cortes de España*, which was composed (March, 1943) of 438 members (*Procuradores*), 13 Ministers, 103 National Counsellors of the *Falange*, 142 Presidents of the State Council and of the Civil and Military Courts, Representatives of the national syndicates, 102 Mayors of Provincial Capitals and of Ceuta and Melilla, 12 Rectors of Universities, 6 Presidents of the Royal Academies, and 7 representatives of the Institutes of Civil Engineers, Lawyers, Doctors, Chemists, Veterinaries and Architects.

On April 1, 1947, a draft law was submitted to the *Cortes* by which Spain was again to become a monarchy, but for the present without a King. A Council of the Realm was, however, to assist General Franco, and to select a successor after his death or incapacity. On July 6, 1947, a referendum asking approval of this law was announced (July 27) to have received 14,145,163 affirmative votes out of a recorded total of 15,219,563. Under this law a Regency Council was to be set up in the event of the death or incapacitation of the Head of the State.

Defence.—*Army*.—Spain is divided into 9 Military Regions. Eight of these regions have a Corps headquarters with 2 Divisions, and the 9th region has one Division. There are independent commands in the Balearics and Canaries. There are also one Armoured and one Cavalry Division. The garrison of Spanish Morocco is the equivalent of 4 divisions.

The Navy consists of 6 cruisers, 20 destroyers, 6 mine-layers, 11 gunboats, 9 minesweepers and 5 submarines, with many auxiliary craft. Sixteen destroyers, 6 escort vessels, 6 ocean minesweepers and several auxiliary craft are being built.

An independent *Air Force* was formed in 1939. It is divided into 5 Air Regions and 3 Overseas Commands, with a total of 16 Fighter, Bomber and Mixed Regiments. The Regiments contain one or more Groups, and the Groups one or more Squadrons.

Education.—Primary education is free, but compulsory attendance cannot be enforced because of the inadequate number of Church schools. The census of 1940 revealed illiteracy figures of over 4½ million males and 5½ million females, about 34 per cent. of the total population. In spite of the large number of Church institutions, the existing secondary schools are also inadequate and at present overcrowded. Training colleges have been set up for teachers in elementary schools. There are 11 Universities in continental Spain and 1 at La Laguna in the Canary Islands. The University of Salamanca was founded in 1230, Valencia (1245), Oviedo (1317), Valladolid (1346), Barcelona (1450), Saragossa (1474), Santiago (1501), Seville (1502), Granada (1526), Madrid, Murcia (1915).

Language and Literature.—Castilian is the language of more than two-thirds of the population of Spain and is the form of Spanish spoken in Mexico, Central and (except in Brazil) Southern America. Catalan is a dialect in Provencal Spain, and Galician, spoken in the north-western provinces, is allied to Portuguese. The literature of Spain is one of the oldest and richest in the world, the *Poem of the Cid*, the earliest and best of the heroic songs of Spain, having been written about A.D. 1140. The outstanding writings of its golden age are those of Miguel de Cervantes Saavedra (1547-1616), Lope Felix de Vega Carpio (1562-1635) and Pedro Calderón de la Barca (1600-1681). The Nobel Prize for Literature has twice been awarded to Spanish authors—J. Echegaray (1904) and J. Benavente (1922). In 1949 there were 118 daily newspapers in the country, 8 being published at Madrid, 7 at Barcelona, 4 at Seville, 3 at Bilbao and 3 at San Sebastian.

FINANCE

	1952
Revenue (Budget).....	Pesetas 22,762,100,000
Expenditure (do.).....	" 20,751,800,000
Public Debt (Dec. 31, 1951) ..	" 69,186,000,000

The official rate for the *peseta* (of 100 *céntimos*) is 30.66 = £1 sterling, but this is largely a nominal quotation, actual rates for imports and exports varying according to the type of goods involved. For other financial transactions and for tourists the rate applied is that ruling on the "free" market which, at June 1, 1953, was *pesetas* 110.31 = £1.

Production and Industry.—The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, apricots and grapes. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The 1952-53 orange crop was over 1,000,000 tons, of which the greater part was exported, chiefly to the United Kingdom and Germany. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry and tent wines are made; in the south-east, the Malaga and Alicante. Exports of agricultural produce represent about 60 per cent. of Spain's foreign currency earnings.

The livestock in 1948 included about 3,300,000 cattle, 607,000 horses, 746,000 asses, 1,078,000 mules, 15,921,000 sheep, 4,221,000 goats and 2,268,000 swine.

Spain's mineral resources of coal, iron, tungsten, copper, lead and other ores are variously exploited.

Many of the richer and more easily worked deposits have been exhausted, but the authorities are actively engaged in stimulating the exploitation of hitherto unworked or lower grade deposits. In 1952 the coal mines produced 10,212,000 tons of bituminous coal, 1,824,000 tons of anthracite and 1,596,000 tons of lignite. The production of Spanish and Riff iron ore amounted to 3,861,000 tons and pyrites to 2,141,000 tons. The iron and steel industries produced 761,100 tons of pig iron and 907,300 tons of steel.

The fishing industry, mainly sardines, tunny and cod, is of importance and there were over 1,000 canning factories in 1948.

The principal manufactures are textile goods of all kinds, boots and shoes and other leather goods, ceramics, sewing machines, bicycles, chemicals and light engineering products.

Communications.—In 1950 there were 12,948 kilometres of normal gauge and 4,924 of narrow gauge of railway open. The sea-going mercantile marine in 1950 consisted of 1,392 vessels of 1,198,253 gross tons; 7,929 ocean-going vessels (11,004,418 gross tons) entered Spanish ports. Civil aviation is under the control of the Minister of Air; there are several inland and international services in operation.

TRADE.

	1950	1951
	*Gold Pesetas	*Gold Pesetas
Imports.....	1,190,636,000	1,299,323,000
Exports.....	1,189,409,000	1,472,252,000
Imports from U.K....	107,582,000	111,838,000
Exports to U.K.....	250,605,000	304,123,000

(The above figures do not include gold and silver shipments.)

* 8.571 Gold pesetas = £1.

The principal imports are cotton, jute, cereals, dried pulses, sugar, coffee, tobacco, cellulose, timber, nitrates, dyes, machinery, motor cars, petroleum products, coal, wool, agricultural tractors and machinery. The principal exports are iron and wolfram ores, cork, hides, perfume essences, salt, fish, vegetables, citrus fruits, wines, potash, olive oil, mercury, sheepskins, lead, pyrites, tinned fruit and tomatoes.

CAPITAL, Madrid. Population (estimated, Dec. 31, 1950), 1,527,894. Other large cities are Ψ Barcelona (1,276,675), Valencia (503,886), Ψ Seville (374,138), Zaragoza (244,015), Ψ Malaga (274,847), Murcia (217,934), Ψ Bilbao (216,417), Granada (154,589), Cordoba (160,347), Las Palmas, Canaries (153,856), Valladolid (119,499), Palma, Majorca (133,397), Ψ Vigo (140,000), La Coruña (127,000), Ψ San Sebastian (114,000), Ψ Cartagena (117,000), Ψ Alicante (101,791), Ψ Santander (100,069), Ψ Gijón (103,000), Ψ Almería (75,861), Ψ Cadiz (98,754), Jerez de la Frontera (93,000), Salamanca (74,223), Oviedo (100,813), Albacete (69,504), Santa Cruz de Tenerife (103,110), Burgos (61,789), Pamplona (72,000), Lorca (70,000).

FLAG: Three equal horizontal bands (red, yellow and red).

BRITISH EMBASSY

(Calle Fernando el Santo, 16, Madrid)

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir John Balfour, K.C.M.G. (1951).
Counsellors, F. R. H. Murray, C.M.G.; B. Malley, C.B.E.

1st Secretaries, D. H. T. Hildyard, D.F.C.; A. K. Rothnie; K. C. Benton.

2nd Secretary and Consul, W. A. H. Goodman, O.B.E.

and Secretaries, A. G. L. Gallegos; Lt.-Col. N. Craig, D.S.O., O.B.E.

3rd Secretary, H. C. Birtles, M.B.E.

Counsellor (Commercial), J. R. Cotton, O.B.E.

1st Secretary (Commercial), A. M. Turner.

3rd Secretaries (Commercial), W. B. Milton, M.B.E.; B. C. Camous.

Counsellor (Labour), W. H. Braine, C.B.E.

1st Secretary (Information), R. P. Pinsent.

2nd Secretary (Information), Hon. E. B. C. Howard.

Naval and Air Attaché, Commander J. B. Cox, D.S.C., R.N.

Military Attaché, Brigadier C. Goulburn, D.S.O.

Senior Archivist, N. L. Forter.

Chaplain, Rev. G. P. Beaumont, M.B.E.

BRITISH CONSULAR OFFICES

There are Consular Offices at Barcelona, Palma de Mallorca, Tarragona, Fernando Po (Spanish Guinea), Valencia, Cartagena, Malaga, Granada, Seville, Cadiz, Huelva, Jerez, Algeciras, La Linea, Vigo, Coruña, Gijón, Bilbao, Santander, Tenerife, Las Palmas, Orotava (Canary Islands), and Madrid.

BRITISH COUNCIL—Representative of the British Council in Spain, Professor W. F. Starkie, C.B.E., Litt.D., The British Institute, Calle de Almagro 5, Madrid.

There are British Institutes at Madrid, Barcelona, Seville and Valencia.

BRITISH CHAMBER OF COMMERCE OF SPAIN, Alcalá 45, D (Segundo), Madrid; Paseo de Gracia II (Segundo), Barcelona.

Madrid, 1,150 miles; transit, 45 to 50 hours.

The **BALEARIC ISLES** are an archipelago off the east coast of Spain. There are four large islands (Majorca, Minorca, Iviza and Formentera), and seven smaller (Aire, Acanada, Botafoch, Cabrera, Dragonera, Pinto and El Rey). The islands were occupied by the Romans after the destruction of Carthage and provided contingents of the celebrated Balearic slingers. The total area is 1,935 square miles, with a population (1948) of 433,444. The archipelago forms a province of Spain, the capital being Ψ Palma in Majorca, pop. (1948) 138,071; Ψ Mahon (Minorca), pop. (1940) 20,000.

The **CANARY ISLANDS** are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population (1941) of 696,982. The Canary Islands form two Provinces of Spain.—*Las Palmas* (Gran Canaria, Lanzarote, Fuerteventura and the islets of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos), with seat of administration at Ψ Las Palmas (pop. 1948, 150,010) in Gran Canaria, where U.S. oil companies have installed tanks for re-fuelling shipping; and *Santa Cruz de Tenerife* (Tenerife, La Palma, Gomera and Hierro), with seat of administration at Ψ Santa Cruz in Tenerife, pop. (1948) 106,798.

ISLA DE LOS FAISANES or **ILE DE LA CONFERENCE** is a Franco-Spanish condominium, under the Treaty of Bayonne Dec. 2, 1856, and March 27, 1901. It lies at the mouth of the Bidassoa in La Higuera bay. It is uninhabited.

Spanish Colonies

The Spanish Colonies consist of certain settlements in, and islands round the coast of, Africa, with a total area of close on 82,400 square miles, and a population estimated in 1935 at 951,000.

Ψ **CEUTA** is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 square miles, with a population of 67,790.

Ψ MELILLA is a town on a rocky promontory of the Rif coast, connected with the mainland by a narrow isthmus. Melilla has been in Spanish possession since 1492. The population is 94,319.

There are British Consulates at Tetuan, Ceuta and Melilla.

SPANISH GUINEA, consisting of the islands of Fernando Pó and Annobon, the Corisco Islands and Río Muni (mainland). Fernando Pó lies in the Bight of Biafra in 3° 12' N. lat. and 8° 48' E. long., about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. With its dependencies it has an area of about 800 square miles, and a population estimated at 34,200. The capital of Spanish Guinea is Ψ Santa Isabel (pop. 9,000) on the island of Fernando Pó. The total area, mainland and islands, is about 10,000 sq. miles, with an estimated population of 170,582, of whom about 4,124 are whites.

Annobon Island (Anno Bom), in the Gulf of Guinea, in 1° 24' S. lat. and 5° 3E. long.; population 1,410.

Corisco Islands, consisting of Corisco, Elobey Grando, and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce.

Río Muni is a coastal settlement between Cameroon and French Congo (1° N.—2° 10' N. lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni, Benito, and Campa rivers, and at Ψ Bata (the principal town) on the coast.

WESTERN SAHARA—Spanish possessions in the Western Sahara extend from N. of Cape Blanco to S. of Cape Ifni, exclusive of Wadi Draa (Treaty with France, Nov. 27, 1912) but including the Ifni enclave. The Colony includes Río de Oro, La Agüera and Ifni, and lies approximately between 21° 20'–26° N. lat., extending eastwards to about 13° W. long. Total area about 100,000 sq. miles (including part of the waterless Sahara, with a sparse population of wandering Moslem Arabs), total population about 32,000. Capital, Ψ Villa Cisneros, pop. about 250.

SPANISH MOROCCO.—In addition to Ceuta and Melilla, Spain also exercises a protectorate over a part of Northern Morocco (see "Morocco"), and on the Moroccan seaboard are certain Spanish settlements:—

Alhucemas, the bay of that name, includes six islands: population 366.

Peñon de la Gomera (or Peñon de Velez) is a fortified rocky islet about 40 miles west of Alhucemas Bay: population 450.

The Chafarinas (or Zafarinas) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 610.

THE SUEZ CANAL

The Suez Canal.—The Compagnie Universelle du Canal Maritime de Suez (1 Rue d'Astorg, Paris VIII) is an Egyptian company, authorised in 1856, and confirmed in 1866, with a capital of 200,000,000 francs in 400,000 shares of 500 francs each. The British Government acquired from the Khedive in 1875 a total of 176,602 shares (cost £4,000,000, value March 31, 1953, £26,980,734). Since 1924 each 500 franc share has been divided into two 250 franc shares.

The Suez Canal was opened in 1869. The total length of the canal is 101 miles, with a minimum width of 60 metres (196 ft. 10 in.), the maximum draught of water allowed for vessels using the canal is 10.36 metres (34 feet). The average time for the transit through the canal is 11 hours 11 minutes (1952). By a convention, signed on Oct. 29, 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 32 administrators, of whom 9 are British (three representing H.M. Government and six the shipowning interest).

British Commercial Directors, Sir T. Harrison Hughes, Bt. (Vice-President of the Company); Maj. A. H. Bibby, D.S.O.; Sir William Currie, G.B.E.; Sir Hubert Heath Eves; The Lord Rotherwick; The Lord Hankey, P.C., G.C.B., G.C.M.G., G.C.V.O.

Representing H.B.M. Govt., E. W. Meiklerleid, C.M.G. (Resident Director); Right Hon. Sir Alexander Cadogan, O.M., G.C.M.G., K.C.B.; and Sir Francis Verner Wylie, G.C.I.E., K.C.S.I.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal in the 13-year period 1940–1952, with the percentage of British vessels:—

Year	No. of Vessels	Net Tons	British Tonnage
			%
1940	2,589	13,535,712	55.11
1941	1,804	8,262,841	62.2
1942	1,646	7,027,763	65.1
1943	2,262	11,273,802	59.5
1944	3,320	18,124,952	57.1
1945	4,206	25,064,966	63.4
1946	5,057	32,731,631	62.6
1947	5,972	36,576,581	47.2
1948	8,686	55,081,056	37.6
1949	10,420	68,861,548	36.1
1950	11,751	81,795,523	32.5
1951	11,604	80,356,338	33.5
1952	12,168	86,137,037	33.3

The transit receipts in 1870 were 4,345,758 fr. (gold), in 1938, 1,625,612,100 fr. (paper), and in 1952, 26,849,015,735 fr. (paper).

The rate of transit dues from Sept. 15, 1951, and until further notice, is 36.5 piastres per ton for laden vessels, and 17 piastres per ton for vessels in ballast.

The net dividends for the year 1952 amounted on the ordinary 250 fr. (gold) shares to 6,841 francs, 83 centimes and on the Actions de Jouissance to 5,877 francs, 56 centimes.

The 12,168 vessels included in the total for 1952 were grouped under the following categories:—

	No.	Net Tonnage
Merchant vessels (laden)...	7,422	49,129,124
Mail steamers.....	1,319	10,406,657
Warships and transport....	348	2,180,229
Merchant vessels in ballast..	3,079	24,421,027
	12,168	86,137,037

The tonnage of the merchandise carried was 25,775,000 tons in 1913; 17,047,000 tons in 1920; 28,779,000 tons in 1938, and 83,448,000 tons in

1952. Details of the nationality of the vessels passing through the Canal in 1952 are appended:—

Flag	No. of Vessels	Net tons
British.....	4,212	28,643,186
Norwegian.....	1,663	13,547,914
French.....	1,018	7,737,864

Other.....	605	2,960,897
	12,168	86,137,037

SWEDEN

(Sverige)

*King of Sweden, of the Goths and the Wends**, Gustaf VI., Adolf, elder son of the late King Gustaf V, born Nov. 11, 1882; married (1) June 15, 1905, H.R.H. the late Princess Margaret of Connaught (died May 1, 1920), (2) Nov. 3, 1923, Lady Louise Mountbatten, Princess of Battenberg, born July 13, 1889.

Heir Apparent, Carl Gustaf, Duke of Jämtland, grandson of the King, born April 30, 1946.

Children of the King (by 1st marriage), (1) The late Prince Gustaf Adolf, born April 22, 1906, married Oct. 10, 1932, Princess Sibylle of Saxe-Coburg-Gotha, died Jan. 26, 1947, leaving issue:—Prince Carl Gustaf (*Heir Apparent*); Princess Margaretha, born Oct. 31, 1934; Princess Birgitta, born Jan. 19, 1937; Princess Desirée, born June 2, 1938; Princess Christina, born Aug. 3, 1943; (2) Princess Ingrid, born March 28, 1910, married May 24, 1935, Frederik, King of Denmark; (3) Prince Bertil, Duke of Halland, born Feb. 28, 1912.

Brother of the King, Prince Wilhelm, Duke of Södermanland, born June 17, 1884, married May 3, 1908, the Grand Duchess Maria Pavlovna of Russia; marriage dissolved March 17, 1914.

CABINET.

(Formed July 31, 1945)

Prime Minister, Tage Erlander.
Justice, Herman Zetterberg.
Foreign Affairs, Dr. Östen Undén.
Defence, Torsten Nilsson.
Social Affairs, Gunnar Sträng.
Civil Affairs, John Lingman.
Communications, Sven Andersson.
Finance, Per Edwin Sköld.
Education and Ecclesiastical Affairs, Ivar Persson.
Agriculture, Samuel Norup.
Commerce, John Ericsson.
Interior, Gunnar Hedlund.
Ministers without Portfolio, Ingvar Lindell; Hjalmar Nilson; Allan Nordenstom.

SWEDISH EMBASSY IN LONDON

(29, Portland Place, W.1)

[Langham: 2080]

Ambassador Extraordinary and Plenipotentiary in London, His Excellency Gunnar Häggblöf.
Counsellor of Embassy, S. Aström.
Commercial Counsellor, H. E. Kleen.

* This is the official title of the King of Sweden.

1st Secretary, A. Jonsson.

2nd Secretary, H. Gadd.

3rd Secretary, G. Luthman.

Attaché, G. Lonacus.

Military Attaché, Brig. T. Hedqvist.

Naval Attaché, Commodore B. Thermanius.

Assistant Naval Attaché, Lt.-Comm. G. Reuterswärd.

Air Attaché, Colonel A. Falk.

Assistant Air Attaché, Capt. F. Bissmarck.

Agricultural Counsellor, M. W. F. de Wachenfelt.

Counsellor and Press Attaché, V. Hammarling.

Assistant Press Attaché, S. A. Sundfeldt.

Chaplain, Rev. K. A. Uddling.

Consulate-General, 14, Trinity Square, E.C.3.

Consul-General, C. A. M. Hallenborg.

Vice-Consuls, O. Ripa; C. B. C. Hartzell.

Area and Population.—Sweden occupies the eastern half of the Scandinavian peninsula in N.W. Europe and comprises 25 governments, "Län," with an area of 173,436 square miles and a population, Jan. 1, 1952, of 7,046,920. Of the 109,500 (approx.) foreigners with permission to reside in Sweden, about 30,000 are Baltic refugees, 15,600 Germans and most of the rest Scandinavians and Finns. In 1951 there were 110,027 births (16.2 per 1,000 inhabitants), 69,704 deaths (10.1 per 1,000) and 53,882 marriages (7.6 per 1,000). In 1950 the infantile mortality rate was 22.8 per 1,000.

Government.—Under the Constitution of June 6, 1809 (with amendments) the throne is hereditary in the House of Bernadotte, Prince of Ponte Corvo, a Marshal of France, who was invited to accept the title of Crown Prince, with succession to the throne. The Marshal landed at Helsingborg on Oct. 20, 1810, and succeeded Charles XIII in 1818. There is a Diet (*Riksdag*) of two Chambers, *Första Kammaren* of 150 members, elected for 8 years; and *Andra Kammaren* of 230 members, elected for 4 years. The Council of Ministers (*Statsråd*) is responsible to the Riksdag.

Production and Industry.—About 27 per cent. of the population are devoted to agriculture and forestry, about 300,000 being owners and 60,000 tenants of the land they cultivate. The country may be divided into three separate districts, the northern, forest; central, mining, industrial, agricultural and forest, the southern, agricultural and industrial. The climate in the south is favourable for producing grain. The principal articles of cultivation are oats, wheat, rye, barley, potatoes, roots, oiliferous plants and grasses. Sweden contains the great lakes of Vänern, Vättern, Mälaren and Hjälmaren. The forests are very extensive, covering over one-half of the surface of the country, and consisting chiefly of fir, pine, birch; these are of great importance, supplying timber, pitch, fuel and tar, in addition to sulphite, sulphate and mechanical wood pulp for the paper-making and rayon industries. The mineral resources are extremely rich; iron ore of excellent quality; lead, zinc, sulphur, manganese, arsenic, gold, granite, and marble. There is a railroad opening up the rich iron-ore districts of Lapland and mineral trains run from Gällivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic; coal is being worked in Scania (Skåne).

In 1949 there were 17,289 industrial establishments (including mines and quarries) employing 662,408 operatives, and 144,344 in administrative and executive posts. The fishing industry landed catches valued at more than Kr. 130,000,000 in 1949.

Communications.—Railroads totalling 20,489 miles in length (of which 9,860 are the property of the State) were open on June 1, 1952; and in

June, 1950, 3,675 km. of telegraph wires and 166,629 km. of superimposed telegraph circuits, 220 control stations, and 4,202 other telegraph stations. There were at the same time 3,320,420 km. of telephone wires and 784,569 km. of superimposed telephone circuits. The Mercantile Marine (May, 1952), consisted of a total of 1,912 ships of 2,402,077 gross tons. Civil aviation is under the control of the Ministry of Communications, under whose supervision all matters concerning civil aviation are handled by the Department of Civil Aviation. This consists of a central authority, the Board of Civil Aviation, and of an Aerodrome Administration, embracing the civil airports of the Government and all other constructions and installations connected with civil aviation. Regular domestic air traffic is maintained by the Swedish Airlines (ABA). Regular European and intercontinental air traffic is maintained within the framework of the Scandinavian Airlines System in Copenhagen by the Swedish Airlines in collaboration with the Danish and Norwegian Airlines.

Defence.—Service in the Defence Forces is universal and compulsory, between 35,000 and 40,000 being trained annually; strength of the Army during the war of 1939-45 was about 500,000, equipped on modern lines and principally mechanized. The Navy consists of 4 cruisers, 3 coast defence ships, 15 destroyers, 6 torpedo boats, 24 submarines and some small craft. The naval stations are Stockholm, Karlskrona and Göteborg. The Air Force consists of 20 wings, chiefly fighters.

Religion.—The State religion is Lutheran Protestant, to which over 98 per cent. of the people adhere.

Language and Literature.—Swedish is one of the Teutonic languages spoken by the people of Scandinavia and is closely allied to Icelandic, Danish and Norse. Swedish national literature may be dated from the foundation of the University of Upsala in 1477 and reached its golden age under Gustavus III (1771-1792), who founded the Swedish Academy in 1786. Among modern Swedish authors who have achieved world-wide reputations are August Strindberg (1849-1912), dramatist and novelist; Selma Lagerlöf (1858-1940), who was awarded the Nobel Prize for Literature in 1909 on account of her pre-eminence as a novelist; Verner von Heidenstam (1859-1940), poet and Nobel Prize-winner (1916); Erik A. Karlfeldt (1864-1931), Nobel Prize-winner in 1931 after his death, and Par Lagerkvist, Nobel Prize-winner, 1951. In 1949 there were 200 daily newspapers in the country, 12 being published at Stockholm, 6 at Göteborg and 4 at Malmö.

Education.—(i.) *Primary:* Compulsory and free, illiteracy rare. Maintained by the State and by local taxation. Attendance good. (ii.) *Secondary:* Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics, commerce and navigation. (iv.) *Universities:* State Universities at Uppsala (founded 1477) and Lund (founded 1668) and private but grant-aided Universities in Stockholm and Göteborg.

[Paddington: 0701]

Ambassador in London, His Excellency Monsieur Henry de Torrenté (1948).
First Counsellor, Erwin Bernath.
Military and Air Attaché, Lt.-Col. Paul Gygli.
Counsellor, Victor Umbricht (Economic Affairs).
1st Secretaries, René Keller; Guido Lepori;
Ernst Bircher; Pierre-Henri Thévenaz.
2nd Secretaries, Hans Miesch; Félix Ansermoz.
Asst. Military and Air Attaché, Major Alfred Weber.

There is Swiss Consular Representation in Manchester.

Area and Population.—The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50'–47° 48' N. lat. and 5° 58'–10° 3' E. long. It is composed of 26 Cantons, 3 subdivided, making 25 in all, of very dissimilar size, united under a Constitution dated May 29, 1874, and comprises a total area of 15,950 square miles, with an estimated population (Dec. 31, 1952) of 4,780,000, who are divided between Protestants, 57 per cent., Roman Catholics, 40 per cent., Jews numbering 19,000 and others 65,000. In 1950 there were 83,541 live births, 47,559 deaths and 37,401 marriages. The infant mortality rate was 29 per 1,000 live births.

Physical Features.—Switzerland is the most mountainous country in all Europe. The Alps, covered with perennial snow and from 5,000 to 15,217 feet in height, occupy its southern and eastern frontiers, and the chief part of its interior; and the Jura mountains rise in the north-west. The Alps occupy 61 per cent., and the Jura mountains 12 per cent., of the country. The Alps are a crescent-shaped mountain system situated in France, Italy, Switzerland, Bavaria and Austria, covering an area of 80,000 square miles from the Mediterranean to the Danube (600 miles). The highest peak, Mont Blanc, Pennine Alps (15,732 feet) is partly in France and Italy, and Monte Rosa (15,217 feet) is partly in Switzerland and partly in Italy. The highest wholly Swiss peaks are Finsteraarhorn (14,026), Aletschhorn (13,711), Jungfrau (13,671), Mönch (13,456), Eiger (13,040), Schreckhorn (13,385), and Wetterhorn (12,150) in the Bernese Alps, and Dom (14,918), Weisshorn (14,803), Breithorn (13,685), and Matterhorn (14,780 feet) in the Pennine Alps.

The Swiss lakes are famous for their beauty and include Lakes Maggiore, Zürich, Lucerne, Geneva, Constance, Thun, Zug, Lugano, Walensee and Brienz.

* The President is elected in December and remains in office from Jan. 1 to Dec. 31; he is generally succeeded by the Vice-President.

Production and Industry.—Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables as well as grapes are grown. Dairying and stock-raising are the principal industries, about 3,000,000 acres being under grass for hay and 2,000,000 acres pasturage. The forests cover about one-quarter of the whole surface. The chief manufacturing industries comprise engineering and other metal-hurgical industries, clothing, watchmaking, wood-working, foodstuffs, chemicals, cotton, silk and rayon, embroidery and footwear.

Government.—Switzerland celebrated the 650th anniversary of Confederation on Aug. 1, 1941. The legislative power is vested in a Parliament, consisting of two Chambers, a National Council (*Nationalrat*) of 126 members, and a Council of States (*Ständerat*) of 26 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council (*Bundesrat*) of 7 members, elected for four years by the Federal Assembly and presided over by the President of the Confederation. The President has a salary of 51,000 francs; the Vice-President and other members of the Federal Council 48,000 francs each. The members of the Federal Council are elected for four years; each year the Federal Assembly elects from this council the President and the Vice-President, they are elected for one year. Not more than one of the same caution may be elected member of the Federal Council.

Defence.—**Army.** Elite (ages 20 to 36), 16 yrs.; initial trg., 118 days. Subsequently 8 training periods of 21 days; then Landwehr (36 to 48) and Landsturm (48 to 60). **Air Force.** Ground personnel: as Army. Flying personnel: age 20 to 36. Initial training 1 year. 6 weeks with squadron each year and completion of 70 hours' flying. After 36 revert to ground duties with Air Force or Army.

Communications.—In 1952 there were about 3,600 miles of railway (including tramways, rack railways, etc.) in operation, 32,252 miles of telegraph and telephone lines (655,435 telephone subscribers) and 4,021 post-offices. There were 1,119,842 licensed radio receivers. At September 30, 1952, the total length of first-class roads was 10,425 miles, the number of motor vehicles being 376,000 (188,000 private cars, 142,000 motor cycles and 47,000 commercial vehicles). A merchant navy, established in 1940, consisted of 36 vessels of 209,599 gross tons. These included 12 freighters, totalling 175,633 tons and 2 tankers totalling 23,500 tons. In addition, there were 378 vessels with a total tonnage of 263,622 engaged in Rhine shipping. In 1952 goods handled in Rhine traffic at Basle amounted to 4,240,000 tons; 113 river and lake vessels transported 8,020,000 passengers and 200,000 tons of freight in 1952. In 1952 Swissair flew 10,340,274 kilometres and carried 292,341 passengers.

Education.—Control by cantonal and communal authorities. No central organ. Illiteracy practically unknown. (i.) **Primary:** Free and compulsory. School age varies, generally 7 to 14. (ii.) **Secondary:** Age 12–15 for boys and girls. Schools numerous and well-attended, and there are many private institutions. (iii.) **Special schools** make a feature of commercial and technical instruction. (iv.) **Universities:** Basle (founded 1460), Berne (1834), Fribourg (1889), Geneva (1873), Lausanne (1890), Zürich (1832), and Neuchâtel (1909), and the technical University of Zürich and commercial University of St. Gall.

Language and Literature.—German is the dominant language in 19 of the 25 cantons; French in Fribourg, Geneva, Neuchâtel, Valais and Vaud; and Italian in Ticino. Many modern authors, alike in the German school and in the Suisse Romande, have achieved international fame. Karl Spitteler (1845–1924) and Hermann Hesse (1877–) were awarded the Nobel Prize for Literature, the former in 1919, the latter in 1947. In 1947 there were 111 daily newspapers (80 in German, 25 in French and 6 in Italian).

Ambassador, His Excellency Fayez al-Khoury (1952).
Counsellor, Dr. N. N. Ibrahim Pasha.
Secretary, N. Kabbani.
3rd Secretary, N. Koubrously.
Attaché, Taher Atassi.
Military Attaché, Col. Abdel-Rahman Mardam Bey.

Area and Population.—The republic of Syria is in the Levant, covering a portion of the former Ottoman Empire, with an estimated area of 70,800 sq. miles and a population (1953) of 3,329,235, Arabic speaking and mainly Moslems. Syria includes the districts of Damascus, Aleppo, Homs, Hama, Lattakieh, Deir-az-zor, Hassetché, Soueida (Jebel Druze) and Deraa. It is bounded on the north by Turkey, on the east by Iraq, on the south by Jordan and Israel, and on the west by the Lebanon and thence northwards by the Mediterranean to the Turkish frontier. The Orontes flows northwards from the Lebanon range across the northern boundary to Antioch (Turkey). The Euphrates crosses the northern boundary near Jerablus and flows through north-eastern Syria to the boundary of Iraq.

Archaeology, etc.—Syria is rich in historical remains. Damascus (*Esh Sham*) is the most ancient city in the world, having an existence as a city for over 4,000 years. It is situated on the river Abana (now known as Barada), at the foot of the barren mountains that form the eastern termination of Anti-Libanus, and at the edge of the wide sandy desert that stretches to the Euphrates. The city contains the Omayed Mosque, the Tomb of Saladin, and the "Street Called Straight" (Acts ix, 11), while at the edge of the Syrian desert is the Roman outpost-city of Palmyra.

On the Alawite coast at Amrit are extensive ruins of the VII century B.C. Phoenician town of Marath, and also ruins of Crusaders' fortresses at Markab, Sahyoun, and Krac des Chevaliers. At Tartous (also on the Alawite coast) are ruins of the XII–XIII century cathedral of Our Lady of Syria and of a castle built by the Knight Templars in late XII century.

Hittite cities, dating from 2,000 to 1,500 B.C., have recently been explored on the west bank of the Euphrates at Jerablus and Kadesh and also on the Orontes at Atchara, near Antioch.

Government.—Syria, which had been under French mandate since the 1914–18 war, became an independent Republic during the 1939–45 war. The first independently elected Parliament met on August 27, 1943, but foreign troops were in part occupation until April, 1946, when their withdrawal marked the complete independence of the Republic, which is a member of the United Nations and of the Arab League.

Recent Changes.—In June 1953, Brigadier Shishkely, then Deputy Prime Minister, announced details of a new constitution for Syria, which he said, would provide for a presidential republic on the pattern of the U.S.A. This constitution was ratified by a national referendum held on July 10. At the same time Brig. Shishkely, who was the only candidate, was elected President.

Production and Industry.—Agriculture, including cattle breeding is the principal source of production; wheat and barley are the main cereal crops, but cotton also takes an important place in the country's economy. Tobacco (latakia) is grown in the maritime plain in Sahel, the Sahyoun and the Djibeli district of the Alawites; skins and hides, leather goods, wool and silk, and copper and brass utensils are locally produced. Mineral wealth is small and oil prospecting has not proved successful.

Language and Literature.—Arabic is the principal language (see Arabia). There are 8 daily newspapers and 12 periodicals in Arabic published in Damascus and 6 daily newspapers and 12 periodicals in the provinces.

Education.—Education in Syria is under State control and, although many of the schools are privately owned, they all follow a common system and syllabus. Elementary education is free at state schools, and is compulsory from the age of seven. Secondary education is not compulsory and is free only at the State Schools. Because of the shortage of places, entry to these State Schools is competitive. The Syrian University, founded in 1924, has faculties of law, medicine, engineering, science, arts and a Higher Teachers' Training College. Approximately 10 per cent. of all students receive scholarships, and at the present time Palestinian refugees are admitted free. The rest pay fees.

Communications.—A narrow-gauge railway, runs from Beirut in the Lebanon to Damascus, connecting at Rayak (Lebanon) with the standard-gauge line which runs from Tripoli (in the Lebanon) through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotcheh. From Damascus the Hejaz railway runs southwards to Jordan. All the principal towns in the country are connected by roads, for the most part very good. The trans-desert route from Damascus to Bagdad is covered by the Nairn Bus Service in fourteen hours. A small internal service operates between Damascus and Aleppo, and between Aleppo and Qamichliyé.

FINANCE

The budget for 1953 was balanced at £Syr.205,000,000.

Currency.—The monetary unit is the Syrian Paper Pound (£Syr.). The official buying value is £Syr.6.13=£1 sterling and the selling rate £Syr.6.19=£1. There is, however, a free market in Damascus, on which the £1 sterling was quoted at approx. £Syr.9.80 in June, 1953. See also p. 83.

TRADE

Principal Imports.—Textiles; vegetable products, mineral products; machinery of all kinds and electrical material; base metals and wares thereof; prepared foods, chemicals and pharmaceuticals; transport material; wood and its manufactures; pearls, precious stones, precious metals; live animals and animal products; rubber and its manufactures.

Principal Exports.—Textile materials and manufactures (including raw cotton and wool), cereals and vegetable products, live animals and animal products, raw hides and skins and prepared foods.

The total value of Syria's foreign trade in 1953 was as follows:—

Imports.....	£Syr.313,340,265
Exports.....	£Syr.319,572,677

During the same period imports from U.K. were £Syr.77,161,101 and exports to U.K. £Syr.39,244,672.

CHIEF TOWNS.—Damascus (population 335,060) is the capital of Syria, other important towns being Aleppo (population 362,541), Homs (244,094) and Hama (146,564), and the principal port of the Syrian Republic is Lattakieh (100,462). The principal town of Jebel Druze is Soueida (Black), built in mid-19th century by refugees from Lebanon from stones of the ruined Nabatean city of Souda and of blocks of local black basalt.

SYRIAN FLAG: Green over white, over black horizontal bands, with three red stars on central white band.

BRITISH EMBASSY

(Damascus)

Prime Minister, Field-Marshal Luang Pibulsonggram.

Foreign Minister, K. N. Bongsprakhondh (H. R. H. Prince Wan Wathayakorn).

EMBASSY IN LONDON

23 Ashburn Place, S.W. 7

[Frobisher: 2983]

Ambassador in London, H.S.H. Prince Wongsanuvatva Devakula (1953).

Area and Population.—The Kingdom of Thailand, or Muang Tai "Land of Free Men," formerly known as Siam, has an area of 198,247 sq. miles with a population (1947) of 17,256,825. Thailand is in South-Eastern Asia. It has a common boundary with the Federation of Malaya, in the south, and is bounded on the west and north-west by the Union of Burma and in the north-east and east by the Kingdoms of Laos and Cambodia, which were formerly part of the French Colony of Indo-China. Although there is no common boundary between Thailand and China, the Chinese province of Yunnan is only separated from the Thai northern border by a narrow stretch of Burmese and Lao territory. The country slopes southwards from the north-west and from the great mountains of Tibet. The principal rivers

are the Salween (which forms a boundary with Burma for 200 miles), the Menam with its tributary the Meping (which are Thai throughout) and the Mekong and its tributaries, which water the eastern plains, where are situated rich rice fields and plantations of coconut and areca palm.

Government.—Thailand is a sovereign independent State. The Constitution of 1952 provides that the King shall exercise legislative power by, and with the advice and consent of, the Assembly of the People's Representatives, executive power through a Council of Ministers and judicial power through Courts established by law. He is advised by a Privy Council appointed by him. The Assembly consists of 246 members, half of whom have been nominated by the King, the other half being elected by a system of indirect representation. The Constitution provides for the eventual replacement of nominated by elected members.

Language, Religion, and Education.—Thai is a monosyllabic, tonal language, a branch of the Indo-Chinese linguistic family. The principal religion is Buddhism, its followers numbering over 13½ millions in 1948, with 627,435 Moslems and some 70,000 Christians. Primary education is compulsory and free and secondary education in Government Schools is free. There are 439 Government schools and 20,893 schools of all kinds, attended by 2,483,589 children. There are 5 Universities and 31 Training Colleges and 245 Vocational Schools (all types).

In 1940 Thailand adopted the Gregorian Calendar, the Buddhist year 2484 beginning on Jan. 1, 1941 (in place of April 1).

Production and Industry.—The chief products of the country are rice, rubber, teak, and tin. There are few manufacturing industries. Rice accounted in 1952 for 67 per cent. of the value of all Thailand's exports. Other products in order of value are fish, fruits, vegetables, poultry, pigs, tobacco, coconuts, palm sugar, onions, garlic, eggs, groundnuts, rattan, chillies, bamboo and bullocks. Forests are extensive and several British companies hold concessions for the exploitation of teak and other hardwoods. Local industries are relatively underdeveloped. They include the production of salt, cement, sugar, tobacco and cigarettes, leather, rubber manufactures, glass bottles, soap, paper, gunny bags, cotton and silk cloth and matches. There are cottage industries producing pottery and cotton and silk cloth. The local niello-ware (engraved silver with interstices filled with black metallic compound) is very popular with visitors. Livestock in 1952 included 4,972,282 cattle, 5,436,347 buffaloes, 13,647 elephants, 232,112 horses, 262 donkeys and 164 mules.

In addition to tin and wolfram, the only minerals produced in important quantities are iron, lead, antimony, lignite and salt. In 1952 the output of tin ore was 13,158 tons and exports totalled about the same figure. About half the output comes from U.K. and Australian-owned mines.

Communications.—About 2,032 miles of State-owned railways were open for traffic in 1950. Railways from Bangkok run to Ubol Raj Thani (357 miles N.E.), Chiangmai (411 miles N.), Aran Pradet (159 miles E.) and Padang Besar (615 miles S.); there are branch lines to Udon Thani, Swankalok, Kantang, Kanchanaburi, Nakorn Srithamaraj, Songkhla and Sungei Golok, totalling about 490 miles. The Burma railway, built with allied prisoner-of-war labour by the Japanese during the war, has been purchased from its starting point at Ban Pong to the Burmese border by the Thai Government and is now part of the Royal State Railways. It is open to general

traffic as far as Kanchanaburi (33 miles). There is through railway connexion between Ban Pong and Penang and Singapore, but it is not yet restored to pre-war efficiency. An extensive programme of new construction is planned. On December 31, 1951, there were about 5,952 km. of State highways opened to traffic, 4,214 km. under construction, and a further 3,153 km. projected. Bangkok is an international airport of importance, and services connect it with Europe, America, India, Singapore and Hong Kong. Internal airline services are maintained between Bangkok-Phitsanuloke-Lampang-Chiangmai; Bangkok-Korat-Ubol-Nakorn Phanom; Bangkok-Chandaburi-Trad; Phitsanuloke-Mae Sod; Chiangmai-Mae Sariang-Mae Hongson; Bangkok-Songkhla-Phuket. There are about 14,474 miles of telegraph lines.

External debt (do.).....	£1,318,000
	U.S. \$17,631,000

Thailand obtained a 3 per cent. loan from India in Sept., 1946, of 50,000,000 rupees (£3,750,000), which was completely paid back early in 1949. An International Bank Mission visited Thailand at the end of 1949, and in October, 1950, Thailand received an International Bank loan of the equivalent of U.S.\$25,400,000 for irrigation, railway development and the development of the port of Bangkok. She received allocations of \$8,900,000 in 1951, \$7,000,000 in 1952 and \$6,300,000 in 1953 from MSA for public health, economic development and education. She has also received considerable defence aid from the U.S. Government.

The official rates of exchange for the *Tical* or *Baht* (of 100 Satangs) since September, 1949, have been 35 *Ticals*=£1 and 12½ *Ticals*=U.S. \$1. The free market rate for remittances stood at about 50 *Ticals*=£1 in May 1953. See also p. 83.

TRADE

	1952
Total imports.....	£118,200,000
Total exports.....	120,000,000
Imports from U.K.....	4,348,000
Exports to U.K.....	1,047,000

In 1939-40 rice constituted 53 per cent., tin ore 14 per cent., rubber 14 per cent. and teak 5 per cent., of the exports. In 1952 the proportions were: rice 67 per cent., rubber 20 per cent., tin 4 per cent., teak 2 per cent. and wolfram 2 per cent. (in value). The export of hides and of hard woods other than teak is at present banned, and the export of cattle was banned until recently. Chief imports are textiles, metal manufactures, machinery, vehicles and transport equipment, chemicals and petroleum products.

CAPITAL, Ψ Bangkok (with Dhonburi), pop. 1947—1,178,881; in the delta of the Menam River. Other centres are Chiangmai and Paknampho, but no other town approaches Bangkok in size or importance.

FLAG: Five horizontal bands, red, white, dark blue, white, red (the blue band twice the width of the others).

Representative, R. J. Hilton, 122 Chakrapetr Road, Bangkok.

TRANSJORDAN

See Jordan

TRIESTE

(Free Territory of Trieste.)

In order to achieve a compromise between the conflicting claims of Italy and Yugoslavia to the town and harbour of Trieste, Annex 6 of the Italian Peace Treaty, signed in Paris on Feb. 10, 1947, established them as a Free Territory which is to be demilitarized and declared neutral and will be administered by a Governor (not yet appointed), who must not be a Yugoslavian or Italian citizen. He is assisted by an Assembly, chosen by popular election on June 13, 1949. The Governor's appointment rests with the Security Council of the United Nations. In the interim, order is maintained by Allied troops. The Territory corresponds with the former Italian Department and includes the town and harbour of Trieste.

TURKEY

(Türkiye Cumhuriyeti.)

President of the Republic (Cumhurbaşkanı), His Excellency Celal Bayar, born 1884, elected May 22, 1950.

President of National Assembly, Refik Koraltan.

MINISTRY.

(May 22, 1950)

Names as spell in Turkish characters.

Prime Minister, Adnan Menderes.

Minister for Justice, Osman Serki Cicekdag.

Minister of National Defence, Seyfi Kurtbek.

Minister of the Interior, Etem Menderes.

Minister for Foreign Affairs, Fuat Köprülü.

Minister of Finance, Hasan Polatkan.

Minister of Education, Rifki Salim Burcak.

Minister of Economy and Commerce and Minister of State, Fethi Celikbas.

Minister of Health and Social Assistance, Ekrem Hayri Üstündağ.

Minister of Customs and Monopolies, Emin Kalafat.

Minister of Agriculture, Nedim Ökmen.

Minister of Communications, Yünnü Üresin.

Minister of Public Works, Kemal Zeytinoglu.

Minister of Labour, Hayrettin Erkmek.

Minister of State Industries, Sitki Yircali.

Minister of State, Celal Yardimci.

Chancellor, Nejat Akan.

Area and Population.—The Turks belong to the Turanian Race, which comprises the Manchus and Mongols of North China, the Finns, and the Turks of Central Asia. Their numbers probably exceed 50,000,000, with the same language, religion and culture, but the actual Turkish State occupies only a small part of the area inhabited by the Turkish Race, the remainder being in Soviet Russia, China, Afghanistan and Persia. Under the Seljuks (Turkish rulers in Anatolia) the conquest of Asia Minor was completed in the 12th century. The Seljuks were succeeded, early in the 14th century, by the Osmanli dynasty, which remained in power until the War of 1914-18.

During the 15th, 16th and 17th centuries the Ottoman Empire was one of the strongest Powers in the world, extending from the Caspian Sea to the Adriatic and Hungary, and from the Indian Ocean to Morocco and the Sudan. It comprised Asia Minor, part of Russia, the Ukraine, the Crimea, the Balkan States and the whole of Arabia. The Black Sea, the Mediterranean, the Red Sea and the Aegean were dominated by Turkish ships, and the Ottoman dominions included not only the Byzantine Empire, but the greater part of the whole Roman Empire.

Turkey now extends from Adrianople to Transcaucasia and Persia, and from the Black Sea to the Mediterranean, Syria and Iraq. The fifth general census of population was held on Oct. 22, 1950. The results of the last four counts are:—

Year	Population
Oct. 20, 1935.....	16,158,018
Oct. 20, 1940.....	17,820,950
Oct. 21, 1945.....	18,790,174
Oct. 22, 1950.....	20,934,638

At the census of 1945 there were 9,446,580 males and 9,343,594 females.

Turkey in Europe (9,256 sq. miles, population 1,626,229 in 1950) consists of Eastern Thrace, including the cities of Istanbul (Constantinople) and Edirne (Adrianople), and is separated from Asia by the Bosphorus at Istanbul and by the Dardanelles (Hellespont)—about 40 miles in length with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west.

Turkey in Asia (285,246 sq. miles, population 19,308,409 in 1950), comprises the whole of Asia Minor or Anatolia ("Land of the Rising Sun" or Orient), and extends from the Aegean Sea to the western boundaries of Georgia, Soviet Armenia and Persia, and from the Black Sea to the Mediterranean and the northern boundaries of Syria and Iraq. The former Turkish Sanjak of Alexandretta (latterly known as the Republic of Hatay), was ceded by France on July 23, 1939, having formed part of Mandated Syria since 1922.

Government.—For two centuries before the War of 1914-18, disintegration had reduced the power and extent of the Turkish Empire, and after that War its boundaries were still further

restricted, Iraq, Syria and Arabia passing into other hands. Sultan Mehmed VI., the last of the Osmanli rulers, fled from Constantinople to Malta on Nov. 20, 1922, and the Sultanate was abolished by the National Assembly. On Oct. 29, 1923,* the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal (since known as Kemal Atatürk) President. Kemal Atatürk, the maker of modern Turkey, died after a prolonged illness in Nov., 1938, and was succeeded by President İnönü. On March 3, 1924, the Assembly passed a law abolishing the office of Caliph and ordering all members of the Ottoman dynasty to leave Turkish territory. The Grand National Assembly (*Büyük Millet Meclisi* or *Kamutay*) is a single-chamber legislature of 487 members (1950), elected for four years by universal adult suffrage, and delegates its executive power to ministers acting in its name and responsible to it for their actions. In May, 1950, a free General Election with universal adult suffrage returned 408 members of the Democrat Party, 69 Republican Party, 1 National Party, and 9 Independents. Turkey is divided for administrative purposes into 63 *vilayet*, with subdivisions into *kaza* and *nahiye*. Vilayet have each a governor (*vali*) and elective council.

Religion and Education.—The majority of the inhabitants are Moslems. There are numerous Christians (of the Latin and Eastern rites) in Istanbul (Constantinople) and a considerable number of Jews. On April 10, 1928, the Grand National Assembly passed a law in virtue of which Islam ceased to be the State religion of the Republic. Education is compulsory, free, and secular. There are elementary, secondary and vocational schools.

In 1949-50 there were 17,921 primary schools, with about 1,758,240 pupils (including 625,837 girls). There are universities at Istanbul (founded 1900), with 12,100 students (2,546 women), and Ankara (founded 1934). The expenditure on public education in 1951-52 was £1189,000,000.

Language and Literature.—Osmanli or Ottoman Turkish is one of the Turanian languages spoken from Macedonia to Siberia. Until 1926 this language was written in Arabic script, but in that year the Roman alphabet was substituted for use in official correspondence and in 1928 for universal use, with Arabic numerals as used throughout Europe. Mainly as a consequence of this change the percentage of Turks who can read and write rose from 22 per cent. in 1928 to 45 per cent. in 1934 and had further risen in the ten years to 1944. Ancient Turkish literature aped the Arabic manner but the revolution of 1908 was followed by a popular reaction against the writings of the past (which appealed only to a small class) and led to the introduction of a native literature free from foreign influences and adapted to the understanding of the people. The vehicle first employed was the newspaper, printed in the neo-Latin alphabet, with supplements for prose and dramatic fiction, poetry and literary criticism. There were (1950) over 100 daily newspapers, mainly in the Turkish language, some of them having editions in French, and numerous magazines devoted to feminine fashions or literary criticism.

Production and Industry.—Agriculture provides a livelihood for 80 per cent. of the population and the economy is based extensively on the export of agriculture products. Agriculture is still largely primitive, but with Marshall Plan assistance is being modernized at an accelerated pace. At the end of

1952 approximately 35,000 tractors were at work. The principal crops are cereals, cotton, tobacco, sultanas and figs, pulses, oilseeds, valonea, hazelnuts, opium, and many varieties of fruit. With the important exception of wheat, which is grown mostly on the arid Central Anatolian Plateau, the bulk of these is grown on the fertile littoral. Tobacco, sultana and fig cultivation is centred at Izmir (Smyrna), where substantial quantities of cotton are also grown. The main cotton area is the Cukurova Plain around Adana. 1951 live-stock estimates were: 24,688,000 sheep, 16,570,000 goats, 4,349,000 goats (mohair), 10,221,000 cattle, 1,155,000 horses, and 1,681,000 donkeys. Animal by-products include wool, hides and skins, and mohair. The forests, which lie between the littoral plain and the Anatolian Plateau, contain beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple. During recent years the Government has attempted, so far not altogether successfully, to combat the depredations of peasant and goat which threaten to destroy the existing forests within the next 25 years.

Turkey's second most important industry is based on her considerable mineral wealth, which is however as yet largely unexploited. The most important developments are in coal, lignite, iron ore and chrome mining and fair quantities of copper, manganese, lead and sulphur are also produced together with other minerals in only small quantities. Working through the State-owned Eti (mining) and Sumer (industry) Banks, great strides have been made during recent years in industrializing the country. Developments include the erection of an iron and steel works at Karabük and other factories for the production of textiles, paper, cement, artificial silk, leather goods and glassware.

COMMUNICATIONS

Railways.—The complete network became the property of the State Railways Administration in 1948. The total length in operation is about 7,700 km. Construction, started in 1937 and at present in progress, includes the line to the Persian border (Elazığ-Kotur) the Iraq frontier line (Diyarbakır-Cizre), the conversion of the Erzerum-Sarikamis line from narrow gauge to normal, and various branch lines in the Gaziantep and Zonguldak areas. The total length of these additions is to be 1,176 km., of which about 350 km. have been completed at a cost of over £1135,000,000. A 15-year plan for the addition of a further 2,310 km. of railway at a cost of £1800,000,000, which was produced in 1947, has now been shelved—possibly because of the prior claims of the 9-year programme for the construction and improvement of roads and highways. Efforts are however being made to increase rolling stock and locomotives of which there is at present a serious shortage.

Roads.—In September, 1948, a 9-year road construction programme was started, involving the construction, reconstruction, improvement and maintenance of a national highway system totalling 24,300 kilometres of all-weather standard roads. The work is being greatly facilitated by the mechanized road building equipment supplied by the American Mission for Aid to Turkey. In 1951, 15,600 kilometres of roads were maintained.

Posts.—In 1948 there were 31,719 km. of telegraph lines, and 1,679 post and telegraph offices. On January 1, 1949 there were 52,423 telephones.

Shipping.—The strength of the Turkish Merchant Navy at the beginning of 1952 was 404,469 gross tons, of which 195,409 tons are owned by the State

* TURKISH NATIONAL HOLIDAY.—Oct. 29 is observed throughout the Republic as a National Holiday.

Shipping Administration. In 1950, 3,545 foreign vessels, of 4,289,316 tons entered and cleared Turkish ports, and 58,549 vessels of 22,315,111 tons under the Turkish flag.

Civil Aviation.—The State Air Lines operate all internal lines and there are a number of foreign air lines, including B.E.A., operating services to Istanbul. The State Air Lines fleet is operated mostly with Dakotas. The airports of Istanbul, Ankara and Adana are being improved to P.I.C.A.O. (Class B) standard.

FINANCE

	1953-54
Revenue (Budget).....	£T1,959,854,000
Expenditure (Budget).....	2,127,506,736

Deficit.....167,652,736

Expenditure includes £T561,249,317 for capital investment. The Government hopes to cover the deficit with Marshall Plan counterpart funds and with an internal loan.

Debt (1952):—

Internal funded.....	£T760,415,000
Internal floating.....	1,312,536,000
External funded.....	767,046,000
External floating.....	55,563,000

2,895,561,000

The Public Debt of the former Ottoman Empire was apportioned amongst the various Successor States, including Turkey, according to the provisions of the Treaty of Lausanne of 1923. The same Treaty provided that the Debtor States were to pay the annuities incumbent upon them by reason of such apportionment to the Ottoman Debt Council.

Since that date, several of the Successor States have settled their shares in various ways and Turkey has acquitted herself of her obligation by the purchase of the existing Turkish Bonds, 1933. This terminates the relations of Turkey with the Debt Council, which body, however, retains all its rights and attributions *vis-à-vis* those States which have not yet settled their shares. The Ottoman Debt Council's Offices are in Paris.

The Turkish *Lira*, or £T. (of 100 *Piastres*, each of 40 *Paras*) has a nominal value of 2s. 7d. (see also p. 83).

TRADE

	1951	1952
Total imports. £T1,125,839,687	£T1,556,600,000	
Total exports.. 879,429,247	1,016,200,000	
Imports from		
U.K.....	190,312,581	277,100,000
Exports to U.K..	73,307,200	66,700,000

The imports include iron and steel, machinery and spares, petroleum products, cotton textiles, wool and woollen yarns, agricultural machinery, locomotives, motor vehicles and pharmaceuticals; the exports include tobacco, cotton, dried fruit, livestock, chrome oilseeds, opium and valonia.

The principal imports from United Kingdom are iron and steel goods, machinery, tractors, woollen and cotton textiles, motor lorries and chemicals; the principal exports to United Kingdom are tobacco, raw cotton, mohair, nuts, figs and raisins.

CAPITAL OF TURKEY, ANKARA (Angora), an inland town of Asia Minor, about 200 miles E.S.E. of Istanbul, with a population (1950 census), of 286,781. Ankara (or Ancyra) was the capital of the Roman Province of *Galatia Prima*, and a marble temple (now in ruins), dedicated to

Augustus, contains the *Monumentum* (Marmor) *Ancyranum*, inscribed with a record of the reign of Augustus Cæsar. A new city has been laid out on modern lines, with parks, statues and avenues. **ISTANBUL** (Constantinople), the former capital, was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and renamed by him; it became capital of the Eastern Roman Empire in A.D. 364; population (1950) 1,018,468. Istanbul contains the celebrated Mosque of St. Sophia, since 1934 a museum of Byzantine and Turkish art. Other cities are **İzmir** (Smyrna) 230,508; Adana 117,799; Bursa (Brusa) 100,007; **Eskişehir** 88,459; **Gaziantep** 72,743; Konya 64,509; **Kayseri** (Cæsarea) 65,489; **Erzurum** 54,360; Sivas 52,269; Malatya 43,937; **Diyaşbekir** 49,077; **Şamsun** 45,495; **Urfa** 37,456; **Maras** 35,071; **Mersin** 37,508 and **İskenderun** (formerly Alexandretta) 22,946.

FLAG: Red, with white crescent and star.

Assistant Naval Attaché, Capitán C. R. Lluberías.

Secretary, Señor Don Guy P. Nery.

Consul-General, Señor Don S. Rivas Costa, 48 Lennox Gardens, S.W.1.

Area and Population.—The smallest Republic in South America, on the east coast of the Río de la Plata, situate in lat. 30° – 35° S. and long. 53° $25'$ – 57° $42'$ W., with an area of 72,180 square miles, and an estimated population of 3,000,000, almost entirely white and predominantly of Spanish and Italian descent.

Physical Features.—The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which cross the Brazilian boundary and extend southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet. The principal river is the Río Negro (with its tributary the Yí), flowing from north-east to south-west into the Río Uruguay. The boundary river Uruguay is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucia, Queguay, and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Merim. The climate is reasonably healthy, with great uniformity of temperature, the summer heat being tempered by the breezes of the Atlantic. The winter is, on the whole, mild, but cold spells, characterized by icy winds from the South Polar regions, are experienced in June, July and August. Rainfall is regular throughout the year, but there are occasional droughts.

Government.—Uruguay—or the *Banda Oriental*, as this territory lying on the eastern bank of the Uruguay River was then called—resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726–1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. In 1825, the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated.

A new Constitution was approved and brought into force on March 1, 1952, whereby the executive

power is discharged by a National Council of State composed of nine members, elected every four years and assisted by nine ministers. The next elections for the Council of State are due in 1954. The members of the National Council of State are eligible for re-election after four years have elapsed since the date on which their mandate ceased. The Legislature consists of a Chamber of 99 deputies and of a Senate of 30 members, elected for four years by all adult male and female citizens who can read and write.

The Republic is divided into 19 Departments, each with a Chief of Police and a Mayor. The most important cities of the interior are Salto and Paysandu, both situated on the River Uruguay, which forms the main line of division from Argentina.

Production and Industry.—Wheat, barley, maize, linseed, sunflower seed and rice are cultivated. The wealth of the country is obtained from its pasturage, which supports large herds of cattle and sheep, the wool of which is of excellent quality. The 1951 livestock census showed figures of 8,154,109 cattle, 23,408,642 sheep, 667,251 horses, 258,980 hogs, 5,568,451 poultry and 511,547 milch cows. In addition to the meat packing industry, textiles and wine and beer are of importance. The development of local industry continues and during and since the Second World War, in addition to the greatly augmented textile industry, marked expansion in local production is notable in respect of tyres, sheet-glass, three-ply wood, cement, leather-curing, beet-sugar, edible oils and the refining of petroleum and petroleum products.

Gold mines still exist at Cunapiru, but exploitation both of gold and of iron ore deposits has not proved successful commercially.

Communication.—There are 1,828 miles of railway, about 5,000 miles of national highways, and about 7,508 miles of telegraph, with 48,375 miles of telephones.

Civil aviation is developing rapidly. An internal air line, PLUNA, which is now owned by the State, runs a passenger and freight service three times a week to the principal capitals of the interior, and has recently extended its services to Southern Brazil and Paraguay. International passenger and freight services are maintained by British Overseas Airways and by American, South American and European air lines. The airport of Carrasco lies 12 miles outside Montevideo.

Education and Social Services.—Uruguay is one of the most advanced of the South American states, with old-age pensions, maternity and child welfare centres, accident insurance, etc. Primary education is compulsory and free, with about 200,000 pupils in 1,600 state schools and technical and trade schools, and evening courses for adult education. In 1950 there were 26,650 pupils in secondary schools, including 9,700 in the 11 State *liceos* of the capital. The University at Montevideo (founded in 1849) had, in 1950, 8,540 students enrolled in its ten faculties.

Language and Literature.—Spanish is the language of the Republic. Modern literature has provided some authors with international reputations and the literature of Spain is accessible in all public libraries. Over one-third of the nation lives in the capital and more than half the daily newspapers are published there.

FINANCE

	1952
Revenue (Budget Estimate)....	Pesos 428,600,000
Expenditure (Budget Estimate)....	458,600,000
Internal Debt (Feb. 28, 1953)...	825,889,381
External Debt (Feb. 28, 1953)...	110,496,513

The monetary unit is the *peso*, which by law is nominally 0.585 grammes fine gold, or the equivalent of US\$1.519. The circulating medium is, however, the paper *peso*, at present linked with the U.S. dollar and the £ sterling at multiple rates giving the *peso* an average value of around 35. There is a free financial market for dealings in dollars and other currencies. The rate for the £ in May 1953 was about pesos 8 (buying) and for the U.S. dollar pesos 2.98 (buying).

Imports from U.K.	36,015,658	29,034,405
Exports to U.K., . .	41,421,689	33,265,000

The exports are principally animal products, and include frozen and preserved meat, wool, hides, corn, hair, tallow, poultry and eggs, sunflower-seed oil and linseed oil; the imports are principally machinery, motor vehicles, textiles and clothing, food substances and beverages, coal, oil, timber, fuel and bloodstock. The principal imports from the U.K. are machinery, motor vehicles, hardware, yarns and chemicals.

CAPITAL. Montevideo, Pop. (Dec. 1952), 802,560. Other centres are Ψ Salto (37,000), Ψ Paysandu (28,000), Ψ Mercedes (23,000), Ψ Colonia (12,000), Ψ Fray Bentos (10,000), and Ψ Maldonado (7,000).

FLAG: Four blue and five white horizontal stripes (surcharged with rising sun on a white ground in the top corner, next flagstaff).

Time of transit from London to Montevideo, by air, 36 hours.

BRITISH EMBASSY

(Residence, Calle Jorge Canning 2491, Parque Battle y Ordoñez, Montevideo)

Ambassador Extraordinary and Plenipotentiary, His Excellency Eric Ralph Lingeman, C.B.E. (1953).

Chancery, Calle Rincon 454, 5° piso.
First Secretary and Consul, G. M. Warr.
1st Secretary (Commercial), C. B. B. Heathcote-Smith.

2nd Secretary and Information Officer, N. E. Cox.
Vice-Consul, J. K. F. Bamford.

Naval Attaché, Captain R. E. Terry, C.B.E., R.N.
Military Attaché, Brig. C. D. T. Wynn-Pope, O.B.E.

Air Attaché, Air Commodore F. C. Hobson.

Labour Attaché, W. M. Wylie.
Accountant-Archivist, G. W. Deakin.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Montevideo and Maldonado.

ANGLO-URUGUAYAN CULTURAL INSTITUTE, Avenida Agraciada 1464, 1er Piso, Montevideo—Director, R. A. C. Du Vivier, M.B.E.

There are branch Institutes at Salto, Paysandu, Fray Bentos, Rivera, Las Piedras, Melo and Trinidad.

BRITISH CHAMBER OF COMMERCE IN URUGUAY, Calle Cerrito 507, Montevideo.

BRITISH COUNCIL

Representatives, R. A. C. Du Vivier, M.B.E., Avenida Agraciada 1464 1er Piso, Montevideo.

U.S.S.R.

(Soyuz Sovetskikh Sotsialisticheskikh Respublik—Union of Soviet Socialist Republics)

GOVERNMENT OF THE U.S.S.R.

Far-reaching structural changes were carried out in the Government machinery immediately after Stalin's death, the number of Ministries and Standing Committees of ministerial rank having been halved. The new structure is as follows:

The Presidium of the Supreme Soviet of the U.S.S.R.

Chairman, Marshal Kliment Yefremovich Voroshilov.

Secretary, N. M. Pegov.

The Council of Ministers of the U.S.S.R.

Chairman, Georgy Maximilianovich Malenkov, appointed March 6, 1953.

Senior Vice-Chairmen, N. A. Bulganin; L. M. Kaganovich; V. M. Molotov.

Vice-Chairman, A. I. Mikoyan.

MINISTERS

Agriculture and Procurement, I. Benediktov.

Aviation Industry, P. V. Dementiev.

Building Materials Industry, P. A. Yudin.

Chemical Industry, S. M. Tikhomirov.

Communications, N. D. Psurtsev.

Construction, N. A. Dygay.

Coal Industry, A. F. Zasyadko.

Culture, P. K. Ponomarenko.

Defence Industry, D. F. Ustinov.

External Trade, I. Kabanov.

Finance, A. G. Zverev.

Foodstuffs Industry, V. Zotov.

Foreign Affairs, V. M. Molotov.

Geology, P. Y. Antropov.

Heavy and Transport Machinery Building, I. I. Nosenko.

Internal Trade, A. I. Mikoyan.

Internal Affairs (M.V.D.), S. N. Kruglov.

Justice, K. P. Gorshenin.

Machine Building, S. A. Akopov.

Manufactured Consumer Goods, A. N. Kosygin.

Medium Machine Building, V. A. Malyshev.

Metallurgy, I. F. Tevosyan.

Motor Industry and Highways, T. A. Likhachev.

Oil Industry, N. K. Baybakov.

Power Stations and Electrical Industry, M. G. Pervukhin.

Public Health, A. F. Tretyakov.

Railways, B. P. Beshchev.

Seagoing and River Shipping, Z. A. Shashkov.

State Control, V. I. Merkulov.

State Farms, A. I. Kozlov.

Timber and Paper Industry, G. M. Orlov.

Chairman of the State Planning Committee, M. Z. Saburov.

Chairman of the State Committee for Building, K. M. Sokolov.

THE COMMUNIST PARTY OF THE SOVIET UNION

The 19th Party Congress (October, 1952) effected certain changes in the Party Constitution. The Politbureau was replaced by a Presidium, the Orgbureau abolished, and the powers of the Secretariat reduced. The traditional name "Bolsheviks" has been abandoned. The composition of the leading Party bodies at present is as follows:

Presidium of the Central Committee, G. M. Malenkov; V. M. Molotov; K. Y. Voroshilov; N. S. Khrushchev; N. A. Bulganin; L. M. Kaganovich;

A. I. Mikoyan; M. Z. Saburov; M. G. Pervukhin (full members); N. M. Shvernik; P. K. Ponomarenko (candidates for membership).
Secretaries of the Central Committee, N. S. Khrushchev; M. A. Suslov; P. N. Pospelov; N. N. Shatalin.

EMBASSY OF THE U.S.S.R. IN LONDON
13 Kensington Palace Gardens, W.8
[Bayswater: 3628]

Ambassador Extraordinary and Plenipotentiary, His Excellency Jacob Alexandrovitch Malik (1953).
Counsellors, N. B. Korovin; N. D. Belochvostikov; A. D. Voina.

1st Secretaries, V. Stefankin; G. Rodionov; Y. Bruslov; I. I. Ippolitov.

2nd Secretaries, A. Krasov; A. Startsev; D. Kholodenin; P. Kuznetsov; Y. Modin.

3rd Secretaries, G. Zhivotovskii; A. I. Romanov; G. Popov; A. Verevkin.

Military Air Attaché, Col. A. Chizhov.

Military Attaché, Maj.-Gen. B. Razin.

Naval Attaché, Commander A. G. Chernoussanov (acting).

Attaches, V. Kuznetsov; P. Kuznetsov; I. Sychev; V. Sychev; A. Manaev.

Trade Representative, N. M. Andrienko.

AREA AND POPULATION

Before the outbreak of the war of 1939-45 the U.S.S.R. consisted of 11 Union Republics—the Russian Socialist Federal Soviet Republic (R.S.F.S.R.) and the Ukrainian, Belorussian, Armenian, Azerbaidjan, Georgian, Turkmenian, Uzbek, Tadzhik, Kazakh and Kirghiz Soviet Socialist Republics. After the collapse of Poland in September, 1939, the Soviet Government by agreement with Germany seized five-eighths of Poland's territory, the so-called *Western Ukraine* and *Western Belorussia*, subsequently incorporated into the Ukrainian and Belorussian Republics respectively. In March, 1940, some territories ceded by Finland under the 1940 Peace Treaty were joined to the Karelian Autonomous Soviet Socialist Republic to form a Karelo-Finnish S.S.R., which became the 12th constituent Republic of the U.S.S.R., while others including the town of Viipuri (Vyborg), were added to the R.S.F.S.R. Similarly, in August of the same year, the major part of *Bessarabia* ceded by Roumania in June was joined to the Moldavian A.S.S.R. to form a Moldavian S.S.R. as the 13th Soviet Republic, while a smaller part of *Bessarabia*, including the Danube estuary port of Izmali, and *Northern Bukovina*, also ceded by Roumania, became part of the Ukraine. The new Soviet-Roumanian frontier was confirmed by the 1947 Peace Treaty with Roumania. In August, 1940, the three independent Baltic Republics, *Estonia*, *Latvia* and *Lithuania*, were forcibly incorporated into the Soviet-Union to form the 14th, 15th and 16th Republics respectively. In June, 1945, *Ruthenia* was ceded by Czechoslovakia and became part of the Ukrainian S.S.R. After the defeat of Germany, a part of *East Prussia* with its capital Königsberg (renamed Kaliningrad in July, 1946) became part of the R.S.F.S.R. By the 1947 Peace Treaty with Finland, the district of *Petsamo* (Pechenga) was added to the territory of the R.S.F.S.R. In the Far East, the southern half of *Sakhalin* and the whole of the *Kurile Islands* were incorporated into the last-named Republic in 1945, after the defeat of Japan. In October, 1944, *Tannu-Tuva*, until the war of 1939-45 a nominally independent state lying to the N.W. of Mongolia, became the autonomous province of *Tuva* within the R.S.F.S.R.

Area (1946) and population (1939) of the constituent Republics of the U.S.S.R.:—

Republic	Sq. miles	Population

* Excluding the population of the Far North.

CONSTITUTION

Under the 1936 ("Stalin") Constitution, the Union of Soviet Socialist Republics is "a socialist state of workers and peasants" (§ 1) in which "all power belongs to the working people as represented by the Soviets [Councils] of Working People's Deputies" (§ 3), while its economy is based on "the socialist ownership of the instruments and means of production" (§ 4). "The

land, its mineral wealth, waters, forests, mills, factories, mines, rail, water and air transport, banks, communications, large state-organized agricultural enterprises (state farms, machine and tractor stations and the like), as well as municipal enterprises and the bulk of dwelling-houses in the cities and industrial localities, are state property" (§ 6), while "the joint enterprises of collective farms and co-operative organizations . . . constitute the common, socialist property of the collective farms and co-operative organizations" (§ 7). "The law [also] permits the small private economy of individual peasants and handicraftsmen based on their own labour and precluding the exploitation of the labour of others" (§ 9). "The personal property right of citizens in their incomes and savings from work, in their dwelling-houses and subsidiary home enterprises, in household articles . . . as well as the right of citizens to inherit personal property, is protected by law" (§ 10). The whole economic life, however, is subordinated to the state economic plan (§ 11).

The U.S.S.R. is a federal state, "formed on the basis of a voluntary union of equal Soviet Socialist Republics" (§ 13); every Republic has "the right to secede from the U.S.S.R." (§ 17).

"The highest organ of state power in the U.S.S.R. is the Supreme Soviet of the U.S.S.R." (§ 30) which exercises exclusively the legislative power (§ 32). It consists of two Chambers, the *Soviet of the Union* (elected on the basis of one deputy for every 300,000 of the population) and the *Soviet of Nationalities* (elected at the ratio of 25 deputies from each Union Republic, 11 from each Autonomous Republic, 5 from each Autonomous Province and 1 from each National Territory). (§§ 33-35). The *Supreme Soviet* which, as a rule, meets twice a year for about a week, delegates most of its power to its *Presidium* which acts as a kind of collective President of the U.S.S.R. between the sessions.

"The highest executive and administrative organ of state power is the Council of Ministers of the U.S.S.R." (§ 64). It is appointed by the Supreme Soviet (§ 70) and is accountable to it, or, in the intervals between the sessions, to its *Presidium* (§ 65).

The Supreme Court of the U.S.S.R. and the Special Courts of the U.S.S.R. are elected by the Supreme Soviet for a term of five years (§ 104). Similarly, the Procurator-General, who exercises "supreme supervisory power to ensure the strict observance of law" (§ 113), is appointed by the Supreme Soviet for a term of seven years.

Citizens of the U.S.S.R. have the right to work, to rest and leisure, to maintenance in old age and sickness and disability relief and to education (§§ 118-121). "Women are accorded equal rights with men" (§ 122). Citizens are accorded equal rights irrespective of their nationality or race (§ 123). The citizens are also guaranteed freedom of speech, of the press, of assembly and of street processions and demonstrations, "in conformity with the interests of the working people and in order to strengthen the socialist system" (§ 125). Section 126 of the Constitution is remarkable for containing the only reference to the real master of the country, the Communist Party. It says that the citizens of the U.S.S.R. "are guaranteed the right to unite in public organizations, trade-unions, co-operative societies, youth organizations, sport and defence organizations, cultural, technical and scientific societies," and that "the most active and politically conscious citizens in the ranks of the working class and other sections of the working people unite in the Communist Party of the Soviet-Union, which is the vanguard

of the working people in their struggle to strengthen and develop the socialist system and is the leading core of all organizations of the working people, both public and state."

Local Government.—The state power in regions, provinces, autonomous provinces, territories, districts, towns and rural localities is vested in the *Soviets of Working People's Deputies* (§ 94), elected by the working people of the respective administrative units for a term of two years (§ 95). The executive and administrative organ of a Soviet is its Executive Committee elected by it (§ 99). The Union Republics and the smaller Autonomous Republics have Supreme Soviets and Councils of Ministers of their own (§§ 57-63 and 79-88), although their jurisdiction is severely circumscribed in favour of the central Government. Since February, 1944, the Union Republics have had the right to enter into direct relations with foreign states and to conclude agreements and exchange diplomatic and consular representatives with them (§ 18A). So far, however, the only diplomatic activity of this kind has been the individual membership of the Ukraine and of Belorussia in the United Nations Organization. Similarly, the 1944 law allowing each Union Republic to possess its own Republican military formations (§ 18B) seems to have remained a paper provision.

Although they possess Ministries of their own for such matters as internal affairs, state control, public health, agriculture, trade, finance and justice, the work of these Ministries is co-ordinated and directed by respective federal Ministries. The Union Republics possess exclusive jurisdiction only over such matters as motor transport, housing, municipal affairs, local industry, education, social insurance, and irrigation.

Religion.—Section 124 of the Constitution lays down that "in order to ensure to citizens freedom of conscience, the church in the U.S.S.R. is separated from the state, and the school from the church," and that "freedom of religious worship and freedom of anti-religious propaganda is recognized for all citizens." Churches have remained open in virtue of contracts concluded between the congregations and the local authorities. The clergy live on voluntary donations from their parishioners. A new *modus vivendi* between the Government and the religious communities was created during the War of 1939-1945. Two administrative bodies, the Council for the Affairs of the Russian Orthodox Church and the Council for the Affairs of Religious Cults, were set up in October, 1943 to provide liaison between the Council of Ministers and the religious bodies. In September, 1943, Stalin agreed to the election of the Patriarch of Moscow and All Russia, a post which had been vacant since the death of Patriarch Tikhon in 1925. Patriarch Sergius, elected by the Council of the Russian Church in 1943, died in May, 1944, and was succeeded in February, 1945, by the present holder of the See, Patriarch Alexius. In 1945 there were 20,000 orthodox parishes in the U.S.S.R. Several religious periodicals are now published in the U.S.S.R., but religious propaganda is still banned.

Education.—Under the Constitution, citizens of the U.S.S.R. have the right to education. "This right is ensured by universal and compulsory elementary education, by free education up to and including the seventh grade and by a system of state grants for students of higher educational establishments who excel in their studies" (§ 121). By 1939, the illiteracy figure had been reduced to below 10 per cent. for males above the age of 9

years and to below 28 per cent. for females of similar age.

In 1946 there were 37,400,000 children attending elementary and secondary schools or otherwise receiving instruction, as compared with 7,900,000 in 1924; the number of students attending higher educational centres was over 561,000 in 1945, compared with 122,000 in 1924. There are two universities in Moscow and 21 in other large centres, in addition to technical, scientific and research institutes, conservatoires of music, colleges of art, dramatic schools, etc. The main centre of research and learning is the Academy of Sciences of the U.S.S.R., which is in effect a vast and efficient government-controlled pool of scientists.

The Iron Curtain.—In the Soviet Union the state controls all educational institutions, theatres, cinemas, museums, libraries and picture galleries, as well as the press and the radio. The complete control achieved by this system was described in the following words by Dr. H. A. L. Fisher (in *A History of Europe*): "A hundred and sixty million human souls are by a gigantic system of government pressure hermetically sealed against the invasion of unwelcome truth." A similar description is conveyed by the phrase *The Iron Curtain* behind which the thoughts and actions of the governments are concealed from the free world, while the curtain prevents the intrusion of unwelcome ideas into the U.S.S.R. and into the countries of Central and Eastern Europe controlled by the Soviet Union.

A striking illustration of this practice is the jamming of British and American broadcasts in the Russian language which the Soviet Government began in April, 1949.

Chronological System.—On February 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar, and by a decree of June 16, 1930, the Soviet Government advanced all the clocks in the Union by one hour, thus adopting permanent Summer Time. The country is divided into several time zones (Moscow time is 3 hours ahead of G.M.T.).

LANGUAGE AND LITERATURE

Language and Literature.—Russian is a branch of the Slavonic family of languages which is divided into the following groups: *Eastern*, including Russian, Ukrainian and White Russian; *Western*, including Polish, Czech, Slovak and Sorbish (or Lusatian Wendish); and *Southern*, including Serbo-Croat, Slovene, Macedonian and Bulgarian. The Western group and part of the Southern group are written in the Latin alphabet, the others in the Cyrillic, said to have been instituted by S.S. Cyril and Methodius in the ninth century, and largely based on the Greek alphabet. Before the Westernization of Russia under Peter the Great (1682-1725), Russian literature consisted mainly of folk ballads (*byliny*), epic songs, chronicles and works of moral theology. The eighteenth and particularly the nineteenth centuries saw a brilliant development of Russian poetry and fiction. Romantic poetry reached its zenith with Alexander Pushkin (1799-1837) and Mikhail Lermontov (1814-1841). Realistic fiction is associated with the names of Nikolai Gogol (1809-1852), Ivan Turgenev (1818-1883), Fedor Dostoyevsky (1821-1881) and Leo Tolstoy (1828-1910), and later with Anton Tchekhov (1860-1904), Maxim Gorky (1868-1936), and Ivan Bunin (b. 1870). Great names in music include Glinka (1804-1857), Mussorgsky (1839-1881), Rimsky-Korsakov (1844-1908), Rubinstein (1829-1894), Tchaikowsky (1840-1893), Rakhmaninov (1873-1949), Scriabin (1872-1915), Prokofiev (1891-1953) and Stravinsky (b. 1882),

FINANCE

Soviet Union Budget

	1952 Roubles	1953 (Estimate) Roubles
Revenue.....	497,700,000,000	543,300,000,000
Expenditure....	460,200,000,000	530,500,000,000

Expenditure (Roubles)

	1952	1953 (Estimate)
Grants to national economy...	178,800,000,000	192,500,000,000
Social and cultural services...	122,800,000,000	129,800,000,000
Defence.....	113,800,000,000	110,200,000,000
Administration..	20,800,000,000	14,300,000,000
Unspecified....	24,000,000,000	83,700,000,000

On March 1, 1950, the Soviet Government revalued the Rouble (of 100 Kopecks), with the result that nominally £1 now equals R.11.20 (instead of R.14.84). This revaluation has not affected the Soviet Union's trade with countries outside her sphere of influence, which continues to be calculated on the basis of dollars.

In 1939 the exchange rate in London was 23.58 to 24.87 roubles=£1. (See also p. 83).

DEFENCE

Defence.—The expenditure on defence appears in the 1952 budget estimate as Roubles 113,800,000,000. No returns concerning the services have been made for some years. The Soviet Army is the world's largest conscript army; probably it has 3,000,000 men now under arms. Since the war it has conscripted over 1,200,000 men a year. Conscripts do two years' colour service followed by about eight years in the reserve. On its present establishment the Soviet Army contains nearly 200 divisions. The *Air Force*, which forms part of the Army, has made immense progress since the war. Soviet aircraft production is believed to amount to at least 12,000 military aircraft annually, and it is generally estimated that the U.S.S.R. has a first-line air strength of 18,000 military aircraft.

The Soviet Navy is believed to consist of 4 battle-ships, 2 aircraft carriers, 13 cruisers, and large numbers of destroyers, torpedo boats and submarines. The construction of submarines is of special priority.

Minister of Defence, Marshal N. A. Bulganin.
Senior Vice-Ministers, Marshal A. M. Vasilievsky;
Marshal G. K. Zhukov.
Chief of General Staff, Marshal V. D. Sokolovsky.

PRODUCTION AND INDUSTRY

One of the most remarkable aspects of Soviet economy has been the transformation of what was primarily an agricultural country into one of the foremost industrial nations of the world in the course of the four successive *Five Year Plans*. Nevertheless agriculture and stock raising are still the principal occupations and employ about 64 per cent. of the population. The area under crops has increased from 259,500,000 acres in 1913 to 392,500,000 in 1941. At the same time, there was a relative decrease of the proportion under grain and an increase of the proportion under industrial crops such as sugar beet, flax, cotton, etc., as well as of that under vegetables and fodder crops. The yield of the chief crops has been steadily rising owing to more rational and scientific methods of farming. The gross grain harvest of 1949 was stated at 7,600,000,000 *poods* (about 122,000,000 tons). Land under crops east of the Volga and the Caspian has greatly increased. In 1937, U.S.S.R. grew 31.1 per cent. of the world wheat, 24.7 per cent. of oats, 10.3 per cent. of cotton and

26.5 per cent. of sugar beet. The live stock in 1938 included 63,200,000 cattle, 17,500,000 horses, 202,500,000 sheep and goats and 22,800,000 pigs. The war of 1939-1945 greatly reduced these numbers.

In 1938 there were about 243,000 collective farms (*kolkhoz*), each about 1,000 acres in area and nearly 4,000 state farms (*sovkhoz*), usually about 10,000 acres. Individual holdings still exist in the areas incorporated into the U.S.S.R. since 1939, but their number has been rapidly dwindling, particularly since 1948, when the pace of collectivization was greatly stepped up and large numbers of recalcitrant peasants deported to the East. In 1950 a new reform has been initiated—the merger of collective farms (in most cases based on individual villages) into larger units.

Forests cover nearly 40 per cent. of the whole area of the Union and form a considerable source of wealth.

Several ambitious industrial projects were made public by the Soviet Government in August and September, 1950. They include the construction of three large water-power stations on the Volga and the Dnieper and of several canals, east of the Caspian and in the Southern Ukraine. The main purpose of these projects is the irrigation of vast tracts of arid land east of the Volga and north of the Crimean Peninsula.

COMMUNICATIONS

Railways.—Length of railways in use:

Year	Miles	Year	Miles
1900.....	31,675	1936.....	53,187
1925-6.....	26,255	1940.....	59,375
1935.....	52,687	1945.....	65,824

European Russia is relatively well served by railways, Leningrad and Moscow being the two main focal points of rail routes. The centre and south have a good system of north-south and east-west lines, but the eastern part (the Volga lands), traversed as it is by trunk lines between Europe and Asia which enter Siberia *via* Sverdlovsk, Chelyabinsk, Magnitogorsk and Ufa, lacks north-south routes. In Asia, there are still large areas of the U.S.S.R., notably in the Far North and Siberia, with few or no railways. Construction of new railways is subordinated to the needs of the Five Year Plans. Railways built since 1928 include the Turkestan-Siberian line (*Turksib*) which has made possible a large-scale industrial exploitation of Kazakhstan, a number of lines within the system of the *Trans-Siberian Railway* (Magnitogorsk-Kartaly-Troitsk, Sverdlovsk-Kurgan, Novosibirsk-Proyektnaya, etc.), which are of great importance for the industrial development in the East, the Petropavlovsk-Karaganda-Balkhash line which has made possible the development of the Karaganda coal basin and of the Balkhash copper mines, and the Moscow-Donbass trunk line. Lines envisaged under the new Five Year Plan include the Stalinsk-Magnitogorsk trunk line. In the northern part of European Russia, the North Pechora Railway has been completed, while in the Far East a second Trans-Siberian line is under construction; it will follow a more northerly alignment than the existing Trans-Siberian and will terminate in the Pacific port of Sovetskaya Gavan.

Sea Ports and Inland Waterways.—The most important ports (Odessa, Nikolayev, Batum, Taganrog, Rostov, Kerch, Sebastopol and Novorossiisk) lie around the Black Sea and the Sea of Azov. The northern ports (Leningrad, Murmansk and Archangel) are, with the exception of Murmansk, ice-bound during winter. Several new ports have been built along the Arctic Sea route (between

Murmansk and Vladivostok) and are now in regular use every summer. The great Far Eastern port of Vladivostok, the Pacific naval base of the U.S.S.R., is kept open by icebreakers all the year round. Inland waterways, both natural and artificial, are of great importance in the country, although all of them are icebound in winter (from 2½ months in the south to 6 months in the north). The great rivers of European Russia flow outwards from the centre, linking all parts of the plain with the chief ports, an immense system of navigable waterways which carries about 60 million tons of freight per year. They are supplemented by a system of canals which provide a through traffic between the White, Baltic, Black and Caspian Seas. The most notable of them, built largely by forced labour, are the *White Sea-Baltic Stalin Canal*, and the *Moscow-Volga Canal*. The new 63-miles long *Volga-Don Canal*, linking the Baltic and the White Seas in the North to the Caspian, the Black Sea and the Sea of Azov in the South, was completed in May, 1952.

Merchant Navy.—There were 560 steamships of 960,261 gross tons and 139 motor vessels of 345,698 gross tons, flying the flag of the U.S.S.R. in July, 1939.

Posts and Telegraphs.—In 1935 the post offices handled about 1,600,000,000 letters and post-cards; the length of telegraph (and telephone) lines was stated at 826,500 miles.

CAPITAL OF U.S.S.R., MOSCOW (see below). For other cities see following articles.

FLAG OF THE U.S.S.R.—Red, with star above hammer and sickle.

NATIONAL DAY OF U.S.S.R.—November 7 (Commemorating the Bolshevik *coup d'état* of 1917).

BRITISH EMBASSY

(Sofiskaya Naberezhnaya 14, Moscow)

British Ambassador, His Excellency Sir William Goodenough Hayter, K.C.M.G. (1953) £4,500.
Minister, P. F. Grey, C.M.G.

1st Secretaries, A. G. R. Rouse, O.B.E.; P. Menell, M.B.E.; T. Brimelow.

2nd Secretaries, Miss J. M. Sheppard; R. J. C. Pease.

3rd Secretaries, H. L. O'Bryan Tear; C. G. F. James, M.B.E.

1st Secretary and Embassy Medical Officer, Dr. B. Haigh.

Chaplain, Rev. H. Isherwood.

Naval Attaché, Capt. A. A. F. Talbot, D.S.O., R.N.

Military Attaché, Colonel M. W. Prynn, O.B.E.

Air Attaché, Air Commodore J. C. A. Johnson.

There are no British Consulates in the U.S.S.R.

I.—R.S.F.S.R.

(The Russian Soviet Federal Socialist Republic)

Chairman of the Presidium of the Supreme Soviet, M. P. Tarasov.

Chairman of the Council of Ministers, A. M. Puzanov.

The R.S.F.S.R. has no Communist Party Central Committee of its own.

The R.S.F.S.R., the largest and the most important of the Republics, occupies the major half of the European part of the U.S.S.R. and the major northern half of its Asiatic part and makes up 77 per cent. of the total territory of the U.S.S.R. with 64 per cent. of the total population. It consists of 12 Autonomous Republics (the Bashkir, Buryat-Mongolian, Chuvash, Daghestan, Kabardin, Komi, Mari, Mordovian, North-Osetian, Tartar, Udmurt and Yakut A.S.S.R.'s); 6 regions (Altai, Khabarovsk, Krasnodar, Kras-

noyarsk, Maritime and Stavropol), containing in their turn 5 autonomous provinces, 2 provinces, and 4 national territories; 48 provinces (Amur, Archangel, Astrakhan, Bryansk, Chelyabinsk, Chita, Chkalov, Crimea, Gorky, Grozny, Irkutsk, Ivanovo Kalinin, Kaliningrad, Kaluga, Kemerovo, Kirov, Kostroma, Kuibyshev, Kurgan, Kursk, Leningrad, Molotov, Moscow, Murmansk, Novgorod, Novosibirsk, Omsk, Orel, Penza, Pskov, Rostov, Ryazan, Saratov, Sakhalin, Smolensk, Stalingrad, Sverdlovsk, Tambov, Tomsk, Tula, Tyumen, Ulyanovsk, Velikie-Luki, Vladimir, Vologda, Voronezh and Yaroslavl), which in their turn include 6 national territories; and 1 autonomous province (Tuva).

Physical Features.—The R.S.F.S.R. may be conveniently divided into three areas, a low-lying flat Western part stretching eastwards up to the Yenisei and divided in two by the Ural ridge; an Eastern part, between the Yenisei and the Pacific, consisting of a number of tablelands and ridges, and a Southern mountainous part. Climatically, the R.S.F.S.R. lies in all zones, except the tropics, and may be divided into the following belts (from north to south): Arctic, Tundra, Forest, Mixed Forest-Steppe, Steppe, Sub-Tropics.

The Republic has a very long coast-line, including the longest Arctic coast-line in the world (about 17,000 miles). The most important rivers in the European Part of the R.S.F.S.R. are the Volga with its tributaries Kama and Oka, the Northern Dvina and the Pechora, the short but wide Neva, the Don and the Kuban, and in the Asiatic part, the Ob with the Irtysh, the Yenisei, the Lena and the Amur, and, further North, Khatanga, Olenok, Yana, Indigirka, Kolyma and Anadyr. Lakes are abundant, particularly in the north-west. The huge Baikal Lake in Eastern Siberia is the deepest lake in the world. There are also two large artificial water reservoirs within the Greater Volga canal system, the Moscow and Rybinsk "Seas."

Minerals.—The Republic occupies one of the first places in the world for mineral wealth. Coal is mined in the Kuznetsk area, in the Urals, south of Moscow, in the Donets basin (its Eastern part lies in the R.S.F.S.R.) and in the Pechora area in the North. Oil is produced in the Northern Caucasus and in the area between the Volga and the Ural (the so-called "Second Baku"). The Ural mountains contain a unique assortment of minerals—high-quality iron ore, manganese, copper, aluminium, gold, platinum, precious stones, salt, asbestos, pyrites, coal, oil, etc. Iron ore is mined, in addition to the Urals, near Kerch in the Crimea, near Kursk, Tula, Lipetsk, Khoper, in several areas in Siberia and in the Kola Peninsula. Non-ferrous metals are found in the Altai, in Eastern Siberia, in the Northern Caucasus, in the Kuznetsk Basin, in the Far East and in the Far North. Nine-tenths of all U.S.S.R. forests are located in the R.S.F.S.R.

Production and Industry.—The vastness of the territory of the Republic and the great variety in climatic conditions cause great differences in the structure of agriculture from north to south and from west to east. In the Far North stag breeding, hunting and fishing are predominant. Further south, timber industry is combined with grain growing. In the southern half of the forest zone and in the adjacent forest-steppe zone, the acreage under grain crops is far larger and the structure of agriculture more complex. In the Eastern part of this zone, between the Volga and the Urals, cereiculture is predominant (particularly summer wheat), with cattle breeding next. Beyond the Urals, we find another important grain-growing and stock-breeding area in the Southern part of

the Western-Siberian plain. The Southern steppe zone is the main wheat granary of the U.S.S.R., containing also large acreages under barley, maize and sunflower. In the extreme South (Crimea, Krasnodar region, Stavropol region) cotton is now cultivated. Vine, tobacco and other Southern crops are grown in Southern Crimea and on the Black Sea shore of the Caucasus.

Industrially, the R.S.F.S.R. occupies the first place among the Soviet Republics. Major changes in the location of industry have occurred since the revolution, with two new industrial areas being developed in the Urals and in the Kuznetsk basin, although Moscow and Leningrad are still the two largest industrial centres in the country. All industries are represented in the R.S.F.S.R., including iron and steel and engineering. Industrial centres include Magnitogorsk, Chelyabinsk, Stalinsk, Tula, Komsomolsk, Molotov, Ufa, Irkutsk, Kuibyshev, Krasnoyarsk, Nizhny-Tagil, Novosibirsk, Omsk, Stalingrad, Gorky, Saratov, Grozny, Rostov and Taganrog.

CAPITAL, Moscow. Population (1939) 4,137,000. Moscow, founded about A.D. 1147 by Yuri Dolgoruki, became first the centre of the rising Moscow principality and, later, in the 15th century, the capital of the whole of Russia (Muscovy). In 1325, it became the seat of the Metropolitan of Russia. In 1703 Peter the Great transferred the capital to the newly built St. Petersburg, but on March 14, 1918, Moscow was again designated as the capital. Ψ Leningrad (before the First World War "St. Petersburg" and from 1914-1924 "Petrograd") had a population (1939) of 3,191,300.

Other cities with populations exceeding 300,000 (1939) are:—

Gorky (Nizhny-Novgorod)	644,100
Ψ Rostov-on-Don	510,300
Stalingrad (Tsaritsyn)	445,500
Sverdlovsk (Yekaterinburg)	425,500
Novosibirsk (Novonikolayevsk)	405,600
Kazan	401,700
Kuibyshev (Samara)	390,300
Saratov	375,900
Voronezh	326,900

The urban population makes up 33.5 per cent. of the total. About three-quarters of the population are Russians.

There are universities in Moscow, Leningrad, Kazan, Saratov, Tomsk, Vladivostok, Voronezh, Gorky, Irkutsk, Molotov, Rostov and Sverdlovsk and a large number of special colleges.

Ψ Seaport.

II.—THE UKRAINE

Chairman of the Presidium of the Supreme Soviet, M. S. Grechukha.

Chairman of the Council of Ministers, D. S. Korotchenko.

Minister of Foreign Affairs, A. M. Baranovsky.

First Secretary of the Party Central Committee, A. I. Kirichenko.

This Republic, second largest in population, lying in the South-Western part of the European half of the U.S.S.R., was formed in December, 1917. It consists of 25 provinces—Chernigov, Chernovtsy, Dnepropetrovsk, Droboych, Izmail, Kamenets-Podolsk, Kharkov, Kherson, Kiev, Kirovograd, Lvov, Nikolayev, Odessa, Poltava, Rovno, Stalino, Stanislav, Sumy, Ternopol, Transcarpathia, Vinnytsa, Volhynia, Voroshilovgrad, Zaporozhye and Zhitomir.

Physical Features.—The larger part of the Ukraine forms a plain with small elevations. The Carpathian mountains lie in the south-western part of

the Republic. The climate is moderate, with relatively mild winters (particularly in the south-west) and hot summers. The main rivers are the Dnieper with its tributaries, the Southern Bug and the Northern Donets (a tributary of the Don).

Production and Industry.—The main centre of Soviet coal mining and iron and steel industry is situated in the southern part of the Ukraine. Engineering and chemical industry have been greatly developed under the Soviet regime. The central forest-steppe region (mainly on the right bank of the Dnieper) is the greatest sugar-producing area in the U.S.S.R. The Ukraine is also leading in grain-growing and stock-raising. In 1937, the Ukraine provided more than 54 per cent. of the total Soviet coal, 61 per cent. of iron, 17 per cent. of metal goods, 64 per cent. of sugar, 22 per cent. of wheat.

The War of 1939-1945 did grave damage to the Ukraine. The loss in human lives is estimated at 2,500,000. Most coal mines were flooded, power stations, mills and factories were blown up or destroyed in fighting. Only 42 per cent. of cattle, 10 per cent. of pigs, 18 per cent. of sheep and goats and 22 per cent. of horses survived the war. The reconstruction of industry and rehabilitation of agriculture is pursued with great vigour. Important help was rendered in the first post-war period by UNRRA.

There are large deposits of coal and salt in the Donets Basin, of iron ore in Krivoy Rog, of manganese in Nikopol, and of quicksilver in Nikitovka.

The Uniate Church of the Western Ukraine, united to the Roman Catholic Church since 1596, was deprived of her Bishops and many priests in 1946 and the people forced to return to the Russian Orthodox Church.

CAPITAL (since 1934), Kiev, the oldest city in Russia, founded in the 7th century A.D., was the capital of the Russian State from 865-1240. Population (1939), 846,300. Other towns with population (1939) exceeding 300,000 are:—

Kharkov.....	833,400
Odessa.....	604,200
Dnepropetrovsk (Yelizavetgrad).....	500,700
Stalino (Yuzovka).....	462,400
L'vov (1931).....	317,000

III.—BELORUSSIA.

(White Russia)

Chairman of the Presidium of the Supreme Soviet, V. I. Kozlov.

Chairman of the Council of Ministers, K. T. Mazurov.

Minister of Foreign Affairs, K. V. Kiselev.

First Secretary of the Party Central Committee, N. S. Patolichev.

The Belorussian S.S.R., lying in the Western part of the European half of the U.S.S.R., was formed early in 1919. It now consists of 12 provinces (Baranovich, Bobruisk, Brest, Gomel, Grodno, Minsk, Mogilev, Molodechno, Pinsk, Polesye, Polotsk and Vitebsk). It is largely a plain with many lakes, swamps and marshy land. Before the revolution of 1917 the area was one of the most backward parts of European Russia. Since then, agriculture has been greatly developed, thanks to draining of swamps. Most of the Republic's industry is also of recent growth. Woodworking is of great importance, but engineering has also been greatly extended with several major plants built in Gome and Minsk.

The Republic suffered heavily during the War of 1939-1945 with most of her towns reduced to

ruins, but reconstruction (aided in the first post-war years by UNRRA) is proceeding apace. A large automobile plant is under construction in Minsk. The main rivers are the upper reaches of the Dnieper, of the Niemen and of the Western Dvina.

CAPITAL, Minsk. Population (1939), 238,800. Other major towns are Vitebsk (167,400) and Gomel (144,200).

In 1939, Belorussians made up four-fifths of the population, with Russians and Jews coming next, but territorial and demographic changes since then must have greatly altered this proportion.

IV.—UZBEKISTAN

Chairman of the Presidium of the Supreme Soviet, Sh. R. Rashidov.

Chairman of the Council of Ministers, U. Y. Yusupov.
First Secretary of the Party Central Committee, A. I. Niyazov.

The Uzbek S.S.R., economically the most important of the Central-Asiatic Republics, was formed in 1924 and consists of the Kara-Kalpak A.S.S.R. and of 9 provinces (Andizhan, Bokhara, Ferghana, Kashka-Darya, Khorezm, Namangan, Samarkand, Surkhan-Darya and Tashkent). It lies between the high Tienshan Mountains and the Pamir highlands in the east and south-east and sandy lowlands in the west and north-west. The major part of the territory is a plain with huge waterless deserts and several large oases, which form the main centres of population and economic life. The largest is the Ferghana valley, watered by the Syr-Darya. Other oases include Tashkent, Samarkand, Bokhara and Khorezm. The climate is continental and dry. Minerals include oil (in the Ferghana valley and in Khandag), coal (recently discovered at Angren) and sulphur (Shorsu).

There is a major agricultural machinery plant at Tashkent and a chemical combine at Chirchik. Uzbekistan is the main cotton-growing area of the U.S.S.R., producing more than 60 per cent. of all Soviet cotton. Irrigation has always been of decisive importance in this area, and the Soviet Government has done much in this field, including the construction of the Great Ferghana Canal (230 miles).

CAPITAL, Tashkent. Population (1939), 585,000. Samarkand (134,300) contains the Gur-Emir (Tamerlane's Mausoleum), completed A.D. 1400 by Ulug-bek, Tamerlane's astronomer-grandson, and a 15th-century observatory, recently restored.

V.—KAZAKHSTAN.

Chairman of the Presidium of Supreme Soviet, D. Kerimbayev.

Chairman of the Council of Ministers, Y. B. Taibekov.
First Secretary of the Party Central Committee, Zh. Shayakhmetov.

The Kazakh S.S.R., the second-largest Union-Republic, stretching from the lower reaches of the Volga and the Caspian in the west to the Altai and Tien-shan in the east, and bordering on China, was formed in 1920 as an autonomous republic (under the name of the Kirghiz A.S.S.R.) within the R.S.F.S.R., and was constituted a Union Republic in 1936. It consists of 16 provinces (Akmolinsk, Aktyubinsk, Alma-Ata, Djambul, East-Kazakhstan, Guryev, Karaganda, Kustanay, Kokchetav, Kzyl-Orda, North-Kazakhstan, Pavlodar, Semipalatinsk, South-Kazakhstan, Taldy-Kurgan and West-Kazakhstan).

Kazakhstan is a country of arid steppes and semi-deserts, flat in the West, hilly in the East and mountainous in the South-East (Southern Altai and Tien-shan). The climate is continental and

very dry. The main rivers are the (Upper) Irtysh, the Ural, the Syr-Darya and the Ili. Kazakhstan contains rich deposits of non-ferrous metals: copper in Kounrad, Djezkazgan and Boshchekul, other metals in the Altai, in the Kara-Tau Mountains, and elsewhere. It also contains an important coal-producing area (Karaganda) ranking third in the U.S.S.R. and an oil-bearing area (near Emba). Major centres of metal industry exist now in the Altai Mountains, in Chirchikent, North of the Balkhash Lake and in Central Kazakhstan. Stock-raising is highly developed, particularly in the Central and South-Western parts of the Republic. Grain is grown in the North and North-East and cotton in the South and South-East.

The Kazakhs make up about three-fifths of the population, the Russians, about one-fifth. There are also many Ukrainian settlers, mainly in the North and some Uzbeks in the South.

CAPITAL, Alma-Ata (formerly Verna). Population (1939), 230,500. Other towns include Karaganda (165,900) and Semipalatinsk (109,800).

VI.—GEORGIA

Chairman of the Presidium of the Supreme Soviet, V. G. Tskhovrebashvili.

Chairman of the Council of Ministers, M. Javakhishvili. First Secretary of the Party Central Committee, M. Mamaladze.

The Georgian S.S.R., occupying the north-western part of Transcaucasia, lies on the shore of the Black Sea and borders in the south-east on Turkey. It was formed in 1921; in 1922 it joined the Transcaucasian Federation which, in its turn, adhered to the U.S.S.R. in the same year. After the liquidation of the Transcaucasian S.F.S.R. in 1936 Georgia became a Union Republic. It consists of the Tbilisi and Kutaisi Provinces, two Autonomous Republics (Abkhazia and Adjara) and the South-Osetian Autonomous Province. Georgia is a country of mountains, with the Greater Caucasus in the North and the Smaller Caucasus in the South. A relatively low-lying land between these two ridges is divided into two parts by the Sura Ridge: Western Georgia with a mild and damp climate and Eastern Georgia with a more continental and dry climate. The Black Sea shore and the Rion lowlands are sub-tropical in their climatic character. The most important mineral deposits are manganese (Chiaturi), coal (Tkibuli and Tkvarcheli) and oil (Kakhetia). Georgia is leading as regards production of manganese in the U.S.S.R. There are also many oil refineries. Viticulture and tobacco-growing are the two main agricultural industries. The Black Sea coast harbours many famous holiday resorts. Georgians make up about three-fifths of the population, the remainder being composed of Armenians, Russians, Azerbaijani and Osetians.

Shortly after Stalin's death a major purge of the Party and Government machineries took place in Georgia. Another purge occurred after Beria's fall in July, 1953.

CAPITAL, Tbilisi (Tiflis) Population (1939), 519,200.

VII.—AZERBAIDJAN

Chairman of the Presidium of the Supreme Soviet, N. G. Geydarov.

Chairman of the Council of Ministers, T. I. Kuliev. First Secretary of the Party Central Committee, M. T. Yakobov.

The Azerbaijan S.S.R. occupies the eastern part of Transcaucasia, on the shores of the Caspian Sea, and borders on Persia. It was formed in 1920. Between 1922-1936 it formed part of the Transcaucasian Federation. In 1936 it became a

Union Republic. It consists of two provinces (Baku and Gence), the Nakhichevan Autonomous Republic and the Nagorno-Karabakh Autonomous Province.

The North-Eastern part of the Republic is taken up by the South-Eastern end of the main Caucasus ridge, its South-Western part by the smaller Caucasus hills, and its South-Eastern corner by the spurs of the Talysh Ridge. Its central part is a depression irrigated by the Kura and by the middle reaches of its tributary Arax. Sheltered by the mountains from the humid west winds blowing from the Black Sea, Azerbaijan has a continental climate. The land requires artificial irrigation. The Republic is very rich in minerals, particularly in oil. The Baku oilfields form the largest oil-producing area in the U.S.S.R., with three-quarters of the total output. A large power station on the Kura (Mingechaur) is under construction. Azerbaijan is also important as a cotton growing area. Baku is the busiest sea port in the U.S.S.R. The Azerbaijani make up three-fifths of the population of the Republic, Armenians, about 12 per cent., and Russians, about 10 per cent.

CAPITAL, Baku. Population (1939), 809,300.

VIII.—LITHUANIA

Chairman of the Presidium of the Supreme Soviet, J. L. Paleckis.

Chairman of the Council of Ministers, M. A. Gedvilas. First Secretary of the Party Central Committee, A. J. Snieckus.

Lithuania, formerly a Province of the Russian Empire, was declared an independent Republic at Vilna in 1918 and was incorporated into the U.S.S.R. in August, 1940. It was occupied by German forces from June, 1941, until the autumn of 1944. It now consists of four provinces: Kaunas, Klaipeda, Siauliai, and Vilnius. The Republic forms a plain with a large number of lakes and swamps. The forests occupy 19 per cent. of the whole area. The main river is the Niemen with its tributaries.

The chief industries are agriculture and forestry the chief products being rye, oats, wheat, barley, flax, sugar-beet and potatoes. Before its incorporation into the Soviet Union, Lithuania exported a large quantity of meat and dairy produce. A radical agrarian reform was carried out between August, 1940, and June, 1941, and resumed after 1944. The collectivization of the peasantry continues in stages.

In 1923, the Lithuanians made up 84.2 per cent. of the population, Jews, 7.6, Poles, 3.2, and Russians, 2.5 of the population. The majority of Jews were exterminated by the Germans, and large numbers of Lithuanians and Poles deported by the Soviets.

CAPITAL, Vilnius (Vilna, restored to Lithuania by U.S.S.R. after invasion and collapse of Poland in 1939, and recaptured by Soviet forces in July, 1944). Population (1940), 209,400, Kaunas (Kovno) had 154,100 inhabitants in 1940.

IX.—MOLDAVIA

Chairman of the Presidium of the Supreme Soviet, I. S. Koditsa.

Chairman of the Council of Ministers, G. Y. Rud. First Secretary of the Party Central Committee, D. S. Gladky.

Moldavia, occupying the south-western corner of the U.S.S.R., borders in the west on Roumania with the Pruth forming the frontier. It is subdivided into four okrugs—Kishinev (Chisinau), Tiraspol, Kagul (Cahul) and Balti. In 1918,

Roumania seized the Russian Province of Bessarabia. In 1924 a Moldavian Autonomous Republic was formed within the Ukraine, and in 1940 the U.S.S.R. forced Roumania to give back Bessarabia, the major part of which was merged with the Moldavian A.S.S.R. to form a Moldavian Union Republic. Moldavia was occupied by the Germans and Roumanians between 1941-1944.

The Northern part of the Republic consists of flat steppe lands, now all under plough. Some forests skirt the Dniester. Further south, around Kishinev, there are woody hills, and further south again, low-lying steppe lands. The climate is moderate. The main river is the Dniester, navigable along the whole course.

The main industry is agriculture (viniculture, fruit-growing and market-gardening). Industry is insignificant in both parts of Moldavia, but the Republic has the densest population in the U.S.S.R. A radical agrarian reform has been carried out under the Soviet régime. Moldavians make up 65 per cent. of the population, with Ukrainians, Russians and Jews next. In the South there are colonies of Bulgarians.

CAPITAL, Kishinev (Chisinau). Population (1939) 120,000.

X.—LATVIA

Chairman of the Presidium of the Supreme Soviet, K. Ozolins.

Chairman of the Council of Ministers, V. T. Lacis.
First Secretary of the Party Central Committee, J. E. Kalnberzins.

The Latvian S.S.R., lying on the shores of the Baltic and of the Gulf of Riga, and composed of the Riga, Daugavpils and Liepaja provinces, was formerly a Baltic Province of the Russian Empire. It was proclaimed an independent state in 1918 and was forcibly incorporated into the U.S.S.R. in August 1940. Between 1941 and 1944 the Republic was occupied by the German forces.

The surface of the country is generally flat, interspersed by occasional chains of hills. The climate is moderately-continental. The main rivers are the lower reaches of the Western Dvina and its tributaries. Forests occupy 20 per cent. of the total territory.

In 1940, Latvians made up three-quarters of the population, with Russians and Jews coming next. Most of the Jews have been exterminated by the Germans, and many Latvians deported by the Soviets.

Latvian industry was always highly developed, with shipbuilding, engineering, chemical industry, textile industry, wood-working and dairying being the chief occupations. Both Riga and Liepaja (Libava, Liebau) are large sea-ports.

As in other newly-acquired Republics an agrarian reform was carried out in Latvia in 1940-41 and again after 1944.

CAPITAL, Riga. Population (1935) 385,700.

XI.—KIRGHIZIA

Chairman of the Presidium of the Supreme Soviet, T. Kulatov.

Chairman of the Council of Ministers, A. Suerkulov.
First Secretary of the Party Central Committee, I. R. Razzakov.

The Kirghiz S.S.R. occupies the north-eastern part of Soviet Central Asia and borders in the south-east on China. In 1924, as Kara-Kirghiz Autonomous Province was formed within the R.S.F.S.R. In 1926 it became a Kirghiz Autonomous Republic, and in 1936, a Union Republic. It consists now of six provinces (Djalal-Abad,

Frunze, Issyk-Kul, Osh, Talas and Tien-Shan). The Kirghiz Republic is a mountainous country, the major part being covered by the ridges of the Central Tien-Shan, while mountains of the Pamiro-Alai system occupy its Southern part. There are a number of spacious mountain valleys, the Alai, Susamyr, the Issyk-kul lake and others. The majority of the population is concentrated in plains, lying at the foot of mountains—Chu, Talass, part of the Fergana Valley, where agriculture prospers. Industry is insignificant, but some mining is done. A number of railways have been built under the Five Year Plans. About two-thirds of the population are Kirghiz, followed by Russians and Ukrainians in the North and Uzbeks in Eastern Fergana.

CAPITAL, Frunze (formerly Pishpek). Population (1939), 92,700.

XII.—TADJIKISTAN

Chairman of the Presidium of the Supreme Soviet, N. Dodkhudoyev.

Chairman of the Council of Ministers, D. Rasulov.
First Secretary of the Party Central Committee, B. G. Gafurov.

The Tadjik S.S.R. lies in the extreme south-east of Soviet Central Asia and borders in the south on Afghanistan and in the east on China. It was originally formed in 1924 as an Autonomous Republic within the Uzbek S.S.R. and became a Union Republic in 1929. It consists of the Gorno-Badakhshan Autonomous Province and of four Provinces (Garm, Kulyab, Kurgan-Tepe and Leninabad).

The country is mountainous: in the east lie the Pamir highlands with the highest point in the U.S.S.R., the Stalin Peak (24,590 feet), in the centre the high ridges of the Pamir-Alai system. Plains are formed by wide stretches of the Syrdarya valley in the north and of the Amu-Darya in the south.

Like the other Central-Asiatic Republics, Tadjikistan is a cotton-growing country. Its climatic conditions favour the cultivation of Egyptian cotton. Irrigation is of great importance. About 60 per cent. of the population are Tadjiks, about 24 per cent., Uzbeks, the rest, Russians and Kirghiz.

CAPITAL, Stalinabad (formerly Dyushambe). Population (1939), 82,500.

XIII.—ARMENIA

Chairman of the Presidium of the Supreme Council, M. P. Papyan.

Chairman of the Council of Ministers, A. E. Kochinyan.
First Secretary of the Party Central Committee, G. A. Arutinov.

The Armenian S.S.R. (subdivided into three okrugs—Erevan, Kirovakan and Leninakan) occupies the South-Western part of Transcaucasia; it was formed in 1920. In 1922 it joined the Transcaucasian Federation, and on its liquidation in 1936 became a Union Republic. In the south it borders on Turkey. It is a mountainous country consisting of several vast table lands surrounded by ridges. The population and the economic life are concentrated in the low-lying part of Armenia, the Aras valley and the Erevan hollow; the climate is continental, dry and cold, but the Aras valley has a long, hot and dry summer. Irrigation is essential for agriculture. At the junction of the former Turkish, Persian and Russian boundaries is Mount Ararat (17,260 ft.), the traditional resting place of "Noah's Ark." Industrial and fruit crops are grown in the low-lying districts, grain in the hills. Armenia is traditionally noted for her wine. There are large copper ore and molybdenum deposits and

other minerals. Carpet manufacture is the principal native industry. The Armenian Church centred in Etchmiadzin is the oldest established Christian Church, Christianity having been recognized as the State religion in 300, and since the 5th century there has been a national language and literature.

More than four-fifths of the population are Armenians.

CAPITAL, Erevan (formerly Erivan). Population (1939), 200,000.

XIV.—TURKMENISTAN

Chairman of the Presidium of the Supreme Council, A. Sariev.

Chairman of the Council of Ministers, B. Ovezov.
First Secretary of the Party Central Committee, S. Babayev.

Turkmenia occupies the extreme south of Soviet Central Asia, between the Caspian and the Amu-Darya and borders in the south on Iran and Afghanistan. It was formed in 1924 and consists of six Provinces (Ashkhabad, Chardjou, Kerki, Krasnovodsk, Mary and Tashauz). The country is a low-lying plain, fringed by hills in the South. Ninety per cent. of the plain is taken up by the arid Kara-Kum desert. Of all Central-Asiatic Republics, Turkmenia is the lowest and driest. The principal industries are agriculture and stock-raising, cotton, wool, astrakan furs, carpets and horses being the principal products. Minerals include oil and sulphur. Most of the land under plough is artificially irrigated. Silk industry is of an old standing. There are also some fisheries in the Caspian.

Turkmens, nomadic in the past, make up 70 per cent. of the population, with Russians coming second, and Uzbeks, third.

CAPITAL Ashkhabad (formerly Askhabad, Poltoratsk). Population (1939) 126,600. (Largely destroyed by an earthquake on October 6, 1948.)

XV.—ESTONIA

Chairman of the Presidium of the Supreme Council, A. M. Jakobson.

Chairman of the Council of Ministers, A. A. Mürlisepp.
First Secretary of the Party Central Committee, L. G. Kabin.

Estonia, formerly a Baltic province of the Russian Empire, was proclaimed an independent Republic in 1918. In 1940, it was forcibly incorporated into the U.S.S.R. It lies on the shores of the Baltic and of the Finnish Gulf in the north and of the Gulf of Riga in the south-west. Some 800 islands, among them Dagö and Ösel, form part of Estonian territory. Between 1941-44, Estonia was occupied by the German forces.

The country forms a low-lying plain with many lakes, among them the Chud (or Pskov) Lake, on the border with the R.S.F.S.R. Forests take up about one-fifth of the territory. Agriculture and dairy-farming are the chief industries, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon and eggs the chief products of dairy farming. There are important manufactures, including textiles, engineering, shipbuilding, wood-working, etc. Mining of shale is being greatly extended under the Five Year Plan to supply Leningrad with gas. The country is composed of three provinces (Tallinn, Pärnu and Tartu).

The population consists of 90 per cent. of Estonians, followed by Russians.

A large-scale purge of so-called "bourgeois nationalist elements" within the Estonian Communist Party took place in 1950.

CAPITAL, ♀ Tallinn (formerly Reval). Population (1938), 146,400.

XVI.—KARELO-FINNISH S.S.R.

Chairman of the Presidium of the Supreme Soviet, O. W. Kuusinen.

Chairman of the Council of Ministers, P. S. Prokopenko.

First Secretary of the Party Central Committee, A. N. Yegorov.

The Republic lies in the north-western corner of the European part of the U.S.S.R. and borders on Finland along its western border. A Karelian Autonomous Republic was formed in 1923 within the R.S.F.S.R. Part of the territory ceded by Finland in 1940 was joined to this A.S.S.R. to form the present Union Republic. Between 1941 and 1944 the Republic was occupied by Finnish and German forces.

It is a country of granite, lakes and forests and includes Onega and part of Lake Ladoga, two of the largest lakes in Europe. Mineral resources are considerable, but as yet hardly developed. The main industry is timber cutting and paper manufacture. The Republic harbours a large number of forced labour camps.

The Kirov (Murmansk) railway connects the two R.S.F.S.R. seaports Leningrad and Murmansk, and the Stalin Canal, built in 1933 and restored in 1947, connects the White Sea with the Onega Lake and the Baltic.

Russians form the majority of the population (63 per cent.), with the Finnish speaking Karelians second (23 per cent.).

CAPITAL, Petrozavodsk. Population (1940), 80,000.

VENEZUELA

(La Republica de Venezuela)

President, Col. Marcos Pérez Jiménez, took office April 19, 1953.

EMBASSY IN LONDON

3, Hans Crescent, S.W. 1

[Knightsbridge: 1734]

Ambassador in London (vacant).

Counsellor (Chargé d'Affaires), Dr. Adolfo Nass.

1st Secretary, Señor Walter H. Brandt.

Naval Attaché, Commander Daniel Gámez Calcaño.

Special Attaché, Señora Miriam Blanco-Fombona De Hood.

Hon. Economic Attaché, Dr. Antonio J. Moreno.

There are Consulates-General at Liverpool and London and Consulates at Cardiff and Birmingham.

Area and Population.—The most northerly Confederation of South America, situated approximately between 1° 40' S. lat. and 12° 26' N. lat. and 59° 52' - 73° 15' W. long. It consists of 20 States and 2 federal territories. The best authorities calculate the actual present area to be approximately 352,143 square miles. The population at the census of Nov. 26, 1950, was 4,985,716, and is now estimated to be 5,328,086, excluding forest-dwelling Indians.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia east by British Guiana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being Margarita, which is politically associated with Tortuga, Cubagua and Coche to form the State of Nueva España. Margarita has an area of about 400 square miles. In 1942 Great Britain ceded to Venezuela the small island of *Palos* (170 acres) about 3 miles from the mainland.

Physical Features.—The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Caracas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima, and on the eastern border the Sierras de Rincote and de Usupamo, enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The Sierra Parima contains Yapurana (7,175 feet) and Duida (8,120 feet), and Para Caima contains Maraguaca (8,228 feet) and Roraima (8,530 feet), the latter being on the Venezuela-Guiana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly *llanos*, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the *Orinoco*, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the southern highlands of the republic to its outflow in the deltaic region of the north-east.

A Franco-Venezuelan Expedition, led by Major Frank Risquez, claims to have discovered the source of the Orinoco, on Nov. 27, 1951, at 63° 15' W. long., 2° 18' N. lat., and about 1,200 metres above sea-level.

The Orinoco is navigable for large steamers from its mouth for 700 miles, and by smaller vessels as far as the Maimures Cataract, some 200 miles farther up-stream. Dredging operations now in progress will open the Orinoco for ocean-going ships as far as Puerto Ordaz (about 150 miles up-stream) by 1954. Among the many tributaries of the main stream are the Ventuari, Caura and Caroni from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which Maracaibo, with an area exceeding 7,000 square miles, is the largest lake in South America. Other lakes are Zulia (290 square miles), south-west of Maracaibo, and Valencia (216 square miles), about 1,400 feet above sea-level in the Maritime Andes. The *llanos* also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot, wet season lasts from April to October, the dry, cooler season from November to March.

Government.—Venezuela was visited by Columbus in 1498, and in 1499 by Alonso de Ojeda and Amerigo Vespucci, the former naming the Gulf of Maracaibo Venezuela, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy-general of Caracas, and the country remained under Spanish rule until the revolt under Simon Bolivar, a native of Caracas, who defeated the Spanish forces in the battles of Los

Taguanes (1813) and Carabobo (1821), and thus secured the independence of the country. Bolivar was an untiring hero in the cause of independence, and through his efforts (and those of his adjutant Sucre) Venezuela, Ecuador and Colombia achieved their freedom from Spain, while Peru was enabled to establish its independence in consequence of his victories. He died in 1830, at the age of 47. Venezuela formed part of the Federal Republic of Colombia from 1822-30, since which time it has been independent. There have been many revolutions since 1846. In 1854 President Monagas liberated the African slaves, and in 1864 President Falcon divided the country into States and formed them into a Federal Republic. The Dictator Juan Vicente Gomez had a profound effect on the country as a result of 27 years rule; he died in 1935.

In 1948 power was assumed by a Military Council of which Col. Carlos Delgado Chalbaud was President. Congress was dissolved, the Supreme Court replaced, and new elections promised. Recognition was accorded at once by the Argentine and Peru, by Great Britain and many European countries in December, by the U.S.A. in January, 1949, and by the U.S.S.R. in March. On Nov. 13, 1950, Col. Delgado Chalbaud was assassinated. A Council (Junta) of Government was formed on Nov. 27, under the Presidency of Dr. German Suarez Flamerich. The composition of the Cabinet was modified at the same time. On Nov. 30, 1952, polling took place to elect a new Constituent Assembly. The published results gave a majority to the Government Party. On Dec. 2, the Government Junta resigned and Col. Pérez Jiménez was appointed Provisional President. On April 15, 1953, the Constituent Assembly published a new Constitution, and chose a Senate and Chamber of Deputies. Col. Pérez Jiménez was elected Constitutional President on April 17 for a term of 5 years.

Production and Industry.—The produce of Venezuelan forests and fields includes the following: (a) Tropical forest region: orchids, wild rubber, timber, mangrove bark, balata gum and tonka beans. (b) Agricultural areas: cocoa beans, coffee, cotton, rice, maize, sugar, sesame, groundnuts, potatoes, tomatoes, sisal, tobacco. There is an extensive beef and dairy farming industry, but the country is not nearly able to produce all the meat, grain or sugar it requires, and food and drink imports in 1952 were valued at the equivalent of about £41 million. An autonomous Government department, the Corporación Venezolana de Fomento, is endeavouring, by loans, investment and other means, to foster agricultural development.

The principal industry is that of *Petroleum*. The production of the oilfields is shown below (in barrels of 42 gallons):—

Year	Barrels	Year	Barrels
1937.....	186,200,000	1945.....	323,400,000
1938.....	188,200,000	1946.....	388,500,000
1939.....	205,800,000	1947.....	438,000,000
1940.....	185,600,000	1948.....	490,000,000
1941.....	223,800,000	1949.....	482,300,000
1942.....	147,000,000	1950.....	546,730,000
1943.....	177,600,000	1951.....	622,187,000
1944.....	257,000,000	1952.....	658,427,000

Before the war of 1939-45 over 80 per cent. of the crude oil was exported to Netherlands' West Indies refineries. In 1942 small refineries were established in Venezuela, capable of handling about 200,000 barrels daily. The large Shell plant at Punta Cardon went into production in February, 1949, and the Creole refinery at Amuay a year later. Other new refineries are being operated by the

Sinclair Oil and Refining Co. and by the Venezuelan Gulf Oil Co. at Puerto La Cruz, and about one-fifth of the total output of crude oil is now being refined in Venezuela. The Venezuelan Government, under existing agreements, receives over 50 per cent. of the profits from oil. The recent development of rich deposits of iron ore in South Venezuela will exert a considerable influence on the Venezuelan economy in the future.

Other industries include gold, diamond and asbestos; cotton wool and rayon weaving; manufacture of paper, cement, beer, tyres, cigarettes, soap, animal feeding concentrates, non-alcoholic drinks, simple steel products, shoes, tins, jewellery, rope, metal and wooden furniture, sacks, paint and motor-vehicle assembly, preparation of pharmaceutical goods, lard, powdered milk, vegetable oil, biscuits and other foods; fishing and fish-canning; pearl fishing.

Language and Literature.—Spanish is the language of the country. Indigenous literature has produced some work of international repute. In 1953 there were 7 daily newspapers in Caracas, 3 in Maracaibo and about 300 periodicals throughout the country.

Education (Primary) is free and compulsory from the age of 7 years. There were (1951-52) about 7,250 primary schools, with 413,000 pupils (206,000 boys, 207,000 girls), and about 160 secondary schools, with 30,000 pupils. There are Universities at Caracas, Mérida and Maracaibo.

FINANCE 1952-53

Revenue.....	Bolívares	2,369,359,000
Expenditure.....	"	2,240,780,000
Internal Debt (Nov. 30, 1952) ..		6,818,131

On June 30, 1930, Venezuela paid off its entire External debt (23,757,634 Bolívares) in gold, as a token of homage to *Simón Bolívar*, the Liberator.

The present Internal Debt is made up as follows:—

Consolidated 3 per cent. Internal Loan.....	Bolívares	186,631
Public Works Loan (Third Issue).....	"	83,500
Second Internal Loan for Public Works.....	"	6,548,000
	Bolívares	6,818,131

The exchange at par of the Bolívar, of 100 Centimos, was 25.25 Bs = £1 sterling; official rate of Exchange, July, 1947, Bs.13.57 = £1. The official rate since Feb. 1953 stood at Bs.9.36 = £1 (buying) and Bs.9.44 = £1 (selling). There are special buying rates for petroleum, coffee and cocoa. (See also p. 83.)

Communications.—There are about 6,200 miles of all-weather roads. The State has now acquired all but a very few of the numerous railway lines, whose total length is only some 760 miles. There are five Venezuelan airlines, of which two, the Linea Aeropostal Venezolana and Taca de Venezuela, are state-owned. The Venezuelan merchant fleet comprises 41 steamships and 61 motor ships, with a total tonnage of 191,091. Foreign vessels are not permitted to engage in the coast trade. There is one government-controlled and 48 commercial broadcasting stations. The latter draw their income from commercial broadcasting. There are a television stations in operation in Caracas, one under construction and one projected.

TRADE

Venezuela's Trade Balance 1939-52 was (including bullion and specie):—

Year	Imports	Exports
1939	Bs. 328,648,050	Bs. 953,340,108
1940	311,170,800	861,030,700
1941	287,850,903	1,045,600,000
1942	215,700,000	696,600,000
1943	222,000,000	862,100,000
1944	544,197,180	1,121,365,579
1945	804,947,760	1,107,852,690
1946	987,155,774	1,499,110,771
1947	1,872,184,958	2,158,330,770
1948	2,296,157,953	2,721,755,254
1949	2,241,011,274	3,360,487,616
1950	1,798,417,835	3,888,454,877
1951	2,150,252,223	4,533,660,335
1952	2,420,679,299	4,858,440,000

The principal imports are machinery, textiles, foodstuffs, steel and iron. The principal exports are petroleum (over 95 per cent. of the total), coffee, gold, and cocoa. Iron ore will shortly be a significant export; the first shipments were made in 1950.

	1950	1952
Imports from U.K. ..	£16,141,000	£19,197,000
Exports to U.K.	£14,408,000	£16,567,000

CAPITAL, Caracas (3,000 ft.). Population, 735,000; other principal towns are Maracaibo (260,000), Valencia (88,674), Barquisimeto (105,080), Maracay (65,761), Puerto Caribe (6,359), Puerto Carupano (30,684), Puerto Cabello (34,413), La Guaira (16,279), San Cristobal (56,073), Cumana (46,416) and Ciudad Bolívar (31,009). Figures are approximate, and, except for Caracas and Maracaibo, based on the 1950 Census.

FLAG: Three horizontal bands, yellow, blue, red (with seven white stars on blue band).

Shipping Attaché, Nikola Ilijić.

Attachés, Lojze Kersnik; Georg Georgijevski.

Area and Population.—Yugoslavia is a Federation comprising the People's Republics of Serbia, Croatia, Slovenia, Montenegro, Bosnia and Herzegovina, and Macedonia. Serbia includes the two "autonomous regions" of Vojvodina and Kosovo-Metohija. In July, 1946, Pelagosa and adjacent islands with all territory East of the line known as the *French Line* in Istria (including Pola and Fiume) was ceded by Italy to Yugoslavia. The area in 1946 was estimated 249,226 square kilometres (96,265 square miles) and the population in 1953 at 16,927,275 (8,211,000 males and 8,716,000 females). As a result of the war there was a decrease of nearly 2,000,000 in the population of Yugoslavia, and this loss has only recently been made up.

Montenegro (*Crna-Gora*) was united to Serbia by a decision of the Montenegrin Parliament in November, 1918, when King Nicholas was deposed.

Government.—Stretching from Central Europe to the Balkans, different parts have been subjected to different historical, religious, cultural and geographical influences. Serbia came early under the Orthodox Church and then passed 500 fallow years of subjection to the Turkish Empire. In Bosnia, an outpost of the Turkish Empire, large numbers of the population were forcibly converted to Islam. Croatia and Slovenia, on the other hand, came under the Roman Catholic Church, and in later years were subjected to the civilizing influence of the Austro-Hungarian Empire. Such factors have, despite community of race, hampered the process of fusion into a united nation. The formation of Yugoslavia after the War (1914-18) represented the culmination of a movement, which began early in the nineteenth century, for the union in a single nation of the Southern Slavs. In 1927

the Yugoslav Committee and the Serbian Government issued a manifesto from Corfu announcing a projected kingdom of the Serbs, Croats and Slovenes under the Serbian dynasty of Karageorgevitch. In October, 1918, a Yugoslav National Council, representing the Yugoslav lands of the Austro-Hungarian monarchy, declared for a state of the Slovenes, Croats and Serbs. A few weeks later a union with Serbia was announced and the *Kingdom of the Serbs, Croats and Slovenes* was proclaimed at the beginning of December, 1918. In Jan., 1929, King Alexander abrogated the Constitution and instituted an absolute monarchy for two years, when it was superseded by a modified constitution, which endured through the greater part of the war of 1939-45, being superseded by an agreement signed on Nov. 1, 1944, by the Yugoslav Prime Minister (Dr. Ivan Subasić) and the leader of the National Liberation Committee (Marshal Josip Broz, commonly known as Marshal Tito) recognizing a provisional parliament. On March 7, 1945, the agreement was confirmed by the Royal Yugoslav government in London, and a provisional government was set up in Belgrade.

On Nov. 29, 1945, the Constituent Assembly of Yugoslavia, at a joint session of the Skupština and the House of Nationalities, proclaimed Yugoslavia a Republic. In January, 1953, a new Constitution became effective, under which two houses (the Federal Council and Council of Provinces) were established.

Defence.—The Army, Navy and Air Force on a peace footing consist of 300,000 officers and men, the war strength being about 1,250,000.

Religion and Education.—The Orthodox, Roman Catholic, Protestant, Islamic and Judaic faiths are recognized by the State; 49.53 per cent. of the population is Orthodox, 36.7 per cent. Catholic, 1.14 per cent. Protestant and other Christian denominations, 12.52 per cent. Islamic and 0.04 per cent. Jews. The Church is separated from the State. All religious instruction in schools has been forbidden since January 1952. Priests are allowed to teach in churches. Eight years elementary education is compulsory and all education is free. In 1952 there were 13,661 elementary schools with 29,700 teachers and 1,422,000 pupils, 683 secondary schools with 249,000 pupils, 78 training colleges for teachers with 24,600 students, and 12 higher pedagogic schools for teachers with 5,600 students. There are five universities, Belgrade, Zagreb, Ljubljana, Sarajevo and Skopje, including 86 faculties with 55,300 students, 11 Art Academies with 1,200 students and 147 elementary and secondary art schools with 15,300 pupils.

Language and Literature.—Under the constitution of 1918 the language of the country is Serbo-Croat-Slovene. Serbian is a South Slav tongue and in writing employs the Cyrillic alphabet, similar to ancient Greek, as in Russia. Croats and Slovenes use the Latin alphabet. Slovene is quite a separate tongue and not easily understood by Serbs or Croats. The Macedonian and Albanian languages are also used by many people. The desire for the political union of the South Slavs led to a cultural unity and a revival of Slav literature. There are 2 Serbian daily newspapers in Belgrade, 3 Slovene dailies in Ljubljana (Laibach), 3 Croat dailies in Zagreb, and daily papers at Skopje, Sarajevo, Cetinje, Novi Sad, and Rijeka.

Production and Industry.—The principal occupation is agriculture. Over 70 per cent. of the population is so engaged. The main crops are wheat and maize of which the yield in 1952 was about 1.9 and 1.5 million tons respectively; however, these amounts were abnormally low owing to the severe

drought in the summer of 1952. The forest areas produced some 8.8 million m³ of timber in 1952 and are capable of considerable development. According to Yugoslav official estimates the livestock population at June 30, 1952, was approximately as follows: Horses, 997,000; cattle, 4,822,000; sheep, 11,719,000; pigs, 5,610,000; poultry, 21,000,000. Minerals are a great source of wealth, particularly in the central regions. Production in 1952 included the following ('000 tons): Hard coal, 1,011; brown coal, 6,842; lignite, 4,245; copper ore, 1,265; lead zinc ore, 1,204; iron ore, 676; bauxite, 577; pyrite concentrates, 167; chrome ore, 107. Antimony ore, pyrites ore and manganese ore are also produced. The largest figures for the output of refined minerals in 1952 were as follows: blister copper, 33,000 tons; electrolytic copper, 21,000 tons; refined lead, 67,000 tons. There is also a developing manufacturing industry.

FINANCE

1953
Dinars

Revenue (Budget Estimates)..... 178,000,000,000
Expenditure (do.)..... 229,000,000,000

The Yugoslav *Dinar* (of 100 *Paras*) has a nominal value of 124 farthings, the exchange rate being 840D=£1 (see also p. 83).

Communications.—In 1939 there were 4,593 miles of normal gauge and 2,061 miles of narrow gauge railway, total—6,654 miles. It is estimated that about 3,343 miles of these lines were destroyed or damaged during the war of 1939–45; most of these have been repaired. About 500 miles of new lines have been built, and further improvements in communications are planned. There are also 20,714 miles of telephone lines and 21,560 miles of telegraph lines. Yugoslavia has a long seaboard on the Adriatic coast. The principal Yugoslav ports are Rijeka, Sibenik, Split, Kardeljevo, Dubrovnik and Kotor (Cattaro). The Danube forms a great commercial highway and the tributary rivers Sava and Tisa provide other important shipping routes; the port of Belgrade was the second busiest on the Danube. There are 5 international aerservices operated by Yugoslav civil aviation.

TRADE

	1950	1951
Imports from U.K.....	£14,195,900	£21,537,030
Exports to U.K.....	£10,560,700	£12,622,278

The principal exports are cereals, timber, ores, cattle, pigs, poultry, skins, fruit, medicinal herbs and etheric oils. The imports are chiefly textile raw materials, machinery and manufactured goods.

The chief imports from U.K. are machinery, tractors and textile yarns.

CAPITAL, Belgrade (*Beograd* = White City), population (1948) 388,246. Other towns are Zagreb or Agram (200,417), Ljubljana or Laibach (120,944), Sarajevo (118,158), Subotica (112,551), Skopje (91,557), Rijeka (Fiume with Susak) (72,120), Ψ Split (49,885) and Ψ Sibenik (38,000).

NATIONAL FLAG: Blue, white, red.

NATIONAL DAYS: Founding of Yugoslav Federal Republic (November 29).

BRITISH EMBASSY

Prvog Maja 46, Belgrade

British Ambassador Extraordinary and Plenipotentiary
His Excellency Sir William Ivo Mallet,
K.C.M.G. (1951).

Counsellor, A. D. Wilson.

1st Secs., E. H. St. G. Moss (*Head of Chancery*);
F. H. Crowther (*Commercial*); S. J. Whitwell;
K. Welboreker (*Information*).

2nd Secs., G. J. Tarr; S. H. Anstey (*Consular*).

3rd Secs., W. J. Sloss; A. H. Grey; W. N. R.
Maxwell (*Commercial*).

ECONOMIC MISSION

Minister (*Economic*), Sir Francis Mudie, K.C.S.I.,
K.C.I.E.

1st Sec., N. J. Moss.

2nd Sec., Miss K. Dooner.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Belgrade,
Zagreb, Skopje, Split and Sarajevo.

BRITISH COUNCIL.—Representative, N. Sutcliffe,
Prvog Maja 34, Belgrade.

THE NOBEL PRIZES

The Nobel Prizes are awarded each year from the income of a trust fund established by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died on December 10, 1896, leaving a fortune of £1,750,000. They are awarded to those who have contributed most to the common good in the domains of (a) Physics; (b) Chemistry; (c) Medicine or Physiology; (d) Literature; (e) Peace. The first awards were made in 1901 on the fifth anniversary of Nobel's death. The awarding authorities are the Swedish Academy of Science—(a) Physics; (b) Chemistry; the Stockholm Faculty of Medicine—(c) Medicine or Physiology; the Swedish Academy of Literature—(d) Literature; a committee of five persons elected by the Norwegian Storting—(e) Peace. The Trust is administered by the Board of Directors of the Nobel Foundation ("Nobelstiftelsens Styrelse"), Stockholm. The Board consists of four members and two deputy members appointed by the awarding authorities; the Swedish Government appoints a chairman and a vice-chairman.

The nationality of prizewinners is indicated as follows: (a) Great Britain; (b) U.S.A.; (c) France; (d) Sweden; (e) Belgium; (f) Russia; (g) Germany; (h) Netherlands; (i) Switzerland; (k) Denmark; (l) Norway; (m) Spain; (n) Poland; (o) Austria; (p) Italy; (q) India; (r) Hungary; (s) Finland; (t) Canada; (u) Chile; (v) Argentine; (w) Japan; (x) Portugal; (y) Irish Free State; (z) Republic of Ireland; (aa) South Africa. The distribution by nationalities is shown at foot of table.

A list of prizewinners for the years 1901–1925 appears in Whitaker's Almanack, 1953.

Year	(a) PHYSICS	(b) CHEMISTRY	(c) MEDICINE or PHYSIOLOGY	(d) LITERATURE	(e) PEACE
1926	Jean Perrin (c)	Theo. Svedberg (d)	J. Fibiger (k)	Grazia Deledda (p)	A. Briand (c) G. Stresemann (g)
1927	A. H. Compton (b) C. T. R. Wilson (a)	H. Wieland (g)	J. Wagner- Jauregg (o)	Henri Bergson (c)	Ferdinand Buisson (c) Ludwig Quidde (g)

Year	(a) PHYSICS	(b) CHEMISTRY	(c) MEDICINE OR PHYSIOLOGY	(d) LITERATURE	(e) PEACE
1928	O. W. Richardson (a)	A. Windaus (g)	C. J. H. Nicolle (c)	Sigrid Undset (l)	No award
1929	Duc de Broglie (c)	A. Harden (a) H. K. A. S. von Euler (d)	Sir F. G. Hopkins (a) C. Eijkman (h)	Thomas Mann (g)	F. B. Kellogg (b)
1930	Sir C. V. Raman (q)	H. Fischer (g)	Karl Landsteiner (o)	Sinclair Lewis (b)	Archbishop N. Söderblom (d)
1931	No award	C. Bosch (g) F. Bergius (g)	Otto Warburg (g)	Eric Axel Karlfeldt (d)	Jane Addams (b) N. M. Butler (b)
1932	W. Heisenberg (g)	Irving Langmuir (b)	Sir Charles Sherrington (a) E. D. Adrian (a)	John Galsworthy (a)	No award
1933	P. A. M. Dirac (a) Erwin Schrödinger (o)	No award	Thomas H. Morgan (b)	Ivan Bunin (f)	Sir N. Angell (a)
1934	No award	H. C. Urey (b)	G. R. Minot (b) W. P. Murphy (b) G. H. Whipple (b)	Luigi Pirandello (p)	A. Henderson (a)
1935	J. Chadwick (a)	F. Joliot (c) Mme. I. Joliot-Curie (c)	Hans Spemann (g)	No award	Carl von Ossietzky (g)
1936	Victor F. Hess (o) C. D. Anderson (b)	Peter Debye (h)	Sir Henry H. Dale (a) Otto Loewi (o)	Eugene O'Neill (b)	Carlos Saavedra Lamas (v)
1937	C. J. Davison (b) G. P. Thomson (a)	W. N. Haworth (m) Paul Karrer (i)	Albert von Szent-Györgyi (r)	H. R. Martin du Gard (c)	Viscount Cecil (a)
1938	Enrico Fermi (p)	R. Kuhn (g)	C. Heymans (c)	Pearl Buck (b)	The Nansen Office
1939	E. O. Lawrence (b)	A. F. J. Butenandt (g) L. Ruzicka (i)	G. Domagk (g)	F. E. Sillanpää (s)	No award
1943	O. Stern (b)	G. Hevesy (r)	Henrik Dam (k) E. A. Doisy (b)	No award	No award
1944	I. I. Rabi (b)	Otto Hahn (g)	E. J. Erlanger (b) H. S. Gasser (b)	J. V. Jensen (k)	International Committee of the Red Cross. Cordell Hull (b)
1945	Wolfgang Pauli (o)	Artturi Virtanen (s)	Sir A. Fleming (a) Sir H. Florey (a) E. B. Chain (a)	Gabriela Mistral (u)	
1946	P. W. Bridgman (b)	J. B. Sumner (b) W. M. Stanley (b) J. H. Northrop (b)	H. J. Muller (b)	Hermann Hesse (i)	Emily Greene Balch (b) John R. Mott (b)
1947	Sir Edward Appleton (a)	Sir Robert Robinson (a)	Prof. and Mrs. C. F. Cori (b) and B. Houssay (v)	André Gide (c)	The Society of Friends.
1948	P. M. S. Blackett (a)	Arne Tiselius (d)	P. Müller (i)	T. S. Eliot (a)	No award
1949	H. Yukawa (w)	W. F. Giaque (b)	W. R. Hess (i) A. E. Moniz (x)	W. Faulkner (b)	Lord Boyd Orr (a)
1950	C. F. Powell (a)	O. Diels (g) K. Alder (g)	E. C. Kendall (b) T. Reichstein (i) P. S. Hench (b)	Earl Russell (a)	R. Bunche (b)
1951	Sir John Cockcroft (a) E. T. S. Walton (z)	E. M. McMillan (b) G. T. Seaborg (b)	M. Theiler (aa)	P. Lagerkvist (d)	L. Jouhaux (c)
1952	F. Bloch (b) E. M. Purcell (b)	A. J. P. Martin (a) R. L. M. Synge (a)	S. A. Waksman (b)	F. Mauriac (c)	No award

The awards have been distributed as follows:—PHYSICS:—Gt. Britain, 14; Germany, 11; U.S.A., 11; France, 7; Netherlands, 4; Austria, 3; Sweden, 2; Italy, 2; India, 1; Denmark, 1; Japan, 1; Republic of Ireland, 1. CHEMISTRY:—Germany, 19; U.S.A., 9; Gt. Britain, 9; France, 6; Sweden, 4; Switzerland, 3; Netherlands, 2; Hungary, 1; Austria, 1; Finland, 1. MEDICINE OR PHYSIOLOGY:—U.S.A., 14; Gt. Britain, 9; Germany, 8; Denmark, 4; Switzerland, 4; France, 3; Austria, 3; Belgium, 2; Canada, 2; Netherlands, 2; Hungary, 2; Russia, 2; Spain, 1; Argentina, 1; Italy, 1; Portugal, 1; South Africa, 1; Sweden, 1. LITERATURE:—France, 8; Germany, 5; Gt. Britain, 5; U.S.A., 4; Sweden, 4; Norway, 3; Italy, 3; Denmark, 3; Poland, 2; Spain, 2; Switzerland, 2; Belgium, 1; India, 1; Russia, 1; Finland, 1; Chile, 1; Irish Free State, 1. PEACE:—U.S.A., 11; France, 7; Gt. Britain, 6; Germany, 3; Sweden, 3; Switzerland, 3; Belgium, 2; Norway, 2; Austria, 2; Italy, 1; Argentina, 1; Denmark, 1; Netherlands, 1.

SCIENCE, DISCOVERY AND INVENTION IN 1953

BRITISH ASSOCIATION. "SCIENCE FOR ITS OWN SAKE."—The British Association for the Advancement of Science held its 115th annual meeting on September 2-9 at Liverpool, under the presidency of Sir Edward Appleton, F.R.S., Principal of Edinburgh University.

In his presidential address on "Science for its own sake" Sir Edward Appleton said that perhaps the most striking fact about modern science, in its explorations ranging from the heart of the atom to the frontiers of the universe, is that, like poetry, like philosophy, it reveals depths and mysteries beyond, quite different from, the ordinary matter-of-fact world we are used to. The scientific approach is a far more personal and imaginative activity than is generally realized. The big jumps ahead are usually the adventures and intuitions of a single mind. Many a vital discovery has been nothing else than recognizing the unexpected. To illustrate the pursuit of science for its own sake he turned to the subject of cosmical research. It was Sir Oliver Lodge who first thought of looking at the heavens with a radio eye instead of an optical eye, when he tried to detect radio waves from the sun, and an American radio engineer, J. G. Jansky, who discovered that radio waves, as well as light waves, could be received from the heavens. Jansky had discovered radio noise coming from the direction of the stars in the Milky Way. The Milky Way, of which our own solar system was really part, was a colony or island of stars in space, shaped roughly like a Yorkshire tea-cake with the stars represented by currants. Space, however, was populated with far more stars than were to be found in the Milky Way. Could it be that a radio star was always a dark star, and so a new type of object in the universe. Baade and Minkowski at Mount Palomar, using the 200-in. Hale telescope and the 48-in. Schmidt telescope, after a meticulous search of parts of the sky determined by F. G. Smith of Cambridge (England), had shown that the major radio sources, those in Cassiopeia and Cygnus, were two entirely unknown objects in the universe. The Cassiopeia radio source was associated with a diffuse cloud of luminous gas, situated within our own galaxy. The tenuous matter of which it was composed was concentrated in a number of fine filaments in the most violent motion. The source in Cygnus, was identified with another exceptional object which was considered to be two island colonies—two extra-galactic nebulae—in collision at a distance requiring 100 million years for the light and the radio waves generated in it to travel to us here on earth. Though we were still without explanation of the relation of radio noise to the structure of the Milky Way, much progress could be expected from two large British radio telescopes, the interferometric instrument at Cambridge and the steerable paraboloid now being built at Jodrell Bank, a station of the University of Manchester, which would be the largest single radio telescope in the world. Thus science, pursued for its own sake, could enlarge men's horizons and invest the world with deeper significance.

The Presidents of the Sections and the subjects of their addresses were as follows:—A. Mathematics and Physics, Prof. Sir H. Jeffreys, F.R.S., "Half a Century of Geophysics." B. Chemistry, Prof. G. R. Clemo, F.R.S., "The Development of Organic Chemistry since the Time of Liebig"; C. Geology, Prof. T. N. George, "Invertebrate Fossils and Evolution"; D. Zoology, Prof. I. E. Smith, "The Maintenance and Spread of Seashore Fauna"; E. Geography, Prof. R. H. Kinzig, "The Geographer as Humanist";

F. Economics, Prof. F. W. Paish, "Open and Repressed Monetary Inflation"; G. Engineering, Lord Dudley Gordon, "Engineering in the Next 2,000 Years"; H. Anthropology and Archaeology, Prof. M. Forkes, "Analysis and Description in Social Anthropology"; I. Physiology, Dr. D. P. Cuthbertson, "The Quality and Quantity of Protein for Man and Livestock"; J. Psychology, Prof. D. W. Harding, "Psychological Problems in the Recognition of Excellence"; K. Botany, Prof. J. Walton, "The Evolution of the Ovule in Pteridosperms"; L. Education, Mr. Robert Birley, "Greek or Chemistry or both?" M. Agriculture, Dr. J. Hammond, F.R.S., "The Application of Animal Physiology to Agriculture"; X. Assembly of Corresponding Societies, Dr. W. E. Swinton, "Gateways of Science."

Two evening discourses were delivered, "Fifty Years of Powered Flight," by Sir Ben Lockspeiser, F.R.S., and "Mount Everest," by Mr. Eric Sipton.

The meeting in 1954 will be held in Oxford on September 1-8, under the presidency of Dr. E. D. Adrian, O.M., F.R.S., Master of Trinity College, Cambridge, and President of the Royal Society.

The annual meeting of the Association in 1955 will be held in Bristol.

ADELIE PENGUINS.—Dr. W. J. L. Sladen, of the Edward Grey Institute at Oxford, has investigated the breeding season of the small Adie penguin during two winters in the Falkland Islands. Nobody has been able to explain satisfactorily the birds' curious "display" rituals and their manner of greeting each other after an absence of a fortnight or more. After marking and branding over a thousand penguins, Dr. Sladen found that the pairs congregated in the rookeries or breeding grounds after the winter—that is to say, during October, when the sea was still frozen. The pairs remained together for about three weeks without food; but as soon as the nest of stones was built and the two eggs laid, the female walked off to the sea, perhaps sixty miles away, and broke her fast with a meal of shrimps—actually "krill" or baleen whale food—leaving the male to incubate by himself. It was not until the fattened female returned after a fortnight that the male got off the eggs, greeted his spouse with a loud cry, and waddled off to the sea himself. The longest fasting period recorded for a male was 42 days, in which time the bird lost two and a half kilograms in weight. Frequently parted pairs were able to recognize each other in a colony of 30,000 apparently identical birds. This seems to be done by a "mutual display", including loud cries, back lifting, and occasionally ecstatic flipper flapping.

ANCESTRY OF LIVING ANIMALS.—Fossils, for geologists, are the stuff of evolution, said Professor T. Neville George, president of the geology section of the British Association. They set the process in a perspective of time. The oysters provided one of the most completely preserved records of fossil lineages; and the very fact that the intergrading populations of most other inferred lineages were fragmentarily represented in any one area was itself a pointer to repeated migration, implying discriminatory environments which were sometimes directly recognizable in the rocks. Present knowledge of the evolutionary process, was mainly based on the tetrapods and a few selected invertebrate lineages; in most other groups, while description of evolutionary stages had been well served, there still awaited a systematic exposition of ancestral

evolution and its relation to growth and form in populations of living animals.

ATHLETIC TRAINING.—Problems of athletic training, the control of breathing during exercise, and distance running were discussed at the British Association. Mr. Roger Bannister, of St. Mary's Hospital Medical School, London, said that in theory there was no limit to any physical performance, but various physiological factors caused the margin by which records were broken to diminish steadily. In sprinting and javelin throwing speed of movement was limited by muscle viscosity. In weight lifting speed of action was at the option of the athlete. Sheer force or mass of muscle was what counted and suitable training could develop it. The shot putter and the discus thrower required both speed and force, and the type of training they underwent varied accordingly. The greatest scope for athletic improvement lay in the distance events. The limiting factor there was lack of oxygen. In recent experiments on a treadmill subjects breathing controlled mixtures of oxygen and air gave up from exhaustion after eight minutes. When breathing 33 per cent. of oxygen their performance was much improved and with 66 per cent. of oxygen they appeared to be able to go on indefinitely.

ATLANTIC CROSSING ON A RAFT.—Dr. Alain Bombard, who set out on August 11, 1952, on a rubber raft, *L'Hérétique*, to cross the Atlantic in an attempt to prove that a man could live at sea on the liquid contained in fish, the flesh of fish, and plankton, reached Barbados on Christmas Eve. He lost 55 lb. in weight during his long voyage. He had thought when he set out that he was faced with a physical problem, but he found that the real problem was one of character and morale. For 53 days he saw no human being. Then he sighted a British ship. After this he spent another 12 days of solitude, until he reached Barbados. His only really courageous action, he said, had been his refusal to take refuge in the ship after he had gone on board and eaten a normal meal. Dr. Bombard tried to avoid routine, and varied his timetable from week to week. He occupied himself with fishing or doing physical exercises. He preferred rough weather, because the struggle with the elements helped to keep up his courage and determination. He submitted to a thorough physical examination at Casablanca, his last intended port of call, and another in Barbados. His only complaint was general debility, due principally to his having been constantly seated.

ATMOSPHERE 7,000 MILES HIGH.—From the study of whistling atmospherics which drop in pitch as they proceed, Mr. L. R. O. Storey, of the Cavendish Laboratory, Cambridge, has concluded that the earth's atmosphere reaches out to a distance of some 7,000 miles above the equator. The drop in pitch is thought to be caused by a variation in the speed at which radio waves of different frequencies travel in the atmosphere. The longer their journey the more the waves are spread out in time and the longer is the interval between the arrival of those of the highest and lowest frequencies. The whistles seem to divide naturally into two groups. In one group the radio waves which make the whistle are thought to have originated in a lightning flash from comparatively close to the observer. In that case the whistle results from waves which have travelled far up into the atmosphere and across the Equator and have been reflected again, roughly along the same path by which they first travelled. In the other group

the whistles are thought to have originated in lightning flashes on the far side of the Equator. These may have made only a single journey. In both cases there may be a sequence of whistles corresponding with waves which have been reflected back and forth across the Equator as many as 10 times.

AUSTRALIA'S RICH BACK DOOR.—Mr. Casey, Minister for External Affairs, announced that the Australian Government is to send an expedition to the Antarctic continent in the summer of 1954 to establish a scientific research station in Australian territory of 2,742,000 square miles, which, he said, was almost as large as Australia itself. For strategic reasons it was important that this area lying so close to Australia's back door should remain under Australian control. It was possible that in future aircraft flying between South America or South Africa and Australia would take the short route over the Antarctic. Big deposits of coal already had been found, and many other valuable minerals were known to exist there. Great food resources in whales, fish, seals, birds, and plankton awaited exploitation in the prolific seas surrounding the Antarctic, to which the world might soon be obliged to turn. Weather forecasts in Southern Australia could be improved by a collection of meteorological data from the Antarctic. Research stations which had been established at Heard and Macquarie Islands had produced valuable scientific results in the six years since their establishment, and had profoundly influenced weather forecasting methods.

AVOCETS' NESTS SAVED. By pumping away the flood water due to the east coast disaster in January the Royal Society for the Protection of Birds saved for one season's breeding the only site of Avocets in Britain at the bird reserve at Havergate in Suffolk. These beautiful birds first returned to nest at the reserve in 1947, after an absence from Britain of about 100 years, and they have successfully bred there each year since then. During the floods on the east coast the sea walls were badly breached in this area and the islets where the avocets breed vanished deep under the flood at Havergate. After the walls had been repaired the islets were still 3 ft. under water. By April 9 it became clear that pumping, in addition to the sluices, would be needed to help to remove the 30,000,000 gallons of water that remained. The water gradually subsided, and the avocets' nesting islets were brought above the water level. The birds returned in good strength, and many of them began to nest.

BACKWARDNESS IN READING.—Backwardness in reading was the subject of a debate by the Education Section of the British Association. Dr. M. L. Kellmer Pringle, of the remedial education centre, Birmingham University, said that recent figures showed that among 11-year-olds, about 23 per cent. were backward and that among 15-year-old school-leavers the percentage was about 30. As about 15 per cent. of the population were "dull" and could not be expected to attain the average standard, the extent of remedial backwardness was 8 per cent. among 11-year-olds and 15 per cent. among 15-year-olds. But those figures failed to take into account the more serious failures, the retarded children. At least one child in 10 in the primary schools failed to achieve a standard of reading of which it was capable.

BANK NOTES IN NEW DESTROYER.—A new type of money destructor, for the burning of old and

dirty currency notes and banknotes, has been devised by the General Electric Company for use by the Bank of British West Africa, Sierra Leone, at Freetown. Sums up to about £250,000 in £1 notes can now be reduced to ashes in a day. Special security safeguards have been incorporated in the machine and the money destructor can be left to burn overnight without attention. Up to 80,000 Treasury notes can be charged at one time, and officials wishing to inspect the progress of burning watch through an armour-plated glass-covered spyhole. To prevent the extraction of notes by unauthorized persons, a double charging door has been fitted so that the inner charging platform cannot be opened unless the outer lid is closed, an action which shoots the notes into the combustion chamber. The destructor has an automatic rocking-bar hearth which ensures the separation of bundles of notes and is an effective ash breaker. The disposal of the ash is controlled, the ash drawer of the machine having a special lock.

BEARDED VULTURE REAPPEARS.—The bearded vulture reappeared in the Austrian Alps. The last record of its breeding in the Alps was in 1800. The last specimen of this bird found in the Alps was said to have been discovered dead in Switzerland in 1886. Since then it has been reported to have died out also in the Pyrenees. This bird, commonly known to British ornithologists as the Lammergeier [*Gypaetus barbatus*], is intermediate between an eagle and a vulture. It has a cruising speed of about 50 miles an hour and is still found in Spain, Corsica, Yugoslavia, Bulgaria, Greece, and Crete.

BECHSTEIN'S BAT IN BRITAIN.—On September 3 a male Bechstein's bat (*Uyolus bechsteini*), which is extremely uncommon in this country, flew through an open window at Nash Court, near Ludlow. It was photographed by Mr. Eric Hosking, using a special high-speed flash set constructed by Dr. P. S. H. Henry, of Manchester. This bat is not difficult to identify at close quarters, owing to its conspicuous ears, which are about three-quarters of an inch long and when laid forward extend beyond the bat's muzzle by half their length. Professor Stuart Piggott states that in the galleries of the neolithic flint-mines at Grimes Graves in Norfolk, dating from *circa* 2000 B.C., the bones of bats which had sheltered there while the mine was a going concern, were found in the excavations of 1914. The species represented included not only Bechstein's Bat but Daubenton's, Natterer's, and the Whiskered Bat—all woodland species, confirming the palaeobotanical evidence for former forest cover of the region, now open heath.

BIRD LIFE IN CYRENAICA.—Colonel J. K. Stanford gave the British Ornithological Union an account of his expedition to Cyrenaica on behalf of the Bird Exploration Fund. The objects of the expedition were to study the spring migration, and to collect specimens of the resident birds of the Jebel, such as the local races of blue tit, chaffinch, and wren, the Barbary partridge, and the desert larks, for the Natural History Museum. There was evidence, he said, of migration northwards on a broad front by birds arriving in Cyrenaica from across the desert. Wherever there was the slightest shade birds would drop down suddenly out of the sky. One warbler came down in this way into the Colonel's car to shelter. Any patch of water, however small, would produce a wading bird, ruffs and little ringed plovers being the most common. The impression was that of a huge medley of bird refugees travelling blindly northward. Every night at Derna there were thousands

of yellow wagtails roosting in about two acres of marsh. There was also a wide variety of species, and one result of the expedition was that the Natural History Museum now had a collection of 450 skins representing more than 100 species from an area from which it previously had no specimens at all. There was also evidence of migration along the Mediterranean shore, chiefly by swallows. No red-backed shrike was seen, though they are known to pass through Cyrenaica in the autumn migration southward. One curious feature of the bird life of the country was the fact that rock pigeons nested not only in deep pot-holes in the ground but had also colonized wells. It was a strange sight to see a party of these pigeons fly across country and then suddenly disappear into a well, like rabbits into their holes.

BLEACHING OF DYES.—The bleaching of dyes by light and the weakening or "tendering" of fabrics after exposure to light or later during washing were discussed at a meeting of the Royal Society. Dr. P. J. Hilson and Professor Sir Eric Rideal, F.R.S., described experiments which had been carried out at King's College on an effect which was first observed in 1839 by Edmond Becquerel, the father of Henri Becquerel, the discoverer of radioactivity. Becquerel noticed that when light fell on certain electrodes a small but observable voltage was generated. Later it was found that even quite simple electrodes would give such an effect if either coated with a dyestuff or immersed in a solution of a dye. The effect in that case was caused by the action of light on the dye. By working with thin layers of different dyes deposited immediately on the electrodes it had been found that reproducible results could be obtained and the process of fading studied quantitatively. It had also been shown that fading was accompanied by a flow of electric current, and that the rate of fading depended on the rate of flow of current. An explanation was suggested of a type of tendering caused by light alone that had been found in dyed cotton fabrics. An example was provided by vat-dyeing of cotton under such conditions that both the dye-stuff and the base from which it was made were in contact with the fibres, and tendering of the fabric could be very marked.

BOTANIC GARDEN AT CAMBRIDGE.—A beginning has been made on the enlargement and development of the University Botanic Garden, Cambridge, from the funds of the Cory bequest. Reginald Cory, a graduate of Trinity College, died in 1934, leaving the residue of his estate to the Botanic Garden. When in 1942 the bequest became effective it was found to amount to several hundred thousand pounds, bringing in an income estimated to rise eventually to £13,000 a year—the largest bequest in the history of the University. Since 1943 the Cory bequest has enabled the garden to buy a number of important books, and two houses near by, but for the most part the income has accumulated. More serious capital improvements have now begun, notably the enlargement of the garden from 20 to 40 acres, and the construction of a large rock garden, entailing the use of 500 tons of rock, near the lake.

BOW-FIN FISH FROM NORTH AMERICA.—The Zoo has recently received through the good offices of the aquarium of the New York Zoological Society four splendid specimens, two males and two females, of the Bow-Fin (*Amia calva*), a primitive fish that inhabits the fresh waters of North America. The Bow-Fin, and the nearly related Gar-Pike of North America, are the sole living representatives of a primitive group of fishes, the

Holostei, that was abundant in the Jurassic and Cretaceous ages, but for the greater part became extinct at the end of the Mesozoic age. The Bow-Fin is a fish of compact shape with a blunt head, and a single dorsal fin along the hinder two-thirds of the back. It is dull brown in colour, the female uniform, but the male being handsomely marbled with black and having a round black spot at the root of the tail; the females are nearly 2 ft. long and the males are a little over 1 ft. The air-bladder of the Bow-Fin is a capacious cellular bag and acts as a lung when the fish gulp down air from the surface if the water is stagnant. Being carnivorous, it preys on other fish, crustaceans and insects. In the breeding season, in early summer, Bow-Fins move into shallow water, where they form a nest by crushing aside the vegetation of the swampy marsh. The male mounts guard over the eggs that stick to the water-plants lining the nest until the young fry are hatched after about a week. They leave the nest in a shoal still guarded by their parent, who shepherds them into a close flock by circling round them and defending them from enemies that would devour them.

BRaille PRINTING ON THE SOLID DOT.—A new process of Braille printing has been invented by Mr. E. J. Pyke, in co-operation with Mr. J. Groak. By this method, which is known as "solid dot" Braille, an embossed Braille master page is first prepared on paper by operating any Braille writing machine. The page is then put through an electrical "scanning" machine, which passes over the embossed letters much as a reader's fingers would do, and which punches the stencil sheet in Braille corresponding to the original. These sheets, which can be of impregnated paper, plastic, or metal, are placed in a printing machine. Two stencils can be used at a time, making possible the double-sided printing of four pages with a plastic dot, which is indestructible, because in the drying process by infra-red ray it becomes welded into the paper. It should be possible to print 5,000 sheets an hour by this method. An advantage of the new method, besides that of cheaper production, is that books produced by any Braille writing machine can be duplicated. The solid dot has also been found easier both for older people and for the sighted worker to learn and to teach.

BRITAIN TIPPING INTO THE SEA.—Dr. L. Hawkes, F.R.S., Professor of Geology, Bedford College, stated at the Royal Institution that Britain is tipping into the sea at the south-east corner, while at the north-west corner there is a rising from the water. London is sinking at the rate of a foot every hundred years. Dutch geologists say there is no hope for Holland unless another Ice Age comes to drop the level of the sea. Stockholm, on the other hand, is scheduled to rise about 300 feet over the coming centuries. All this is part of the gradual, unceasing shift in the earth's crust which is essential to the maintenance of land masses. The earth is not calculated to become a solid, frozen mass for another 150,000 million years.

BRONZE AGE GOLD BRACELET.—A pure gold bracelet, about 3,000 years old, was found by Mr. A. G. Ward when he was digging on his farm at Stanton, Staffordshire. At first he mistook it for the tin band of a pickle jar, but officials of the Derby Museum decided that it was a relic of the Bronze Age, when Celtic tribes inhabited that region of Staffordshire. The bracelet is in the form of an open hoop, with a rough claw on each end. It may have been the property of a Celtic princess or part of the decoration of an idol or other sacred image.

BRONZE ARMLET FOUND IN SKYE.—A beautiful example of late Celtic art of the first or second century was found by a crofter digging in a peat bog in Skye. It consisted of a bronze armlet of snake design, the sixth of its kind to be found in Scotland, no similar spiral armlet having been found elsewhere. The Skye armlet, like the other five, is in the form of a coiled snake with a snake head at each end. The eyes were probably filled with enamel or blue glass. It consists of a bar or band of bronze of a uniform width of about half an inch and about three-eighths of an inch thick in the middle, moulded in the shape of a cylindrical spiral of three and a half turns. The length is about 33 inches. The middle coil of the armlet is boldly ornamented. Here the ornament consists of 28 oval bosses separated from each other by a narrow ellipse. The coils are completely separate, but are so close together that only a thin sheet of paper can pass between them.

CANTERBURY: ROMAN REMAINS.—The work of the Canterbury Excavation Committee has yielded further evidence of the importance of that city in Roman times. Trenches dug in a field to the north of Whitehall Road revealed the hard-packed gravel of the earliest Roman road to lead out of the city. It was a continuation of the original Watling Street and probably crossed the River Stour by a ford. The road went out of use when the fortifications were built round the city in the second century. At this spot the post holes of two Roman timber-built dwellings, one of the first and the other of the second century, which fronted the road, were found. Beneath the road surface lay a considerable quantity of Belgic pottery fragments dating back to the middle of the first century. Inside the city, near the Watling Street Congregational church site, four metal surfaces of successive periods of the former Roman street were revealed. They overlay the site of an earlier house which had apparently been demolished because it was in the way of the projected road. Outside the castle walls the trench shows the remains of the earthen defence bank leading up to the thick Roman flint wall. At the site of the former Riding Gate, in the medieval city wall which still exists, an excavation was made to see whether there was once a Roman guard house in the usual position to the left of the gate as one entered the city. A series of floors were found, and a number of coins of the third and fourth centuries, together with the surface of the earlier Watling Street, the line of which was altered when the defence wall was built.

CHANGING LIFE IN THE CHANNEL.—A possible reason for the changes in the nature and abundance of animals living in the English Channel was given by Dr. L. H. N. Cooper, of the Marine Biological Laboratory at Plymouth, to the zoologists at the British Association. Perhaps most important for the life of the nation was the complete collapse of the Plymouth herring fishery in the early 1930s. Beyond all doubt the control of the biological productivity of our shelf waters lay away outside in the Atlantic Ocean and it was clear that to-day there were no rich nutrient reserves in the ocean within reach of the physical forces that could bring them to the surface. In the second decade of this century the sea temperatures in the North Atlantic where bottom water might be formed were colder than average, culminating in exceptionally cold winters in 1918, 1920, and 1921. Most of the water now in the bottom of the North Atlantic Ocean sank from the surface in those cold Arctic winters and in doing so displaced upwards the nutrient rich water which rejuvenated the waters of the English

Channel about 1921. Since then there had been no succession of cold Arctic winters and no appreciable rejuvenation of nutrients had occurred. It was probable that those nutrients remained available for some years. In 1930 an exceptionally cold winter was experienced over southern Britain with prolonged and strong north-easterly and easterly winds; conditions were exceptionally favourable for cascading from the Celtic Sea, which could have been stripped of its last rich reserves of dissolved phosphate and other nutrients. There was, however, an awkward phase difference to explain away; for the following summer was the last rich year in the English Channel, whereas it might have been expected to be the first poor year.

CIRCUMPOLAR PLANT IN SCOTLAND.—With the discovery of *Diapensia lapponica* (*Ericales*) at 2,500 ft. in the Arisaig district of Inverness-shire, a new species, genus, and family have been added to the British flora. Several hundred specimens have been observed in that locality, the habitat being completely exposed on stony and gravelly schists, and with a rainfall of 120 inches. *D. lapponica* is one of the small group of circumpolar arctic-montane species—a group not represented in the mountains of Central Europe—with a wide distribution in the several continental and insular areas in the Arctic region.

CLIMATE TO GET COLDER.—Dr. J. D. H. Wiseman, of the British Museum of Natural History, forecast at the Royal Society that there would be a century or two of deteriorating weather before our climate improved. The evidence on which he based his forecast had been gleaned from cores of mud, gouged out of sediment on the ocean bed, in which can be found pointers to past climate. The evidence shows a cyclic fluctuation of temperature on our planet; and having charted these records and noted their rhythm, Dr. Wiseman predicts that in the next one or two hundred years our climate will grow steadily colder. One way in which scientists can "read" these cores of ocean mud is to judge the abundance of pinpoint-size sea-shells at each level in the core. These shells are the fossil remains of tiny one-celled animals: the *foraminifera*, whose shells piled up through the ages to form the chalk cliffs of Dover. The *foraminifera* live largely on the surface of the ocean. As they die their shells sink to the ocean floor along with other sediment. They flourish in periods of warm weather, becoming scarcer when the climate becomes colder. So those layers of sediment in the core which contain an abundance of *foraminifera* shells record periods of warm weather, and vice versa. Scientists are able to relate the layers to recent and distant historical and geological ages, and thus provide a chronological chart of changes in the earth's climate.

CLOCK RUNS ON LIGHT ONLY.—A photo-electric clock that keeps itself wound simply by exposure to light has been invented by Swiss watch-makers. It runs for 24 hours on energy drawn from one hour's exposure to light—either natural or artificial, direct or indirect. Four hours of moderate light wind the clock fully. To let it run down, it would have to be placed in total darkness for four days. Light energy is absorbed through three small window-like openings in the base of the otherwise ordinary-looking clock. These openings are the photo-electric cells which transform light energy into electric current. The electric current runs a permanent-magnet type motor weighing only 45 grams, which in turn winds the mainspring through gears that increases the motor's force by 10,000 to 1. Since under normal con-

ditions there is more than enough light, an automatic device cuts off the current when the mainspring is fully wound. The photo-electric cell, which transforms light energy into electric current, consists of a sheet of copper covered with selenium, over which is placed a translucent sheet of silver. Light striking this sheet produces electric current. If several such cells are attached in series, the current is strong enough to turn a small motor.

COELACANTH CAUGHT AGAIN.—A new specimen of the coelacanth was caught on September 24 off Anjouan, in the Comoro archipelago. After steps had been taken to ensure its preservation, the fish was dispatched by air to the Madagascar Institute of Scientific Research at Antananarivo, where Professor Millot declared it to be a perfect specimen. Only two other specimens of the coelacanth, which belongs to a species about 400 million years old, have been caught in recent times, both of them in these waters—the first in December, 1938, and a second in December, 1952.

COFFIN OF SHEET COPPER.—An ancient coffin of sheet copper, from Ur of the Chaldees, was on view in the Birmingham Museum by the generosity of Sir Leonard Woolley. It is riveted down the sides and at the top and bottom, with twin handles at both ends and dates from the Assyrian Period, c. 700–650 B.C. One other coffin of this type, now in the British Museum, was found at Ur and, apart from fragments of side panels and a rim in the Metropolitan Museum of Art, New York, these are the only ones known. When excavated, large portions of the sides of the coffin had corroded away. Laboratory treatment arrested the corrosion and the remaining solid metal was cleaned. In cleaning it was discovered that the side panels are covered with engraved animal figures, rosettes and cartouches. Similar, but somewhat finer engravings, were found on the sides of the other coffin at the British Museum and are also known, from the fragments from Zawiyeh, Persia, in New York. So similar in design and detail are all these that they may well be the products of one and the same workshop. That the panels were engraved before being riveted to the coffin is shown by the fact that in some cases the rivets cut through the outline of the animal figures. The two coffins were originally encased in wooden outer coffins, covered with wooden lids coated with bitumen, and the whole enclosed in a vault of bricks. Each contained the body of a woman, together with textiles, jewellery, pottery and clay vessels.

COOKING BY FIREDAMP.—Methane—the miners' "firedamp"—collected from coal seams below the Dee estuary in Point of Ayr Colliery, Flintshire, is being supplied for heating to industries and households along the North Wales coast. The gas, at present is taken in a six-inch main to Prestatyn and fed into gasholders and mixed with low-grade water gas to enable it to be used. Because of methane's high calorific value—900 British Thermal Units, compared with coal gas's 450 B.T.U.—it will be simple to obtain a mixture of the required standard. The gas is kept at high pressure in the seams; and 2,250,000 cubic feet drained off each day, part to be used to supply Prestatyn, Rhyl, Rhyddlan, St. Asaph, Abergelle, and perhaps Holywell, Colwyn Bay, and Flint. The object of the scheme is to cheapen the price of gas to the consumer. At present, along the North Wales coast, over 50,000 tons of coal are being consumed yearly to manufacture gas. When the new scheme is in operation only coke will be used, and it is estimated that the requirements will be

30,000 tons a year. Installing the new plant and laying mains will probably cost £500,000. The manufacturing plant to deal with the methane at Point of Ayr is expected to cost £150,000. By taking gas from the seams the mine is made much safer, eliminating the danger of explosion. The risk of firedamp explosions in Haig pit, Whitehaven, where several major disasters involving heavy loss of life have occurred during the past three decades, has been reduced by 75 per cent. by a system of extraction of methane gas from the coal faces four miles under the sea.

COSMIC RAY RIDDLE.—Sir John Cockcroft, director of the atomic research station at Harwell, told the British Association that balloons sent up by cosmic ray workers carried photographic plates and other recording apparatus. When these balloons fly at a very great height, and the plates are exposed and developed, the results show that coming into the earth's atmosphere from outer space are tracts of primary cosmic ray particles. They move at very high speeds and have enormous energy. How they accelerate to these enormous speeds is one of the problems to be solved by cosmic ray workers. Research is being done in connection with the belief that there are very weak magnetic fields extending for enormous distances in outer space.

DARWIN'S OLD HOME.—The custody of the national memorial to Charles Darwin at Downe House, Kent, has been transferred from the British Association to the Royal College of Surgeons. Darwin lived at Downe House for 40 years, and it was there that he wrote the *Origin of Species* and other great works.

DIRECTION FINDING BY ANIMALS.—The different ways in which animals find their way about were discussed by zoologists at the British Association. Dr. H. W. Lissman, of Cambridge University, gave a review of the problem of direction-finding in fish. The two most spectacular examples are the breeding migrations of eels and salmon. No satisfactory explanation of these has yet been given although there is evidence that fish have a highly developed chemical sense and are sensitive to temperature changes of less than one-tenth of a degree. His own recent discovery was that certain African fish regularly emit electrical pulses and are sensitive to similar pulses either from other fish or their own if picked up and fed back again into the water. The case of the sandhopper *Talitrus saltator* was described by Dr. D. I. Williamson, of the marine biological station, Port Erin, Isle of Man. Sandhoppers spend most of their time buried in the sand near high water mark, but they have been found to use different methods of navigation according as they were released on wet sand below high water mark or on dry sand above it. If released on wet sand they moved up-beach no matter whether the sun was shining or obscured, or whether the beach was one to which they were accustomed or not. Seaward movements towards high water mark have been shown to depend on sunlight and to be upset by moving the hoppers from one beach to another facing the opposite direction. Dr. J. L. Cloudsley-Thompson stated that the movement of centipedes, millipedes, and wood lice was governed during the day by their need to avoid dry, bright, and hot places. In the moist air at night their movements are less restricted and it is at night that they disperse themselves to new areas.

DISCOVERIES BY ROCKET.—Sir Edward Appleton, in an address on "Finding Things out with

Radio and Rockets," said that at a height of between 50 and 60 kilometres the atmosphere was actually hotter than the bottom layer touching the earth. A temperature minimum, the coldest level in the atmosphere, was reached at 85 kilometres, where bluish-white nuchiluent clouds were seen. They may be composed of tiny ice crystals, or of dust from comets, meteors, or volcanoes. Further exciting things may come from experiments with rockets. If we could get one high enough we could make it travel round the earth at a constant height, and become a satellite of the earth—like the moon, but not so far away. Such a rocket had been designed in theory which would weigh 7,000 tons, nearly all the weight being due to the fuel; the weight of the part reaching the orbital height would be 24 tons. The cost had been estimated at \$4m. for each orbital rocket. One question was whether "space man" could survive such an experiment, and what was the chance of the space ship being punctured by a heavy meteor. Clearly far more experiments would have to be done with rockets containing instruments, and then with living animals, to try to settle these questions. It would be wrong of the scientist to refuse to develop new things because they might be used in the wrong way. We must look on the gifts from science as charging every one of us with a great responsibility—the responsibility of using them for the benefit and not the ruin, of our fellow men.

DRY ROT DANGER.—The Department of Scientific and Industrial Research has drawn attention to the danger of dry rot, which thrives on damp wood. The fungus is airborne, but damp helps it to take hold and spread; the infection is insidious and can flourish between the brickwork and the woodwork of a house for months before it shows itself in cracking, crumbling skirting boards and window frames. If it takes hold in some visible place, it can be recognised from its typical appearance of cotton wool, covered with a silky sheen, the effect of the strands which feed the fungus. Though they look fragile they are strong enough to penetrate woodwork and even brick walls. The only remedy is to have the infected wood sawn out and burned.

EARLIEST FORM OF "TRUE MAN."—Five specimens of what is believed to be the earliest form of "true man" in the world were discovered by the South African palaeontologist, Mr. John T. Robinson, of Transvaal Museum, Pretoria. The discovery was made at Swartkranz, Transvaal, the scene of the discovery of the South African ape man by Dr. Robert Broom, who died in 1951. Mr. Robinson states that the creature called *Telanthropus* is a complete mixture of the ape man and the early true man of Java and China, and probably lived a quarter to half a million years before. The discovery proved definitely his theory propounded a few years ago on finding scattered fragmentary remains of *telanthropus*. It entirely disproved the theory of man's origin in Asia. There may have been parallel development in Asia and Africa. *Telanthropus* was extremely primitive, and not even stone implements had been found.

ECHIDNA AT THE ZOO.—Through the generosity of the Qantas Airlines, Ltd., the Zoo has received an Echidna, one of the most peculiar animals to be found in Australasia. The echidna, or spiny anteater, is about the size of a rabbit and is covered on its upper surface with a mixture of hair and stout spines, but on the under surface only with hair. It has an elongated naked snout, at the end of which

are situated the nostrils and the tiny mouth which can be opened only far enough to allow the long mobile tongue to be protruded. It is quite without teeth. The dark eyes lie at the base of the snout, and behind them the opening of the ear which, however, has no ear flap. The limbs are short and muscular and bear very stout claws used in digging. But the most remarkable claw is that on the second toe of the hind foot; it is very long and curved and is not used for digging but for performing the toilet and scratching the skin through the forest of spines. The echidna is one of the only two kinds of mammal that lay eggs, the other being the platypus. But whereas the platypus lays two eggs and incubates them in a nest at the end of a burrow, the echidna lays only one and carries it about in a pouch in which the young lives for some time after it is hatched. When it is 4 in. or 5 in. long it is turned out, the development of the spines presumably making it too uncomfortable a burden for its mother's pocket. In captivity the echidna thrives on bread and milk, finely chopped meat, and hard-boiled egg, and it drinks milk in large quantities.

ELEPHANT SHARK.—A specimen of that strange fish known popularly as the "elephant shark" was taken off Middle Brighton, Melbourne, Australia, a rare catch in these waters. It is not a true shark, and its scientific name is *Callorhynchus milii*. It measures about 16 in. long and weighs three pounds. It has two dorsal fins, a double-finned tail, and two sets of wing-like fins below, and in addition two bony projections beneath it. The elephant shark uses its "trunk," the feeler above its mouth, for seeking food on the ocean bed.

ENGINEERING IN NEXT 2,000 years. The use of gravity as a direct source of power was described by Lord Dudley Gordon, president of the Engineering Section of the British Association as "obviously entirely visionary." The amount of uranium in the earth, if it were to remain the only source of nuclear energy, would be exhausted well within the period of 2,000 years, but heavy hydrogen might serve as a fuel. In the ocean tides there was an immense source of power; but Professor Haldane had sounded a warning that the unlimited development of tidal power would be to increase the braking action of the tides, so that the rotation of the earth would slow down. The moon would again begin to approach the earth and the result would be the destruction of this planet; but it was calculated that the final judgment was not likely to take place before A.D. Thirty Six Million. Two main problems had to be solved—first the provision of sufficient power to meet world demands, and secondly the supply of materials to make the application of that power useful to mankind. There was every indication that iron and steel products would continue to be the main source of supply certainly for the next few hundred years, and there was still great scope in the production of iron and steel in improved composition and structure of materials. Two important materials are already being obtained in large quantities from the sea, iodine and magnesium. It was estimated that 4,000,000 tons of magnesium were present in each cubic mile of sea water, and it was already being extracted from the sea in commercial quantities in Great Britain. Failure to commence development within the next 50 or 100 years would mean that life on this planet within 2,000 years might deteriorate to a level much lower than that existing to-day.

ETHNOLOGICAL DATA IN CANADA.—According to the census taken in June, 1951, the people of

British origin, who had a substantial predominance in numbers at the turn of the century, form a minority in Canada to-day. The British stocks, whose numbers rose by 77 per cent. from 5,775,904 in 1941 to 6,709,685 in 1951, were still the largest ethnic group, but their percentage of the total population had fallen to 47.9, as compared with 49.7 in 1941 and 57 in 1901. The quota of French origin rose by 24 per cent. from 3,483,038 in 1941 to 4,319,167 in 1951, but their percentage showed a slight gain, 30.8 as compared with 30.3, and was only fractionally higher than the percentage for 1901—30.7. Canadians of continental European origin increased by almost 25 per cent. to 2,553,722, as compared with 2,043,926, and their percentage to 18.2, as compared with 17.8 in 1941 and 8.5 in 1901. Of the different races the Italians (152,245, as compared with 112,625) showed the largest proportionate gain, 35 per cent. People of Asiatic origin, including Chinese, Japanese, Hindus, and Syrians, declined in number to 72,287, as compared with 74,064, but there was a gain in the native Indian and Eskimo populations, whose combined total rose to 165,607, as compared with 125,521.

EXTINCT CIVILIZATION IN INDIA.—A Swedish expedition, led by Dr. Hannah Rydh and including Dr. Holger Arbham, Professor of Archaeology at Lund University, has explored the ruins of the Rangmahal—Palace of Colours—near Suratgarh, in the Rajasthan Desert of India, and has unearthed pottery and other art specimens revealing an extinct civilization in the Dershedvati Valley. The finds include about ten large vessels of pottery, a few small-size sculptures, one clay plate with Gupta inscriptions, beads of clay and ornaments and coins from various periods of Indian history, Reuter says. Most of them belong to the period from about the birth of Christ to the 6th century A.D. The Rangmahal ruins consist of 40 mounds, spread over a 100-mile dry belt in the Dershedvati Valley. Dershedvati, like Saraswati, was one of the two lost rivers of which mention is made in the Hindu Scriptures. Relics belonging to the Moghul, Gupta, Kushan and Maurya periods have been found. Among them are a lamp with a handle having a bull on it and a bowl with two figures with outspread arms in the pose of swimming. The coins discovered appear to belong to the Yaudheyas in the 2nd century A.D. Script on one of the pieces of a broken pot is believed to belong to the 3rd century A.D. The excavations have revealed that Rangmahal was the site of a distinctive culture which flourished as far back as the pre-Mauryan period dating from the 3rd century B.C. Pieces of bricks on all the sites indicate the existence of brick houses.

FARADAY SOCIETY JUBILEE.—The golden jubilee celebration of the Faraday Society was held at the Royal Institution, which is closely associated with the genius of Michael Faraday. Two founder members were present, including Sir James Swinburne, F.R.S., in his 96th year. In an address on "Michael Faraday as a Physical Chemist," Sir Harold Handley, F.R.S., said that Faraday was by nature a physicist. From 1816 to 1830, when his papers were entirely practical, his inner mind was brooding over his early conviction of the essential unity of nature, intent on finding the underlying relations of light, electricity, and magnetism. But thanks to his early training with Davy, his wide acquaintance with the properties of many substances, and his unrivalled knowledge of chemical technique, there was always a chemist's background to his experiences. It was his dual outlook that made him a key figure in the early history of

physical chemistry. It was remarkable how many of Faraday's ideas and discoveries had had a decisive influence on the development of electro-chemistry in the nineteenth century and had even to-day a direct bearing on modern theories. Had he been a believer in the atomic theory he might have made the deduction that electricity, like matter, was atomic in nature. It was left most appropriately to Helmholtz, in his Faraday lecture given at the Royal Institution in 1881, to point out that most startling result of Faraday's laws: "If we accept the hypothesis that the elementary substances are composed of atoms, we cannot avoid concluding that electricity also, positive as well as negative, is divided into elementary portions which behave like atoms of electricity." Thus Faraday's laws had led directly to the conception of the electron.

FORGERY OF JULIUS CÆSAR BUST.—The marble head of Julius Cæsar, now on view in the British Museum, is declared by Mr. Bernard Ashmole to be a modern forgery of a classical antiquity. No portrait of Julius Cæsar, he said, was more familiar, yet it could be proved false by the simple method of examining the surface under a magnifying glass, which revealed that although the head was perfectly preserved, and there could thus be no motive for re-working it, the whole surface except the hair had been systematically pitted with an instrument the nature and shape of which could be inferred from the marks it had left on the surface. The models which inspired the maker, probably an Italian of about 1800, were three portraits of Cæsar then in Rome—a cuirassed statue on the Capitol, a colossal head in the Farnese collection, now in Naples, and a bust acquired in 1771 by Pope Clement XIV and still in the Vatican. For the British Museum head the face and neck of the bust in the Vatican were closely copied, the poise of the head and other features were suggested by the Capitoline statue, and perhaps by the Farnese head; hair of conventional Roman character was added, and the whole re-created in the spirit of the sculptor's own day. The bust was bought by the Museum in 1818 for £30 from the collector James Millingen, who had recently acquired it in Rome, but it was not identified as Julius Cæsar until 1847. In 1899 it was condemned by Furtwängler, but this did not affect its popularity, and the public is reluctant to abandon it even to-day.

GANNETS INCREASE IN NUMBERS.—Seven years ago the Ornithological Society of New Zealand adopted a gannet census, to ascertain past population trends and to provide a basis for discussion of future changes. It has now been shown that there has been an increase in the New Zealand gannet population in the last hundred years, but the reason for this is obscure. The Maoris only used the gannet for food on a small scale, and there was no habitual use of it as bait or as food by fishermen. Gannet guano has never been taken regularly in large quantities, but there is no evidence that this has any effect on breeding.

GOOSE CHASING ON HORSEBACK.—Mr. Peter Scott, the artist and naturalist, the leader of the Severn Wildfowl Trust expedition to Iceland, caught and released more than nine thousand pink-footed geese. The object of the expedition was to "ring" the geese, so that the population may be measured by the new sampling technique developed by the trust. During four weeks at an oasis in the central desert of Iceland, an area which contains the largest known breeding colony of pink-footed geese, the expedition—on horseback—rounded up the geese during the flightless period, when the

goslings are still too young to fly and the adults have moulted the feathers of their wings. In the largest "catch" 3,169 geese were rounded up and driven into a small enclosure of nylon netting in twelve hours. A second "catch" was almost as big—3,113—and others of 1,910, 1,007, 720, 675, and 537 were also made. Among the geese rounded up were 149 carrying rings put on in Britain during three recent winters by teams from the Severn Wildfowl Trust using rocket-propelled nets. It is doubtful whether so many geese have ever been caught before for ringing, though an American, Mr. Graham Cooch, ringed five thousand blue geese in Hudson Bay.

GREENWICH OBSERVATORY TRANSFER.—The first stage of the transfer of the Royal Observatory from Greenwich, where the sky is becoming increasingly obscured by smoke and street-light glare, to Herstmonceux Castle, Sussex, has now been completed. Provision has been made for administrative offices, library, instrument rooms, records rooms, hostel accommodation, and residence for the Astronomer Royal. The second stage comprises the meridian group of buildings to house the Greenwich reversible transit circle, the Bamberg broken transit, and the Melbourne reversible transit circle, all transferred from Greenwich. Provision will be made for a new instrument—a photographic zenith telescope. The building to house the electrical control gear for the photographic zenith telescope has been completed, and also the meteorological enclosure to take rain gauges, thermometers, wind gauges, and sunshine recorders. The equatorial group, will comprise six new observatory domes to house the 30-in. and 36-in. reflecting telescopes, the 26-in. and 28-in. refractors and astrophysical telescope, and a building for the new Schmidt camera telescope. At the old Observatory an inscribed stone tablet and a strip of brass let into a band of white stonework have been set up to mark the position of the Greenwich Meridian. The National Maritime Museum is taking over, as an astronomical and navigational annexe, the old buildings of the Observatory. The Octagon Room, the original observatory of the first Astronomer Royal, John Flamsteed, will be opened to the public, and it will be possible to show to visitors some of the historic instruments left behind including Halley's transit instrument, the first transit instrument to be used in England; instruments used in the seventeenth and eighteenth centuries; and Airy's transit circle, installed in 1851, which defines the prime meridian, and which is still in use. This last famous instrument will remain in the position it has always occupied, marking the zero of longitude. The Shepherd 24-hour electric clock, outside the main gate, remains in position.

GYPSUM CURE FOR FLOOD DAMAGE.—In the work of recovering the territory in Holland which was damaged by the recent floods, it was discovered that the use of calcium sulphate or gypsum could undo the effect of sea water on productive land. After the dykes have been repaired and the surface water pumped away, ditches and drainage canals are cleared; then gypsum is spread for the rain to wash into the soil. The two agricultural research stations at Goes and Kampen have tested the salt content of all the land rescued from flooding and calculated the amount of gypsum needed—from 8 cwt. to 8 tons an acre—and this is issued to the farmers free of charge; more than 500,000 tons are being imported, to treat 200,000 acres. As soon as the soil can be tilled farmers are informed by the Government advisory service which crops stand the best chance of succeeding; and, provided they fol-

low this advice, they receive a subsidy to make up the return from the meagre first crop to the level of their production costs. Full compensation is being paid for the value of livestock and farm equipment lost.

HEATH FRITILLARY.—The future of at least one rare species of butterfly, the Heath Fritillary, is now assured by the Nature Conservancy. It has taken over 76 acres of Mincing Wood and Crawford's Rough, near Blean, Kent, where this butterfly lives. The Heath Fritillary lives practically nowhere else in this country, though its natural feeding plant is found in many parts.

HEAVY WATER FROM HOT SPRINGS.—The New Zealand Government has approved in principle the construction of a £5,000,000 plant to produce electricity and heavy water by using geothermal steam in the Wairakei area of North Island. Government departments will work in cooperation with the British atomic establishment at Harwell, which is interested in obtaining a supply of heavy water for use as a moderator in stockpiling atomic materials. Though the Wairakei area is only a small portion of the geothermal belt, estimated to extend over 3,750 square miles, about 20,000 kilowatts of power is already available from bores sunk there. There will be an intensified drilling programme, on which £200,000 is to be spent.

HUMAN STARVATION.—The American Geographical Society has made public its "study in human starvation," part of a survey of medical geography that is being prepared by the society's department of medical geography. Dr. Jacques M. May, director of the department, states that almost two-thirds of the world's population subsist on a deficient diet, largely for lack of adequate distribution. The society concluded that the world's food production appeared to be sufficient to provide food for everyone. So far as Europe, including the Soviet Union, is concerned, only Portugal, Spain, Italy, and east Germany lack adequate food, whereas in Asia enough food is available only in Kashmir, Nepal, Tibet, Siam, Cambodia, and Formosa. Australia and New Zealand have adequate diets, as do Somaliland and Portuguese Guinea, in Africa, and Canada, the United States, Uruguay, Paraguay, and two-thirds of Argentina, in the western hemisphere. The rest of the world, the society found, subsisted on diets lacking in both energy and protective or tissue-repairing values. Blame for these substandard diets is laid on population densities, insufficient purchasing power, wastage, social and economic patterns, religious and cultural taboos, land tenure, and inefficient farming. Inadequate methods of distribution were the most severe cause of malnutrition.

HYDRO-ELECTRIC POWER PROJECT.—A great electrical scheme has been projected by the North of Scotland Hydro-Electric Board, which will produce about 151,000,000 units of electricity a year. The cost will be £8,800,000. The scheme covers a catchment area of over 250 square miles in Sutherland, and will develop the water power resources of Loch Shin, its tributary streams, the river Caisley and the upper part of the river Brora. Four dams will be built, and five generating stations with a total capacity of 40,000 kilowatts, will be constructed. Loch Shin will be raised and enlarged by a dam across the narrows just north of Lairg, and a generating station will be incorporated in the dam. A second dam will be built across the river

Shin below the present outlet of the loch, and water from this reservoir will be led by aqueduct to the main generating stations near Inveran Hotel. A generating station is also to be built near Granich, at the western end of Loch Shin. Neur Loch will be enlarged by a dam, and this water will be led by aqueduct to a generating station on the southern shore of Loch Merkland, near Garvault. Another dam will form a storage loch by joining three small hill lochs, and, from this reservoir, there will be an aqueduct to a generating station on the north shore of Loch Merkland.

ICEBERGS DETECTED BY RADAR.—Experiments in Hudson Bay have confirmed that radar is an invaluable aid to ships navigating in bad visibility in ice-infested waters. Two representatives of the Ministry of Transport and one from the National Research Council of Canada sailed in the *N. B. McLean*, an ice-breaker fitted with a standard type radar set, on a 5,000-mile voyage in the Belle Isle and Hudson Straits. Their experience showed that in calm weather, which is usual in fog, ice formations of all types could be detected, from large bergs at 15 to 20 miles range down to small "growlers" at one and a half miles. "Growlers," which are smoothly rounded pieces of ice protruding up to 10 ft. out of the sea and weighing several hundred tons, were likely to be detected at ranges not exceeding three miles. For a ship travelling at 15 knots, that represented a warning period of only 12 minutes. Under conditions of rough sea and bad visibility it was thought unsafe to rely upon radar. Fields of tight pack-ice composed of hummock ice could be detected under all sea conditions up to ranges of about three miles, and leads through the ice could be identified. The investigations provided no proof that atmospheric conditions reduced detection ranges.

ICEBERGS SEEN FROM THE AIR.—The Woods Hole Oceanographic Institute is trying out a method of detecting icebergs from the air when fog or cloud impair aerial observation. An airborne radiation-thermometer will measure the temperature of the surface of the sea, registering the long-wave radiation (heat rays) from the area over which the plane is flying, and comparing this with the radiation from a sample of water in the instrument itself. Icebergs have been spotted from the air by means of radar, but this does not distinguish between an iceberg and a fishing-boat, whereas the radiation-thermometer will record the fact that the iceberg is definitely the colder of the two. The method has been successfully used in mapping from the air the inshore limits of the Gulf Stream from Florida to the region of Cape Cod. It is said to give accurate results provided that the radiation from the surface of the sea is not too much diffused by low cloud.

INDIANS' CONCERN IN ECLIPSE.—Low clouds at times spoiled London's view of the eclipse of the moon on January 29-30, and there were only momentary glimpses of the gradually darkening face. At 9.54 p.m., when the moon entered the true shadow of the earth, nothing could be seen in central London, and it was not until 10.10 p.m. that a shadow across the lower half could be discerned. Towards midnight the shadowed area appeared to glow with a reddish colour, turning the outer, silvery ring of light to gold. The total phase lasted from 11.5 p.m. to 12.30 a.m. An alleged announcement by the Kodikanal Observatory that the eclipse would not be visible in India caused great indignation among the pandas (genealogists).

who frequent Hindu places of pilgrimage) of Kurukshetra, a holy place in Punjab. An eclipse is normally regarded by the pious as an evil omen, the effects of which can be mitigated by offering charity to the pandas, who in this case declared that the eclipse would be visible in India. They threatened to take the matter to a court of law, on the ground that the announcement threatened their livelihood, but the dispute ended when the Director-General of Indian Observatories denied that it was ever made. The eclipse was visible, and several hundred thousand people bathed twice in the River Jumna to cast away pollution, of which an eclipse is believed to be the sign.

IRON CIST IN ROMAN BARROW.—An iron cist was discovered in a Roman barrow of the first century at Holborough, near Snodland, in the Medway Valley. Cists so far discovered in Britain have been made of either wood or brick. The barrow at Holborough is one of the few intact Roman burial mounds of its type to be excavated. A few days earlier a lead coffin about 5 ft. long and tapering was unearthed. The coffin was that of a child and had been put into the barrow at least a century after the death of the person for whom the barrow was made. The child might have had a Christian burial, the coffin having been laid in an east-west position. The design on the coffin lid has been deciphered as *Venus* on a pedestal. The lead is about $\frac{1}{2}$ in. thick and has cable-and-billet moulding and scallop-shell decoration. An important find has been the discovery of the metal corner pieces of the wooden frame which supported the coffin.

KIRKSTALL ABBEY DISCOVERIES.—For three summers excavations have been conducted west and east of the refectory at Kirkstall Abbey, and interesting discoveries have been made. As at most of the great Benedictine houses, the cloister and cloister garth at Kirkstall were on the south side of the church, screened by the south transept and here by the cellarer's wing. The scriptorium, where the monk's reading and writing was done, was on the sunny walk next the nave wall; and on the opposite side of the cloister was the refectory, flanked by the kitchen and by a warming-house. On the site of the warming-house the latest excavation has been done. A drain was found containing a coin of Charles the Bold of Burgundy, of about 1470; and in the soil on which the drain was laid, a groat of Henry V of about 1420. Therefore the drain was not yet laid in the earlier year and was in use in the later. Reconstruction took place in and about the warming-house at the end of the fifteenth century to a building erected in the twelfth. Yet the monks already had a bath in the thirteenth century. On the opposite side of the refectory the meat kitchen was constructed in the fifteenth century and an annexe added probably in the sixteenth. Under the kitchen cobbles was an Abbey token, from a Nuremberg mint. The monks, when they prepared to build the Abbey, set up on the site shops not only for the carpenters and stonemasons but for the smelters and smiths who made the tools they would need. Iron nails found here had the same measurement as modern sizes; and an awl with a square section and a pointed top to fit a handle came from a clay layer under the flags. This is the first tradesman's tool to be found at Kirkstall. The Abbey pottery bowls, cooking pots, pitchers and mugs give a sequence from the twelfth to the sixteenth century.

KON-TIKI: NEW PROOF.—Thor Heyerdahl, who crossed the Pacific on a raft, claims that he has found the last link in the chain of proofs of the

theory that the inhabitants of the Polynesian Islands originally came from South America. One of the main points in criticism has been that no signs had been found of South American settlement on the Galapagos Islands, which should be far easier to reach with rafts than the Polynesian Islands, which are much farther away. In a later expedition Mr. Heyerdahl went to the Galapagos and found traces of four South American settlements. A great number of pots and tools, some of which were from the Inca period, were brought home. That South Americans never settled permanently on the Galapagos is, according to Mr. Heyerdahl, explained by the discovery that balsa wood rafts of the Kon-Tiki type were manoeuvrable so that a return journey was possible. On his first expedition Mr. Heyerdahl believed that the raft had to follow the winds and currents, but he has now proved that rafts can cruise almost like an ordinary sailing-boat. The Kon-Tiki raft was equipped with one pair of centreboards forward, one pair aft, and one pair amidships, but the centreboards were not—as Mr. Heyerdahl first believed—meant only to steady the raft. By raising or lowering the front or rear centreboards and adjusting the sail, direction could be changed without using oars or rudder. This method was used by Indians until fifty years ago but has since been forgotten, and Mr. Heyerdahl got to know about it by chance. He sailed out on a new raft from the Ecuador coast in a favourable wind, but had no difficulty in returning to his starting-point.

LIFE ON DIFFERENT WORLDS.—Prof. J. D. Bernal, Professor of Physics at Birkbeck College, in a lecture to the British Interplanetary Society, said that no satisfactory theory of the origin of life on the earth had yet been produced. Attempts to explain it had been made by individual scientists, but too many different sciences were involved, and a plausible solution of the problem could only be reached by many experts working together. Proteins are the jigs on which other living molecules are built, but every molecule of protein was made by another protein molecule, and the puzzle was how the first one arose. He suggested that it was formed on the surface of wet estuarine mud or clay; this could act as a template upon which such a molecule might be built. New living forms could no longer arise in this way, because any newly formed protein would be instantly devoured by living organisms already present. Moreover, the short-wave radiation from the sun, which could provide the energy for building up such molecules, is now cut off by atmospheric ozone, formed from oxygen which the earth's vegetation had put into the air. The biology of the future would no longer be concerned only with terrestrial organisms. When interplanetary travel became feasible it would be interesting to see what basic resemblances existed between life forms on different worlds. Earthly beings would probably find anything living on Mars uneatable.

LIGHTNING MECHANISM.—The mechanics of lightning, and the generation of electricity in storms, were discussed at the British Association. Professor J. M. Meek, Professor of Electrical Power Engineering at Liverpool University, said that it is now known, largely from photographs taken with a camera able to make exposures at intervals of no more than a few millionths of a second, that the lightning flash is not a single one but a series of multiple strokes. It travels from cloud to ground at half a million miles an hour and one stroke follows another at intervals of fifty-millionths of a second. When the discharge reaches the ground

there is a far faster return stroke back to the cloud. This travels at some twenty thousand miles a second. It is during this return stroke that the most intense light is emitted. Mr. B. J. Mason, lecturer in meteorology at Imperial College, London, said that exploration with radar and aircraft revealed that thunderstorms consisted of one or more cells which contained strong vertical air currents, of up to 60 miles an hour, and were the seat of raindrop and hailstone formation and of lightning activity. Thunderstorm electrification was associated with the growth of ice pellets (soft hail) in the cloud, and in Germany it was found that these particles were predominant in thunderstorms and accompanied by very strong electric fields. The ice pellets when growing in a thundercloud would fall relative to the air and carry their negative charge downwards, while the positive charge would be carried to the top of the cloud either on ions, small cloud droplets, or small ice crystals to give the correct charge distribution.

LOCUSTS IN FLIGHT.—Dr. R. C. Rainey, of the Locust Survey Headquarters in Nairobi, has a new theory about locusts which may save millions of pounds every year in controlling their flight. He has discovered that locusts herd to fly towards what meteorologists call "areas of convergence"—that is where distorted air currents ascend and cause rain. The mass flights, he believes, are a desire by the female locusts to lay their eggs in moist, soft ground. The theory, if correct, should make it possible to predict the movement of the big swarms—which sometimes last for days—so that the control officers can intercept the insects before they concentrate in hitherto unpredictable directions. The cost of controlling the 1952 outbreak, in which about twenty Governments were involved, was about £10,000,000. Dr. Rainey has confined his research to the desert locust, which is more destructive than all the other species, and ranges from Eastern India to the West Coast of Africa and in a north-south direction from South-West Siberia to Tanganyika. He satisfied himself that locusts could travel great distances. A swarm in the Nile Valley travelled 700 miles in 15 days and another reached French Equatorial Africa from the Arabian Coast, a distance of about 1,300 miles. Across Africa there is a shifting area of ascending winds and rain known as the "international convergence zone," which lies between the trade winds and the monsoon currents on either side of the Equator. By plotting the movement of this zone and also the flight directions of locusts over a number of years, Dr. Rainey found that the two movements could be interrelated. The steady advance of a relatively wet front from the Gulf of Aden, south-west across Ethiopia and into Kenya some time ago nearly coincided with the advance in the same direction of huge swarms of locusts. Similar flights and meteorological conditions were observed in the Anglo-Egyptian Sudan and east across the Yemen to Baluchistan and Pakistan in 1950. Nobody has yet discovered how the locusts can "sense" their distant objectives, though it has been suggested that small patches of exceedingly sensitive hair on the front and on the top of their heads are receptive to wind currents. The hairs, furthermore, control the movement of their flight muscles.

LUNDY VISITED BY RARE BIRDS.—Four extremely rare visitors were among the 129 species of birds which were noted on Lundy during 1952. They included the red-headed bunting (adult males seen in both August and November), the red-rumped swallow, and White's thrush. Of the two first-

named Witherby's *Handbook of British Birds* records respectively one and four known occurrences in Britain, and of White's thrush between 20 and 30. The fourth rarity was the American robin—which is not a robin, but a species of thrush, *Turdus migratorius*. An example of this bird, a first-winter male, was on Lundy from October 25 to 29, when it was trapped, carefully examined, and photographed before release.

"MANIAC" WEATHER FORECASTS.—A calculating machine designed to deal with problems of accurate and rapid weather forecasting has been developed at the Institute for Advanced Study, at Princeton, in New Jersey. The machine, nicknamed "Maniac" (from mathematical analyser, numerical integrator and computer), was developed under the direction of Dr. John von Neumann. It contains about 2,000 radio tubes and completes computations quicker than any earlier calculating machine. Scientists believe that the more accurate and rapid weather forecasting made possible by "Maniac" will be worth many millions of dollars to industries which depend on accurate prediction of weather, such as agriculture, shipping and aviation. If all factors which "make the weather," such as temperatures, barometric pressures, and wind velocities and directions, could be constantly measured at thousands of locations and many altitudes, weather predictions for (say) the next month would be extremely accurate. The new machine provides a means by which the computations needed for accurate weather forecasting can be done with sufficient speed to have the more detailed forecasts ready in time for practical use. Weather forecasters have been using equations which comprise great air masses, as isolated units, but new equations for "Maniac" comprise the whole atmosphere up to an altitude of 12 miles and deal with this air mass as if it were built up of imaginary "boxes", each with a volume of 240 cubic miles. These equations express the weather in each of the air boxes and then unite all the parts in a comprehensive equation. Before "Maniac" was built there was no means of dealing with such a mass of figures quickly enough for use. Even the fastest pre-"Maniac" machines would take about two weeks to work out the answers. "Maniac" will solve the complicated equations in two and a half hours.

MAPS OF TROPICAL PLANTS.—With the help of seventeen maps Prof. R. Good has illustrated the distribution of the family, sub-families, tribes and selected genera of the *Ascleptadaceae*, that highly distinctive group of tropical plants, which includes perennial herbs, undershrubs, shrubs and climbers, all having a specialized pollen transfer mechanism. The maps represent all available information regarding the distribution of the family, which has a general distribution in the Old World and New World tropics. The family is poorly represented in isolated islands.

MEGALITHIC TOMB ON ANGLESEY.—Excavation work at Barclodiad y Gawres, a headland south of Rhosneigr, Anglesey, has revealed a tomb of cruciform plan, resembling one of the great Irish passage graves. Three stones at the central chamber end of the passage and the back stones of the eastern and western side chambers showed designs of magical art in the manner of the Irish tombs. Mr. T. G. E. Powell, who led the work, states that the face of a five-foot upright has been deeply pocked with a design consisting of a central panel of two superimposed lozenges bordered on either side by a double zig-zag line. The whole is surmounted with horizontal rows of zig-zags and

a small spiral, the survivor of a possible pair. This stone is based on an anthropomorphic prototype introduced from Iberia and of ultimate east Mediterranean origins. The stone forming the back of the eastern side chamber displays a row of spirals, all in the pocked technique of stone cutting. The spirals diminish in size from left to right, and the outer two spin differently from the inner pair. Above this row, in the left-hand corner, are traces of two smaller spirals. The orderly arrangement of these spirals, is very exceptional in megalithic art, and it would appear that decorative considerations in addition to magical, played some part in this particular case. The spiral, a motif almost non-existent in the megalithic art of Iberia and Brittany, seems to have been introduced to the Irish Sea area, from the Mycenaean world. The construction of Barclodiad y Gawres he says may be placed in the mid-second millennium.

MICROBE BENEFITS TO MAN.—The annual lecture commemorating the work of Anthony van Leeuwenhoek, who discovered the existence of the teeming world of the microbe some two centuries ago, brought to the Royal Society a fellow townsman of Leeuwenhoek, Professor A. J. Kluyver, the famous microbiologist. Professor Kluyver said that man has regarded the microbe in turn as "a marvel," "a mere curiosity," "man's enemy" and, latterly, "as an essential element in living nature." It is now well known that without bacteria no life would be possible on our planet. For example, 95 per cent. of the carbon dioxide required by the higher plants, on which all higher forms of animal life ultimately depend, comes from microbial metabolism. These figures also reveal that microbial protoplasm is twenty times as prevalent on the earth as the higher protoplasmic forms of life. This is accounted for by the ubiquity of bacteria. The bacteriologist who writes to a keeper of bacterial cultures for some "rare" specimen of bacteria could obtain that very organism from the dust on his own shoe, if he knew how to isolate it. One of the greatest contributions of the microbe to mankind has been the insight it has given into the flexibility of the life-processes in the living cell, as well as a better understanding of the causes underlying evolution. Much more common than hereditary changes in bacteria is an ability to adapt the enzyme systems of metabolism (the life-processes) to meet the demands of a changing environment. The energy-releasing processes in living cells can ultimately be reduced to a single principle. This is the release of energy in the cell by a continuous flow of electrons within and between molecules. This electron flow is achieved by a shift of hydrogen atoms from one molecule to another, or from one part of a molecule to another part of the same molecule—the process of transhydrogenation. Organisms which got into places where there was no oxygen learned to use other hydrogen acceptors—such as sulphur, nitrogen and carbon—and gave rise to the "life without air" which so shocked scientists when they first came upon the anaerobic bacteria.

MINOAN SCRIPTS.—The suggestion that the language of the undeciphered inscriptions in the so-called "Minoan Linear Script B," found on clay tablets in Crete and on the mainland of Greece, might be Greek has been made by Mr. Michael Ventris. He says that the inscriptions were nearly all on clay tablets, and were nominal rolls of palace employees and lists of food, stores, clothes, pottery and armaments. Most archaeologists believed that the inhabitants of the Greek mainland during the Mycenaean Age (c. 1550-1100 B.C.) already spoke

Greek. But as the earliest Linear Script B tablets came from Knossos, which at that time was thought to be inhabited by a non-Greek "Minoan" people, it was often considered that Linear Script B must contain a non-Greek language. The system of writing had about 75 letters. It was not an alphabet but a syllabary—that is, each letter stood for a separate syllable. He had analyzed the tablets and it was possible to deduce something of the grammatical structure of the unknown language. He began to experiment with a system of syllable values which seemed to bring the language into line with Greek grammar, and to produce recognizable Greek words. These values depended partly on key identifications, such as the words for "Knossos," "swords," "father," "mother," "and," "bronze," "so much," "four-legged animals," and "children." This Greek seemed to be much more archaic than Classical Greek, and even than Homer. Compared with the earliest forms of Greek previously known it was approximately as Chaucer was to modern English. If the Mycenaean tablets were really written in such a Greek language, then they represented the earliest articulate record of any language which was still spoken to-day.

MONTE BELLO FAUNA. A preliminary report on two thousand specimens of animals and insects collected on the islands of Monte Bello before the atomic bomb was exploded in 1952 was presented to the Zoological Society by Surgeon Commander G. Wedd, of H.M.S. *Campania*, who organized the survey. The island fauna was known to possess only two native mammals, a wallaby and a bandicoot, both of which had been harried out of existence by "introduced cats" since they were recorded forty years ago. Twelve species of local birds were previously known; another species, a falcon, can now be placed on the list. Of reptiles six more species have been added to the eleven previously known, including the limbless lizard (aprasia) and the degenerate snakes. Many invertebrate beasts, insects, myriapods, scorpions, and spiders were collected. It is believed that in certain families about 25 per cent. of them are peculiar to the Monte Bello group, which suggests that either the islands have been isolated from the mainland for a very long time or that the atomic bomb has been exploded among a collection of "relict" species. This is borne out to some extent by the flora, which appears to be composed mainly of Australasian strand plants. It therefore seems to be that the islands of Monte Bello were cut off from the mainland about a million years ago. The animals and the plants eeked out an existence among the arid limestone and shell-grit dunes. Then came the bomb which has given two thousand specimens a place in the Natural History Museum.

MOON ON A BIG SCALE.—The National Geographic Society exhibited at Washington a new set of photographs of the moon and planets and of the first taken by the 200-in. telescope on Mount Palomar, in California, which is the largest telescope in the world. The photographs showed a piece of the moon, two views of Mars, and one each of Jupiter, Venus, and Saturn. The immense magnifying power of the telescope has made it possible to reproduce details of the moon and planets on a larger scale than ever before. The craters and the pits of the moon could be seen clearly. Just below the centre of the photograph was a large crater 150 miles wide, with walls 12,000 ft. high.

NEBULAE ARE NOT ISOLATED.—According to observations at the Mount Palomar Observatory

the widely-separated extra-galactic nebulae do not necessarily exist in complete isolation from one another. Some of the distant nebulae, it is believed, are connected by luminous "bridges" or "inter-nebular highways" more than ten thousand million-million miles long, substantially longer than any previously known. These observations, by Dr. Fritz Zwicky, Professor of Astrophysics, have been confirmed by work at the Palomar and Mount Wilson observatories. It has been known for some years that luminous filaments sometimes join comparatively close double nebulae, like the bars of dumb-bells. But it was not known that "bridges" connect widely separated nebulae. Now they have been photographed on small plates about the size of a postage stamp. The bridges connect three nebulae in the constellation of Virgo at a distance of about 50 million light years from the earth. This discovery may explain why certain nebulae are "redder" or apparently farther away than they should be. This was discovered by measuring both their red and their yellow and blue light by means of filter and photo-electric cells. It was thought that this false reddening was because the stars are far away in time as well as in space and their integrated luminosity may have been redder far back in the past. The explanation may now be that these internebular "bridges" are obscuring light calculations.

NERVOUS SYSTEM DISCOVERIES.—Advances in the study of the nervous system were described by Dr. E. D. Adrian, O.M., in his presidential address to the Royal Society. The picture of the nervous system, he said, was extending in several directions, and the most striking advance had come from the great development of techniques for studying what went on in the very small units of which the nervous system was built up. When they knew more it might be that the general plan on which the units were organized would become much clearer. Perhaps a complete revision of outlook on the nervous system might be necessary. The most remarkable recent addition to sensory physiology had been Lissman's discovery that certain fish could guide themselves by the aid of the currents which they produced from special electric organs in their bodies. It now appeared that various fresh-water fish had electric organs too small to have any paralyzing effect but large enough to set up pulses of current in the water for their own sense organs to detect. Rushton had recently investigated the reactions of the eel *Gymnotus*, which had a large electric organ for stunning prey and a smaller one for detecting it. The system enabled the eel to detect and eat the small fish; but if metal electrodes were placed near it the eel detected and ate those, too. Indeed, the stomachs of electric eels which had lived in civilized regions were said to contain an assortment of scrap metal erroneously swallowed because the electrical detecting system was not designed to exclude such man-made objects. Animals which lived on land could have little use for organs whose sole function was to produce electric currents, but small electric currents were produced whenever nerve fibres or nerve cells were in action.

ORIGIN OF FLOWERING PLANTS.—Professor John Walton took "The Evolution of the Ovule of the Pteridosperms" as the subject of his presidential address to the Botanical Section of the British Association. He said that the dominant plants of the present time, Gymnosperms (conifers, etc.) and Angiosperms (flowering plants in the popular sense), were reproduced by means of seeds, and the history of the plant world as revealed in fossils

suggested that this method of reproduction gave them an advantage over the Pteridophytes (ferns and their allies), which were reproduced by spores and delicate gametophytes (the sexual phase in the life-cycle of ferns). The seed habit was particularly well suited to life on land, whereas the gametophyte depended on the presence of free water at the moment of fertilization. The origin of the Angiosperms was still as great a mystery as it was in the time of Darwin, but discoveries made since then gave some hint of the direction in which the truth lay. The evidence we possessed pointed to the Pteridosperms (extinct fern-like plants) having been, among all known palaeozoic forms, the most likely progenitors of the Angiosperms.

PAPER-TEARING BIRDS.—No sufficient explanation is yet forthcoming of the paper-tearing habit of various species of birds. (WHITAKER'S ALMANACK, 1951.) The subject was investigated by bird-watchers throughout the country, and a report to the British Trust for Ornithology by Colonel W. M. Logan Home shows that 424 observers returned completed *questionnaires*, and 2,000 replies were received after Mr. James Fisher in a broadcast had asked for records of paper-tearing. Most of the reports name blue tits as offenders, although there are records for the jackdaw, rook, chaffinch, canaries, budgerigars, and parrots, while one record speaks of a golden eagle tearing paper in a stone shelter. The tits work with the sun, entering south and east windows in the mornings and west windows in the afternoon. A list of the materials torn by tits includes, besides wallpaper (first with 1,564 records), newspapers, and book covers, such items as name cards on doors, lampshades, seed packets in greenhouses, notices in church porches, xos. notes from a milkman's book, old licence in car, knitting wool, hood of perambulator, sofa cover, washing on line, pyjamas, nylons, buttons pecked off, leather on clocks, soap, wireless aerial, plastic aprons, and stair carpet and gloves. In the chapel of Haileybury College blue tits entered the dome and made 40 holes through the stucco and asbestos and littered the floor with debris.

PICCARD'S DEEP SEA DIVE.—Professor Piccard, in his Italian-built diving bell, or bathyscaphe, touched the bottom of the "Tyrrhenian pit," one of the deepest parts of the sea around the shores of Italy, near the island of Ponza, on September 30. He reached almost 10,000 ft., eclipsing the previous record held by two French naval officers. The diving bell was under water for exactly two hours and 15 minutes. The professor and his son, who accompanied him on the dive, announced when they came to the surface that the sealed instruments on board indicated they had been successful in diving deeper than any other human being in history. The darkness was absolute and the powerful searchlight did little to relieve the gloom. But minute points of phosphorescent light pricked the darkness, proving that there was some kind of life down there. The sea was completely calm, and there was no great change in temperature in the observation cabin. Piccard's bathyscaphe is a sort of under-water dirigible. The gondola, a hollow, steel sphere is 6 ft. 6 in. in diameter with walls 4 in. thick, and a conical porthole 4 in. wide inside and 18 in. outside. This is suspended under a "balloon" shaped like a stubby cigar about 30 ft. long, through which a conning tower gives access to the gondola. The balloon contains 25,000 gallons of petrol weighing 70 tons. Other compartments contain nearly 10 tons of steel shot, held in place by electro-magnets, which drop their load when the current is cut, permitting the bathyscaphe

to rise. Electric batteries drive the two propellers—maximum speed 300 yards an hour—for the pumps and for the powerful searchlights.

PRESS FOR ALLOY FORGINGS.—The use of large light alloy forgings in aircraft construction has been assisted by the installation of a 12,000-ton hydraulic press by High Duty Alloys, Limited, at its works at Redditch. This new tool is designed to give working pressures of 4,000, 8,000, and 12,000 tons. The press itself weighs 800 tons and has an overall height of 56 ft. 4 in. To serve it with pre-heat billets there are three 30-ft. gas-fired furnaces, each having a capacity of 10 tons. The difficulty of making die forgings in light alloys comes from the fact that the work has to be done hot. It has been found that the specific pressure needed to make a hot die pressing ranges from 10 tons to 20 tons a square inch, and this is at a temperature of about 400 deg. C., when the plasticity of the alloy is at least four times greater than when cold.

RABBIT PEST IN AUSTRALIA.—Mr. Casey, Minister for External Affairs, reviewing the inroads made on the rabbit pest in Australia by the myxomatosis virus, said that for the third successive year there had been seasonal conditions favourable to the spread of the virus through insect carriers. In many parts of Victoria and in large areas of New South Wales, South Australia, and southern Queensland, a 90 per cent. reduction of the rabbit population had been reported. In the Cunnamulla district of Queensland thousands of square miles of light sand country that had been kept bare by rabbits was now covered with new growths of grass and herbage ideal for stock feeding. Most of this country had been useless for sheep raising since the 1880s, when rabbits entered it from South Australia. In many areas, graziers and farmers reported a remarkable increase in the carrying capacity of their pastures because of the infection of the rabbits by myxomatosis. If the gains made in those three years were maintained, Australia's stock-carrying capacity would be increased by tens of millions, and the value of the wool clip by many million pounds.

RAREST BRITISH FLOWERS.—Mr. R. A. Graham announced that the spurred coral-root orchid (*Epipogium aphyllum*) had, after twenty years absence, once again shown itself under a fairly heavy shade in a hilly wood in the south of England. This delightful plant, which has been described as our rarest wild flower, had previously occurred only 10 times over the years since its first discovery in 1854, and on only two or three occasions were more than three plants found growing together. In 1953 no fewer than 13 examples were found, all very small, and only five bearing more than one flower.

Mr. R. A. Blakelock, writing in the *Kew Bulletin*, describes the discovery of a flowering plant new to Britain. This is *Artemisia norvegica*, a species of wormwood or mugwort, which was found by Sir Christopher Cox in 1950 and again in 1952 near Ullapool in Wester Ross. It was growing at about 2,400 ft. on the spur of a mountain. The site was about 2½ miles from the nearest cottage and about an hour and three-quarters' walk from a road. The finder counted 24 colonies of the plant and there were probably others. *Artemisia norvegica*, which was previously known only from the Dovrefield district in Norway and from the Northern Urals, is an interesting addition to the plants discovered, in the last few years, in remote parts of Scotland, others being *Koenigia islandica* and *Diapensia lapponica* (see WHITAKER'S ALMANACK, 1953).

ROCK DWELLINGS IN THE SCILLIES.—Excavations in the Scilly Isles completed the uncovering of a

house dated about 1000 B.C. at English Island Carn. A yard lay west of the house doorway bounded by a wall of small stones laid as headers and with a gateway in the centre. The walling of this period is distinctive and quite unlike that of later times in Scilly. The ruins of this hut were covered by a limpet midden of later dwellers. On the other side of the island, at Little Bay, another house was shown by the pottery found there, to date from the end of the Bronze Age, about 500 B.C. The walling, which in places stands six courses high, is made of large stones, horizontally laid, and with yellow clay binding the joints. This house was 11 ft. wide and must have been 16 ft. long, but the sea has removed about half its length. The entrance was flanked by upright slabs and a hearth was sunk in the floor. Beside the south wall was a wide and deep drain designed to collect the water which percolated through the west wall of the house. Restrictions in the width of the drain, at two places suggest that the water was expected to accumulate and to be used. One of the two prehistoric tombs on Middle Arthur was excavated. It proved to be a list of unusual form, triangular or boat-shaped, 8 ft. long by 4 ft. at its greatest width. One capstone remained *in situ* and the very small cairn (13 ft. by 11 ft.) was retained by a kerb of substantial stones. The cist contained sherds of a late Bronze Age urn and much cremated bone.

ROCKET TO THE MOON.—Delegates to the conference of the Society for Inter-planetary Study at Düsseldorf discussed the possibility of rocket flight to the moon. Dr. Gartmann, the secretary, said there could be no question for decades of the application of atomic energy to rockets. Nor was it practicable at present to build a rocket with sufficient propulsive capacity to carry it to the moon or some other planet without an intermediate stop. A rocket able to reach the moon would need to weigh 30,000 tons—as much as a battleship. The contents would be 150 times as heavy as the rocket itself, and this was something which no constructor could realize. The one possibility was to build a filling station in space, at which the rocket could land and take in supplies. Experiments in the United States had gone beyond the drawing-board stage. The German rocket expert, Herr Wernher von Braun, then in America, was planning a space station at a distance of about 1,200 miles, which would travel round the earth in two hours. Other speakers pointed out that dwellers on the satellite would have none of the protection afforded by the air belt round the earth, but would be exposed to dangerous cosmic rays, which Dr. Ruff, of Bonn, likened to those given off after the explosion of an atomic bomb.

ROCK STUDY UNDER THE SEA.—More detailed knowledge of rocks beneath the oceans is resulting from a method of exploration already used on land in prospecting for oil and which was first applied to the ocean bed by Dr. M. N. Hill and Dr. J. C. Swallow, of the Department of Geodesy and Geophysics, Cambridge University. The method depends on the detonation of an explosive charge—in ocean use a depth charge exploded at 900 ft. depth—and the timing of waves from the explosion at a series of submerged hydrophones spaced out in a straight line at 100 ft. depth. From this information the depth and thickness of successive layers beneath the ocean bed can be calculated, together with the speeds at which sound waves travel through them. This speed varies from about 6,000 ft. a second to more than 20,000 ft. a second, and from its value in a particular layer conclusions can be drawn about the nature of the rock which forms the layer. The method is similar in principle

to that used in the study of earthquake records. After a preliminary trial some 350 miles off the west coast of Ireland, further measurements were made in the north Atlantic and Pacific from H.M.S. *Challenger* from October, 1950, to April, 1952, by Dr. T. F. Gaskell and Dr. Swallow, and by Dr. Hill in the eastern Atlantic in the summer of 1952. In deep ocean areas, and away from islands, it has been confirmed that the granitic layer which forms the main mass of the continents is generally missing. But west of Ireland, possibly near Bermuda, off the west coast of North America, and at two points in the western Pacific, evidence of a granitic layer has been found. Where there is no granitic layer there is usually a direct transition from sediments, which may be thousands of feet thick, to a layer of dense basaltic rocks, such as underlies the granitic layer of the continents. The use of cameras and echo-sounding apparatus in the exploration of the sea floor formed the basis of a number of papers read to the zoological section of the British Association. Mr. W. D. Chesterman, physicist of the Royal Naval Scientific Service, said that recent advances in underwater observation had been made possible by the use, by frog-men, of special submersible cinema cameras. The shapes and topographical structure of the sea bed had been recorded and studies made of fish life in natural conditions; the performance of trawl nets and the escape of young fish through the mesh had been examined; and the condition of the hulls of wrecks could be ascertained to enable efficient salvage operations to be carried out. For naval purposes training films on submarine-escape procedures could illustrate visually and with extreme clarity the correct drill in the case of an emergency.

ROMAN FORT AT SOUTH SHIELDS.—The Roman fort at South Shields, believed to have been originally known as *Arbeia*, had been opened to the public. The work of preservation, carried out by Professor I. A. Richmond, consisted in making firm existing walls, and in excavating foundations not previously exposed, and, where the actual walls have gone, marking the foundations in concrete. There were two successive forts in the second century, and finally a great period when it became a stores base for the armies of Severus in the Scottish campaigns of 209-211. A series of storehouses was built, which gave the fort its unique character. This third stage was intimately connected with the position of South Shields at the point, on the south bank of the Tyne, beyond which sea-going ships could not ascend the river. The fort was therefore well-suited to be a supply base, first for the Scottish campaigns and afterwards for the troops manning Hadrian's Wall. In the fourth century the granaries were turned into quarters for junior officers who arranged the transfer of goods from sea-going to river craft. The fort seems to have been destroyed by fire at the end of the fifth century. The new museum, adjoining the site, contains a collection of objects found there, including portions of five swords from under the ramparts of the third-century fort. They were regarded as a hopeless mass of rust until Professor Richmond sent them to the British Museum, where Dr. Plenderleith, by the use of X-rays found in them two things not known in any other Roman swords. The first was that one sword was inlaid with remarkable patterns—Mars and his shield (Roman in theme but Celtic in execution) on one side, and a Roman eagle with standards on the other. Two of the swords showed evidence of "pattern welding," a method of welding for strength and resilience hitherto known from Viking but not from Roman swords.

RUBBER BAG TO HOLD 12,000,000 GALLONS.—A rubber bag which will ultimately hold 12,000,000 gallons of water is to be fitted into part of the Mill Hill reservoir at Easington, near Sunderland. Originally the reservoir, was designed to hold 24,000,000 gallons, but serious cracks in the concrete structure, caused by mining subsidence, resulted in one of the two basins into which the reservoir is divided being taken out of use and the level of water in the other reduced so that it held only 3,000,000 gallons. It was decided that only rubber could provide the solution to the problem, and that the best method would be to make rubber sheets, tailor them to size to fit around the stanchions and the sides of the basin, and then join the sheets together in the reservoir to form a rubber bag which will rest on the concrete supports. The work, is to be done by the Dunlop factory in Manchester. When finished the rubber bag itself will weigh a hundred tons and will hold 12,000,000 gallons of water.

SEA OTTER BEING SAVED.—The combined efforts of Britain, the United States, Russia and Japan are saving the sea otter, which has been described as "the rarest as well as the most valuable of all the fur-bearing animals ever known." Its natural range stretched from northern Japan northward and eastward along the coast of Asia, then to the Aleutian Islands, Alaska, and southward down the American Pacific coast as far as southern California. For centuries its thick, soft fur was used by American Indians and, exclusively, by Japanese nobles, but after intensive hunting by English, Americans and Russians began, between 1785 and 1803 at least 74,000 sea otter skins were taken, and at the end of last century it was in danger of complete extinction. In 1911 an international agreement, giving the sea otter protection north of the thirtieth parallel, was made between Great Britain, the United States, Russia, and Japan. It was also given local protection by the Pacific States of America. Since then, the sea otter has been re-establishing its hold on life. In 1938 Californian naturalists were astonished when a herd of about a hundred appeared off Bixby Bay, whence they have since spread up and down the coast. Now a report from the Aleutians, and principally from the Delarof and Rat Islands, which form part of that archipelago, states that the sea otter exists in fair numbers, under the watchful eye of the United States Fish and Wildlife Service and the United States Air Force. In 1949 an air reconnaissance round two islands—Amchitka and Rat—revealed 1,321 sea otters. With the continuance of protection this animal seems to have a good chance of survival.

SEA SURGE ON THE EAST COAST. Mr. J. R. Rossiter, of the Liverpool Observatory and Tidal Institute, discussed at the British Association the magnitude and causes of the abnormal levels over the whole of the North Sea during the great storm in January. The cause of the disturbance he said, was the very strong northerly wind in the wake of a depression which entered the North Sea about noon on January 31. The gale was abnormally severe, with winds of approximately 140 miles an hour over a belt of the western and central North Sea 150 miles wide. The levels over the whole of the North Sea varied during the storm, and the tractive force of the north winds piled a tremendous volume of water from the Norwegian shores of the Atlantic into the North Sea, giving maximum levels near the Thames and on the Dutch coast. The mean level of the sea was more than 2 ft. above normal during February 1, which was equivalent to a transport of about 15 billion cubic feet of water.

The rotation of the earth during the disturbance, tended to concentrate the flow of water into the North Sea down the English coast and the outflow along the European coast. Tidal observations for Dover, Newhaven, and Dieppe made it possible to trace the transmission of the surge through the Straits of Dover and it was evident that a fraction of that surge did pass into the English Channel. Indeed the Strait became a minor safety-valve by allowing part of the swollen North Sea to escape southwards in the form of a two-knot current. An analysis of the gale published in the "Meteorological Magazine" states that there was a wind at about 2,000 feet reaching 175 miles an hour in a belt over 100 miles wide. This record speed was established at noon, and by six o'clock there was a long belt with a wind averaging about 140 m.p.h. over the whole of the western and central parts of the North Sea. The wind speeds reached then were much higher than anything previously recorded in this country, the next highest being 100 m.p.h.

"SMOG" DESTROYS TREES AND FLOWERS.—How precious plants wither under the effects of "smog" was described to the British Association by Dr. C. S. Metcalf, of the Royal Botanic Gardens, Kew. Some specimens had been reduced to bare stems and stripped of flowers and leaves in a single night's fog. Chemicals emitted into the air by the combustion of coal and solid smokeless fuels such as coke did considerable damage to vegetation. At Kew numerous species are difficult to cultivate on account of chemical pollution of the atmosphere. Evergreens, particularly conifers, became stunted because of soot deposited on their leaves. Still more serious was the damage to winter flowering plants caused by sulphur dioxide in the air. During the severe fog in December, 1952, many specially fine displays of winter flowering plants at Kew were completely spoiled. The flowers of certain orchids turn black and die and a much larger range of plants shed their leaves very rapidly. Plants which withstood the smog better than others were chrysanthemums, and camellias because of the coarseness of their leaves. To counter this menace in glasshouses, susceptible plants could be partly protected by keeping the temperature low and reducing the humidity during periods when atmospheric pollution was particularly severe. Further protection could be given to specially valuable plants by covering them with newspapers or any other material that would absorb sulphur dioxide.

SMOKE AND CANCER.—The possibility of an association between city smoke and the incidence of cancer was discussed by Professor G. R. Clemo, F.R.S., director of the chemistry department, King's College, Newcastle, in his presidential address to the Chemistry Section of the British Association. Statistics showed that cancer in the respiratory system was on the increase; that naturally focused attention on the air—or rather smoke—we breathe. He had made an examination of smoke collected in Newcastle by means of filters through which about 10 million cu. ft. of air had been drawn in three months. A considerable quantity of material readily soluble in petroleum ether had been obtained from the filters, and by chromatographic means a hydro-carbon was found which gave highly characteristic derivatives resembling those of a well known carcinogen. Subsequent analysis indicated that it was a derivative of the well known hydro-carbon pyrene. Other crystalline compounds had also been isolated. This was believed to be the first time that definite chemical compounds had been isolated from city smoke.

SONIC BARRIER.—In an address to the Roadfarers' Club Mr. Neville Duke spoke of faster-than-sound flight from the pilot's point of view. Sonic bangs had occurred, he said, when aircraft had flown at the speed of sound. A reasonable explanation was that the noise made below the speed of sound is dissipated, but at the speed of sound the noise waves build up and cannot escape from the aircraft. Then, when the aviator went through the sound barrier they were left behind, rather like a bubble. If it were coloured it could be seen. The same thing happened when the aviator came out through the sound barrier again—and, strangely enough, it was the second bang that those on the ground heard first. The pilot did not hear any of these bangs. There were minor indications that showed that he was approaching the sonic barrier, but once he had passed through, there appeared to be nothing to prevent him going further—except what they knew as "drag rise" and lack of power. The bangs being made at present should not break glass or windows. The actual pressure wave was quite weak. It would make trousers flap, or rattle loose windows. All supersonic research flights were done at high altitudes, because there the speed of sound was less; but because jet engine power was less in the less dense air, they finished *go* with a dive.

SPHENODON.—The Zoo has received a remarkable reptile called a tuatara or sphenodon which is the sole representative of a group of reptiles, the Rhychocephalians, otherwise known only from fossil remains, and survives to-day as a result of the most rigorous protection. It is about 18 in. long, dark khaki-green in colour with a number of white flecks on its body, and was received from the Department of Internal Affairs at Wellington in New Zealand, where it is restricted to a few small islands off the North Island. The tuatara have a rudimentary third eye, the pineal, which holds a central position in the upper surface of the cranium and shows only as an indentation in the skin. At the Zoo it lives under a pile of rocks, but in its natural state it shares burrows and lives on amicable terms with various birds such as petrels and shearwaters. The burrows are lined with grass and leaves and the bird invariably lives on the left side of the inner chamber and the tuatara on the right. The breeding habits of the tuatara are most unusual: about ten white hard-shelled eggs an inch long are laid towards the end of the year and development goes on until March, when it stops, starting again in September. The hatching takes place about December, after well over a year's incubation. Mr. W. H. Dawbin, who has been studying the species for two years, has captured, marked, and released a colony of about 450 of them from an island in the Cook Strait. The tagged specimens will be observed in the field to gain information still required about their habits, food, mating, egg-laying, and growth rates.

STARS ARE SOMETIMES HIDDEN.—The Astronomer Royal, Sir Harold Spencer Jones, lecturing at Liverpool, said that astronomers are now using radar to locate stars hidden behind patches of "dusty matter" in the Milky Way. He showed a photograph taken at Mount Wilson, indicating the greatest distance yet covered by the astronomer's telescope—a universe 500 million light years from the earth. It appeared as a small black elliptical shape. While that light was travelling through space the earth had seen many great changes, he said. Mountain ranges had been thrown up and worn down again by water and wind-blown sand. Many forms of life had gone through their stages

of evolution and vanished. Man did not make his appearance—one million years ago—until the light was on its very last lap. The new 200-in. telescope at Mount Palomar, California, would enable astronomers to chart space up to a thousand million light years distance.

STAR SPEED 190 MILES A SECOND.—Dr. Joseph Pearce, Director Emeritus of the Dominion Astrophysical Observatory, British Columbia, reported the discovery of a new star with a speed of 190 miles a second. He said it was one of two stars which revolved round each other at the highest speed so far observed for bodies travelling in orbits. The second star's speed was 122 miles a second. One star was 5,000,000 miles in diameter, the other 3,000,000 miles—13 and 8 times respectively as massive as the sun.

STONEHENGE DISCOVERIES.—Some unexpected discoveries have been made at Stonehenge during excavations by Mr. R. J. C. Atkinson and Professor Stuart Piggott, of the Department of Prehistoric Archaeology of Edinburgh University. The first problem considered was the question of the exact course of the avenue and the investigation of its alleged western branch recorded by Stukeley. The investigation of the avenue reveals two roughly parallel ditches following approximately the course suggested by Stukeley for the western branch. The ditches are of uncertain date, though one is certainly later than the avenue and the other presumably so. Neither has any structural connexion with the avenue or with each other. The presence of the avenue ditch was also confirmed on the south side of the Amesbury-Stonehenge road close to its presumed termination on the north bank of the Avon. The bank on the eastern side of the avenue was found to be spread over the already largely filled ditch which surrounds the Heel Stone and is therefore later in construction than the erection of the Heel Stone. Remains of a large stake were found against the eastern side of the stone hole, showing that the Heel Stone had been erected in the same manner as certain of the sarsen uprights of the main circle at Stonehenge and at Amesbury. On two of the sarsen uprights, one on the outer circle and one on the inner horseshoe of trilithons, are carvings of bronze axes and of a bronze dagger which had not hitherto been recognized and are only visible in suitable conditions of oblique sunlight. The axes, with markedly spayed semi-circular cutting edge, represent types familiar in the British early Bronze Age, but the dagger, with its pommel, and square shoulders and narrow tapering blade, is unlike any British type. It is closely paralleled by daggers from Mycenaean dated between 1600 and 1500 B.C. when there were contacts between the Wessex Bronze Age and the Mycenaean, Greece.

SURGERY IN THE BRONZE AGE.—Further evidence has come to light of the existence in prehistoric times of "surgeons" who performed operations on the human skull with instruments of flint. Excavation of an early Bronze Age "saucer" barrow 100 ft. in diameter, at Snail Down, Collingbourne Ducis, near Marlborough, has unearthed a complete "basket burial" of the remains of a man with a disk cut out of his skull. This is the first time a cranial disk has been found in a British Bronze Age burial. Only a few of these disks have been found in this country, and none has been of later than the Neolithic period. They may have had a ritual as well as a surgical significance since some have been found perforated with a hole suggesting that they were worn round the neck on a cord. It was the

practice in this type of burial to place the remains in a basket and then place the basket in a small pit with rubble, bits of flint and pottery, animal bones and any other material connected with the funeral burning.

SUBMARINE MARK BUOY.—A new type of mark buoy, which would be released by a submarine if it were unable to surface after diving, was approved by the Admiralty after successful sea trials. The purpose of the mark buoy is to indicate a position in such a manner that aircraft and searching vessels can locate it easily, and thus be on hand to rescue survivors. In its present form the buoy is constructed of light metal alloy, and comprises a number of capsules enclosed in an annular structure; it has been designed to combine strength, compactness, and buoyancy adequate to support warning devices. A flashing light which has a range of 3,500 yards in good visibility is installed and comes into operation when the buoy is released from the submarine. Its two batteries have a minimum life of 42 hours, and in good visibility the light has a range of about two miles. Buoyancy is given to the device by packing the annular structure with watertight pressure-resistant metal capsules. The upper surfaces of the buoy are painted with a special composition which has a high daylight visibility range, and round the top is a crown containing 24 reflecting road studs. A red nylon flag is carried on a mast.

TELEVISION VIEW OF SEA FLOOR.—The Institute of Oceanography reports that experiments with underwater television suggest that it might be a valuable means of studying the floor of the sea. The equipment used was developed by the Admiralty for use in the Royal Research Ship *Discovery II*. The television camera, weighing 7 cwt., and fitted with a stereoscopic attachment has been installed in the *Discovery II*. It was designed for use down to 1,000 ft. Shoals of fish have been seen on several occasions. Plankton can be seen, mostly as spots of light, though occasionally the type of organism can be identified. Observations on the sea floor were made in about 33 fathoms off Falmouth, in 60 fathoms near the mouth of the English Channel, and in about 80 fathoms near the edge of the continental slope. Further observations were made on the continental shelf off Portugal, on the Gettysburg Bank, on the rocky sea floor round the Azores, and on the Princess Alice Bank south of the Azores. On the Gettysburg Bank there was a fine view of black rock and what appeared to be white sand, but which the conical dredge showed to be almost entirely calcareous fragments.

TEREDO THE ENEMY OF TIMBER.—Experiments to discover the best timber for use in coastal defence include the testing of wallaba and mora, two little-known woods from British Guiana, as well as such timbers as greenheart and oak. The enemy is the tereido, the dreaded shipworm, which bores into breakwaters and harbour works, and not only in the tropics. In the eighteenth century much havoc was wreaked by the tereido in the sea-dikes of Holland, causing serious inundations along the coast, and from 1914 to 1920 its excavations cost the authorities of San Francisco Bay no less than ten million dollars. Drake's *Golden Hind* was an earlier distinguished victim. Australian marine engineers have discovered that the tereido does not like the turpentine tree, which is resistant for ten years, whereas Burmese teak succumbs much sooner. The coconut palm survives about five years, although the shipworm shows a good deal of cunning in its

work. For its tunnels always follow the grain, only swerving aside when an extra hard knot or iron nail is encountered. The teredo dislikes sharp-edged particles in the tissues of the wood it is burrowing and methods are being sought of impregnating marine timbers with silica; otherwise the traditional weapon of counter-attack is the studding of groyne and harbour works with a multitude of broad-headed iron nails.

TOLLUND MAN'S AGE?—Radio-active methods are to be used in an attempt to ascertain the exact date of the life and death of the Tollund Man, whose almost perfectly preserved body was found under eight feet of peat in the Tollund bog in Jutland in 1950. Danish and foreign scientists, have been unable to fix the period when the Tollund Man lived. But they agree that it was at least 2,000 years ago. The body was in an unusually good state of preservation, the head especially. The internal organs were intact and it is on these that scientists are to experiment with radio-active methods. Nowhere in the world has a human face come so unspoiled down the ages. The Tollund Man's face is a rather narrow one and not particularly large, and a type one may meet with in the same part of Jutland to-day. The nose is firm and well set. There are calm furrows on the brow. The play of the closed eyes has been preserved intact. The mouth is closed; the lips appear strong and finely drawn. It is the face of a sleeping man, apparently a man who has just closed his eyes for a moment. When he was found a handsomely plaited rope in the form of a noose was pulled so tightly around his neck that it had left grooves in the skin. Mr. Palie Lauring, a well-known Danish scientist, says that when the settlement was in dire peril, when starvation faced the country, they would sometimes make the supreme sacrifice, would sacrifice the chieftain himself to appease the gods. He was not killed in any degrading way. His head was crushed or he was hanged; and the leather noose was left round his neck to prove to the gods his honourable death, for hanging was the sacrificial death.

UNIVERSE TWICE AS OLD.—Astronomers who are using the 200-in. telescope on Mount Palomar have made a series of calculations concerning the size of the universe, which, they consider, is probably twice as large and twice as old as has been supposed. They now believe that the yardsticks they have been using to measure space are incorrect. Dr. Walter Baade and Dr. Harlow Shapley have determined that the great Nebula in Andromeda is about twice as far from us as used to be thought. These estimates arise out of accurate measurements of the brightness of the Magellanic clouds, a pair of small galaxies in the southern sky formerly believed to be about 75,000 light years from us. The measurements indicate that certain aggregations of stars in these clouds are globular clusters of the same type as those in the Milky Way. If the clusters are as bright as those in our own galaxy they must be twice as far away as had been thought, which would mean that all the distances between galaxies must be doubled. If every galaxy is twice as far away as we had thought, it must also be twice as big. Therefore the Milky Way, which was supposed to be an exceptionally large galaxy, would be about the same size as the Andromeda Nebula. The new estimate would clear up another discrepancy. On the basis of the expansion-rate of the universe, it has been estimated to be about 2,000 million years old, whereas geological evidence indicates that the earth is over 3,000 million years old. The revised estimate of

the size of the universe would increase its age to 4,000 million years.

WATER EROSION.—To combat serious water erosion the French Government have built 10,000 miles of channel terraces on the steep slopes of the Atlas mountains outside Algiers. This conservative and soil restoration project is the result of intensive studies since 1940 of ways and means to save soil on the steep (55-deg.) slopes. Torrents of water pour down the mountainsides each year, washing millions of tons of good earth from the slopes into rivers, streams, the valleys and the ocean. It is not unusual for $\frac{3}{4}$ in. of rain to fall in 30 minutes, and when it reaches the bottom of the slopes the water is transformed into a thick muddy liquid. Now, the terraces hold and slow down the descent of the water from the mountains. Trees have been planted on the ridges of each channel terrace.

WHEEL TAPPING ON THE RAILWAY.—Wheel tapping and similar traditional methods of testing the soundness of metal parts may be superseded by a more scientific system of flaw detection as a result of development work at the laboratory of the Guest, Keen and Nettlefold group of companies. The new method, still in the experimental stage, depends upon an electrically generated "ringing" of the part; the vibrations imparted to the metal are recorded on the face of a cathode-ray tube and the picture clearly illustrates the condition of the part. Sound metal is able to "ring" inaudibly for some appreciable time; but a hidden flaw results in a "dead" note.

WILD LIFE IN AUSTRALIA.—The scientific expedition organized by the Australian Museum in Sydney returned after four months work in the interior and northern areas of the country, and presented the institution with a large and valuable collection of zoological and mineral specimens. More than 300 birds were brought back, among them seven not previously included in the museum's collection—the grey honey-eater, the white quilled rock pigeon, the strike thrush, the fantailed warbler, the rufous-crowned emu wren, the northern warbler, and the buff-breasted warbler. A number of specimens were caught of the beautiful little jerboa-like marsupials belonging to the genus *antechinus*. They have the unusual quality of hopping like kangaroos instead of running. Very thin, with greatly elongated hind legs, they resemble the so-called kangaroo mice, which actually share their habitat in great numbers. At Ayer's Rock, in the desert more than 200 miles from the nearest town—Alice Springs—a domestic mouse was found. Domestic cats which had "gone wild" were fairly common. Only one example of the orange-backed or desert bandicoot was found. Many years ago it was very plentiful. The aborigines and white miners working on the Granites, 350 miles north-west of Alice Springs, used to eat desert bandicoots with some relish. To-day they have become very rare, and none had been caught since 1897. In the Forest River, north-west of Wyndham, East Kimberleys, were found 400 frogs about whose species little is yet known. Minerals collected included gold in quartz from a rich leader at the Granites; wolfram mica, malachite and azurite from Mount Doreen, 200 miles north-west of Alice Springs; silver-lead ore from Arnhem Land, native copper, cuprite, bornite, malachite, chalcopyrite and pyritic ore from Tennant Creek; scheelite from Mosquito Creek and cassiterite ore from Maranboy, both in the upper regions of the Northern Territory.

LITERATURE OF THE YEAR

THE year 1953 was memorable by reason of the ample evidence it provided that literature, besides being perhaps the noblest demonstration of man's genius, is, like all other human activities in this age, governed by economics. In March, 1953, the Society of Authors issued a statement, entitled "Critical Times for Authors," in the course of which it was emphasised that the position of the author at the present time was bound to worsen with any worsening in the condition of publishing. While more titles were published, the statement said, average sales had shown a serious decline at a time when the cost of book production had increased out of all proportion to the rise in book prices. The increased costs of manufacture had diminished the profit return even of best-sellers. "This is bad for best-sellers," the Society of Authors' statement said, "but worse for the young and small-selling authors because it is out of the profit made for them by their best-sellers that many publishers in the past were able to follow publishing as a profession and not merely as a trade and to publish, often at a loss, the work of unknown authors and those whose sales were small though their critical status was considerable."

The publishers, no less than the authors, found themselves confronted with a multiplicity of problems. Even the one notable amelioration of their circumstances—*viz.* the return to reasonableness in the price of paper—tended to complicate rather than to resolve their difficulties. During 1951 and 1952 paper had rocketed in price to unprecedented heights and was, moreover, hard to acquire. When at the beginning of 1953 the publisher found that he could obtain all the paper he required and at reasonable prices, he found himself faced with the necessity of explaining to the book-buyer, who was aware of the sharp fall in paper prices but not of the continually rising costs of printing and binding, that prices of books were, in relation to their cost, extremely moderate. These difficulties were hardly eased by the loud cries of financial distress which came from the booksellers, whose trade association, in April, 1953, published a Report, entitled "Results of Bookselling, 1948-1952," which analysed the accounts of a representative cross-section of British booksellers during three years' trading, and which made it abundantly clear that the business of bookselling was commercially unrewarding.

Against this economic background the record figure of 18,741 titles published in 1952 was not seen by the book trade itself as a reassuring sign. The relationship between output of titles and total turnover is a vital one for the book trade, and the relevant figures are as follows:

Year	Turnover	Titles Recorded
1938	£10,706,018	16,219
1939	£10,321,658	14,904
1940	£9,953,196	11,053
1941	£13,986,700	7,581
1942	£16,735,900	7,241
1943	£19,290,800	6,705
1944	£20,500,516	6,781
1945	£21,979,554	6,747
1946	£26,961,622	11,411
1947	£30,203,763	13,046
1948	£33,241,431	14,686
1949	£34,297,252	17,034
1950	£37,158,652	17,072
1951	£41,553,760	18,066
1952	£42,790,387	18,741

It will be seen that while the latest turnover figure is roughly double the 1945 figure, the average turnover per title has become smaller. In 1945, gener-

ally speaking, a publisher knew that he would sell every copy of every book he was able to produce, and the element of risk, which is always the costliest factor in book publishing, was removed. For the past three or four years the position has been wholly different. More books have been produced than the public has shown itself willing to assimilate, the risk of loss has been considerable and the constant rise in manufacturing costs, to which reference has already been made above, has added further to the publishers' difficulties. These developments have caused anxiety not only to the book trade itself but to those who, concerned primarily with literary rather than commercial values, deplore a publishing situation in which the publication of the majority of books must be a gamble.

For these reasons the signs that manifested themselves during 1953 of a slight abatement in the output of new titles were welcomed. The total number of new books published in the first nine months of 1953 amounted to 13,137, as compared with 13,815 during the comparable period of 1952. Less welcome was the evidence that the progressive increases in book trade turnover that have been recorded each year since 1940 were no longer being maintained. In the first three months of 1953 the total turnover amounted to £9,548,533, compared with £9,772,267 during the corresponding period of 1952. Commenting on this decline the Publishers Association, in their annual report issued in the spring of 1953, said: "Whether the volume of sales has reached a peak from which there will be a descent or whether this is merely a plateau in an upward journey are matters which cannot yet be determined, but which are of vital importance to the trade."

The export market for British books continues to flourish. In 1952 the export book business amounted to the record total of £14,482,036. Export figures for earlier years have been:

1940	£3,517,335	1946	£6,715,212
1941	£3,983,900	1947	£7,412,905
1942	£3,608,700	1948	£8,739,236
1943	£4,469,600	1949	£9,798,838
1944	£4,895,349	1950	£11,394,220
1945	£5,139,222	1951	£13,740,323

ITEMS OF INTEREST

COPYRIGHT.—The committee appointed by the President of the Board of Trade in 1951 to examine and make recommendations concerning the law of copyright produced their report. They strongly advocated the adherence of the British Government to the Berne Union, as providing a high standard of right in intellectual property, and expressed the hope that the Universal Copyright Convention drawn up under the auspices of UNESCO in the summer of 1952 would not result in any lowering of present standards. (The standard of protection afforded by the Universal Copyright Convention is considerably lower than that agreed by parties to the Berne Union.) The committee heard witnesses presenting very different points of view concerning the duration of copyright, and were impressed by the evidence of publishers which showed that, but for a lengthy term of copyright, during which the continued earnings of successful books could make good the losses on books which were uncommercial propositions, it would not be possible for the latter to be published at all. The committee did not accept the argument put forward on the other side, that a shorter period of copyright would result in cheaper books for the public. They recommended that there should be full protection for fifty years

after the author's death instead of the limited protection which now exists for the second half of that period. They rejected the proposal that royalties, to be devoted to some deserving literary object, should be payable on out-of-copyright works, on the grounds that this would simply be a new indirect tax on the public.

The committee commented on the evidence they had received of the resentment felt by British authors about the non-participation by the United States in the Berne Union agreement. The United States was one of the 43 signatories to the Universal Copyright Convention, and in June, President Eisenhower commended this Convention to Congress for ratification. Bills proposing the emendation of American copyright law to make ratification of the Convention possible have been introduced in both the House of Representatives and the Senate.

TAXATION OF AUTHORS.—A concession made to authors in the Budget allowed royalties to be spread, for the purposes of taxation, over two years following publication of a work. The Chancellor of the Exchequer, who has been pressed by members on both sides of the House of Commons to do something for authors, and who has himself expressed great sympathy with their particular difficulties, emphasised that this was in fact an extension of the concession that had already been made in the case of lump payments for rights in literary property. Any further steps in this direction, he said, would involve others besides authors and would have to wait until the report of the Royal Commission on taxation was published. The Chancellor therefore asked members not to press him any further in the matter this year.

A recommendation that the State should act without delay to give authors relief in the matter of taxation was one of the principal recommendations in what was described as an "agreed statement" on authors' financial difficulties, produced by the Society of Authors under the title "Critical Times for Authors" (referred to above). An "agreed statement" was considered necessary since there had been widespread discussion of the problem in the press and elsewhere to which many authors had contributed. As such, it was necessarily moderate, and disregarded controversial questions such as that of direct State aid for authors. It strongly urged, however, that public aid should be forthcoming in greater measure for public libraries and school libraries.

SIMPLIFIED SPELLING BILL.—A private member's bill, the Simplified Spelling Bill, was presented to the House of Commons by Mr. Mont Follick, M.P. He was supported by Mr. I. J. Pitman, M.P. and nine other members. The bill required the Minister of Education to institute researches into ways in which spelling could be simplified, "with a view to reducing, and if possible eliminating, the widespread inability of the children of Great Britain to read their own language." As much to the surprise of the sponsors as to anyone else, the bill passed its second reading by 65 to 53. Since in a private member's bill no financial provision may be sought, Mr. Follick declared himself satisfied with the statement of the Minister of Education that any body undertaking the research work he had in mind would have her goodwill, and he withdrew the bill in the certainty that it would be defeated on the next vote.

WELSH LITERATURE.—The Committee on Welsh Language Publishing, which was set up by the Home Office in 1951, produced their report in which they urged the vital importance of an increase in the available reading matter in Welsh if the Welsh language and culture were to survive.

They recommended the provision of some central body—a possible name, it was suggested, might be the "Welsh Books Foundation"—which would provide Welsh books for schools and stimulate the general provision of Welsh books in any ways that seemed feasible. The Government is seeking the recommendations of the Council for Wales and Monmouthshire and the Welsh Joint Education Committee on the proposal.

LITERARY PRIZES.—The Nobel Prize for Literature was awarded to François Mauriac.

The James Tait Black Memorial Prize for the best novel published in 1952 was awarded to Evelyn Waugh for his "Men at Arms." The biography prize went to G. M. Young for his "Stanley Baldwin."

The Heinemann Foundation awards for 1952 were made to Edwin Muir for his "Collected Poems" and to Reginald Pound for his "Arnold Bennett."

The Somerset Maugham Award for 1953 was made to Emyr Humphreys on the strength of the promise shown in his novel, "Hear and Forgive."

The William Foyle Poetry Prize was awarded to Dylan Thomas for his "Collected Poems 1934-52."

The Library Association Carnegie Medal for the most outstanding book for children published in 1952 was awarded to Mary Norton for "The Borrowers."

EFFECTS OF BROADCASTING ON READING.—The B.B.C. published the results of an experiment, which had been undertaken with the co-operation of public librarians, booksellers and publishers, to test the increase, if any, in the demand for books broadcast in the form of a B.B.C. serial. Three books were selected, and dummies were substituted for genuine copies on the shelves of over sixty public library branches, containing an invitation to the would-be borrower to state his reasons for wishing to borrow the book in question. Most of those who responded attributed their wish to read the books to the broadcasts—about 20 per cent., because they wished to catch up on parts of the serial they had missed, and the remaining 80 per cent., because they were interested in the book itself as a whole. Of the three books chosen, the demand in one case rose by 308 per cent.; the others showed an increased demand by 160 and 162 per cent. The B.B.C.'s conclusions were that the broadcast serialization of a book is likely to give an immediate, and sometimes startling, stimulus to public demand; and that it does not seem to depress, but rather stimulates the normal longer-term demand for a book. The larger question of the effect of broadcasting as a whole on the volume and quality of the public's reading, however, was one which would require a much more comprehensive enquiry.

NATIONAL BOOK LEAGUE.—In January the Italian Ambassador opened at the National Book League's headquarters in Albemarle Street an exhibition entitled "The Italian Book, 1465-1900." This had been arranged jointly by the National Book League and the Italian Institute, at whose premises the section of the exhibition dealing with 19th century Italian books was shown. A Coronation Exhibition of books selected by Sir Harold Nicolson, and entitled "The Two Elizabeths and their Peoples," was sent on tour. An exhibition of Unesco publications opened at the National Book League at the end of April, and in September the League showed their fourth International Book Design Exhibition, to which eleven countries contributed—the United Kingdom, the United States, the U.S.S.R., France,

Germany, Switzerland, Australia, New Zealand, Poland, Czechoslovakia, Israel.

READING IN AUSTRALIA.—Sydney University undertook a survey into Australian reading habits, the results of which were published in the summer. The report commented particularly on the dearth of information about books which was badly needed in the Commonwealth, and said that "literary criticism in Australia is frustrated and frustrating." Australians were eager for advice about books, but there were no national journals comparable with those in the United Kingdom to carry book news to all parts of the Commonwealth. The newspapers' attitude to books was "as regrettable as it was short-sighted." The only national book medium was the radio, and although its interest was very great, it could only cover a fraction of the books published. The hope was expressed that reviews and book discussions would be an integral part of any television established in Australia.

BASKERVILLE'S PUNCHES.—The punches engraved in the mid-eighteenth century by John Baskerville for the type which bears his name have found a permanent home at Cambridge (Baskerville was University Printer at Cambridge from 1758 to 1768) through the generosity of the French type-founding firm, Deberny and Peignot, into whose possession the punches had come. The presentation was made at Cambridge by M. Charles Peignot in the presence of the French Ambassador.

CANADA REMOVES TAX ON BOOKS.—In February the Canadian Government removed the sales tax on books. Canadian librarians, teachers, publishers and booksellers have for some time been strongly urging the removal of what was described as a "formidable bar to the wider distribution of good literature."

SHIPS' LIBRARIES.—The Seafarers' Education Service reported that for the first time the number of books sent to merchant ships' libraries passed the quarter-million mark in one year. The number of ships carrying libraries has increased by 50 per cent. since the end of the war. There has been enthusiastic support from ship-owners, whose contributions cover most of the costs of the work, and from all sections of the shipping industry. The public has responded well to appeals for books for this purpose.

THE FREEDOM TO READ.—In June, 1953, an order by the U.S. State Department in Washington directed that books written by Communists and sympathizers with Communism should be removed from United States overseas libraries. This directive received only very modified support from the Executive; President Eisenhower warned: "Don't join the book-burners. Don't be afraid to go to the library and read the books." The President distinguished between public libraries in the United States "in which our citizens of all ages and races must ever be able to turn with clear confidence that there they can freely seek the whole truth unwarping by fashion and uncontaminated by expediency," and American libraries maintained in other countries; he did not see why public money should be spent on purchasing Communist books for these latter libraries whose whole purpose was to explain the American way of life.

At the end of June, 1953, the American Book Publishers' Council and the American Library Association issued a seven-point declaration entitled "The Freedom to Read." Stating that this freedom, essential to democracy, was now under attack from private groups and public authorities, the declaration affirmed that it was in the public interest

that publishers and librarians should make available the widest diversity of views and expressions including those which were unorthodox or unpopular with the majority; that publishers and librarians did not need to endorse every idea or presentation contained in the books they made available, and that it was contrary to the public interest for publishers and librarians to determine the acceptability of a book solely on the basis of the personal history or political affiliations of the author.

OBSCENITY IN LITERATURE.—In Great Britain the year 1953 saw a considerable increase in the number of seizures, by the police, of books judged to be obscene. Almost invariably the books thus seized were of a palpably pornographic nature, professing no claims to be regarded as serious literature. A case of a different kind was the action brought in September, 1953, by the Douglas, Isle of Man, police against Boots Cash Chemists (Lancashire) Ltd., a company operating one of the great lending library systems, and of the highest repute, on two charges of unlawfully keeping an obscene book for hire. In his reserved judgment, the High Bailiff stated that he had come to the conclusion that the two books concerned in the case were obscene publications within the meaning of the Isle of Man Obscene Publications and Indecent Advertisements Act, 1907. He had come to this conclusion with reluctance, because he was satisfied that the defendant company had acted in perfectly good faith throughout, and had no improper motive in hiring out the two books which were not, in his opinion, more obscene than many of the well-known books written today by distinguished authors. For these reasons the fine imposed was a nominal one of £1 and costs in each case.

BOOKS PUBLISHED

Among the books published between October, 1952, and September, 1953, were the following:

Biography

"Stanley Baldwin," by G. M. Young; "Witness," by Whittaker Chambers; "Winston Churchill," by Virginia Cowles; "My Political Life, Vol. I," by L. S. Amery; "Jan Christian Smuts," by J. C. Smuts; "Hitler," by Alan Bullock; "Henry James: The Untried Years, 1843-1870," by Leon Edel; "The Hoover Memoirs, 1920-1935," by "The Holmes-Laski Letters," edited by de Wolfe Howe; "Aneurin Bevan," by Vincent Brome; "Bernard Shaw and Mrs. Patrick Campbell: Their Correspondence," edited by Alan Dent; "Born to Believe," by Lord Pakenham; "Carson," by H. Montgomery Hyde; "Lincoln the President, Vol. III," by J. G. Randall; "Call Back Yesterday: Memoirs, 1887-1931," by Hugh Dalton; "Ernest Bevin," by Francis Williams; "Harold Laski," by Kingsley Martin; "Newman's Way," by Sean O'Faolain; "The Flagstad Manuscript," by Lella, The Life of George Sand," by André Maurois; "Mary II, Queen of England," by Hester W. Chapman; "Recollections of André Gide," by Roger Martin du Gard; "The Story of Axel Munthe," by Gustaf Munthe and Gudrun Uexkull; "Thomas Bewick," by Montague Weekley; "Thomas Carlyle: Letters to his Wife," edited by Trudy Bliss; "The Weeping and the Laughter," by J. MacLaren-Ross; "The Ruling Few," by Sir David Kelly; "The Finish," by Sir Alfred Munnings; "More For Timothy," by Victor Gollancz; "Sir James Jeans," by E. A. Milne; "Ugo Foscolo: An Italian in Regency England," by E. R. Vincent; "Robert Browning," by Betty Miller; "Return Passage," by Violet Markham; "Living Dangerously," by F. Spencer Chapman; "In the Castle of My Skin," by George Lamming; "An Exile in Soho," by Mrs. Robert

Henrey; "The Glitter and the Gold," by Consuelo Vanderbilt Balsan; "Doctor at Sea," by Richard Gordon; "My Life's History," by Grandma Moses.

Fiction

"Requiem for a Nun," by William Faulkner; "The Dwarf," by Par Lagerkvist; "Too Late the Phalarope," by Alan Paton; "East of Eden," by John Steinbeck; "Love Among the Ruins," by Evelyn Waugh; "The Echoing Grove," by Rosamond Lehmann; "In the Wet," by Nevill Shute; "Esther Costello," by Nicholas Monsarrat; "Sunday Creditors," by Nigel Balchin; "Giant," by Edna Ferber; "The Groves of Academe," by Mary MacCarthy; "The Heart is a Lonely Hunter," by Carson McCullers; "The Easter Party," by V. Sackville-West; "Collected Stories," by Osbert Sitwell; "Calypso," by Humphrey Slater; "The Nature of Love," by H. E. Bates; "The Present and the Past," by Ivy Compton-Burnett; "Madame de," by Louise de Vilmorin; "The Loved and the Unloved," by François Mauriac; "The Hill of Howth," by L. A. G. Strong; "The High and the Mighty," by Ernest K. Gann; "Salvation," by Scholem Asch; "A Stranger Came to the Farm," by Mika Waltari; "The Secret Stream," by Marcel Aymé; "Satan in the Suburbs," by Bertrand Russell; "Desfrée," by Annemarie Selinko; "The Mustard Seed," by Vicki Baum; "Larry Vincent," by Frances Parkinson Keyes; "The Silver Chalice," by Thomas B. Costain; "The Retreat," by P. H. Newby; "Man on the Tightrope," by Neil Paterson; "His Brother's Keeper," by Eden Phillips; "For Esme—With Love and Squalor," by J. D. Salinger; "Daughter of the House," by Edith de Bora; "The Blue Hussar," by Roger Nimier; "Like Men Betrayed," by John Mortimer; "Epitaph of a Small Winner," by Machado de Assis; "Blanket Boy's Moon," by Peter Lanham and A. S. Mopeli-Paulus; "The Sea Shall Not Have Them," by John Harris; "The Chalice and the Sword," by Ernest Raymond; "The Fair Bride," by Bruce Marshall; "The Garden to the Sea," by Philip Toynbee; "Snowflake," by Paul Gallico; "The Sojourner," by Marjorie Kinnan Rawlings; "The Schirmer Inheritance," by Eric Ambler; "Kingfishers Catch Fire," by Rumer Godden; "Digby," by David Walker; "The Curve and the Tusk," by Stuart Cloete; "The Crest of the Broken Wave," by James Barke; "The Cardboard Crown," by Martin Boyd; "Westward the Sun," by Geoffrey Cotterell; "To the Devil—A Daughter," by Dennis Wheatley; "A Stranger Here," by Robert Henriques; "Surface," by Alexander Fullerton; "Jubilee Trail," by Gwen Bristow.

History, Politics and World Affairs

"Elizabeth I and her Parliaments," by J. E. Neale; "The Speeches of Adlai E. Stevenson," by "Russia After Stalin," by Isaac Deutscher; "The Life and Death of Stalin," by Louis Fischer; "Principia Politica," by Leonard Woolf; "The War on World Poverty," by Harold Wilson; "Struggle for Africa," by Vernon Bartlett; "The Strange Case of Alger Hiss," by Lord Jowitt; "European Communism," by Franz Borkenau; "The Bolshevik Revolution: 1917-1923. Vol. III," by E. H. Carr; "Daybreak in China," by Basil Davidson; "Documents on British Foreign Policy, 1919-1939," edited by Woodward and Butler; "Freedom: A New Analysis," by Maurice Cranston; "Tito Speaks," by Vladimir Dedijer; "We Too Can Prosper," by Graham Hutton; "Westward the Course of Empire," by Bernard De Voto; "Prophecy of Famine," by H. J. Massingham and Edward Hyams; "Journey to the Far Pacific," by Thomas E. Dewey; "Britain's Economic Problem," by C. A. R. Crosland.

Literature, Criticism, Poetry

"The Nonesuch Shakespeare"; Fuller's "Worthies of England," edited by John Freeman; "The Oxford Book of English Talk"; "Private View," by Walter de la Mare; "Memories," by Desmond MacCarthy; "The Vagrant Mood," by W. Somerset Maugham; "The Modern Writer and His World," by G. S. Fraser; "Ideas and Places," by Cyril Connolly; "The True Voice of Feeling: Studied in English Romantic Poetry," by Herbert Read; "Selected Poems," by Wallace Stevens; "New Poems, 1953," a P.E.N. Anthology; "Images of Tomorrow," edited by John Heath-Stubbs; "Fables," by Jacquetta Hawkes; "Emile Zola," by F. W. J. Hemmings; "Edward Lear's Indian Journal"; "The Denton Welch Journals."

Religion and Philosophy

"A Catholic Commentary on Holy Scripture"; "Interpretation of the Fourth Gospel," by C. H. Dodd; "Eclipse of God," by Martin Buber; "Tragedy is not Enough," by Karl Jaspers; "Science and Religion," by C. E. Raven; "Early Christian Fathers," ed. Richardson; "Zwingli and Bullinger," ed. Bromiley; "Advocates of Reform," ed. Spinka; "Letter to a Priest," by Simone Weil.

Travel and Adventure

"The Story of Everest," by W. H. Murray; "Seven Years in Tibet," by Heinrich Harrer; "The Silent World," by J. Y. Cousteau; "Shark-O!" by P. FitzGerald-O'Connor; "A Year of Space," by Eric Linklater; "Under the Red Sea," by Hans Hass; "The Undersea Adventure," by Philippe Diolé; "Nepal Himalaya," by H. W. Tilman; "Arctic Solitudes," by Admiral Lord Mountbatten; "Annapurna," by Maurice Herzog; "Bandoola," by J. H. Williams; "Jungle Green," by Arthur Campbell; "Inuk," by Roger Bullard; "Exploration Fawcett," by Brian Fawcett; "Coming Down the Seine," by Robert Gibbings; "Blind White Fish in Persia," by Anthony Smith.

The War

"The Rommel Papers," edited by Liddell Hart; "One of our Submarines," by Edward Young; "The Escapers," edited by Eric Williams; "Boldness be my Friend," by Richard B. Pape; "Cover of Darkness," by Roderick Chisholm; "Escape or Die," by Paul Brickhill; "London Calling North Pole," by H. J. Giskes; "The Man Who Never Was," by Ewen Montagu; "They Have Their Exits," by Airey Neave; "Unbroken: The Story of a Submarine," by Alistair Mars; "Under the Sea-Wind," by Rachel L. Carson; "A Country of Memorable Honour," by Thomas Firbank; "Now Thrive the Armourers," by Robert O. Holles.

Miscellaneous

"The Royal Philatelic Collection"; "A Book of Beauty," by John Hadfield; "William Blake's Jerusalem," "The History of the Coronation," by Lawrence E. Tanner; "The Mint," by Sir John Craig; "The Overloaded Ark," by Gerald Durrell; "Pooh Pilot," by A. P. Herbert; "Picture," by Lillian Ross; "The Living Brain," by W. Grey Walter; "Art and Architecture of India," by Benjamin Rowland; "Reflections on a Marine Venus," by Lawrence Durrell; "Prelude to Space," by Arthur C. Clarke; "Simple Heraldry," by Iain Moncrieffe and Don Pottinger; "Michelangelo," by L. Goldschneider; "Mr. Tompkins Learns the Facts of Life," by George Gamow; "Rome and a Villa," by Eleanor Clark; "Movable Feasts," by Arnold Palmer; "Painting in Britain, 1530-1790," by Ellis K. Waterhouse; "Chambers' Twentieth Century Dictionary"; "Elizabeth Our Queen," by Richard Dimbleby.

Principal Book Publishers and Their Addresses

More than 3,700 firms, individuals and societies have published one or more books in recent years. The list which follows is a selective one comprising, in the main, those firms whose names are most familiar to the general public. An interleaved list containing over 2,000 names and addresses is available, price 4s. od. post free, from the publishers of "Whitaker."

- Aberdeen University Press, Aberdeen.
 Allan (Ian), Craven House, Hampton Court, Mddx.
 Allen (W. H.), 43 Essex St., W.C.2.
 Allen & Unwin, 40 Museum St., W.C.1.
 Allenson & Co., 5 Wardrobe Place, E.C.4
 Allman & Son, 17 Creechburg Lane, E.C.3
 Amalgamated Press, Fleetway House, E.C.4
 Architectural Press, 9 Queen Anne's Gate, S.W.1.
 Arnold (E.), & Co., 41 Maddox St., W.1.
 Arnold (E. J.) & Son, Butterley St., Leeds.
 Arrowsmith, Quay St., Bristol
 Art & Technics, 58 Frith St., W.1.
 Avalon Press, 20 Headfort Place, S.W.1.
 Bagster (S.), 80 Wigmore St., W.1.
 Baillière, Tindall & Cox, 8 Henrietta St., W.C.1.
 Barker (Arthur), 30 Museum St., W.C.1.
 Barrie (James), 3 Clement's Inn, W.C.2.
 Bartholomew & Son, 12 Duncan St., Edinburgh.
 Batchworth Press, 54 Bloomsbury St., W.C.1.
 Batsford, 4 Fitzhardinge St., Portman Square, W.1.
 Bell (Geo.) & Sons, 6 Portugal St., W.C.2
 Benn (Ernest), 154 Fleet St., E.C.4.
 Black (A. & C.), 4 Soho Sq., W.1.
 Blackie, Glasgow, and 16 William IV St., W.C.2.
 Blackwell (Basil), 49 Broad St., Oxford.
 Blackwood, Edinburgh, and 1-8 Bateman's Bldgs., W.1.
 Blandford Press, 16 West Central St., W.C.1.
 Bles (Geoffrey), 52 Doughty St., W.C.1

BOOK PRODUCTION AND BOOK EXPORTS

Figures Issued by The Publishers' Association (based on information supplied to its Chartered Accountants by individual publishers) show a marked increase in book exports since the outbreak of war in 1939. The Totals for the years 1941 to 1952 are shown below:—

Year	Total value of Books produced in U.K.	Total value of Books exported from U.K.	Year	Total value of Books produced in U.K.	Total value of Books exported from U.K.
1941.....	£13,986,700	£3,983,900	1947.....	£30,203,763	£7,412,905
1942.....	10,735,900	3,608,700	1948.....	33,241,431	8,739,236
1943.....	19,290,800	4,469,600	1949.....	34,297,255	9,798,838
1944.....	20,500,516	4,895,349	1950.....	37,158,652	11,394,220
1945.....	21,979,584	5,139,222	1951.....	41,553,760	13,740,323
1946.....	26,961,622	6,715,212	1952.....	42,790,387	14,482,036

BOOKS PUBLISHED IN GREAT BRITAIN IN 1952

This Table, from *The Bookseller* of January 3, 1953, shows the books published in 1952 with the number of new editions, translations and limited editions.

Books and pamphlets priced at less than 6d. have been omitted, as are also all Government publications except the more important issued by H.M. Stationery Office.

COPYRIGHT

The Government Department dealing with Literary and artistic Copyright is the *Industrial Property Department, Board of Trade*, 25 Southampton Bldgs., London, W.C.2.

The law of copyright is contained in the Copyright Act, 1911, under which copyright subsists automatically, without registration, in every original literary, dramatic, musical and artistic work. Libraries entitled to receive free copies of books published in the United Kingdom, are the British Museum, the Bodleian Library, Oxford, University Library, Cambridge, the National Library of Wales, the National Library of Scotland and Trinity College, Dublin.

Voluntary Registration at Stationers' Hall.—Compulsory registration at Stationers' Hall terminated on Dec. 31, 1923, but in the following year the Stationers' Company established a *new Register* in which Books and Fine Arts can be registered. A copy has to be filed at Stationers' Hall and certified copies of the entries are issued, the fees being 6s. for a Book, or a Fine Art; certified copies 6s. in either case. The fee for a search is 3s. Such entries are of value in proving the existence of a work on a given date in the case of infringement.

Address, The Registrar, Stationers' Hall, E.C.4.

MUSIC AND OPERA OF 1952-53

(1952) **Oct. 1.** Signor Toscanini gave the second of two concerts (his last appearance in London before his retirement) in the Festival Hall, conducting the Philharmonia Orchestra in Brahms' third and fourth Symphonies and St. Anthony Variations. **11 and 12.** Concerts at Dorking and at the Royal Festival Hall of works by Dr. Vaughan Williams to celebrate the composer's eightieth birthday. **15.** B.B.C. Orchestra, conducted by Sir Malcolm Sargent, began its winter session of public concerts at the Festival Hall. **19 and 20.** Concerts at the Festival Hall by the Munich Philharmonic Orchestra conducted by Fritz Rieger, in the course of a tour of Great Britain and France. **22.** The first of the Royal Philharmonic Society's concerts of its 142nd season, conducted by Sir Thomas Beecham, included the late Frederic Austin's overture, *The Sea Ventures*, performed in memory of the composer. **23.** Covent Garden Opera Season began with new production of Verdi's *A Masked Ball*, with English text by Prof. E. J. Dent, conducted by John Pritchard, who made his first appearance as a conductor at Covent Garden. Other conductors during the season were Sir John Barbiroli, Vittorio Gui, Issay Dobrowen of La Scala, Milan and the Royal Opera House, Stockholm, Vilem Tausky and Peter Gellhorn.

Nov. 9. The new recital room at the Festival Hall opened with a concert of eighteenth-century music given by the London Harpsichord Ensemble. The room, which is intended for recitals to comparatively small audiences, holds just over 200 people. **16.** The Scarlatti Orchestra from Naples, under Franco Caracciolo, gave a concert in the Festival Hall. **17.** The Vienna Philharmonic Orchestra, conducted by Clemens Krauss, gave the first of a series of concerts at the Albert Hall. **19.** A new tone-poem, *Lord Byron*, by Richard Arnell, performed by the Royal Philharmonic Orchestra. **24.** Annual St. Cecilia's Day festival service held at St. Sepulchre, Holborn, when anthems representing every period of English Church music were sung, ending with one specially composed for the occasion by Sir George Dyson. Three motets by Stanford were given to mark the centenary year of his birth. In the evening, the Queen and the Duke of Edinburgh attended the St. Cecilia Concert at the Festival Hall, when works by Elgar, Arne, Vaughan Williams and the Canadian composer, Dr. Healey Willan, were heard. **Nov. 3-Dec. 11.** Dame Myra Hess played each of Beethoven's five piano concertos in turn at the Festival Hall, with Sir Adrian Boult and the London Philharmonic Orchestra.

Dec. 8. The London Symphony Orchestra devoted its concert at the Festival Hall to the music of Sibelius on his eighty-seventh birthday.

(1953) **Jan. 5.** Stravinsky's opera, *The Rake's Progress*, composed to an English text by W. H. Auden and Chester Kallman, first performed at Vienna in 1951, was heard for the first time in this country in an adaptation for broadcasting in the B.B.C. Third Programme. **14.** Dr. Vaughan Williams' new symphony in five movements, *Sinfonia Antartica*, performed for the first time at the Free Trade Hall, Manchester, by the Hallé Orchestra under Sir John Barbiroli. The work is derived from the music written by the composer for the film *Scott of the Antarctic*. It received its first London performance at the Festival Hall on Jan. 21. **23.** To celebrate the tenth anniversary of its foundation the London Baroque Ensemble, well known for its work in smaller halls, and for gramophone records of its performances, appeared for the first time at the Festival Hall, including in its pro-

gramme Richard Strauss' Symphony for 26 wind instruments, heard for the first time in this country. **26.** The Collegium Musicum Italicum, on a visit to this country, gave a performance under its conductor, Renato Fasano, at the Festival Hall, largely of Italian 18th-century music.

Feb. 12-14. London Philharmonic Orchestra made a tour of the west under the auspices of the Western Symphony Concerts Committee, and gave concerts, including special ones for children, at Exeter, Plymouth and Truro. **14.** Covent Garden Opera Season ended with a performance of *Aida* under Sir John Barbiroli. On **Feb. 16** the full company started its provincial tour at Cardiff, subsequently visiting Edinburgh, Glasgow, Liverpool and Manchester. **23.** William Alwyn's first symphony well received at its first performance in London by the London Symphony Orchestra under Sir John Barbiroli at the Festival Hall.

March 5. Fernando Previtali, conductor of the Rome Radio Orchestra, conducted the London Symphony Orchestra at the Festival Hall. **12.** First performance in this country of Heinrich Sutermeister's opera, *Romeo and Juliet*, given by the Sadler's Wells Opera Company. **16.** L'Orchestre National de la Radiodiffusion-Télévision Française played at the Festival Hall in a programme which, with one exception, was all-French. **18.** The tercentenary of Corelli marked by a performance by the Royal Philharmonic Orchestra of his Concerto Grosso in F, conducted by Vittorio Gui.

April 3. Annual Good Friday complete performance of *The Messiah* by the Royal Choral Society at the Albert Hall. Walter Susskind conducted the B.B.C. Chorus and the Royal Philharmonic Orchestra at the Festival Hall in Haydn's *Seven Last Words* (broadcast for the first time in this country). **5.** Bach's *Easter Cantata*, broadcast by the Royal Philharmonic Orchestra from a special Easter Concert at Glyndebourne, conducted by John Pritchard, with Peter Pears and Elizabeth Schwarzkopf among the soloists. **20.** Covent Garden Opera Company's opera season opened at the Royal Opera House with Puccini's *Turandot*, conducted by Sir John Barbiroli, with James Johnston and Gertrude Grob-Prandl. **22.** Dr. Wilhelm Furtwängler, paying his first visit to London since 1948, conducted the Berlin Philharmonic Orchestra at the Albert Hall in a programme of Wagner, Brahms, Richard Strauss and Bach. **28.** Concert in memory of the late Dr. E. H. Fellowes at the Goldsmiths' Hall, when music from his editions of Elizabethan and Jacobean composers was given.

May 2. Season of Italian opera, with 60 Italian artists, opened at the Stoll Theatre. The operas performed were predominantly those of Verdi. **4.** At the New Theatre, Oxford, Delius' opera, *Ismele*, written in the early years of the century, produced for the first time, under the auspices of Sir Thomas Beecham. **5.** Sadler's Wells Opera Company opened its London Season with performances of Mozart's *Così fan Tutte*. **22.** Bi-centenary of the birth of Viotti commemorated by Yehudi Menuhin with a performance of the composer's violin concerto in A minor with the Boyd Neel Orchestra at the Festival Hall. **22-25.** Four special concerts by the Bournemouth Municipal Orchestra to celebrate its Diamond Jubilee. At the last concert Malcolm Arnold's Symphony No. 2, specially commissioned for the occasion, was performed.

June 1. Coronation Eve Concert at the Festival Hall with a performance of 10 songs commissioned by the Arts Council from 10 specially written poems. The composers represented included Vaughan Williams, Ireland, Rubbra, Bliss, Finzi,

Howells and Rawsthorne. The B.B.C. broadcast a production specially recorded by Radio Italiana of Rossini's opera *Elisabetta Regina d'Inghilterra*, a work written in 1875, and which was thought to have been heard only once in this country—in 1818.

June 2. *The Coronation.* The music for the Coronation Service combined much of the traditional Coronation music (including Handel's *Zadok the Priest*, written for the Coronation of George II and sung at every subsequent Coronation, Parry's *I was Glad*, introduced at Edward VII's Coronation and Stanford's *Gloria*, first sung at the Coronation of George V) with six new works. These were the *Introit* by Dr. Howells, the *Gradual* by Dr. W. H. Harris, the *anthem* at the *Crowning* by Sir George Dyson, the *Creed* and the *Sanctus* by Vaughan Williams, a *Homage Anthem* by Dr. Healey Willan and the *Te Deum* by Sir William Walton. In addition, a new march by Sir William Walton and a *Processional* by Sir Arthur Bliss were played before the Service. Dr. Gordon Jacob prepared a new setting of the *National Anthem*, and the late Sir Arnold Bax composed a *Coronation March*, played at the end of the Service. Works by early English composers, including Gibbons and Byrd, were also heard during the Service. The choir of 400 voices, under Sir William McKie, director of music for the Service, assisted by Dr. W. H. Harris and Dr. John Dykes Bower, included the complete choirs of Westminster Abbey, the Chapels Royal, St. Paul's Cathedral and St. George's Chapel, Windsor, with representatives of other choirs. The orchestra of 60 included the leaders of 18 of the principal orchestras in the country. Its leader was Mr. Paul Beard. The organ-playing was shared by Dr. O. H. Peasgood, Dr. H. G. Ley and Mr. W. H. Gabb. The orchestra played a programme before the service, and for a short time after it, under the direction of Sir Adrian Boult.

7. The Glyndebourne Opera Season opened with a performance of Gluck's *Alceste*, conducted by Vittorio Gui, with settings specially designed by Sir Hugh Casson. Since the previous season the proscenium and stage of Glyndebourne Opera House had been widened and other structural alterations made. The first Festival of St. Ives, Cornwall, opened with a concert of early choral music in the Parish Church.

7-14. The Cheltenham Festival, including four concerts by the Hallé Orchestra (conducted on three occasions by Sir John Barbiroli and on the fourth by Sir Adrian Boult) and a service at which the Three Choirs of Gloucester, Hereford and Worcester sang.

8. Gala performance, at Covent Garden, in the presence of the Queen of Benjamin Britten's new opera, *Gloriana*, specially written for the Coronation, conducted by John Pritchard, with Peter Pears, Joan Cross, Jennifer Vyvyan, Adele Leigh and Monica Sinclair in the cast.

9. Jascha Heifetz, in a short visit to this country, gave the first of two concerts at the Festival Hall.

17. Kirsten Flagstad, the Norwegian singer, gave a farewell recital in London before her retirement.

26. The twentieth anniversary of the Boyd Neel Orchestra celebrated with a concert at the Festival Hall, with a programme including Mendelssohn's *Symphony No. 9 in C*, not previously heard at a London concert, and a new oboe concerto written by Malcolm Arnold for Leon Goossens.

July 11. The Covent Garden Opera Season ended with a final performance of Britten's *Gloriana*. Opening of the Taw and Torridge Festival with three centres, at Bideford, Barnstaple and Ilfracombe. Among the musical features of the Festival were presentations of Benjamin Britten's version of *The Beggar's Opera* and his own *Let's Make an Opera*.

26. Fifty-ninth season of the Henry Wood Promenade Concerts opened at the Albert Hall. The programme consisted of Elgar's *Cockaigne Overture*,

Vaughan Williams' *London Symphony*, Walton's new *Coronation March*, Rossini's *La Boutique Fantasque* and Rachmaninov's *Second Piano Concerto*, with Moiseiwitsch as soloist. Sir Malcolm Sargent was the conductor.

26-31. The Kings' Lynn Festival included an operatic recital by Peter Pears and Jennifer Vyvyan with Benjamin Britten at the piano, and two choral concerts, one by the Netherlands Chamber Choir and the other by the B.B.C. Chorus, which sang Haydn's "Nelson" Mass.

30. The Glyndebourne production of Mozart's *Seraglio*, sung in the original German, televised in its entirety.

Aug. 15. At the Promenade Concert, Larry Adler gave two works specially written for harmonica and orchestra, Vaughan Williams' *Romance* and a concerto by Arthur Benjamin.

23. Edinburgh Festival. On the evening of the opening day of the Festival, the Rome Symphony Orchestra of Radio Italiana, making its first visit to Great Britain, gave a concert conducted by Fernando Previtali. On the following night the orchestra, under Vittorio Gui, gave the first performance in this country of Ghedini's *Pezzo Concertante* for two violins and viola. Later the Vienna Philharmonic Orchestra introduced another new work to British listeners—Hindemith's symphony, *Die Harmonie der Welt*. Other orchestras which took part in the Festival were the B.B.C. Symphony Orchestra, the Philharmonia and the Scottish National Orchestra. The symphony concerts were given in the Usher Hall. In the Freemasons' Hall were concerts by the London Mozart Players, the Paganini String Quintet, the Cambridge University Madrigal Singers, the Loewengath String Quartet, the Saltire Singers, the Virtuosi di Roma, the Barylli String Quartet and the Italian Opera Quartet, and recitals by Yehudi Menuhin and Max Rostal. The Glyndebourne Opera Company presented three operas, Rossini's *La Cenerentola*, Stravinsky's *The Rake's Progress* and Mozart's *Idomeneo*.

24-29. The Hallé Orchestra, under Sir John Barbiroli, played at the Promenade Concerts for a "guest week." The orchestra had never previously appeared at the Promenades.

Sept. 6. Three Choirs Festival opened at Gloucester Cathedral, with a service at which Walton's *Coronation Te Deum* was sung. Later in the Festival Handel's *Israel in Egypt*, the second and third parts of the *Messiah*, Bach's *St. John's Passion*, Haydn's *Coronation Mass*, Elgar's *Dream of Gerontius*, Mendelssohn's *Elijah* and Monteverdi's *Magnificat*, were heard.

7. Carl Rosa Opera Company, now working in association with the Arts Council, resumed its work after an interval with a tour which began at Nottingham.

10. Herbert Howells' *A Kent Yeoman's Wooing Song*, performed for the first time at the Promenade Concert with Owen Brannigan and Elsie Morison as soloists.

15. The Bavarian State Opera from Munich, paying its first visit to this country, opened a two-week season at the Royal Opera House. Its repertoire consisted of three of Richard Strauss' operas, *Arabella*, *Liebe der Danae* and *Capriccio*, the last two of which had not previously been performed in England.

19. The Promenade Concerts season at the Albert Hall ended with much of the traditional music for the occasion; Sir Henry Wood's famous *Sea-Song Fantasia*, though absent from the programme, was played as an encore.

24. St. Paul's Cathedral Choir left England for a two months' tour of Canada and the U.S.A., during which it was to give recitals in 40 cities, including in its programme some of the music sung at the Coronation.

20-27. Festival of Music in Lichfield Cathedral, with performances by the Hallé, Birmingham Symphony and B.B.C. Midland Orchestras and the Element String Quartet.

30. Opening of the London Philharmonic Orchestra's 1953-54 season at the Festival Hall.

DRAMATIC SUMMARY, 1952-1953

THE LONDON STAGE.—Once again, the most interesting theatrical event of the year was the production of a new play from the facile pen of T. S. Eliot. His new comedy, *The Confidential Clerk*, won immediate praise when it was first seen at the Edinburgh Festival, and it was quickly brought to London, where the favourable opinion formed by critics and public across the border was at once confirmed. Otherwise, although a number of new plays enjoyed long runs, the season could scarcely be described as exceptional. A light comedy, *For Better, For Worse*, by Arthur Watkyn, drew audiences throughout the year, as did *The Mousetrap*, by Agatha Christie, and *Dear Charles*, by Alan Melville, and *The Living Room*, by Graham Greene, promised to follow suit. Other popular productions included *The Seven Year Itch*, by George Axelrod, *The Moon Is Blue*, by F. Hugh Herbert, and *Carlington, V.C.*, by Dorothy and Campbell Christie; and mention must be made of *Four Winds*, by Alex Atkinson, *Anastasia*, by Marcelle Maurette (secured for presentation in the West End immediately it had been seen on television), and *The Devil's General*, by Carl Zuckmayer. Of the many Shakespearean revivals of the year, the most notable were at the "Old Vic." —*All's Well That Ends Well* and a new version of *Hamlet*, arranged for Edinburgh.

The following is a list of productions between Oct. 1, 1952, and Sept. 30, 1953:—

ALDWYCH, Aldwych, W.C.2.—(1952) Oct. 10. *Letter From Paris*, by Dodie Smith, adapted from novel by Henry James (Messrs. Nicholas Hannen, Peter Barkworth and Nicholas Phipps and Mesdames Brenda Bruce and Maxine Audrey). Nov. 6. *Wild Horses*, by Ben Travers (Messrs. Robertson Hare and Ralph Lynn and Mesdames Ruth Maitland and Joan Haythorne). (1953) May 14. *The Seven Year Itch*, by George Axelrod (Messrs. Brian Reece and Alexander Gauge and Miss Rosemary Harris).

AMBASSADORS, West Street, W.C.2.—(1952) Nov. 4. *Murder Mistaken*, by Janet Green (Messrs. Derek Ferr and Anthony Marlowe and Mesdames Iris Hoey, Brenda de Banzie and Patricia Burke). Henry Kendall Frank Lawton and Hubert Gregg and Mesdames Viola Lyel and Marguerite Stone); at the Phoenix on June 14, *Annabella*, by Philip Broadley (Messrs. Anthony Sharp and Bryan Coleman).

THE FILMS, 1952-1953

DURING the greater part of the year, Hollywood—if not the whole film world—was as much concerned with new methods of presentation as with the quality of pictures, and while British producers in no way ignored what was called a technical revolution they were able to show a good proportion of the best films of 1953. The first full-length three dimensional film from the States to be screened in London was *Bwana Devil*, and later examples of the modern system marked a steady improvement. One drawback was that many of the 3-D films necessitated the use of special glasses by the audience. The Coronation provided the most popular of the pictures of the year, both *Elizabeth Is Queen* and *A Queen Is Crowned*, each in colour, being excellent representations of the historic ceremony, which were seen by many millions, not only in England. Among the most interesting of the other British films were *The Man Between*, *Pickwick Papers*, *Appointment in London*, *The Cruel Sea*, *Malta Story*, *The Tifflid Thunderbolt*, *Top Secret*, and *The Story of Gilbert and Sullivan*. In the year under review, Charles Chaplin's latest film, *Limelight*, had its world première in London, and pictures made in a dozen countries were on view.

Following is a list of the principal films shown publicly in London from Oct. 1, 1952, to Sept. 30, 1953:—

ACADEMY, 165 Oxford Street, W.1.—(1953) Jan. 3. *Les Jeux Interdits*, French (Georges Poujouly and Brigitte Fossey). March 27. *The Medium*, opera film (Leo Coleman, Marie Powers and Anna Maria Alberghetti). April 2. *The Magic Garden*, South African. May 1. *Two Pennyworth Of Hope*, Italian. May 15. *The Imposter*, Japanese. June 26. *Pépé Le Moko* (Jean Gabin). Sept. 4. *Moment Of Truth*, French (Walter Chiari, Jean Gabin and Michèle Morgan).

BERKELEY, 30 Tottenham Court Road, W.1.—(1952) Nov. 24. *Forbidden City*, Chinese. Dec. 12. *Gala Festival*, Russian, and *The Treasure*, Polish. (1953) Jan. 30. *The Merry Wives Of Windsor*, German version of Nicolai's opera. March 16. *La Forza Del Destino*, Italian (Tito Gobbi). April 6. *The Young Chopin*, Polish. Aug. 28. *La Belle Image*, French (Frank Villard).

CAMEO-POLYTECHNIC, Upper Regent Street, W.1.—(1952) Oct. 20. *L'Amour, Madame*, French (François Perier and Arletty). Nov. 7. *The Bride Couldn't Wait*, Italian. Dec. 11. *The Seven Deadly Sins*, Franco-Italian (Michèle Morgan). (1953) June 22. *The Loves Of Don Juan*, Spanish. Aug. 21. *The Sinner*, German (Hildegard Neff).

CARLTON, Haymarket, S.W.1.—(1952) Oct. 10. *The Happy Time* (Charles Boyer and Louis Jourdain). Oct. 24. *The Holly And The Ivy*, British

(Sir Ralph Richardson, Celia Johnson, Margaret Leighton and Margaret Halstan). Nov. 7. *The Marrying Kind* (Aldo Ray and Judy Holliday). Nov. 21. *The Four Poster* (Rex Harrison and Lili Palmer). Dec. 5. *The Road To Bali* (Bing Crosby, Bob Hope and Dorothy Lamour). Dec. 19. *Hans Christian Andersen* (Danny Kaye, Farley Granger, Joey Walsh and Jeanne Moreau). (1953) Jan. 8. *The Prisoner of Zenda* (Stewart Granger, James Mason, Louis Calhern and Deborah Kerr). March 13. *Moulin-Rouge* (José Ferrer, Colette Marchand, Suzanne Flon and Zsa-Zsa Gabor). May 15. *The Stranger Left No Card*, British (Alan Badel). May 29. *Sialag 17* (William Holden). June 12. *The Girls Of Pleasure Island* (Leo Genn). June 26. *Forever Female* (Paul Douglas, Ginger Rogers and Pat Crowley). July 23. *Anything Can Happen* (José Ferrer and Kim Hunter). Aug. 7. *By The Light Of The Silvery Moon* (Doris Day). Aug. 21. *Roman Holiday* (Gregory Peck and Audrey Hepburn). Sept. 25. *The Man Between*, British (James Mason, Ernst Schrodter, Claire Bloom and Hildegard Neff). Sept. 25. *Prince Philip*, biography.

CONTINENTAL, 36 Tottenham Court Road, W.1.—(1952) Nov. 10. *The Strange Ones*, French (Edouard Dermithe and Nicole Stéphane). (1953) Feb. 2. *Wozzeck*, German (Kurt Meisel). Feb. 17. *The Little World of Don Camillo*, Franco-Italian. May 15. *Snake Of Death*, French (Henri Vidal). July 10. *Sadko*, Soviet.

CURZON, Curzon Street, W.1.—(1952) Oct. 10. *Kon-Tiki*, film of Pacific Ocean voyage, and *Strangers In The House*, French (Raimu). (1953) Jan. 30. *Dr. Knock*, French (Louis Jouvet). Feb. 19. *The Virtuous Isidore*, French (Bourvil). March 5. *One Summer Of Happiness*, Swedish (Folke Sundquist and Ulla Jacobsson). April 17. *Diary Of A Country Priest*, French (Claude Laydu and André Guibert). May 21. *Adorable Creatures*, French (Daniel Gelin, Danielle Darrieux and Edwige Feuillère).

EMPIRE, Leicester Square, W.C.2.—(1952) Oct. 3. *Pat And Mike* (Spencer Tracy and Katharine Hepburn). Oct. 17. *The Merry Widow* (Fernando Lamas and Lana Turner). Oct. 27. *Because You're Mine*, Royal Film Performance (Mario Lanza, Paula Corday and Doretta Morrow). Nov. 21. *Top Secret*, British (George Cole, Oscar Homolka and Nadia Gray). Dec. 5. *Everything I Have Is Yours* (Gower and Marge Champion). Dec. 12. *My Man And I* (Ricardo Montalban and Shelley Winters). Dec. 29. *The One-Piece Bathing Suit* (Walter Pidgeon and Esther Williams). (1953) Jan. 30. *Time Bomb*, British (Glenn Ford, Maurice Denham and Harold Warrender) and *Jeopardy* (Benny Sullivan and Barbara Stanwyck). Feb. 5. *Plymouth Adventure* (Spencer Tracy, Leo Genn, Van Johnson and Gene Tierney). Feb. 19. *Above And Beyond* (Robert Taylor and Eleanor Parker). March 5. *The Bad And The Beautiful* (Kirk Douglas, Dick Powell and Lana Turner). March 19. *Never Let Me Go*, British (Clark Gable, Richard Haydn, Bernard Miles and Gene Tierney). April 30. *Sea Devils* (Rock Hudson and Yvonne de Carlo). May 7. *Battle Circus* (Humphrey Bogart and June Allyson). May 14. *The Oracle*, British (Joseph Tomelty, Gilbert Harding, Robert Beattie and Virginia McKenna). May 21. *Young Bess* (Stewart Granger, Charles Laughton, Jean Simmons and Deborah Kerr). June 5. *Elizabeth Is Queen*, colour film of the Coronation. June 26. *The Story Of Three Loves* (Kirk Douglas, James Mason, Pier Angeli and Moira Shearer). July 9. *Innocents In Paris*, British (Alastair Sim, Jimmy Edwards, Ronald Shiner, Margaret Rutherford and Claire Bloom). July 23. *Lili* (Jean Pierre Aumont, Mel Ferrer, Leslie Caron and Zsa-Zsa

Gabor). Aug. 13. *The Red Beret* (Alan Ladd, Leo Genn, Harry Andrews and Susan Stephens).

GAUMONT, Haymarket, S.W.1.—(1952) Oct. 3. *Monkey Business* (Cary Grant and Ginger Rogers). Nov. 14. *Pickwick Papers*, British (James Hayter, Nigel Patrick, Harry Fowler, George Robey, Donald Wolfitt, Kathleen Harrison, Hermione Gingold and Hermione Baddeley). Dec. 5. *The Steel Trap* (Joseph Cotten). Dec. 26. *The Man Who Watched Trains Go By*, British (Marius Goring and Claude Rains). (1953) Feb. 5. *Blackbeard The Pirate* (Robert Newton and Linda Darnell). March 19. *Desperate Moment*, British (Dirk Bogarde and Mai Zetterling). April 30. *Go To Mars* (Abbott and Costello). July 2. *The Square Ring*, British (Jack Warner, George Rose, Robert Beatty and Bill Owen). July 23. *Call Me Madam* (Donald O'Connor, Ethel Merman and Vera-Ellen). Sept. 3. *The Sword And The Rose*, British (James Robertson Justice, Richard Todd and Glynnis Johns). Sept. 25. *Is Your Honeymoon Really Necessary?* British (David Tomlinson, Bonar Colleano, Diana Dors and Diana Decker).

LEICESTER SQUARE, Leicester Square, W.C.2.—Oct. 10. *Venetian Bird*, British (Richard Todd and Eva Bartok). Oct. 30. *It Started In Paradise*, British (Ronald Squire and Jane Hylton). Nov. 21. *The Snows Of Kilimanjaro* (Gregory Peck, Ava Gardner, Hildegard Neff and Susan Hayward). (1953) Jan. 22. *The Long Memory*, British (John Mills, John McCallum, John Slater, Eva Bergh and Elizabeth Sellars). Feb. 12. *Royal Heritage*, British and *Appointment In London*, British (Dirk Bogarde, Ian Hunter and Dinah Sheridan). March 5. *The Titled Thunderbolt*, British technicolour (Stanley Holloway, Godfrey Tearle, George Relph and Gabrielle Brune). March 26. *The Cruel Sea*, British (Jack Hawkins, Donald Sinden, Denholm Elliott, Virginia McKenna, Moira Lister and Megs Jenkins). April 17. *Peter Pan*, cartoon version by Walt Disney. May 27. *Genevieve*, British (John Gregson, Kenneth More, Dinah Sheridan and Kay Kendall). June 18. *Titanic* (Clifton Webb, Brian Aherne, Edmund Purdom and Barbara Stanwyck). July 9. *MacDonald Of The Canadian Mounties* (Tyrone Power and Thomas Gomez). July 30. *Dangerous Crossing* (Michael Rennie and Jeanne Crain) and *Powder River* (Cameron Mitchell and Corinne Calvet). Aug. 21. *Let's Do It Again* (Ray Milland and Jane Wyman). Sept. 11. *Laughing Anne*, British (Wendell Cory, Forest Tucker, Ronald Shiner and Margaret Lockwood).

LONDON PAVILION, Piccadilly, W.1.—(1952) Nov. 3. *The Big Sky* (Kirk Douglas). Nov. 14. *The Thief* (Ray Milland). Dec. 5. *The Narrow Margin* (Charles McGraw and Marie Windsor) and *A Girl In Every Port*. (1953) Jan. 16. *Ruby Gentry* (Jennifer Jones). Feb. 5. *Cash Boy*, British (James Kenney). Feb. 19. *The Ring*. March 5. *Hangman's Knot* (Randolph Scott). April 10. *The Final Test*, British (Jack Warner, Robert Morley, Ray Jackson, Adrienne Allen and Brenda Bruce). April 30. *The Lusty Men* (Robert Mitchum and Susan Hayward). May 7. *The Man Behind The Gun* (Randolph Scott). July 9. *Cruisin' Down The River* (Dick Haymes and Billy Daniels). Aug. 6. *The Glass Wall* (Vittorio Gassman and Gloria Grahame). Aug. 21. *The Beast From 20,000 Fathoms*.

MARBLE ARCH PAVILION, Marble Arch, W.1.—(1952) Oct. 2. *Anna*, Italian (Silvano Manganò). Oct. 30. *The Devil Is A Woman*, Mexican. (1953) Jan. 2. *Cops And Robbers*, Italian (Aldo Fabrizi and

Toto). Jan. 23. *Maclovía*, Mexican. Feb. 5. *Night Is My Kingdom*, French (Jean Gabin). April 9. *Battle Of Stalingrad*, Russian. June 26. *Vienna Waltzes* (Anton Walbrook). July 3. *Intimate Relations*, British (Harold Warrender, Russell Enoch and Ely Albin).

METROPOLE, 160 Victoria Street, S.W.1.—(1953) July 2. *Split Second* (Stephen McNally and Paul Kelly) and *Beautiful But Dangerous* (Robert Mitchum and Jean Simmons).

NEW GALLERY, 123 Regent Street, W.1.—(1952) Oct. 20. *La Cage Aux Filles*, French (Daniele Delorme). Nov. 7. *Devotion*, Italian (Columba Dominguez). Nov. 21. *Miracle In Milan*, Italian. (1953). Feb. 19. *Three Forbidden Stories*, Italian. April 9. *Infidelity*, Italian. Aug. 22. *One Enchanted Evening*, German. Aug. 29. *The Story of Doctor Louise*, French. Sept. 5. *Bellissima*, Italian (Anna Magnani).

ODEON, Leicester Square, W.C.2.—(1952) Oct. 16. *Limelight*, world première (Charles Chaplin, Buster Keaton, Sydney Chaplin, Nigel Bruce and Claire Bloom). (1953) Jan. 9. *My Cousin Rachel* (Richard Burton and Olivia de Havilland). Jan. 30. *The Net*, British (James Donald, Robert Beatty and Phyllis Calvert). Feb. 19. *Rough Shoot*, British (Joel McCrea, Herbert Lom, Marius Goring and Evelyn Keyes). March 12. *Street Corner*, British (Terence Morgan, Michael Medwin, Peggy Cummins, Anne Crawford, Thora Hird, Dora Bryan, Eleanor Summerfield, Rosamund John and Barbara Murray). April 2. *Grand National Night*, British (Nigel Patrick and Moira Lister). April 23. *The Desert Rats* (Richard Burton, Robert Newton and James Mason). May 15. *To-night We Sing* (David Wayne, Ezio Pinza and Tamara Toumanova). June 5. *A Queen Is Crowned*, colour film of the Coronation. June 25. *Malta Story*, British (Alec Guinness, Anthony Steel, Jack Hawkins, Renee Asherson, Muriel Pavlow and Flora Robson). July 16. *Salome* (Stewart Granger, Alan Badel, Charles Laughton, Basil Sydney and Rita Hayworth). Aug. 29. *Melba* (Alec Clunes, Robert Morley, Patrice Munsel and Martita Hunt). Sept. 18. *Return To Paradise* (Gary Cooper and Barry Jones).

ODEON, Marble Arch, W.1.—(1952) Oct. 3. *Full House*, founded on five O. Henry stories. Oct. 24. *The Gentle Gunman*, British (John Mills, Dirk Bogarde and Robert Beatty). Nov. 14. *Made In Heaven*, British (David Tomlinson, A. E. Matthews, Paula Clark, Sonja Ziemann and Athene Seyler). Dec. 5. *Folly To Be Wise*, British (Alastair Sim, Edward Chapman, Roland Calver, Colin Gordon, Martita Hunt and Elizabeth Allen). Dec. 26. *Marching Along* (Clifton Webb). (1953) Jan. 16. *Decameron Nights* (Sir Godfrey Tearle, Louis Jourdain and Joan Fontaine). Feb. 26. *The Star* (Bette Davis). March 20. *Bwana Devil*, first full-length coloured three-dimensional film shown in England (Robert Stack, Nigel Bruce and Barbara Britton). April 30. *Turn The Key Softly*, British (Terence Morgan, Yvonne Mitchell, Kathleen Harrison and Joan Collins). May 21. *Man On A Tightrope* (Fredric March, Adolphe Menjou and Gloria Grahame). June 12. *Single-Handed*, British (Jeffrey Hunter and Michael Rennie). July 23. *Way Of A Gaucho* (Rory Calhoun and Gene Tierney). Aug. 23. *Always A Bride*, British (Ronald Squire,

Terence Morgan, James Hayter, Marie Löhr and Peggy Cummins). Sept. 4. *White Witch Doctor* (Robert Mitchum and Susan Hayward). Sept. 25. *Inferno* (Robert Ryan).

PLAZA, Piccadilly Circus, W.1.—(1952) Oct. 20. *The Turning Point* (William Holden and Alexis Smith). Oct. 30. *Trent's Last Case*, British (Orson Welles, John McCallum, Michael Wilding and Margaret Lockwood). Nov. 21. *Somebody Loves Me* (Ralph Meeker and Betty Hutton). Dec. 26. *Botany Bay* (James Mason, Alan Ladd, Sir Cedric Hardwicke and Patricia Medina). (1953) Jan. 16. *Women of Twilight*, British (Freda Jackson, Rene Ray and Dora Bryan). Feb. 5. *Military Policemen* (Bob Hope and Mickey Rooney). March 5. *Come Back, Little Sheba* (Burt Lancaster and Shirley Brook). March 19. *The Stars Are Singing* (Lauritz Melchior and Anna Maria Albergheiti). April 3. *The War Of The Worlds* (Gene Barry and Ann Robinson). April 23. *Niagara* (Joseph Cotten and Marilyn Monroe). May 8. *The Story Of Gilbert And Sullivan*, British (Robert Morley, Maurice Evans, Martyn Green, Peter Finch and Eileen Herlie). June 12. *The Captain's Paradise*, British (Alec Guinness, Celia Johnson and Yvonne de Carlo). July 9. *Sangaree* (Fernando Lamas, John Sutton and Ariene Dahl). Aug. 13. *Little Boy Lost* (Bing Crosby, Christian Fourcade and Gabrielle Dorziat). Sept. 4. *Shane* (Alan Ladd and Van Heflin).

RIALTO, 3 Coventry Street, W.1.—(1952) Oct. 10. *Perilous Expedition* (Lau Lauritzen). Oct. 24. *The Young Caruso*, Italian. Dec. 1. *Volcano*, Italian (Anna Magnani and Geraldine Brooks). (1953) Jan. 9. *Helle, Elephant*, Italian (Vittorio de Sica). Jan. 23. *The Happy Vineyard*, German. Feb. 11. *Les Belles de Nuit*, French (Gerard Philipe). June 5. *The Beggar's Opera*, British version of Gay's opera (Sir Laurence Olivier, Hugh Griffith, Stanley Holloway, Adele Leigh, Dorothy Tutin, Daphne Anderson, Athene Seyler and Joan Cross). Sept. 7. *Fanfan La Tulipe*, French (Gerard Philipe).

STUDIO ONE, 225 Oxford Street, W.1.—(1952) Oct. 13. *Margherita du Cortona*, Italian (Aldo Nicodemi and Maria Frau). Oct. 20. *Julie De Carneilhan*, French (Edwige Feuillère). Nov. 28. *Souvenirs Perdus*, French (Edwige Feuillère and Daniele Delorme). (1953) Jan. 9. *The Yellow Balloon*, British (William Sylvester and Andrew Ray). Feb. 5. *Le Plaisir*, French (Max Ophüls and Danielle Darrieux). June 22. *Le Ragazze Di Piazza Di Spagna*, Italian.

TIVOLI, Strand, W.C.2.—(1953). Aug. 6. *She's Back On Broadway* (Steve Cochran and Virginia Mayo).

WARNER, Leicester Square, W.C.2.—(1952) Oct. 10. *She's Working Her Way Through College* (Ronald Reagan and Virginia Mayo). Nov. 28. *Retreat Hell!* (Frank Lovejoy and Richard Carlson). Dec. 12. *Jack And The Beanstalk* (Abbott and Costello). Dec. 26. *The Crimson Pirate* (Burt Lancaster). (1953) Jan. 23. *The Iron Mistress* (Alan Ladd and Virginia Mayo). Feb. 12. *Springfield Rife* (Gary Cooper). Feb. 26. *April In Paris* (Ray Bolger and Doris Day). March 19. *Stop, You're Killing Me* (Broderick Crawford and Claire Trevor). April 2. *The Miracle Of Fatima* (Angela Clark). April 16. *I Confess* (Montgomery Clift and Anne Baxter). May 7. *The House Of Wax* (Vincent Price and Phyllis Kirk).

CLUB AND LIBRARY EDITION OF WHITAKER, 1954

The Club and Library Edition of Whitaker's Almanack, 1954, contains 1190 pages, together with coloured maps (The World, The British Isles, Baltic States, Russia and her neighbours, Germany and her neighbours, France and Spain, The Far East, India, Pakistan and Burma, Africa, Canada and Newfoundland, The United States, South America, Australia, New Zealand) in strong leather binding, with gilt top and silk headband. Price 30s. net.

BROADCASTING DURING THE YEAR

NEW B.B.C. DIRECTOR-GENERAL

On Oct. 8, 1952, the appointment of Lieut.-Gen. Sir Ian Jacob as Director-General of the B.B.C. was announced. Throughout the Second World War, Sir Ian Jacob was Military Assistant Secretary to the War Cabinet. Subsequently he became Controller of the B.B.C. European Services, and in 1947 Director of Overseas Services, from which post he had been temporarily transferred earlier in 1952 to act as Chief Staff Officer to the Minister of Defence. The new Director-General took over his duties on Dec. 1 from Mr. B. E. (now Sir Basil) Nicolls, Director of Home Broadcasting, who had been Acting Director-General since the resignation of Sir William Haley.

TEMPORARY TELEVISION STATIONS

The Assistant Postmaster-General, Mr. Gamman, announced in October, 1952, that interim arrangements were being made for a television service for North-East England and Northern Ireland in time for the Coronation. Plans for stations at Pontop Pike, near Gateshead, and at Belfast had already been made, and it had now proved possible to make temporary provisions at these places. The B.B.C. proposed to use mobile transmitters with a power of 1 kw. vision and $\frac{1}{2}$ kw. sound, and temporary aerials. The service provided would continue until permanent installations could be brought into use, though it would naturally not give the quality or coverage ultimately expected from the permanent stations. It was anticipated that the Pontop Pike station would serve a million people within a radius of 20 miles, including Tyneside, and the Belfast station 500,000 people in the immediate neighbourhood of the city. Reception of the Coronation television from the Pontop Pike station was stated to be excellent.

THE QUEEN'S FIRST CHRISTMAS BROADCAST

The Queen followed the practice of her father and grandfather in broadcasting to her people throughout the Commonwealth on Christmas Day. In spite of disturbed atmospheric conditions, Her Majesty was heard clearly in all parts of the world. The Queen, in the first Christmas Day broadcast of her reign, asked for the prayers of all her listeners on her Coronation Day. The Prime Minister of New Zealand, Mr. Holland, announced on Christmas Day that the Queen's Christmas broadcast in 1953 would be made from Government House, Auckland.

TELEVISION ADVISORY COMMITTEE

The Postmaster-General announced the reconstitution of the Television Advisory Committee. Admiral Sir Charles Daniel became Chairman, and other members were: Sir Edward Herbert, Mr. Charles McLaren, Mr. E. M. Fraser, Mr. G. Darnley Smith and Mr. C. O. Stanley of the Radio Advisory Council, the Director-General of the B.B.C., and a representative each of the Treasury, the Ministry of Supply and the Post Office. The Committee is to advise the Postmaster-General on the development of television and sound broadcasting at frequencies above 30 megacycles per second, and related matters, including competitive television services and television for public showing in cinemas and elsewhere. It was announced in July that 95 inquiries had been received about licences to operate commercial television stations.

The first report of the Committee was presented on July 7, and was limited to a consideration of

the frequencies required for the development of television in the home. The frequencies lie within a range which is divided into five bands. The B.B.C. stations, working or planned, make virtually full use of Band I, and the Committee recommended that Band II should be reserved for VHF sound broadcasting, and that Bands III, IV and V should be developed by television. In Bands IV and V every third channel should be allocated in the first instance, to leave room for colour in future. The Postmaster-General, in commenting on the report, said that Band III was the only band likely to be used in the next few years. He also gave the assurance that there would be no difficulty in fitting adaptors to current sets, and, in some cases, to older types of television sets, to enable them to receive alternative programmes.

THE CORONATION

The sound and television broadcasting of the Coronation ceremony and procession and attendant celebrations was considered on all sides to have been an outstanding success. The original decision to televise only the processions west of the screen in Westminster Abbey was subsequently amended, and viewers saw the whole service except for the Anointing, the Communion prayers and the administration of the Sacrament. Many thousands all over the world were thus enabled to see the actual crowning of Her Majesty. The television transmissions of the procession back to Buckingham Palace were excellent, in spite of the bad weather. Taking into account large-screen presentations in cinemas, church halls, hospitals, etc., it was estimated that not fewer than 20,000,000 people viewed the service in the United Kingdom alone. The television programme lasted for seven hours. Thirty-seven transmitters were used to radiate the sound and television broadcasts in this country. In the evening of Coronation Day, the Queen spoke to her people, and the broadcast was preceded by messages from eight of the Commonwealth Prime Ministers then present in London, from Queen Salote of Tonga and finally from Sir Winston Churchill.

The televised programme of the Coronation was relayed to the Continent, and was seen clearly in France, Belgium, Holland and Western Germany. Telefilms of the service were flown immediately to Canada, reaching Goose Bay, Labrador, at 6.45 p.m., and being seen by audiences in Montreal the same evening. The two chief United States networks (the National Broadcasting Company and the Columbia Broadcasting System) had chartered airliners which flew direct to New York with the films taken by the networks themselves. The films were processed during the journey and were shown during the evening in New York and Boston. During the day 43 languages were used in B.B.C. sound broadcasts, in addition to a continuous English programme on the European and overseas services, and a separate English programme for re-broadcasting in America. Foreign commentators were also given full facilities for independent broadcasts from London.

The televising of the Coronation was a large factor in the increase of television sets in use by the public. On March 31, 1953, the latest date for which figures are available, 2,142,454 combined sound and television licences were current, compared with 1,457,000 a year previously.

OTHER CORONATION YEAR BROADCASTS

The Naval Review was another feature of the Coronation Year which demonstrated develop-

ments in television. Seven television cameras were installed at Spithead, four of them on two ships, the aircraft carrier H.M.S. *Eagle* and the recovery ship, H.M.S. *Reclaim*, which was two miles distant from the *Eagle*. This was the first B.B.C. television broadcast from a ship at sea. The specially installed television aerial in the *Eagle* was attached to a gyro-controlled mounting so that the aerial maintained a constant bearing, regardless of the effect of wind and tide on the ship's position at any time during the broadcast. The pictures were transmitted by a radio link to a relay station on Portsdown Hill.

The televising of the visit of the Queen and the Duke of Edinburgh to Caernarvon Castle on July 10 was the first television outside broadcast made from North Wales. A mobile intermediate transmitter was set up on Snowdon at a point where micro-waves could be received along the line of sight from Caernarvon and retransmitted similarly from Snowdon to Holme Moss on the Pennines.

NEW STATION AT CRYSTAL PALACE

The B.B.C. decided that the new and more powerful transmitting station to take the place of the Alexandra Palace station should be situated in the grounds of the old Crystal Palace. It was thought that this site would give a better service to South-East England and would also extend facilities to those parts of the South Coast which will not be covered by the projected transmitter in the Isle of Wight. Meanwhile the transfer of various activities from the Alexandra Palace to Lime Grove, Shepherd's Bush, continued during the year, and a small part of the proposed television centre at the White City was also brought into use.

COMMERCIAL TELEVISION

The controversy about the desirability of commercial television continued during the year. Mr. Atlee, in a speech at Beddington on June 13, said that if the Government introduced commercial television, the Labour Party, if returned to power, would have to alter it. Opposition to commercial television was also expressed by the British Council of Churches, the Co-operative Party and the General Council of the T.U.C., A Government spokesman in the House of Commons, replying to questions on June 17 about American commercial handling of the Coronation broadcasts, said that the British Ambassador in Washington had reported that in general the programmes had been marked by exceptional restraint and propriety, and that during the main showing of the television film by the networks with which the B.B.C. had made special arrangements, "commercials" had been reduced to an extent unprecedented in American television.

During the summer, two independent bodies were formed with opposing views on the question of commercial television. The National Television Council, with Viscount Waverley as president, and Lady Violet Bonham-Carter as chairman, has as its objects the opposition to commercial television in any form, and the encouragement of the far-reaching development to public service television, including the early provision of an alternative television programme. The Popular Television Association, of which the president is the Earl of Derby, was founded to oppose a B.B.C. monopoly in television. Its objects are "to awaken the national conscience to the dangers, social, political, and artistic, of monopoly in the rapidly expanding field of television, to provide the public at the earliest possible moment with alternative programmes which are in keeping with the best standards of British taste, and to open up steadily

widening opportunities of employment for artists, writers, producers and technicians in all fields of the entertainment and electronics industries."

BROADCASTING IN SCHOOLS

As a result of a survey made by the School Broadcasting Council, it was estimated that nearly a million children in 7,000 schools listened to the religious service for schools broadcast on Tuesday and Friday mornings, a far larger number than for any other school broadcast. In June, 1953, 25,691 schools in the United Kingdom were registered as listening to school broadcasts, an increase of a thousand in twelve months.

FUTURE TELEVISION PLANS

On June 23, the Director-General of the B.B.C. announced plans for the development of the British television service. The first task would be to complete the five medium-power television stations now planned, and the next step would be to set up a further eight low-power stations, 97 per cent. of the population of Great Britain and Northern Ireland would then be within reach of the television service—an incomparably larger figure than in any other country. The television programme would be extended by a further two hours a day, and would include a special news service in vision. At some time during the next 10 years it might be possible to introduce colour, but that would depend entirely on the development of a compatible system which could be received in black and white by existing sets.

A Government statement on July 2 said that it had been agreed that the B.B.C. should proceed at once with new permanent television stations at Aberdeen, Belfast, Plymouth and Pontop Pike, and in the Isle of Wight, the Isle of Man and the Channel Islands, and with the transfer of the London station from Alexandra Palace to the Crystal Palace. A start would also be made with VHF sound services to help reception in areas where it was at present unsatisfactory. The Government proposed to publish a White Paper in the autumn defining the terms upon which commercial television might be permitted to operate. Meanwhile certain broad principles for commercial television were envisaged. These included the limitation of the number of stations under any one ownership or control, the setting-up of a controlling body to advise the Postmaster-General on the issue of licences and to ensure that programmes conformed to certain standards, and the placing of responsibility for what was broadcast on the owner and operator of a station, and not the provider or sponsor of programmes.

SPORTS BROADCASTS

Though Football League matches and Rugby Union internationals continued to be absent from the television programme, many Rugby Union and Rugby League club matches were televised. The Lawn Tennis Championships at Wimbledon and county and Test Match cricket were also still popular. Broadcasting of the Test Matches in particular attracted many viewers and listeners. On the third day of the last Test, the B.B.C. cancelled other programmes to give an almost uninterrupted broadcast on the match from 3 p.m. until the close of play. On the final day, by agreement with the M.C.C., the B.B.C. was allowed to televise the whole of the play, and there was also a ball by ball sound commentary on the Light Programme. An agreement reached between the B.B.C. and Messrs. Topham, the managers of Aintree racecourse, enabled the B.B.C. to broadcast the Grand National.

BROADCASTING STATIONS OF THE WORLD

A select list of broadcasting stations in various Commonwealth and foreign countries, giving the name of the station and its administration followed by its strength in kilowatts; and (F.) wave-lengths in metres followed by frequency in kilocycles per second. Certain details of the stations in foreign countries are drawn from *Nomenclature des stations de radiodiffusion* by permission of the Director-General, International Telecommunication Union.

ART AND OTHER EXHIBITIONS, 1952-53

BRITISH MUSEUM TRICENTENARY

THE Act of Parliament giving effect to the will of Sir Hans Sloane, which brought about the foundation of the British Museum, received the royal assent on June 7, 1753. The bicentenary year of the Museum was celebrated by a number of special exhibitions. The main one for the first half of the year displayed manuscripts, printed books, medals and prints and drawings relating to the Coronations of English Kings and Queens. The exhibition included the Gospels of King Athelstan, a volume on which the oath is said to have been taken at mediaeval coronations. From July onwards an exhibition took place illustrating the origins and growth of the British Museum itself. A number of subsidiary exhibitions, some of which are mentioned below, were also held. Several of these were illustrative of the literature of other countries. The Department of Manuscripts put on view during this year some of the best manuscripts from the Cotton Collection, the Harleyan Manuscripts and the Sloane Manuscripts.

DUTCH PICTURES

The Burlington House Winter Exhibition, which opened in November, 1952, was devoted this year to a fine and representative collection of Dutch pictures. It differed from the famous 1929 Exhibition in that most of the pictures came from British collections, though a small number of important exhibits was sent from the Netherlands. Nearly 50 Rembrandts were shown, including an equestrian portrait from Panshanger which had never previously been publicly exhibited. Cuyp, Frans Hals, Vermeer, Terborch, de Hooch and Hobbema were also well represented. One portrait of a young woman by Frans Hals had only recently come to light as the result of cleaning. Some Dutch primitives and works by artists before the great age of Dutch art were also on view. As a supplement to the Exhibition at the Academy, where no drawings were included, the British Museum showed a number of drawings and prints from its own collections. The display of drawings and etchings by Rembrandt was notable, and, less usual, was a good selection of Dutch 18th century coloured water-colour drawings. Another exhibition designed to coincide with that at Burlington House was one at the Matthiessen Gallery, which showed the work of Rembrandt's pupils and his influence upon them. The artists represented included Aert de Gelder, Gerard Dou, Jacob Backer, Carel and Barent Fabritius and Philips Koninck. The exhibition was in aid of victims of the Dutch floods.

OLD MASTER DRAWINGS

For some years there has been an increasing interest in drawings by the old masters. The first exhibition of drawings by Michael Angelo from British collections was opened at the British Museum in April, at which examples from the British Museum, the Ashmolean, the Royal Library at Windsor Castle, and private collections, were shown. Since two-fifths of all the extant drawings by Michael Angelo are in this country, the Exhibition was both representative and distinguished. A more general exhibition was that held in the Diploma Galleries of the Royal Academy from August to October. Though this also was confined to works from British collections, Italian drawings ranged from Raphael to Canaletto, French drawings from Claude to Ingres, and in a room containing Dutch, Flemish and German

drawings, Rembrandt, Rubens, Dürer and Lucas Cranach were well represented. There were also a number of works by Gainsborough, a red chalk drawing by Hogarth only recently discovered, and sketches by Lawrence and Wilkie.

In May the Victoria and Albert Museum brought together for the first time the whole of its splendid collection of Constable's oil and water-colour paintings and sketches and other drawings, most of which were given to the Museum by the painter's daughter. Most of the large oil-paintings were already well-known, and it was again the drawings which aroused most interest.

Among other exhibitions of drawings during the year were a selection of old master drawings from the Guise Collection at Christ Church in the Treasures of Oxford Exhibition at the Goldsmiths' Hall, another selection from Sir Bruce Ingram's splendid collection—this time of animal and bird drawings—shown at Colnaghi's Galleries in aid of the London Federation of Boys' Clubs, and, outside London, the exhibition of drawings at Leicester, designed to illustrate the taste of the eighteenth century and particularly of Jonathan Richardson, the painter, writer on art and collector. A number of the drawings shown were once in Richardson's own collection.

TURNER AND GIRTIN

The Whitechapel Art Gallery, which had been entirely re-decorated, re-opened in February with an exhibition of paintings, mostly unfamiliar, by Turner. One work, *Venice from the Giudecca*, had hung in Italy until brought to this country in 1947. *The Falls of Clyde*, from the Lever Art Gallery, had formerly belonged to Ruskin. The large landscape *The Dort Packet-Boat from Rotterdam, becalmed*, was also shown, and the Tate Gallery lent a number of Turner's oil-paintings which are not usually on view. The selection of water-colours was large and representative. The exhibition attracted a very large attendance. At the same time as the Turner Exhibition, an unusually comprehensive selection of water-colours by Turner's contemporary, Thomas Girtin, was being shown at Agnew's Gallery.

WESTMINSTER ABBEY TREASURES

During February and March an exhibition of treasures from Westminster Abbey was shown at St. James's Palace in aid of the appeal for the preservation of the Abbey fabric. The exhibition ranged from vestments to statuary, and also included many documents from the Abbey muniments. Many exhibits reflected the connection of the Abbey with British kings and queens. A number of altar frontals or dorsals from the gifts customarily made by the sovereigns at their coronations demonstrated fine modern as well as old embroidery. Three copes made for the coronation of Charles II, including one later worn by the Dean at the Coronation in June, were on view. Paintings included the famous life-size portrait of Richard II, and the Vivarini Madonna, given to the Abbey by the late Lord Lee of Fareham. There was a selection of sculptures of saints from among the small figures below the clerestory in Henry VII's Chapel, and from among the famous collection of funeral effigies, the plaster head of Henry VII himself, recently shown to have been made from his death-mask. A small sixteenth-century bust of Abbot Islip was recovered in recent years from inside a pinnacle on the north front, where it had been put as a filling by one of Wren's workmen.

The great twelfth-century abbey deed chest was also on view, and documents from the time of Edward the Confessor down to the marriage certificate of our present Queen. Among early manuscripts were a thirteenth-century bestiary and a thirteenth-century Bible written on fine vellum.

ROYAL PORTRAITS

To mark the Coronation, an Exhibition of Portraits of the Kings and Queens of England, from the seventh-century Penda of Mercia to the present day was shown at the Diploma Galleries of the Royal Academy. The early "portraits" were on coins, some of them not now easily distinguishable, and later collections of coins and also of royal seals were also shown. Plaster casts of their tombs provided the portraits of some of the Angevin monarchs and their consorts. The sequence of portraits proper, however, from the later Middle Ages onward, revealed a number of fine works of art, and there was also an excellent collection of miniatures.

The Arts Council arranged an exhibition of photographs of the royal tombs in Westminster Abbey, specially commissioned, and taken by Mr. F. L. Kenett. The photographs made clear much detail of the sculpture which cannot be well seen by the visitor to the Abbey.

THE TREASURES OF OXFORD

For several years past the Worshipful Company of Goldsmiths has sponsored a noteworthy series of exhibitions, largely of plate, old and new, from the City of London and elsewhere. In 1953 the Company joined with the Oxford Society in an exhibition at the Goldsmiths' Hall of the Treasures of Oxford, which, though college plate made a fine showing, covered a considerably wider field. As already mentioned, the Guise Collection of drawings from Christ Church was well represented. There were also a series of drawings of Oxford by Turner, and caricatures by Rowlandson and by Sir Max Beerbohm. The portraits and busts, however, were mainly chosen to represent well-known Oxford men. Illuminated manuscripts included one open to show a drawing, perhaps by St. Dunstan himself, of the Saint kneeling at the feet of Christ, and a copy of the Gospels which belonged to St. Margaret of Scotland. Also shown were poems in the hand of James I, the manuscript score of Purcell's *Ode on St. Cecilia's Day*, the original of Shelley's *Ode to the West Wind*, a note scribbled by Charles II at a meeting of his Council, and a letter written by George V when a child. Among more miscellaneous exhibits were William of Wykeham's mitre and girdle, the white leather gloves, embroidered in gold thread, which were given to Queen Elizabeth I when she visited Oxford, the lantern which Guy Fawkes was carrying when he was arrested in the cellars of the Houses of Parliament, and Dr. Johnson's teapot from Pembroke College. Older college plate is rare in Oxford, since most of it was handed over to the Oxford Mint in the Civil War to be melted down for coins. But some fifteenth- and sixteenth-century survivals were shown, together with much fine later plate, down to the two-handled cup designed in 1952 to commemorate Merton's feat in going head of the river for the first time.

THE ACADEMY SUMMER EXHIBITION

The Royal Academy Summer Exhibition contained the usual large number of portraits, formal and informal. Among those exhibited by the President, Sir Gerald Kelly, were paintings of the Lord Chancellor, Dr. Vaughan Williams and Dr.

Marie Stopes. Other formal portraits were those of the Lord Mayor of London by Eric Kennington and Sir Travers Humphreys by Harold Knight. Sir Winston Churchill sent a number of landscapes, dating from different times during his career, including one painted at Cap d'Ail in September 1952. A fine battle-piece by A. R. Thomson, *The Last Stand of the Gloucesters on the Infin River*, had been painted specially for the Gloucestershire Regiment. Two works by Dame Laura Knight, a typical gypsy scene, *Early Morning*, and an allegory, *Hands of Man*, and one by Stanley Spencer, *The Marriage at Cana*, also aroused interest. Three works which had been purchased for the Chantry Bequest were shown in the exhibition. They were Epstein's bronze of Mrs. Ambrose McEvoy, Matthew Smith's early *Nude, Fitzroy Street, No. 1*, and Rodrigo Moynihan's group of the teaching staff of the painting school at the Royal College of Art. In the Architectural room were drawings of Basil Spence's latest versions of his designs for Coventry Cathedral, Prof. A. E. Richardson's restoration of Trinity House, Tower Hill, and Raymond Erith's plans for altering Tendring Hall, Suffolk, a house by Sir John Soane at present unoccupied.

MAP-MAKING

During the year there were two exhibitions illustrating maps and map-making. The first, at the British Museum, consisted of maps from the earliest times till the foundation of the Ordnance Survey in 1791. The earliest exhibit was a Babylonian clay tablet of the sixth century B.C., bearing a diagrammatic picture of the world. Maps of the British Isles from that of Matthew Paris in the thirteenth century were also on view, including Tudor maps from the Cottonian Collection with notes by the great Lord Burghley. The second exhibition, which opened at the Royal Institution of Chartered Surveyors in June, as well as showing many fine early maps, brought the story of map-making up to date. The Ordnance Survey Department exhibited the methods by which modern maps are drawn and redrawn, and there were German maps, some showing successive "waves" planned for the invasion of England, and some used by the *Luftwaffe* in the Battle of Britain. The actual map of Europe from the British Cabinet war room was also on view. The Queen lent from the Windsor archives a series of surveys of Windsor Great Park, and another set of plans traced the history of the Portman Estate in Marylebone from 1741 to the present day.

LOCAL HISTORY

The greatly increased interest in local history continued to be reflected in a number of exhibitions in centres throughout the country. The Staffordshire county record committee promoted a special exhibition at Stafford of documents from the county, ranging from royal charters to household account books. The County Record Office at Hertford put on view a loan collection of documents from Panshanger, including more than a hundred file cases of letters written to Lord Melbourne while he was Prime Minister. At the Castle Museum, Norwich, an exhibition of relics, portraits, manuscripts and furniture of the Pastons served to illustrate the story of that famous Norfolk family. The City of York Art Gallery arranged an exhibition entitled "York between the Reigns of the two Elizabeths," and brought together a fine collection of prints, maps and drawings, including some seventeenth-century etchings of the Minister by Daniel King, which had only recently been rediscovered.

RETROSPECT OF SPORT 1952-53

OLYMPIC GAMES

The Modern Olympic Games were revived in 1896 and meetings have been held as follows:—

I	1896	Athens	VI	1916	Berlin**	XI	1936	Berlin
II	1900	Paris	VII	1920	Antwerp	XII	1940	Tokio, Helsinki**
III	1904	St. Louis	VIII	1924	Paris	XIII	1944	London**
IV	1908	London	XI	1928	Amsterdam	XIV	1948	London
V	1912	Stockholm	X	1932	Los Angeles	XV	1952	Helsinki

The venue of each Olympic Meeting is fixed some time ahead by the International Olympic Committee who have awarded the XVI Games to be held in 1956 to Melbourne, Australia.

** The Games of 1916 were allotted to Berlin, but were not held owing to the war. The Games of 1940 were allotted first to Tokio, then in 1938 to Helsinki; but also were not held owing to the war. The Games of 1944 were awarded to London in 1939, but again were not held owing to the war. It is a rule of the Olympic Charter that the cancellation of any Meeting must not alter the numbered sequence.

WORLD'S ATHLETIC RECORDS

(All the world's records given below have been accepted by the International Amateur Athletic Federation with the exception of those marked thus (*) which await ratification and are likely to be accepted.)

BRITISH ATHLETIC RECORDS

British (All-comers') Records are those made by any amateur athlete within the United Kingdom of Great Britain and Northern Ireland. British National records are those made by any British athlete, also within the United Kingdom. Where the latter differ from the former they are given with an asterisk.

 Hammer—D. W. J. Anthony (Watford H.), 174 ft. 8 in.
 Javelin—M. J. Denley (Thames Valley H.), 208 ft. 7 in.
 † Decathlon—L. Pinder (Doncaster P.W. A.C.), 5,321 pts.
 Tug-of-War (100 stone)—R.A.O.C. (Feltham).
 Tug-of-War (Catchweight)—R.A.O.C. (Feltham).
 † 4 × 110 yards Relay—Polytechnic Harriers, 43.6 sec.
 † 4 × 440 yards Relay—Polytechnic Harriers, 3 min. 23.7 sec.
 † Held at Cardiff on July 25.
 † Held at Chesterfield on June 27.
 † Held at Uxbridge on Aug. 28 & 29.
 * New best Championship performance.

WOMEN'S A.A.A. CHAMPIONSHIPS

White City Stadium, July 4, 1953.

100 yards—A. Pashley (Gt. Yarmouth), 11.0 sec.
 220 yards—A. E. Johnson (Cambridge), 25.0 sec.
 440 yards—V. M. Winn (Spartan), 57.6 sec.
 880 yards—A. Oliver (Gosforth), 2 min. 15.0 sec.
 One mile—E. Harding (London Olympiads), 5 min. 09.8 sec.
 Mile Walk—B. E. M. Randle (Birchfield), 7 min. 48.2 sec.

80 metres Hurdles—J. C. Desforbes (Essex), 11.5 sec.
 High Jump—S. Lerwill (Spartan), 5 ft. 5 in.
 Long Jump—J. C. Desforbes (Essex), 18 ft. 10½ in.
 Weight—J. J. Linsell (Essex), 39 ft. 9 in.
 Discus—S. Farmer (Brighton), 131 ft. 3 in.
 Javelin—A. M. Collins (London Olympiades), 119 ft. 11½ in.
 Pentathlon—J. C. Desforbes (Essex) 3,221 points.

GREAT BRITAIN v. FRANCE

White City Stadium, August 1 & 3, 1953

100 yards—R. Bonino (France), 9.9 sec.
 220 yards—B. Shenton (G.B.), 21.7 sec.
 440 yards—L. A. Smith (G.B.), 48.6 sec.
 880 yards—R. G. Bannister (G.B.), 1 min. 50.7 sec.
 One mile—C. J. Chataway (G.B.), 4 min. 12.4 sec.
 Three miles—D. A. G. Pirie (G.B.), 13 min. 36.4 sec.
 Six miles—A. Mîmoun (France), 28 min. 37.6 sec.
 Steeplechase—K. E. Johnson (G.B.), 9 min. 10.8 sec.
 4 × 110 yards Relay—Great Britain, 42.1 sec.
 4 × 440 yards Relay—Great Britain, 3 min. 13.4 sec.
 120 yards Hurdles—P. B. Hildreth (G.B.), 14.7 sec.
 440 yards Hurdles—G. Cury (France), 53.0 sec.
 High Jump—G. Damitio (France), 6 ft. 5 in.
 Long Jump—P. A. Whaley (G.B.), 22 ft. 10 in.
 Pole Vault—G. M. Elliott (G.B.), 13 ft. 3 in.
 Hop, Step—K. S. D. Wilmshurst (G.B.), 48 ft. 9½ in.
 Weight—J. A. Savidge (G.B.), 53 ft. 7 in.
 Discus—M. Pharaoh (G.B.), 157 ft. 2 in.
 Hammer—E. C. K. Douglas (G.B.), 177 ft. 8½ in.
 Javelin—K. E. Flanagan (G.B.), 198 ft. 1 in.

Great Britain won by 127 points to 79. This match was first held in 1921. Great Britain has won on 17 occasions, France on 5.

Women's Match.

100 yards—A. Pashley (G.B.), 11.1 sec.
 220 yards—A. Pashley (G.B.), 25.2 sec.
 440 yards—V. M. Winn (G.B.), 2 min. 16.1 sec.
 4 × 110 yards Relay—Great Britain, 47.4 sec.
 80 metres Hurdles—J. C. Desforbes (G.B.), 11.1 sec.
 High Jump—S. Lerwill (G.B.), 5 ft. 6 in.
 Long Jump—J. C. Desforbes (G.B.), 18 ft. 7½ in.
 Weight—P. Veste (France), 40 ft. 8½ in.
 Discus—S. Farmer (G.B.), 139 ft. 1½ in.
 Javelin—A. M. Collins (G.B.), 120 ft. 6½ in.
 Great Britain won by 69 points to 33.

GREAT BRITAIN v. GERMANY

Berlin, August 29 & 30, 1953

100 metres—H. Fütterer (Germany), 10.7 sec.
 200 metres—H. Fütterer (Germany), 21.2 sec.
 400 metres—K. F. Haas (Germany), 47.2 sec.
 800 metres—G. Dohrow (Germany), 1 min. 52.1 sec.
 1,500 metres—W. Lueg (Germany), 3 min. 51.6 sec.
 5,000 metres—D. A. G. Pirie (G.B.), 14 min. 02.6 sec.
 10,000 metres—F. D. Sando (G.B.), 30 min. 21.0 sec.
 Steeplechase—K. Schmalz (Germany), 9 min. 10.6 sec.
 4 × 100 metres—Germany, 41.2 sec.
 4 × 400 metres—Germany, 3 min. 13.0 sec.
 110 metres Hurdles—F. J. Parker (G.B.), 14.8 sec.
 400 metres Hurdles—H. Whittle (G.B.), 53.6 sec.
 High Jump—W. Massion (Germany), 6 ft. 2 in.
 Long Jump—H. Oberbeck (Germany), 23 ft. 5½ in.
 Pole Vault—G. M. Elliott (G.B.), 13 ft. 5½ in.
 Hop, Step—K. S. D. Wilmshurst (G.B.), 48 ft. 0½ in.
 Weight—J. A. Savidge (G.B.), 53 ft. 8½ in.
 Discus—H. Rosendahl (Germany), 153 ft. 1 in.
 Hammer—E. C. K. Douglas (G.B.), 178 ft. 8½ in.
 Javelin—H. Will (Germany), 224 ft. 5½ in.

Germany won by 112 points to 94.

GREAT BRITAIN v. SWEDEN

Stockholm, September 2 & 3, 1953.

100 metres—B. Shenton (G.B.), 10.7 sec.
 200 metres—B. Shenton (G.B.), 21.5 sec.
 400 metres—P. G. Fryer (G.B.), 48.3 sec.
 800 metres—T. Ekfeldt (Sweden), 1 min. 50.0 sec.
 1,500 metres—S. Karlsson, 3 min. 45.8 sec.
 5,000 metres—F. Green (G.B.), 14 min. 27.6 sec.
 10,000 metres—D. A. G. Pirie (G.B.), 29 min. 17.2 sec.
 Steeplechase—C. Söderberg (Sweden), 9 min. 08.4 sec.
 4 × 100 metres—Great Britain, 41.6 sec.
 4 × 400 metres—Sweden, 3 min. 15.0 sec.
 110 metres Hurdles—F. J. Parker (G.B.), 14.6 sec.
 400 metres Hurdles—L. Ylander (Sweden), 52.7 sec.
 High Jump—B. Nilsson (Sweden), 6 ft. 5½ in.
 Long Jump—A. R. Cruttenden (G.B.), 23 ft. 6½ in.
 Pole Vault—R. Lundberg (Sweden), 13 ft. 9½ in.
 Hop, Step—A. Norman (Sweden), 48 ft. 3½ in.
 Weight—J. A. Savidge (G.B.), 51 ft. 10½ in.
 Discus—M. Pharaoh (G.B.), 157 ft. 4½ in.
 Hammer—B. Asplund (Sweden), 178 ft. 1 in.
 Javelin—O. Bengtsson (Sweden), 234 ft. 8½ in.

Sweden won by 109 points to 103.

INTERNATIONAL CROSS COUNTRY

Paris, March 21, 1953.

THE DERBY, 1942-1953

For particulars of the Derby from 1780-1941 see 1921-42 editions.

The Distance of the Derby course at Epsom is $1\frac{1}{2}$ mile. Lord Egremont won Derby in 1782, 1804, 5, 7, 26 (also, 5 Oaks); Duke of Grafton, 1802, 9, 10, 15 (also, 9 Oaks); Mr. Bowes, 1835, 43, 52, 3; Sir J. Hawley, Teddington (1851), Beadsman (1858), Musjid (1859), and Blue Gown (1868), the 1st Duke of Westminster, Bend Or (1880), Shotover (1882), Ormonde (1886), and Flying Fox (1899). Lady James Douglas was the first lady to win the Derby—War Substitute at Newmarket (1918); at Epsom, Mrs. G. B. Miller (1937). First winner was Sir Charles Bunbury's Diomed in 1780. From 1840 to 1945 a substitute Derby was run at Newmarket. By Winning his 5th Derby, The Aga Khan equalled Lord Egremont's record. He has also won 2 Oaks.

NOTE.—In Her Majesty's Coronation Honours List of June 1, 1953, Gordon Richards, already champion jockey 25 times, becomes the first of his profession to receive a knighthood. Five days later (and without having yet received the accolade of knighthood) he rode his first Derby winner for Sir Victor Sassoon on Pinza. This success brought Gordon Richards' total number of winners to 4,670. Total number of winners for season up to and including Oct. 10, 4,787.

Fred Archer's record of wins, 2,749.

CRICKET

Cricket is played under the "Laws of Cricket" and is governed by the Committee of the Marylebone Cricket Club (1787), Lord's, N.W.1. Pres.—The Earl of Rosebery, P.C., E.T., D.S.O., M.C. Sec. Maj. R. Aird. Asst. Secs.—J. G. Dunbar; S. C. Griffith.

County Championships.

The first County Championship was in 1873 when Gloucestershire and Nottinghamshire finished equal on points. Yorkshire have won 22 times; Surrey 11; Notts 8; Lancs 8; Middlesex 5; Kent 4; Gloucester 2; Derby 2; Warwick 2; Glamorgan; Notts and Lancs tied in 1879 and 1882, and Notts, Lancs and Surrey were all equal in 1889. Middlesex and Yorkshire tied in 1949 and Lancashire and Surrey tied in 1950.

CONDITIONS.—Win, 12 points; Tie, 6 pts. Points awarded for lead in 1st innings, though losing match, or in drawn game, 4 (2 each if tie in 1st innings). Where there is no play on first two days the match comes under the laws for one-day games, except that a side may not declare its 1st innings closed until it has batted for at least sixty minutes. In such one-day matches without other than 1st innings conclusion, the side leading on 1st innings shall score 8 points.

DECLARATION LAW.—Captains of teams may now declare their innings closed at any time on the first day irrespective of score. This rule—experimental—does not apply to Test Matches where declaration on the first day of a match is not allowed by the Laws of Cricket. This amends the experiment which began in 1946 of allowing a Captain to declare the innings closed on the first day of a County match after the score had reached 300.

NEW BALL.—The experiment of allowing the new ball after 65 overs have been bowled is to continue.

Cricket.—Laws, etc., 1953.

The Cricket Board of Control re-appointed N. W. D. Yardley, F. R. Brown, R. E. S. Wyatt and L. E. G. Ames as the Test Match selection Committee for 1953. The one variation from season 1952 was that F. R. Brown was appointed chairman instead of N. W. D. Yardley.

The Australians agreed to play under the experimental declaration rule in first class games other than Test matches. This rule (in operation in England for 2 seasons) allows the batting side to declare at any time except if rain has reduced the match to a one day game. Then the side taking first innings must bat for at least an hour.

In future, each side will score six points when the scores are equal in a match played out to a finish, i.e.—a tie.

NOTE.—Last season (1952) when Warwickshire tied with Sussex and Lancashire tied with Essex, Warwickshire and Lancashire took eight points, having led on first innings, and their opponents 4 points. When scores are equal in a drawn match, e.g.—when the side batting last has not finished its innings—the team taking fourth innings shall score six points in all, whether they led on the first innings or not. The opposing team will retain such points as they may have gained from the first innings. But if they were behind on first innings they will gain no points from the match.

The M.C.C. and Australia reached agreement on the revision of the Laws of cricket to prevent persistent use of the fast short-pitched ball or "Bumper." This is an experiment, and if successful the other members of Imperial Cricket Conference (South Africa, New Zealand, West Indies, India, and Pakistan) will be invited to carry out a similar trial.

1953 Cricket Records.

Hat Tricks.—J. Flavell (Worcestershire v. Cambridge University; J. C. Laker (Surrey) v. Warwickshire; J. C. Laker (Surrey) v. Cambridge University; K. R. Dollery (Warwickshire) v. Gloucestershire; A. V. Bedser (Surrey) v. Essex; V. Munden (Leicestershire) v. Derbyshire; R. Tattersall (Lancashire) v. Nottinghamshire.

Firsts.—1,000 runs.—D. Kenyon (Worcestershire), June 18, 100 wickets.—A. V. Bedser (Surrey), July 14, 2,000 runs.—W. J. Edrich (Middlesex), August 10.

Ties.—Northamptonshire v. Middlesex: Northamptonshire 182 and 226; Middlesex 96 and 312.

Bowling Feats.—R. Berry (Lancashire) took 10 wickets for 102 runs in 1 innings v. Worcestershire. A. V. Bedser (Surrey) 8 wickets for 18 runs v. Warwickshire. A. V. Bedser (England), 14 wickets for 99 runs in 1st Test v. Australia at Nottingham. P. J. Loader (Surrey), 9 wickets for 28 runs and 4 wickets for 85 runs v. Kent; 8 wickets for 21 runs v. Worcestershire; 8 wickets for 72 runs and 4 wickets for 45 runs v. Warwickshire. B. D. Wells (Gloucestershire), 8 wickets for 31 runs v. Somerset. R. G. Marlar (Gentlemen), 7 wickets for 79 runs v. Players. R. Tattersall (Lancashire), 9 wickets for 40 runs v. Nottinghamshire. G. A. R. Lock (Surrey), 8 wickets for 26 runs v. Hampshire.

Highest Individual Scores.—F. A. Lowson (Yorkshire), 259 not out v. Worcestershire. (Highest score by an English batsman since 1949.) D. Kenyon (Worcestershire), 238 not out v. Yorkshire (same match).

Fastest Century.—G. E. Tribe (Rest v. South), 75 minutes.

1,000 Runs and 100 Wickets. G. E. Tribe (Northants).

Test Match Records.

Large Attendances and Receipts.

350,534 persons were present at the Third Test between England and Australia at Melbourne in 1937, and the record for one day, 87,798, was also made during this match. Over 158,000 persons watched the England v. Australia match at Leeds in 1948—a record for this country.

More money was taken at the Second Test Match between England and Australia at Lord's in 1953 than at any previous cricket match in the world. The total receipts for the five days were £57,716. The attendance was 137,915—not a record.

CENTURIES IN TESTS.

England.—L. Hutton, 145 at Lord's; W. Watson, 109 at Lord's.

Australia.—A. L. Hassett (2), 115 at Nottingham and 104 at Lord's; K. R. Miller, 109 at Lord's; R. N. Harvey, 122 at Manchester.

First played, 1876. Played 163 matches. England have won 57 matches, Australia 68 matches and 38 matches have been drawn.

NOTE.—After Australia's victory at the Oval (Aug. 29, 1882), an epitaph with black-edged border "in affectionate remembrance of English Cricket... The body will be cremated and the ashes taken to Australia," appeared in *The Sporting Times* ("The Pink 'Un") of Sept. 2, 1882. Since that year the contest has been colloquially for *The Ashes*.

West Indies v. India.

1953.

West Indies won series. West Indies won 1 match, the four other matches resulting in draws.

First Test.—Port of Spain (Jan. 21-28). Drawn India 417 and 294; West Indies 438 and 142 for 0.

Second Test.—Bridgetown (Feb. 7-12). West Indies won by 142 runs. West Indies 296 and 228; India 253 and 129.

Third Test.—Port of Spain (Feb. 19-25). Drawn. India 279 and 362 for 7 (dec.); West Indies 315 and 193 for 2.

Fourth Test.—Georgetown (Mar. 11-17). Drawn. (Abandoned). India 262 and 190 for 5; West Indies 364.

Fifth Test.—Kingston (Mar. 31-April 5). Drawn. India 312 and 444; West Indies 576 and 92 for 4.

India v. Pakistan

1952.

Pakistan made their debut in Test cricket in this series with a rubber of five Test matches against India. India won the series. India won 2 matches, Pakistan 1 match with 2 matches drawn. India thus gained her first Test rubber success.

First Test.—New Delhi (Oct. 16-18). India won by innings and 70 runs. India 372; Pakistan 150 and 152.

Second Test.—Lucknow (Oct. 23-26). Pakistan won by innings and 43 runs. India 106 and 182; Pakistan 331.

Third Test.—Bombay (Nov. 13-16). India won by 10 wickets. Pakistan 186 and 242; India 387 for 4 (dec.) and 45 for 0.

Fourth Test.—Madras (Nov. 28-Dec. 1). Drawn. (Abandoned). India 175 for 6; Pakistan 344.

Fifth Test.—Calcutta (Dec. 12-15). Drawn. Pakistan 257 and 236 for 7 (dec.); India 397 and 28 for 0.

Australia v. South Africa, 1952-53.

The series was drawn. Australia won 2 matches, South Africa 2 matches and 1 match was drawn.

First Test.—Brisbane (Dec. 5-10). Australia won by 96 runs. Australia 280 and 277; South Africa 221 and 240.

Second Test.—Melbourne (Dec. 24-30). South Africa won by 82 runs. South Africa 227 and 388; Australia 243 and 290.

Third Test.—Sydney (Jan. 9-13). Australia won by innings and 38 runs. South Africa 173 and 232; Australia 443.

Fourth Test.—Adelaide (Jan. 24-29). Drawn. Australia 530 and 233 for 3 (dec.); South Africa 387 and 177 for 6.

Fifth Test.—Melbourne (Feb. 6-12). South Africa won by 6 wickets. Australia 520 and 209; South Africa 435 and 297 for 4.

By winning the second Test against Australia at Melbourne South Africa recorded their first victory against Australia for 42 years, and only the third victory in 50 years during which they have met.

By their victory over Australia in the fifth Test match at Melbourne, South Africa held Australia to a draw in the series for the first time.

This was the first time since D. R. Jardine's English tour in Australia of 1932-23 that an Australian team has failed to win a Test rubber in Australia.

Of sixteen first-class matches played in Australia, South Africa won four matches, lost three matches, and drew nine matches. They won two Test matches and beat Tasmania and Western Australia and losing two Test matches and being beaten by New South Wales.

New Zealand v. South Africa.

1953.

Of the two Test matches played South Africa won 1 match the other being drawn.

First Test.—Wellington (Mar. 6-10). South Africa won by innings and 180 runs. South Africa 524 for 8 (dec.); New Zealand 172 and 172.

Second Test.—Auckland (Mar. 13-17). Drawn. South Africa 377 and 200 for 5 (dec.); New Zealand 245 and 31 for 2.

SERVICES, ETC.

Army v. R.A.F. (Draw). Army 114 and 81 for 7; R.A.F. 167. R.A.F. beat R.N. by 8 wickets. R.A.F. 192 for 8 (dec.) and 149 for 2; R.N. 169 and 170. R.N. beat Army by 89 runs. R.N. 303 for 8 (dec.) and 174 for 3 (dec.); Army 211 for 8 (dec.) and 177.

Schools.—Rugby beat Marlborough by 7 wickets. Marlborough 161 and 119; Rugby 227 and 54 for 5. Eton beat Winchester by 4 wickets. Winchester 156 and 192; Eton 189 for 6 (dec.) and 163 for 6. Tonbridge beat Clifton by 10 wickets. Tonbridge 223 and 10 for 0; Clifton 65 and 165. Oratory beat Beaumont. Beaumont 127 and 105 for 2; Oratory 202 for 2 (dec.). Combined Services beat Public Schools by 103 runs. Combined Services 251 and 253 for 5 (dec.); Public Schools 259 for 6 (dec.) and 142. Cheltenham v. Haileybury (drawn). Cheltenham 139; Haileybury 138 for 7.

Gentlemen v. Players.—Gentlemen beat Players by 95 runs. Gentlemen 129 and 311; Players 123 and 222.

OXFORD AND CAMBRIDGE.

First played 1827. Cambridge have won 48.
Oxford 42, drawn 19.

1949 Cambridge (7 wkts.) (C. 359 and 133 for 3; O. 169 and 322).	C. 165 and 197).
1950 Drawn. (Cambridge 200 and 193 for 7 (dec.); Oxford 169 and 122 for 5).	1952 Drawn. (Oxford 272 and 179 for 9; Cambridge, 408 for 8 (dec.)).
1951 Oxford (21 runs.) (O. 178 and 208; C. 122 and 116; Cambridge 191 and 238 for 8).	1953 Cambridge (2 wkts.) (Oxford 322 and 116; Cambridge 191 and 238 for 8).

Note.—Universities did not play official matches in war years 1915-18 and 1940-45.

ETON AND HARROW.

First played 1805. Played 118. Eton have won 45.
Harrow 37. Drawn 36. One-day matches, 1940-5.

1946 Drawn (E. 313 for 9 dec., 112 for 2 dec. H. 100, 101 for 7).	1950 Drawn (E. 237 and 147; H. 282 for 7 (dec.) and 24 for 5).
1947 Drawn (H. 266 for 5 dec., 122 for 4; E. 394 for 8 dec.).	1951 Drawn (E. 203 and 172 for 4 (dec.); H. 105 and 167 for 9).
1948 Drawn (E. 205, 205 for 8 dec.; H. 160, 209 for 9).	1952 Harrow (7 wkts.) H. 159 and 68 for 3; E. 151 and 73.
1949 Eton (7 wkts. E. 176 and 107 for 3; H. 128 and 151).	1953 Eton (10 wkts. E. 238 and 3 for 0; H. 82 and 158).

BENEFITS 1953.

The following players took benefits during season 1953: A. V. Bedser (Surrey); T. G. Evans (Kent); C. Gladwin (Derbyshire); J. T. Ikin (Lancashire); N. Oldfield and A. E. Nutter (Northamptonshire); R. O. Jenkins (Worcestershire); S. M. Brown (Middlesex); H. T. F. Buse (Somerset); W. E. Jones (Glamorgan); John Langridge (Sussex); E. A. Meads (Nottinghamshire); F. J. Vigar (Essex); and A. E. Wilson (Gloucestershire).

Women's Cricket Association

President, Mrs. P. J. H. Maxwell, M.B.E.; Hon. Secretary, Miss N. Rheinberg, 9 Birkdale Avenue, Pinner, Middlesex.

England 54 and 117 for 2 wickets (decl.).

The Rest, 64 and 112 for 5 wickets.

Miscellaneous Cricket Records.

Highest individual scores, A. E. Stoddart, 485, for Hampstead v. Stoics, 1886; in first-class cricket in England, A. C. MacLaren, 424, for Lancashire v. Somerset, at Taunton, July, 1895; in Australia, D. G. Bradman (Australia), 452 (not out) for N.S.W. v. Queensland, Sydney, 1929-30; in India, B. B. Nimbalkar (Maharashtra v. W. Indian States), Poona, 1948-9, 443 (not out).

Highest team innings.—Australia, Victoria 1,107 v. N.S.W., Melbourne, 1926; England, England 1,903 (for 7 dec.) v. Australia, 1938.

Win.—Victoria beat New South Wales by innings and 656 runs, Dec. 29, 1926.

Runs in a day.—Australia v. Essex, Southend, May 15, 1948, 721.

Smallest totals.—Oxford University (one man absent), 12 v. M.C.C. at Oxford, May, 1877; Northants, 12 v. Gloucester, June 11, 1907.

Highest Aggregate.—Fifth Test, Durban, March, 1939. S. Africa 530 and 481; England 316 and 654 for 5 wickets. 1,981 (35 wkts.). India, Bombay, 651 and 714 for 6 dec. v. Maharashtra 407, 604. Total 2,376 (38 wkts.).

Highest Partnership.—Gul Mahomed (319) and V. S. Hazare (288 not out) made 577 for 4th wicket for Baroda v. Holkar (Mar. 7, 1947). Previous: C. L. Walcott and F. M. Worrell, 574 for Barbados v. Trinidad, 1946. P. Holmes and H. Sutcliffe 555 for Yorks. v. Essex, Leyton, 1932 1st wicket highest.

Most centuries in innings.—Six, Holkar State playing against Mysore, Mar. 1946.

Most centuries in one season.—D. C. S. Compton, 18 (1947); J. B. Hobbs, 16 (1925); W. R. Hammond, 15 (1938); H. Sutcliffe, 14 (1932); D. G. Bradman (1938), C. B. Fry (1901), W. R. Hammond (1933, 7), T. Hayward (1906), E. P. Hendren (1923, 7, 8), C. P. Mead (1928), and H. Sutcliffe (1928, 31), 13 centuries. Six consecutive—C. B. Fry, 1901; D. G. Bradman (Australia), 1938-9; five consecutive Test centuries, E. Weekes, 1949. Total centuries in career—J. B. Hobbs, 197 (175 in Eng.).

Most runs made in a year.—D. C. S. Compton (Middlesex), 3,816 (1947); W. J. Edrich (Middlesex), 3,539 (1947); T. Hayward (Surrey), 3,518 (1906). L. Hutton (Yorks), 3,429 (1949); F. E. Woolley (Kent), 3,352 (1928); H. Sutcliffe (Yorks.) 3,336 (1932).

Most wickets in season.—A. P. Freeman (Kent), 304, 1928, and 298, 1933; T. Richardson (Surrey), 290, 1895.

1,000 runs in May.—W. G. Grace, 1895. W. R. Hammond, 1927. C. Hallows, 1928. D. G. Bradman, 1930, 38. W. J. Edrich, 1938; incl. April, T. Hayward, 1900. In June, L. Hutton, 1,294, 1949. In July.—A. E. Fagg, 1,018, 1938; August.—W. R. Hammond, 1,281, 1936; L. Hutton, 1,050, 1949. Aggregates.—J. B. Hobbs, 61,221; W. G. Grace, 54,896, 2,876 wkts. W. R. Rhodes, 4,188 wkts. Also F. E. Woolley, 58,969; E. P. Hendren, 57,610; W. R. Hammond, 50,408; A. P. Freeman, 3,775 wkts.

Fastest scoring.—P. G. H. Fender for Surrey v. Northamptonshire in 1920, 100 runs in 35 mins.

Double.—J. H. Parks (Sussex), 3,003 runs and 101 wkts., 1937. In match: A. E. Fagg (Kent) v. Essex, 1938, Colchester, 244 and 202 (not out).

Highest batting average in England 115.66, D. G. Bradman (S. Aust.), 1938. In first class games to Sept., 1948, D. G. Bradman's figures were 334 inns., 116 centuries (29 in Tests), 43 not outs, 27,851 runs, 452 Highest score, 95.67 average.

Record Benefit.—C. Washbrook (Lancs.) £14,000 (1948). D. C. S. Compton (Middlesex) £12,200 (1949). W. E. Bowes (Yorks) £8,084 (1947).

Sir D. Bradman received £10,000 for his Testimonial match in Australia, 1948-9.

Wicket Keeping Feats.—R. Pooley 12 wkts. in 1 match. Surrey v. Sussex at the Oval 1868. Caught 8, stumped 4.

A. E. Wilson (Gloucestershire) set up a wicket keeping world record on May 8, 1953, when he held his 10th catch of the match against Hampshire at Portsmouth.

Double centuries in match.—A. E. Fagg (Kent) v. Essex at Colchester, 1938, 224 (1st innings) and 202 not out (2nd innings).

Record wicket Partnerships:—

1st wicket: 555, H. Sutcliffe and P. Holmes (Yorkshire v. Essex), Leyton, 1932.

2nd wicket: 455, B. B. Nimbalkar and K. V. Bhandarrar (Maharashtra v. W. India States), Poona, 1948.

3rd wicket: 445, W. A. Carson and P. E. White (New Zealand v. Otago), Wellington, N. Zealand, 1936-7.

4th wicket: G. Mohamed and V. S. Hazare (Baroda v. Holkar), 1946-7.

5th wicket: 405, D. G. Bradman and S. Barnes (Australia v. England), Sydney, Australia, 1946-7.

6th wicket: 487, G. Headley and C. C. Passallaine (unfinished) (Jamaica v. Lord Tennyson's XI, Kingston, Jamaica, 1931-2).

7th wicket: 344, K. S. Ranjitsinhji and W. Newham (Sussex v. Essex), Leyton, 1902.

8th wicket: 433, V. T. Trumper and A. S. Sims (Australian team v. Canterbury, N. Zealand), Christchurch, 1913-14.

9th wicket: 283, J. Chapman and A. R. Warren (Derbyshire v. Warwickshire), Blackwell, 1910.

10th wicket: 307, A. F. Kippax and J. E. H. Hooker (N.S.W. v. Victoria), Melbourne, 1928-9.

10 wickets in innings.—A. P. Freeman (Kent), 3 times; H. Verity (Yorkshire), 2 times.

OXFORD AND CAMBRIDGE

Principal Events and Winners, 1952-53

The first Cricket Match between Oxford and Cambridge was on June 4, 1827, on Lord's Ground; the result was "unfinished." Annual contest started in 1838.

In Rowing, Oxford and Cambridge met in 1829 at Henley (Hambleton Lock to Henley Bridge, 2½ miles), and Oxford won easily in 14 min. 30 sec. The next match was in 1836 from Westminster to Putney, and Cambridge won in 36 min.; but for several years Henley Regatta was used for the match. The first regularly annual race on the tideway was in 1856. Dead-heat was in 1877.

The Athletic Sports were instituted in 1864, and the first meeting was on Christ Church Cricket Ground. Since 1866 London has been the centre. "Representative Colours" were awarded 1939-45. "Blues" and "half-blues" were awarded again from Oct. 15, 1945. Last blue ribband appeared 1839.

Event	Summary of Results			Results 1952-53

ENGLAND v. SCOTLAND.	g. g.	ASSOCIATION CUP.
1948 England .. 2 to 0		Manchester U. b. Blackpool .. 4-2
1949 Scotland .. 3 to 1		W'hampton W. b. Leicester C. .. 1-0
1950 England .. 1 to 0		Arsenal b. Liverpool .. 2-0
1951 Scotland .. 3 to 2		Newcastle b. Blackpool .. 2-0
1952 England .. 2 to 1		Newcastle b. Arsenal .. 1-0
1953 Draw .. 2 to 2		Blackpool b. Bolton W. 4-3

At the Annual Meeting of the Football League in June 1953 it was stated that the attendances at Football League matches for 1952-53 were 37,249,966. This was 1,865,900 less than in the preceding season. Over the last four seasons the total decline has been more than 4,000,000.

The following clubs were re-elected: 3rd Div. South, Walsall and Shrewsbury; 3rd Div. North, Accrington Stanley and Workington.

Note.—At the Annual Meeting of the Football League in June 1950, it was decided that both sections of Div. III (i.e. Div. III South and Div. III North) should be increased from 22 clubs to 24. On ballot Gillingham and Colchester United were elected to Div. III South and Shrewsbury Town and Scunthorpe United to Div. III North.

This was the first extension of the League since 1923.

LEAGUE COMPETITION, 1952-53.

Div. I.—Arsenal, 54 pts.; Preston North End, 54 pts.

Note.—Arsenal won the 1st Division Championship on goal average over Preston North End—a difference of .099 of a goal separating the sides. This was the seventh time the League Championship has been won by Arsenal—a record.

Relegated: Derby County, 32 pts.; and Stoke City, 34 pts.

Div. II.—Promoted: Sheffield United, 60 pts.; Huddersfield Town, 58 pts. Relegated: Barnsley, 18 pts.; and Southampton, 33 pts.

Div. II (South).—Promoted: Bristol Rovers, 64 pts. Applied for and gained re-election: Walsall and Shrewsbury Town.

Div. III (North).—Promoted: Oldham Athletic, 59 pts. Applied for and gained re-election: Accrington Stanley and Workington.

Scottish League.—Div. A: Champions, Glasgow Rangers, 43 pts.; Div. B: Champions, Stirling Albion, 44 pts.

Irish League.—Glentoran, 33 pts.

League of Ireland.—Shelbourne, 30 pts.

CUP FINALS, ETC., 1952-53.

F.A. CUP.—S.F. Blackpool beat Tottenham Hotspur 2-1; Bolton W. beat Everton 4-3.

F. Blackpool beat Bolton W. 4-3 at Wembley, May 2, 1953 (att. 100,000, £49,900 (Record)).

F.A. AMATEUR.—S.F. Pegasus beat Southall 2-1 (after replay); Harwich and Parkeston beat Walton and Hersham.

F. Pegasus beat Harwich and Parkeston 6-0 at Wembley, April 11, 1953 (att. 100,000). Receipts £29,247 (Amateur Record).

SCOTTISH CUP.—F. Glasgow Rangers beat Aberdeen 1-0 (after replay). Receipts £23,000 (Record).

SCOTTISH LEAGUE CUP.—Dumdee beat Kilmarnock 2-0.

WELSH CUP.—Rhyl beat Chester 2-1.

IRISH CUP.—Linfield beat Coleraine 5-0.

F.A. OF IRELAND CUP.—Cork Athletic beat Evergreen United 2-1.

CORONATION CUP.—Celtic beat Hibernian 2-0.

ARMY CUP.—77th Trg. Regt. (Catterick) beat 28th Bn. R.A.O.C. (Bramley) 3-2.

ARTHUR DUNN CUP.—Old Salopians beat Old Wykehamists 3-1.

AMATEUR CUPS.—

Middlesex Senior: Hounslow Town.

Surrey Senior: Tooting and Mitcham.

Essex Senior: Ilford.

Herts. Senior: Berkhamsted.

Berks and Bucks Senior: Slough Centre.

London Senior: Finchley drew with Walthamstow Avenue (joint holders).

Kent Amateur: Bromley.

UNIVERSITIES.—Oxford University drew with Cambridge University 0-0, at Wembley, March 7, 1953.

LEADING AMATEUR DIVISIONS.

Athenian: Hendon, 42 pts.

Isthmian: Walthamstow Avenue, 44 pts.

Spartan: Ware, 50 pts.

London: Eton Manor, 43 pts.

Corinthian: Carshalton Athletic, 39 pts.

THE UNIVERSITY BOAT RACE

(Putney-Mortlake, 4m. 1f. 180 yds.)

Year	Winner	m. s.	Won by
1938	Oxford	20 30	2 lengths.
1939	Cambridge	19 3	4 lengths.
1946	Oxford	19 54	3 lengths
1947	Cambridge	23 1	10 lengths
1948	Cambridge	17 50	5 lengths (Rec'd.)
1949	Cambridge	18 57	½ length.
1950	Cambridge	20 15	3½ lengths.
1951	Cambridge	20 50	12 lengths.
	(After re-row)		
1952	Oxford	20 23	Canvas (about 10 feet)*
1953	Cambridge	19 54	8 lengths.

*This was the closest verdict ever given in the Boat Race except for the dead-heat in 1877.

Cambridge have won 54 times, Oxford 44, and there has been 1 dead-heat.

The 1954 Boat Race will be rowed on Sat., April 3.

Race Disasters.

1859.—Cambridge sank, Oxford won.

1912.—Cambridge sank at 1 mile, and Oxford shortly after Hammersmith Bridge, Oxford won re-row.

1925.—Oxford sank soon after Hammersmith Bridge and Cambridge paddled home to win.

1951.—Oxford sank after half a mile. Race abandoned because of weather and rowing conditions. Cambridge won the re-row.

CYCLING 1952-53

World Championships. Track (Zurich).

Professional—

Sprint.—A. Van Vliet (Holland).

Pursuit (5 kms.).—S. Patterson (Australia) 6 mins. 26.6 secs.

Motor-paced (62½ miles).—A. Verschueren (Belgium), 1 hr. 26 mins. 30 secs.

Amateur—

Sprint.—M. Morettini (Italy).

Pursuit (4 kms.).—G. Messina (Italy), 5 mins. 7 secs.

Road (Lugano)—

169 miles.—F. Coppi (Italy), 7 hr. 30 mins. 59 secs.

Amateur—

122½ miles.—R. Filippi (Italy), 4 hr. 59 mins. 19 secs.

British Champions (Amateur)

Men:

Sprint.—C. Peacock (Tooting B.C.).

Juniors' Sprint.—M. Hasler (Bognor Regis C.C.).

10 miles.—M. Ward (Polytechnic C.C.).

50 miles (tandem-paced).—D. Fkming (Portsmouth C.C.).

1,000 metres tandem.—P. Brotherton, E. Thomson (East Mids. Clarion C. and A.C.).

Individual Pursuit.—K. Mitchell (Willesden C.C.).

Club Team Pursuit.—Norwood Paragon C.C.

880 yards grass.—J. Tighe (Scunthorpe Poly. C.C.).

5 miles grass.—B. Sandy (Somerset R.C.).

Massed Start.—E. Gerrard (Barnet C.C.).

Massed Start (Juniors').—H. Reynolds (Solihull C.C.).

Women:

Sprint.—M. Beevers (Brodsworth R.C.C.).

880 yards grass.—M. Beevers (Brodsworth R.C.C.).

Individual Pursuit.—D. M. Franks (Apollo C.C.).

English Road Time-Trial Champions (R.T.T.C. Regulations).

Men:

25 miles.—S. F. Higginson (Halsowen A. & C.C.), 57 mins. 29 secs.

50 miles.—P. H. Jackson (Dixie Wheelers), 2 hrs. 4 mins. 30 secs.

100 miles.—E. Britton (Yorkshire R.C.), 4 hrs. 16 mins. 57 secs.

12 hours.—B. W. Appleby (Kentish Wheelers), 257.14 miles.

24 hours.—P. E. A. Carter (South Lancs. R.C.), 450.25 miles.

Women:

25 miles.—J. Harris (Apollo C.C.), 1 hr. 4 mins. 16 secs.

50 miles.—C. Brown (South Shields Victoria C.C.), 2 hrs. 18 mins. 36 secs.

100 miles.—D. M. Franks (Apollo C.C.), 4 hrs. 37 mins. 4 secs.

WORLD RECORDS

(As at Dec. 5, 1952)

Open Air Tracks

Professional Unpaced Standing Start.

1 km.—R. H. Harris, 1 min. 9.8 secs.

5 kms.—F. Battesini, 6 mins. 21 secs.

10 kms.—M. Archambaud, 12 mins. 53 secs.

20 kms.—M. Archambaud, 25 mins. 59.6 secs.

1 hour.—F. Coppi, 45 kms. 798 m.

Amateur Unpaced Standing Start.

1 km.—M. Morettini, 1 min. 10.6 secs.

5 kms.—Aureggi, 6 mins. 32 secs.

10 kms.—Aureggi, 13 mins. 03.4 secs.

20 kms.—Aureggi, 27 mins. 13.8 secs.

1 hour.—Aureggi, 43 kms. 905.33 m.

Professional Motor-paced.

1 hour.—R. Oubron, 70 km. 860 m.

Covered Tracks

Professional Unpaced Standing Start

1 km.—R. H. Harris, 1 min. 09 secs.

Professional Motor-paced.

100 kms.—J. Lohmuller, 1 hr. 29 mins. 37.2 secs.

1 hour.—J. Goutorbe, 71 kms. 268 m.

British.

½ mile (f.s.).—C. Peacock, 24.4 secs.

Professional:

½ mile (s.s.).—R. H. Harris, 27.7 secs.

½ mile (f.s.).—R. H. Harris, 24.0 secs.

½ mile (s.s.).—R. H. Harris, 55.0 secs.

½ mile (f.s.).—R. H. Harris 51.0 secs.

1 mile (s.s.).—W. J. Bailey, 2 mins. 5.6 secs.

1 mile (f.s.).—S. Patterson, 1 min. 57.6 secs.

BRITISH MOTOR CYCLE SPEEDWAY, 1953.

England v. Australia.

1st Test Match (Norwich).—Australia beat England 62-46.

2nd Test Match (Wembley).—England beat Australia 57-51.

3rd Test Match (Birmingham).—England beat Australia 61-47.

England regained the speedway "Ashes" for the first time since 1950.

World Championship.—1, F. Williams (Wembley), 14 pts.; 2, S. Waterman (Harringay), 13 pts.; 3, G. Marden (Norwich), 12 pts.

MOTOR CYCLING, 1953

Senior T. T., Isle of Man.—1st, R. Amm (Norton), 2 hr. 48 m. 51 s., 93.85 m.p.h.; 2nd, J. Brett (Norton), 93.74 m.p.h.; 3rd, H. Armstrong (Giler), 93.62 m.p.h.

Junior T. T., Isle of Man.—1st, R. Amm (Norton), 2 hr. 55 m. 5 s., 90.52 m.p.h.; 2nd, K. Kavanagh (Norton), 90.44 m.p.h.; 3rd, F. Anderson (Moto Guzzi), 89.41 m.p.h.

Lightweight T.T., Isle of Man.—1st, F. Anderson (Moto Guzzi), 1 hr. 46 m. 53 s., 84.73 m.p.h.; 2nd, W. Haas (N.S.U.), 84.52 m.p.h.; 3rd, S. Wunsche (I.D.K.W.), 81.34 m.p.h.

Clubman's T.T., Isle of Man.

Senior.—R. D. Keeler (Norton), 84.14 m.p.h.

Junior.—D. T. Powell (B.S.A.), 80.17 m.p.h.

Ultra Lightweight.—R. L. Graham (Agusta), 1 hr. 27 m. 19 s., 77.79 m.p.h.

Ulster Grand Prix (Belfast) (247 miles).—1st, K. Kavanagh (Norton), 2 hr. 28 m. 38 s., 89.81 m.p.h.; 2nd, G. Duke (Giler), 89.28 m.p.h.; 3rd, J. Brett (Norton).

Manx Senior Grand Prix.—1st, D. Parkinson (Norton), 2 h. 31 m., 28.2 s., 89.68 m.p.h.; 2nd, R. Keeler (Norton), 2 h. 31 m. 25 s., 89.07 m.p.h.; 3rd, D. Ennett (Matchless), 86.52 m.p.h.

Manx Junior Grand Prix.—1st, F. M. Fox (Norton), 2 h. 40 m. 18.45 s., 84.73 m.p.h.; 2nd, D. Christian (Norton), 83.81 m.p.h.; 3rd, D. T. Powell (Norton), 83.59 m.p.h.

Belgian Grand Prix.—F. Anderson (Moto Guzzi) 56 m. 1s., 103 m.p.h.

MOTOR RACING

Ulster Trophy.—1st, M. Hawthorn (Ferrari), 1 hr. 12 m. 1.6 s., 86.49 m.p.h.; 2nd, K. Wharton (Cooper-Bristol), 1 hr. 13 m. 5 s., 85.04 m.p.h.; 3rd, R. Baird (Ferrari), 1 hr. 13 m. 48.2 s., 84.40 m.p.h.

Empire Trophy Race (Isle of Man).—1st, R. Parnell (Aston Martin), 53 m. 21 s., 73.96 m.p.h.; 2nd, K. Wharton (Frazer-Nash), 53 m. 39 s., 72.10 m.p.h.; 3rd, H. Ruesch (Ferrari), 54 m. 16 s., 72.64 m.p.h.

British Grand Prix (Silverstone) (263 miles).—1st, A. Ascari (Ferrari), 92.97 m.p.h.; 2nd, J. M. Fangio (Maserati), 92.43 m.p.h.; 3rd, G. Farina (Ferrari), 90.80 m.p.h.

International Sports Car Race (Silverstone).—1st, R. Parnell (Aston Martin), 89.41 m.p.h.; 2nd, R. Salvadori (Aston Martin), 88.84 m.p.h.; 3rd, P. Collins (Aston Martin), 88.82 m.p.h.

Daily Telegraph International Trophy Meeting.

Challenge Trophy.—1st, D. Parker (Kieft), 70.42 m.p.h.

Clchester Cup (Goodwood).—1st, E. de Graffenried (Maserati), 70.48 m.p.h.

Richmond Trophy (Goodwood).—1st, K. Wharton (B.R.M.), 90.47 m.p.h.

Mille Miglia (Italy, 1,512 kilos).—1st, G. Marzotto (Ferrari), 10 hr. 37 m. 19 s., 88 m.p.h.; 2nd, J. M. Fangio (Alfa Romeo); 3rd, F. Bonetto (Lancia).

Argentine Grand Prix.—1st, A. Ascari.

Belgian Grand Prix.—1st, A. Ascari (Ferrari), 115 m.p.h.

Rheims Grand Prix (310 miles).—1st, M. Hawthorn (Ferrari), 2 hr. 44 m. 18.6 s., 113 m.p.h.

Swiss Grand Prix.—1st, A. Ascari (Ferrari), 294 miles in 3 hr. 1 m. 31 s., 97 m.p.h.

German Grand Prix.—1st, G. Farina (Ferrari), 83.88 m.p.h.

Dutch Grand Prix.—1st, A. Ascari, 81 m.p.h.

Ulster Tourist Trophy.—1st, P. Collins and P. Griffith (Aston Martin), 9 h. 37 m. 12 s., 81.71 m.p.h.; 2nd, R. Parnell and E. Thompson (Aston Martin), 9 h. 40 m. 35 s., 81.24 m.p.h.; 3rd, K. Wharton and C. Robb (Frazer-Nash), 9 h. 42 m. 52 s., 77.21 m.p.h.

Goodwood Trophy.—1st, M. Hawthorn (Ferrari), 92.7 m.p.h.

MEMORABLE FLIGHTS

—1952—

(Feb. 18)—Canberra twin-jet bomber (Sq.-Ldr. L. C. E. De Vigne)—London Airport to Castel Benito, Tripoli (1,451 miles), 2 hr. 41 m. 49.5 s. (average speed 538.13 m.p.h.).

(Mar. 16)—Canberra jet bomber—England to Darwin, Australia, 20 h. 20 m. flying time.

(May 3-4)—Inaugural scheduled trip of B.O.A.C. Comet jet air liner, London to Johannesburg (6,724 miles), 23 h. 38 m.

(May 5-6)—Return flight 23 h. 43 m.

(May 10-11)—R.A.A.F. Canberra bomber—Lyncham, Wilts, to Melbourne, 23 h. 5 m. flying time.

(July 10)—Vickers Supermarine Swift (Fl.-Lt. D. W. Morgan)—London to Brussels (200 miles), 18 m. 3.33 s.

(Aug. 26)—Canberra jet bomber (Wing-Cdr. R. P. Beaumont)—Aldergrove, Northern Ireland, to Gander, Newfoundland and back, 10 h. 3 m. 29.28 s. (flying time 7 h. 59 m.), a record; return flight in 3 h. 25 m. 18 s. also a record.

(Sept. 25)—Canberra jet bomber (Air Vice-Marshal D. A. Boyle)—Binbrook, Lincs., to Malta and back (2,034 miles), 6 h. 5 m. flying time.

(Sept. 28)—Canberra jet bomber (Wing-Cdr. H. P. Connolly)—London Airport to Nairobi (4,479 miles), flying time 9 h. 55 m. 16 s. (average speed 427.3 m.p.h.).

(Oct. 3)—Return flight, Nairobi to Benson, Oxfordshire, flying time 9 h. 46 m. (average speed 456 m.p.h.).

—1953—

(Jan. 22)—B.E.A. Viscount (Capt. A. S. Johnson)—London Airport to Cologne (331 miles), 70 m. 17 s.

(Jan. 27)—Ministry of Supply Canberra jet—London Airport to Karachi (3,921 miles), 8 h. 52 m. 28 s.; and London Airport to Darwin, Jan. 27-28 (8,608.5 miles), 22 h. 21 s. (flying time: 19 h. 11 m.).

(Apr. 3-5)—B.O.A.C. Comet airliner, first commercial flight London to Tokyo, 36 h.; return flight, Apr. 5-7, 38 h. 52 m. (both ways, 3d. 20 h. 22 m.).

(May 4)—Canberra bomber (Wing-Cdr. W. F. Gibb)—altitude record, 63,658 ft.

(May 5)—de Havilland Comet (Capt. John Cunningham)—Hatfield to Cairo (2,182 miles)—4 h. 35 m.

(June 5th)—Canberra jet bomber, Warton, Lancs., to Gander, Newfoundland (2,260 miles)—4 h. 26 m.

(July 5)—Supermarine Swift fighter (Lieut.-Cdr. M. Lithgow)—London Airport to Le Bourget, 19 m. 5.6 s.; return flight, 19 m. 14.3 s.

(Sept. 7)—Hawker-Hunter jet (Squad.-Leader Neville Duke)—new speed record over three-kilometre course near Littlehampton—average of 4 runs 727.6 m.p.h.

(Sept. 19)—Hawker-Hunter jet (Squad.-Leader Neville Duke)—new record over 100 kilometer closed circuit near Dunsfold, Surrey—709.2 m.p.h.

SEASONABLE AND UNSEASONABLE FISH

The following table shows the periods when the different kinds of edible fish mostly in use are "in season" and "out of season."

The letter *p* signifies that the fish are then

in their prime or most plentiful; the letter *x* signifies that the fish may be obtained, but are not at their best; the letter *c* signifies that it is "close-time" as fixed by statute.

(a) This is for sea crayfish (or crawfish). River crayfish can be obtained in the summer and autumn. It is illegal to take fresh-water crayfish from March to June.

(b) Foreign oysters can be sold in the close season, and are to be had almost all through the year, even though they have been laid down in English beds for temporary storage.

CLOSE TIMES FOR GAME

In each case the dates are inclusive:—

Black Game—Dec. 11 to Aug. 19 (Aug. 31 in Somerset, Devon, and New Forest).

* *Grouse*—Dec. 11 (Dec. 10, Scotland) to Aug. 11.

* *Partridge*—Feb. 2 to Aug. 31.

* *Pheasant*—Feb. 2 to Sept. 30.

* *Plumage*—(Scotland only) Dec. 11 to Aug. 11.

Wild Duck and Wild Geese—Feb. 1 to Aug. 11.

It is also unlawful (in England and Wales) to kill the game marked * on a Sunday or Christmas Day.

In England and Wales, hares, rabbits, woodcock, snipe, quail, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those laws. In Scotland the same remarks apply to deer and hares and to the first four birds. The

(d) In the close season, salmon from the Netherlands, and also from certain British rivers where net fishing is permitted later in the year than usual, are largely sold.

(e) In normal times, for the first six months, the bulk of our London supply of shrimps comes from the Netherlands, but Dutch shrimps are far inferior to the English, which are plentiful from July to Dec.

close-time for all these birds is, under the Wild Birds' Protection Acts, 1880 to 1939, from March 2 to July 31, both inclusive. Subject to local orders, this close-time applies to all wild birds throughout Great Britain.

HUNTING AND GROUND GAME

There is no statutory close-time for fox-hunting or rabbit-shooting, nor for deer nor hares; but by an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March 1 to July 31 inclusive under a penalty of a pound. The First of November is the recognized date for the opening of the fox-hunting season, which continues till the following April. Other-hunting lasts from mid-April to mid-September. The period for deer-hunting or stalking varies from about August 12 to October 12 for stags, and from November 10 to the end of March for hinds.

Glasgow (1873), 201-203 Albion Street, Glasgow.
Chief Officer, W. McCollum.
- SALVATION ARMY, THE.—Founded by General William Booth (b. 1829, d. 1912) in July, 1865, in the East of London. After the work had spread to many English cities under the name of the Christian Mission, it took, in 1878, its present name and adopted a military plan of organization, with a uniform and other distinctive features. From the early 'eighties it spread to many parts of the world, and at the death of its Founder was established in 59 countries. Since 1890, following the publication of "In Darkest England and the Way Out," written by the first General, the Salvation Army has added social work of a varied and comprehensive character to the evangelistic work with which it began, and which remains the foundation and principal feature of its activities. In December, 1951, the number of Officers, Cadets and Employees was 44,825 Local Officers, Bandsmen, Songsters and Corps Cadets (unpaid), 224,698, languages used 81, Corps and Outposts 16,897. Social Centres and Agencies 1,739, including 409 Shelters and Cheap Food Depots, 239 Industrial Homes, 69 Employment Bureaux, 8 ex-prisoners' Homes, 268 Homes for Women and Children, 12 Farms, 157 Slum Posts, 926 Day and Industrial Schools, 106 Hospitals, Clinics and Dispensaries, 108 Eventide Homes. Balance-sheets and statements of account relating to the General Funds or to the Social Funds can be obtained, post free, from 113 Queen Victoria Street, E.C.4.—*GENERAL*, Albert Orsborn, C.B.E.; b. 1886; elected General, May 9, 1946; assumed Command June 21, 1946.

ZOOLOGICAL SOCIETY OF SCOTLAND, ROYAL, Corstorphine Road, Edinburgh, 12.—*Sec.*, Donald Bowles, B.Sc.

INDUSTRIAL RESEARCH ASSOCIATIONS

A notable development in modern industry is the growth in numbers and importance of Industrial Research Associations and their increasing influence on the scientific and economic life of the country. The total expenditure of these Associations in 1951 was about £3,550,000 per annum, of which £1,330,000 was provided by the Department of Scientific and Industrial Research and the remainder by subscriptions of individual members.

The Government Scheme for Co-operative Industrial Research was launched by the Department of Scientific and Industrial Research in 1918. Its aim was to stimulate the industries of the United Kingdom to undertake co-operative research as a means of increasing their efficiency.

Research Associations formed under this scheme are registered companies, limited by guarantee of a nominal sum and working without the division of profits in the form of dividends. To assist the formation of such Associations the Board of Trade and the Department of Scientific and Industrial Research have drawn up a model Memorandum and Articles of Association, to which Research Associations under the scheme conform in all essential points.

The income of the Research Associations is derived from subscriptions from their individual members, supplemented in most cases by substantial grants from the Government, through the Department of Scientific and Industrial Research.

The Research Associations are autonomous bodies free to determine their own policy for the development of their research programmes and the use to be made of the results of their research. Membership is open to any British firms in the particular industry, subject to the approval of the Council of the Research Associations.

There are now 41 Research Associations established under the scheme, covering most of the principal industries of the country, as follows:—

Baking.

BRITISH BAKING INDUSTRIES RESEARCH ASSOCIATION, Baking Industries Research Station, Chorleywood, Herts.—*Dir.* J. B. M. Coppock, Ph.D.

Boots and Shoes.

BRITISH BOOT, SHOE AND ALLIED TRADES RESEARCH ASSOCIATION, Satra House, Rockingham Rd., Kettering.—*Dir.* H. Bradley, C.B.E.

Cast Iron.

BRITISH CAST IRON RESEARCH ASSOCIATION, Bordesley Hall, Alvechurch, Birmingham.—*Dir.* Dr. J. G. Pearce.

Ceramics.

BRITISH CERAMIC RESEARCH ASSOCIATION, Queen's Road, Penkhull, Stoke-on-Trent.—*Dir.*, A. T. Green, O.B.E., D.Sc.

Coal.

BRITISH COAL UTILISATION RESEARCH ASSOCIATION, Randalls Rd., Leatherhead, Surrey.—*Dir.* Gen. D. T. A. Townend, C.B.E., D.Sc., Ph.D.

Coke.

BRITISH COKE RESEARCH ASSOCIATION, 74 Grosvenor Street, W.1.—*Dir.* G. W. Lee.

Cotton.

BRITISH COTTON INDUSTRY RESEARCH ASSOCIATION, Shirley Institute, Didsbury, Manchester.—*Dir.* F. C. Toy, C.B.E., D.Sc.

Cutlery.

CUTLERY RESEARCH COUNCIL, Light Trades House, Melbourne Avenue, Sheffield, 10.—*Dir.*, C. N. Kingston, M.B.E.

Electrical.

BRITISH ELECTRICAL AND ALLIED INDUSTRIES RESEARCH ASSOCIATION, Thorncroft Manor, Dorking Road, Leatherhead, Surrey.—*Dir.* S. Whitehead, D.Sc., Ph.D.

Felt.

BRITISH HAT AND ALLIED FELTMAKERS RESEARCH ASSOCIATION, Stanley House, Manchester Rd., Fairfield, Droylsden, Manchester.—*Dir.* T. Barr, Ph.D.

Flour.

RESEARCH ASSOCIATION OF BRITISH FLOUR-MILLERS, Cereals Research Station, Old London Rd., St. Albans, Herts.—*Dir.* T. Moran, C.B.E., D.Sc., Ph.D.

Food Manufacturing.

BRITISH FOOD MANUFACTURING INDUSTRIES RESEARCH ASSOCIATION, Randalls Road, Leatherhead, Surrey.—*Dir.* F. H. Banfield, Ph.D.

Fruit and Vegetable Canning.

FRUIT AND VEGETABLE CANNING AND QUICK FREEZING RESEARCH ASSOCIATION, Chipping Campden, Glos.—*Dir.* F. Hirst.

Furniture.

RESEARCH COMMITTEE OF THE FURNITURE DEVELOPMENT COUNCIL, 11 Adelphi Terrace, Robert Street, W.C.2.—*Dir.* J. C. Pritchard.

Gelatine and Glue.

BRITISH GELATINE AND GLUE RESEARCH ASSOCIATION, 22 Dalmeny Avenue, Holloway, N.7.—*Dir.* A. G. Ward.

Hosiery.

HOSIERY AND ALLIED TRADES RESEARCH ASSOCIATION, Thorneywood House, 4 First Avenue, Sherwood Rise, Nottingham.—*Dir.* D. Starkie, Ph.D.

Hydromechanics.

BRITISH HYDROMECHANICS RESEARCH ASSOCIATION, Netteswell Road, Harlow, Essex.—*Dir.* L. E. Prosser, A.K.C., B.Sc.

I.C. Engines.

BRITISH INTERNAL COMBUSTION ENGINE RESEARCH ASSOCIATION, 111-112 Buckingham Avenue, Trading Estate, Slough.—*Dir.* Eng. Rear-Adm. D. J. Hoare, C.B.

Iron and Steel.

BRITISH IRON AND STEEL RESEARCH ASSOCIATION, 11 Park Lane, W.1.—*Dir.* Sir Charles Goodeve, O.B.E., D.Sc., F.R.S.

Jewellery.

DESIGN AND RESEARCH CENTRE FOR THE GOLD, SILVER AND JEWELLERY INDUSTRIES, Goldsmiths' Hall, Foster Lane, E.C.2.—*Gen. Sec.*, Miss M. de V. Hunt.

Jute.

BRITISH JUTE TRADE RESEARCH ASSOCIATION, Kinnoull Road, Kingsway West, Dundee, Scotland.—*Dir.* H. Corteen.

Lace.

LACE RESEARCH ASSOCIATION, Glaisdale Drive, Bilborough, Nottingham.—*Dir.* John C. MacCallum.

Launders.

BRITISH LAUNDERERS' RESEARCH ASSOCIATION, Hill View Gardens, Hendon, N.W.4.—*Dir.* F. C. Harwood.

Leather.

BRITISH LEATHER MANUFACTURERS' RESEARCH ASSOCIATION, Milton Park, Egham, Surrey.—*Dir.* H. Phillips, D.Sc.

Linen.

LINEN INDUSTRY RESEARCH ASSOCIATION, Lambeg, Co. Antrim.—*Dir.* A. J. Turner, C.B.E., M.A., D.Sc.

Marine Engineering.

PARSONS AND MARINE ENGINEERING TURBINE RESEARCH AND DEVELOPMENT ASSOCIATION, Pamestrada Research Station, Wallsend, Northumberland.—*Dir.* T. W. F. Brown, D.Sc.

Motor.

MOTOR INDUSTRY RESEARCH ASSOCIATION, Lindley, nr. Nuneaton, Warwickshire.—*Dir.*, A. Fogg.

Non-Ferrous Metals.

BRITISH NON-FERROUS METALS RESEARCH ASSOCIATION, Euston St., N.W.1.—*Dir. and Sec.*, G. L. Bailey, C.B.E.

Paint.

RESEARCH ASSOCIATION OF BRITISH PAINT, COLOUR AND VARNISH MANUFACTURERS, Waldegrave Rd., Teddington, Middlesex, *Dir.* L. A. Jordan, C.B.E., D.Sc.

Paper.

BRITISH PAPER AND BOARD INDUSTRY RESEARCH ASSOCIATION, Welcomes Rd., Kenley, Surrey.—*Dir.* N. R. Hood, Ph.D.

Printing and Packaging.

PRINTING, PACKAGING AND ALLIED TRADES RESEARCH ASSOCIATION, Patra House, Randalls Rd., Leatherhead, Surrey.—*Dir.* G. L. Riddell, Ph.D.

Production Engineering.

PRODUCTION ENGINEERING RESEARCH ASSOCIATION OF GREAT BRITAIN, Staveley Lodge, Melton Mowbray, Leics.—*Dir.* D. F. Galloway, Ph.D.

Rayon.

BRITISH RAYON RESEARCH ASSOCIATION, 58 Whitworth St., Manchester 2. Laboratories: Barton Dock Rd., Urmston, nr. Manchester.—*Dir.* J. Wilson, M.C.

Rubber.

RESEARCH ASSOCIATION OF BRITISH RUBBER MANUFACTURERS, Shawbury, Shrewsbury, Shropshire.—*Dir.* J. R. Scott, Ph.D.

Scientific Instruments.

BRITISH SCIENTIFIC INSTRUMENT RESEARCH ASSOCIATION, 20 Queen Anne St., W.1.—*Dir.* A. J. Philpot, C.B.E.

Shipbuilding.

BRITISH SHIPBUILDING RESEARCH ASSOCIATION, 5 Chesterfield Gdns., Curzon St., W.1.—*Dir.* S. L. Smith, C.B.E., D.Sc.

Springs.

COIL SPRING FEDERATION RESEARCH ORGANISATION, 40 Grosvenor Gardens, S.W.1.—*Dir.* R. Genders, M.B.E., D.Met.

Tar.

COAL TAR RESEARCH ASSOCIATION, Oxford Road, Gomersal, nr. Leeds.—*Dir.* D. McNeill, Ph.D.

Welding.

BRITISH WELDING RESEARCH ASSOCIATION, 29 Park Crescent, W.1.—*Dir.* H. G. Taylor, D.Sc.

Whiting.

BRITISH WHITING FEDERATION RESEARCH COUNCIL, 245 Amphil Road, Bedford.—*Dir.* G. E. Bessey.

Wool.

WOOL INDUSTRIES RESEARCH ASSOCIATION, Tordiron, Headingley, Leeds, 6.—*Dir.* A. B. D. Cassie, D.Sc., Ph.D.

AGRICULTURAL RESEARCH INSTITUTES

The following research institutes are under the direct control of the Agricultural Research Council (see pp. 376-7):—

Field Station, Compton, near Newbury, Berks—*Director*, W. S. Gordon, C.B.E. Ph.D., M.R.C.V.S., F.R.S.E.; Unit of Insect Physiology, Dept. of Zoology, Cambridge—*Director*, V. B. Wigglesworth, C.B.E., M.D., F.R.S.; Institute of Animal Physiology, Babraham Hall, Babraham, Cambs.—*Director*, I. de Burgh Daly, F.R.S.; Animal Breeding Research Organisation, Glenbourne, 6 South Oswald Road, Edinburgh, 9—*Director*, H. P. Donald, D.Sc., Ph.D., F.R.S.E.; Plant Virus Research Unit, Molteno Institute, Cambridge—*Director*, K. M. Smith, D.Sc., Ph.D., F.R.S.; Poultry Research Centre, King's Buildings, West Mains Road, Edinburgh, 9—*Director*, A. W. Greenwood, D.Sc., Ph.D., F.R.S.E.; Unit of Animal Reproduction, School of Agriculture, Cambridge—*Hon. Director*, J. Hammond, C.B.E., D.Sc., F.R.S.; Potato Genetics Station, Huntingdon Road, Cambridge—*Director*, K. S. Dodds, D.Sc., Ph.D.; Potato Storage Investigation Team, School of Agriculture, University of Nottingham, Sutton Bonington, Loughborough, Leics.—*Officer in Charge*, A. R. Wilson, M.Sc., Ph.D.; Unit of Experimental Agronomy, Department of Agriculture, University of Oxford—*Hon. Director*, Prof. G. E. Blackman, M.A.; Unit of Biometrical Genetics, Department of Genetics, University of Birmingham—*Hon. Director*, Prof. K. Mather, D.Sc., Ph.D., F.R.S.; Unit of Microbiology, Department of Bacteriology, The University, Sheffield, 10—*Hon. Director*, S. R. Elsdon, Ph.D.; Unit of Soil Physics, School of Agriculture, Cambridge—*Director*, E. C. Childs, Ph.D., Sc.D.; Unit of Plant Nutrition (Micro-Nutrients), Long Ashton, Bristol—*Hon. Director*, Prof. T. Wallace, C.B.E., M.C., D.Sc., F.R.S. Unit of Embryology, Univ. College of N. Wales, Bangor.—*Hon. Director*, Prof. F. W. Rogers Bramwell, D.Sc., Ph.D., F.R.S.

GRANT-AIDED RESEARCH INSTITUTES

In addition to the above there are other important institutes which, while retaining their own individuality, are financed wholly or in the main by grants made by the State. Most of these Institutes have governing bodies of their own to which they are directly responsible and together they account for much of the agricultural research being carried out in Great Britain. The maintenance grants are borne on the Votes of the Ministry of Agriculture and Fisheries and the Department of Agriculture for Scotland and these Departments seek the advice of the Agricultural Research Council in the consideration of research programmes and estimates.

The Agricultural Research Institutes have evolved in various ways, in many instances through the sponsorship of members of the agricultural community who desired scientific knowledge in relation to the branch of the industry with which they were concerned, and to one of them, Rothamsted Experimental Station, belongs the distinction of being the oldest agricultural research institute in the world.

(a) Research affecting Plants and Soils

Soil Science and Plant Pathology

Rothamsted Experimental Station, Harpenden, Herts.—*Director*, Sir William Gammie Ogg, Ph.D., F.R.S.E.

Macaulay Institute for Soil Research Craigiebuckler, Aberdeen.—*Director*, D. N. McArthur, C.B.E., D.Sc., Ph.D., F.R.I.C., F.R.S.E.

Plant Breeding

Scottish Society for Research in Plant Breeding, Craigs House, Corstorphine, Edinburgh.—*Director*, J. W. Gregor, D.Sc., Ph.D., F.L.S.

Plant Breeding Institute, School of Agriculture, Cambridge.—*Director*, G. D. H. Bell, Ph.D.

Welsh Plant Breeding Station, Agricultural Research Building, Pengllys, Aberystwyth.—*Director*, Prof. E. T. Jones, M.Sc.

Horticulture

John Innes Horticultural Institution, Bayfordbury, Hertford.—*Director*, (vacant).

Horticultural Research Station, East Malling, Nr. Maidstone, Kent.—*Director*, F. R. Tubbs, Ph.D.

Agricultural and Horticultural Research Station, Long Ashton, Bristol.—*Director*, Prof. T. Wallace, C.B.E., M.C., D.Sc., F.R.S.

Plant Physiology

Research Institute in Plant Physiology, Imperial College of Science and Technology, Prince Consort Road, S.W.7.—*Director*, Professor F. G. Gregory, D.Sc., F.R.S.

Vegetables

Vegetable Research Station, Wellesbourne, Warwickshire.—*Director*, J. Philp, Ph.D., F.L.S.

Grassland

Grassland Research Institute, Hurley, nr. Maidenhead, Berks.—*Director*, William Davies, D.Sc.

Glasshouse Crops

Experimental and Research Station, Cheshunt, Waltham Cross, Herts.—*Director*, W. F. Bewley, C.B.E., D.Sc. (A new station is being set up at Toddington, nr. Littlehampton, Sussex.)

(b) Research affecting Animals

Animal Diseases

Animal Diseases Research Association, Moredun Institute, Gilmerton, Edinburgh.—*Director*, J. Russell Greig, C.B.E., Ph.D., M.R.C.V.S., F.R.S.E.

Foot and Mouth Disease Research Station, Pirbright, Surrey.—*Director*, I. A. Galloway, D.Sc., M.R.C.V.S.

Dairying

National Institute for Research in Dairying, Shinfield, nr. Reading.—*Director*, Professor H. D. Kay, C.B.E., D.Sc., Ph.D., F.R.S.

Hannan Dairy Research Institute, Kirkhill, Ayr.—*Director*, J. A. B. Smith, D.Sc., Ph.D., F.R.S.E.

Nutrition

Rowett Research Institute, Bucksburn, Aberdeen.—*Director*, D. P. Cuthbertson, M.D., D.Sc., F.R.S.E.

Poultry

Poultry Genetics Research Station, School of Agriculture, Cambridge.—*Director*, M. S. Pease.

(c) Research on Agricultural Engineering

National Institute of Agricultural Engineering, Wrest Park, Silsoe, Beds.—*Director*, W. H. Cashmore.

Scottish Agricultural Machinery Testing Station, Howden, Mid-Calder, Midlothian.—*Director*, W. J. West.

TRADES UNIONS

A list of the 183 Trades Unions affiliated to the Trades Union Congress in 1953-54. The number of members of each Union is shown in parenthesis.

ACTORS' EQUITY ASSOCIATION, BRITISH (10,250).—*Sec.*, G. Sandison, 8 Harley Street, W.1.

AGRICULTURAL WORKERS, NATIONAL UNION OF (135,000).—*Sec.*, Harold Collison, 308 Gray's Inn Road, W.C.1.

ASPHALT WORKERS, THE AMALGAMATED UNION OF (2,500).—*Sec.*, F. V. Jenkin, 82 Newington Causeway, S.E.1.

ASSURANCE WORKERS, NATIONAL AMALGAMATED UNION OF LIFE (5,010).—*Sec.*, W. B. Hannaford, 11 Mauldeth Road, Withington, Manchester, 20.

BAKERS, CONFECTIONERS AND ALLIED WORKERS, AMALGAMATED UNION OF OPERATIVE (28,300).—*Sec.*, A. E. Halliday, Union House, 8 Guilford Street, W.C.1.

BAKERS, CONFECTIONERS, BISCUIT BAKERS AND BAKERY WORKERS, SCOTTISH UNION OF (15,658).—*Sec.*, W. Mowbray, 5 Burnbank Gardens, Glasgow, N.W.

BAKERS' UNION, LONDON JEWISH (85).—*Sec.*, S. Lever, Circle House, 22 Alie Street, E.1.

BANK EMPLOYEES, NATIONAL UNION OF (36,879).—*Gen. Sec.*, T. G. Edwards, 28 Old Queen Street, S.W.1.

BASKET, CANE, WICKER AND FIBRE FURNITURE MAKERS OF GREAT BRITAIN AND IRELAND, THE NATIONAL UNION OF (439).—*Sec.*, J. Farman, 12 Sandford Road, Moseley, Birmingham, 13.

BEAMERS, TWISTERS AND DRAWERS (HAND AND MACHINE), AMALGAMATED ASSOCIATION OF (3,908).—*Sec.*, H. Earnshaw, O.B.E., 21 Clayton Street, Blackburn.

BEDSTEAD WORKERS' ASSOCIATION (311).—*Sec.*, R. Eastwood, 17 Stafford Street, Birmingham, 4.

BLACKSMITHS, FARRIERS AND AGRICULTURAL ENGINEERS, AMALGAMATED SOCIETY OF (679).—*Sec.*, H. E. Cooper, 42 Court Road, Wolverhampton.

- BLACKSMITHS' FORGE AND SMITHY WORKERS' SOCIETY, ASSOCIATED (11,233).—***Sec.*, W. J. Michael, 177 Hill Street, Glasgow, C.3.
- BLASTFURNACEMEN, ORE MINERS, COKE WORKERS AND KINDRED TRADES, THE NATIONAL UNION OF (20,945).—***Sec.*, J. O'Hagan, 93 Borough Road West, Middlesbrough.
- BLIND OF GREAT BRITAIN AND IRELAND, NATIONAL LEAGUE OF THE (5,987).—***Sec.*, T. H. Smith, M.B.E., 262 Langham Road, N.15.
- BOILERMAKERS AND IRON AND STEEL SHIPBUILDERS' SOCIETY, UNITED (82,977).—***Sec.*, E. J. Hill, Lifton House, Eslington Road, Newcastle-on-Tyne, 2.
- BOOT AND SHOE MAKERS AND REPAIRERS, AMALGAMATED SOCIETY OF (1,200).—***Sec.*, H. Ainsworth, 139 Tulketh Brow, Preston.
- BOOT AND SHOE OPERATIVES, NATIONAL UNION OF (83,626).—***Gen. Sec.*, L. Poole, The Grange, Earls Barton, Northampton.
- BOOT, SHOE AND SLIPPER OPERATIVES, ROSSENDALE UNION OF (8,105).—***Sec.*, R. Driver, Taylor House, 7 Tenterfield Street, Waterfoot, Rossendale, Lancs.
- BRASSTURNERS, FITTERS, FINISHERS AND INSTRUMENT MAKERS' ASSOCIATION, SCOTTISH (1,400).—***Sec.*, R. Harkess, 121 West Regent Street, Glasgow, C.2.
- BRASSWORKERS, AMALGAMATED SOCIETY OF (638).—***Sec.*, W. H. Hodges, 111 Browning Street, S.E.17.
- BRITISH AIR LINE PILOTS' ASSOCIATION (1,167).—***Sec.*, D. Follows, M.B.E., 95 Mount Street, W.1.
- BRUSHMAKERS, NATIONAL SOCIETY OF (3,100).—***Sec.*, G. F. Mayes, M.B.E., 15 Hackney Road, E.2.
- BUILDING TECHNICIANS, ASSOCIATION OF (93,000).—***Sec.*, F. E. Shrosbree, 5 Ashley Place, S.W.1.
- BUILDING TRADE WORKERS OF GREAT BRITAIN AND IRELAND, AMALGAMATED UNION OF (95,355).—***Sec.*, G. H. Lowthian, M.B.E., "The Builders," Crescent Lane, South Side, Clapham Common, S.W.4.
- CARD BLOWING AND RING ROOM OPERATIVES, THE NATIONAL ASSOCIATION OF (53,822).—***Sec.*, A. Roberts, C.B.E., 81 Fountain Street, Manchester, 2.
- CARD SETTING MACHINE TENTERS SOCIETY (272).—***Sec.*, R. Ashton, 627 Halifax Road, Hightown, Liversedge, Yorks.
- CHAIN MAKERS AND STRIKERS ASSOCIATION (1,117).—***Sec.*, A. E. Head, Unity Villa, Sidney Road, Cradley Heath, Staffs.
- CHEMICAL WORKERS' UNION (20,056).—***Sec.*, R. Edwards, Dalton House, 155 Kennington Park Road, S.E.11.
- CIGARETTE MACHINE OPERATORS' SOCIETY (549).—***Sec.*, A. T. Knight, 17 Station Road, Filton, Bristol.
- CINEMATOGRAF AND ALLIED TECHNICIANS, ASSOCIATION OF (5,422).—***Sec.*, G. H. Elvin, 2 Soho Square, W.1.
- CIVIL SERVICE CLERICAL ASSOCIATION (149,590).—***Sec.*, L. C. White, 2 Upper Belgrave Street, S.W.1.
- CIVIL SERVICE UNION (23,842).—***Sec.*, G. V. Carvell, 88 Rochester Row, S.W.1.
- CLERICAL AND ADMINISTRATIVE WORKERS' UNION (39,930).—***Sec.*, F. C. Woods, 70 St. George's Square, S.W.1.
- CLOTH PRESSERS' SOCIETY (160).—***Sec.*, D. Berry, 106 Church Lane, Moldgreen, Huddersfield.
- COAL TRIMMERS' UNION, CARDIFF, PENARTH AND BARRY (396).—***Sec.*, A. W. Loxton, 13 Bute Crescent, Cardiff.
- COLLIERY OVERMEN, DEPUTIES AND SHOTFIRERS, NATIONAL ASSOCIATION OF (30,460).—***Sec.*, B. Walsh, 59 Essex Park, Finchley, N.3.
- COMMERCIAL TRAVELLERS, NATIONAL UNION OF (416).—***Sec.*, J. F. Denning, 103 Southwark Street, S.E.1.
- COMPOSITORS, LONDON SOCIETY OF (13,599).—***Sec.*, R. Willis, 7-9 St. Bride Street, E.C.4.
- CONSTRUCTIONAL ENGINEERING UNION, THE (20,008).—***Sec.*, J. Stanley, 140 Lower Marsh, S.E.1.
- CO-OPERATIVE OFFICIALS, NATIONAL UNION OF (7,639).—***Sec.*, A. W. Potts, Saxone House, 56 Market Street, Manchester, 1.
- COOPERS' FEDERATION OF GREAT BRITAIN AND IRELAND (3,563).—***Sec.*, E. H. Pettengell, 269 Burdett Road, Limehouse, E.14.
- COPPERSMITHS, BRAZERS AND METAL WORKERS, NATIONAL SOCIETY OF (6,000).—***Sec.*, H. E. Poole, 437 Strand, W.C.2.
- CORRECTORS OF THE PRESS, ASSOCIATION OF (1,490).—***Sec.*, C. W. Wallace, 1 Gough Square, E.C.4.
- CUTLERY UNION, NATIONAL (1,248).—***Sec.*, H. Slack, 5 Room, Foresters' Hall, Trippet Lane, Sheffield, 1.
- DYERS, BLEACHERS AND TEXTILE WORKERS, NATIONAL UNION OF (80,226).—***Sec.*, W. L. Heywood, O.B.E., Unity Chambers, 26 Manningham Lane, Bradford, 1.
- ELECTRICAL POWER ENGINEERS' ASSOCIATION (12,470).—***Sec.*, H. Norton, 102 St. George's Square, S.W.1.
- ELECTRICAL GRADES UNION (203,304).—***Sec.*, W. C. Stevens, Hayes Court, West Common Road, Hayes, Bromley, Kent.
- ELECTROTYPE AND STEROTYPES, NATIONAL SOCIETY OF (4,408).—***Sec.*, A. J. Buckle, 80 Blackfriars Road, S.E.1.
- ENGINEERING AND SHIPBUILDING DRAUGHTSMEN, ASSOCIATION OF (47,939).—***Sec.*, G. H. Doughty, Onslow Hall, Little Green, Richmond, Surrey.
- ENGINEERING UNION, AMALGAMATED (891,086).—***Sec.*, B. Gardner, O.B.E., 120 Peckham Road, S.E.15.
- ENGINEERS AND FIREMEN'S UNION, GRIMSBY STEAM FISHING VESSELS (900).—***Sec.*, J. C. B. Olsen, 10 Orwell Street, Grimsby.
- ENGINEERS' ASSOCIATION, NATIONAL (752).—***Sec.*, J. Harrison, 19A Corporation Street, Manchester, 4.
- ENGINEER SURVEYORS' ASSOCIATION (1,510).—***Sec.*, A. Prestwich, 19 Atlantic Chambers, 7 Brazenose Street, Manchester, 2.
- ENGINEERS, FIREMEN, MECHANICS AND ELECTRICAL WORKERS, THE NATIONAL UNION OF (37,182).—***Sec.*, W. J. Tudor, Transport House, Smith Square, S.W.1.
- ENGRAVERS, UNITED SOCIETY OF (1,396).—***Sec.*, D. Hill, 421 Cheetham Hill Road, Manchester, 8.
- FELT HATERS, AMALGAMATED SOCIETY OF JOURNEMEN (2,817).—***Sec.*, F. Worthington, 14 Walker Street, Denton, nr. Manchester.
- FELT HAT TRIMMERS AND WOOL FORMERS' ASSOCIATION, AMALGAMATED (2,785).—***Sec.*, F. Worthington, 14 Walker Street, Denton, nr. Manchester.
- FILE TRADES, SHEFFIELD AMALGAMATED UNION OF (1,520).—***Sec.*, J. Thorpe, Queen Street Congregational School, North Church Street, Sheffield, 1.
- FILM ARTISTES' ASSOCIATION, THE (1,222).—***Sec.*, A. M. Isles, 85 Shaftesbury Avenue, W.2.
- FIRE BRIGADES UNION, THE (20,500).—***Sec.*, J. Horner, 865 Fulham Road, S.W.6.
- FOUNDRY WORKERS, AMALGAMATED UNION OF (76,084).—***Sec.*, J. Gardner, 164 Chorlton Road, Brooks's Bar, Manchester, 16.

FRENCH POLISHERS' SOCIETY, UNITED (1,583).—*Sec.*, J. E. Banham, 95 Farringdon Road, E.C.1.

FUNERAL AND CEMETERY WORKERS, NATIONAL UNION OF (1,206).—*Sec.*, E. Anderson, 212 East Lane, N. Wembley, Middlesex.

FURNITURE TRADE OPERATIVES, NATIONAL UNION OF (74,674).—*Sec.*, A. G. Tomkins, C.B.E., "Fairfields," Roe Green, Kingsbury, N.W.9.

GENERAL AND MUNICIPAL WORKERS, NATIONAL UNION OF (800,000).—*Sec.*, T. Williamson, C.B.E., 5 Endsleigh Gardens, W.C.1.

GLASS BEVELLERS AND KINDRED TRADES SOCIETY, MIDLAND (569).—*Sec.*, H. L. Bignell, 28 Hazel Croft, Northfield, Birmingham.

GLASS BOTTLE WORKERS' TRADE SOCIETY, LONDON (400).—*Sec.*, H. J. Sharp, 20 Amhurst Road, Hackney, E.8.

GLOVERS, NATIONAL UNION OF (1,954).—*Sec.*, E. C. G. Fear, 41 Middle Street, Yeovil, Somerset.

GOLD, SILVER AND ALLIED TRADES, NATIONAL UNION OF (3,798).—*Sec.*, S. E. Charlesworth, Shrewsbury Chambers, 34 Campo Lane, Sheffield, 1.

GOLDSMITHS, JEWELLERS AND KINDRED TRADES, THE SOCIETY OF (1,677).—*Sec.*, A. J. Raxworthy, 331 Gray's Inn Road, W.C.1.

HEADLERS AND TWISTERS TRADE AND FRIENDLY SOCIETY, HUDDERSFIELD (300).—*Sec.*, C. Mitchell, 37 St. George's Road, Scholes, Holmfirth, nr. Huddersfield.

HEALTH SERVICE EMPLOYEES, CONFEDERATION OF (52,737).—*Sec.*, C. F. Comer, 1 Rushford Avenue, Levenshulme, Manchester, 19.

HEATING, DOMESTIC AND VENTILATING ENGINEERS AND GENERAL METAL WORKERS, THE NATIONAL UNION OF OPERATIVE (16,022).—*Sec.*, E. Pacey, 617 Warwick Road, Solihull, Warwickshire.

HORSE AND MOTORMEN'S ASSOCIATION, SCOTTISH (20,000).—*Sec.*, J. Brannigan, 308 Albert Drive, Glasgow, S.1.

HOSIERY WORKERS, NATIONAL UNION OF (40,539).—*Sec.*, C. G. Grocock, 55 New Walk, Leicester.

INLAND REVENUE STAFF FEDERATION (37,500).—*Sec.*, A. L. N. D. Houghton, M.P., 7 St. George's Square, S.W.1.

INSURANCE OFFICIALS, GUILD OF (17,565).—*Secs.*, Messrs. R. E. Dewberry & H. Levitt, 7 St. Thomas Street, S.E.1.

INSURANCE WORKERS, NATIONAL FEDERATION OF (39,132).—*Sec.*, P. W. Auton, 16 Red Lion Square, W.C.1.

IRON AND STEEL TRADES CONFEDERATION (118,400).—*Sec.*, H. Douglas, Swinton House, 324 Gray's Inn Road, W.C.1.

IRON FITTERS' ASSOCIATION, GENERAL (2,652).—*Sec.*, A. Fair, Callendar, Riggs, Falkirk.

IRON, STEEL AND METAL DRESSERS' TRADE SOCIETY (5,045).—*Sec.*, J. H. Wigglesworth, O.B.E., 231A Oxford Road, Manchester.

IRON, STEEL AND WOOD BARGE BUILDERS' AND HELPERS' ASSOCIATION (807).—*Sec.*, W. H. Harris, 37 Stephendale Road, S.W.6.

JOURNALISTS, NATIONAL UNION OF (12,522).—*Sec.*, H. J. Bradley, 22 Great Windmill Street, W.1.

JUTE, FLAX AND OTHER FIBRE WORKERS, DUNDEE AND DISTRICT UNION OF (5,000).—*Sec.*, J. I. Duffy, 69-71 Nethergate, Dundee.

LACE MAKERS AND AUXILIARY WORKERS, AMALGAMATED SOCIETY OF OPERATIVE (1,700).—*Sec.*, J. E. Flewitt, 16 Pembridge Place, Mount Street, Nottingham.

LACE OPERATIVES FEDERATION, BRITISH (1,000).—*Sec.*, J. E. Flewitt, 16 Pembridge Place, Mount Street, Nottingham.

LAMINATED AND COIL SPRING WORKERS' UNION (700).—*Sec.*, F. M. Hynes, 144 Rural Lane, Wadsley, Sheffield, 6.

LEATHER WORKERS, AMALGAMATED SOCIETY OF (12,102).—*Sec.*, A. L. Barrett, 4 Mexborough Avenue, Leeds, 7.

LEATHER WORKERS AND ALLIED TRADES, NATIONAL UNION OF (4,656).—*Sec.*, W. Collingson, 19 Brazenose Street, Manchester.

LITHOGRAPHIC ARTISTS, DESIGNERS, ENGRAVERS AND PROCESS WORKERS, SOCIETY OF (11,382).—*Sec.*, V. M. Butler, 54 Doughty Street, W.C.1.

LITHOGRAPHIC PRINTERS, THE AMALGAMATED SOCIETY OF (8,532).—*Sec.*, R. T. Williams, Sene-felder House, 137 Dickenson Road, Rusholme, Manchester, 14.

LOCK AND METAL WORKERS, NATIONAL UNION OF (3,162).—*Sec.*, R. D. Gerrard, 45 Market Place, Willenhall, Staffs.

LOCOMOTIVE ENGINEERS AND FIREMEN, ASSOCIATED SOCIETY OF (69,130).—*Sec.*, J. G. Baty, 9 Arkwright Road, N.W.3.

LOOM OVERLOOKERS, THE GENERAL UNION OF ASSOCIATIONS OF (6,100).—*Sec.*, F. Titherington, Derby Chambers, 6 The Rock, Bury.

MACHINE CALICO PRINTERS, TRADE SOCIETY OF (756).—*Sec.*, G. B. Holland, 31 Thornley Lane, Reddish, Stockport.

MACHINE ENGINE AND IRON GRINDERS AND GLAZIERS' SOCIETY, AMALGAMATED (355).—*Sec.*, H. Milne, 231 Oldham Road, Rochdale, Lancs.

MANAGERS AND OVERLOOKERS' SOCIETY (1,969).—*Sec.*, W. H. Bannister, Textile Hall, Westgate, Bradford.

MEDICAL PRACTITIONERS' UNION (4,742).—*Sec.*, Dr. H. B. O. Cardew, 56 Russell Square, W.C.1.

METAL MECHANICS, NATIONAL SOCIETY OF (37,606).—*Sec.*, A. R. Penny, 70 Lionel Street, Birmingham, 3.

MILITARY AND ORCHESTRAL MUSICAL INSTRUMENT MAKERS' TRADE SOCIETY (244).—*Sec.*, G. H. Skillin, 60 Pebworth Road, Harrow, Middlesex.

MINERWORKERS, NATIONAL UNION OF (613,118).—*Sec.*, A. L. Horner, 5 Westminster Bridge Road, S.E.1.

MINISTRY OF LABOUR STAFF ASSOCIATION (12,200).—*Sec.*, E. M. Thomas, 22 St. George's Drive, S.W.1.

MONOTYPE CASTERS AND TYPEFOUNDERS' SOCIETY, THE (868).—*Sec.*, A. Douglas, 80 Blackfriars Road, S.E.1.

MOULDERS AND FOUNDRY WORKERS' ASSOCIATED SOCIETY (455).—*Sec.*, T. Jones, 30 Elgin Street, Manselton, Swansea.

MOULDERS AND KINDRED INDUSTRIES TRADE UNION, AMALGAMATED (2,500).—*Sec.*, J. Banks, Philos Chambers, 195 Oxford Road, Manchester, 13.

MUSICIANS' UNION (28,574).—*Sec.*, H. Ratcliffe, 7 Sicilian Avenue, W.C.1.

NAVIGATORS AND ENGINEER OFFICERS' UNION, THE (12,000).—*Sec.*, D. S. Tennant, C.B.E., 78 Leadenhall Street, E.C.3.

NUT AND BOLT MAKERS, NATIONAL AMALGAMATED ASSOCIATION OF (30).—*Sec.*, J. A. Taylor, 31A Heller Street, Dudley, Worcs.

PACKING CASE MAKERS (WOOD AND TIN), BOX MAKERS, SAWYERS, AND MILLWORKERS, THE NATIONAL UNION OF (5,352).—*Sec.*, S. G. Reading, 95 Farringdon Road, E.C.1.

PAINTERS, NATIONAL SOCIETY OF (71,350).—*Sec.*, S. Horsfield, O.B.E., 4 Camp Street, Lower Broughton, Salford, 7, Lancs.

PAINTERS' SOCIETY, SCOTTISH (13,668).—*Sec.*, W. Peat, 6 Fitzroy Place, Sauchiehall Street, Glasgow, C.3.

PATTERNMAKERS' ASSOCIATION, UNITED (16,134).—*Sec.*, W. B. Beard, O.B.E., 15 Cleve Road, W. Hampstead, N.W.6.

- PLASTERERS, THE NATIONAL ASSOCIATION OF OPERATIVE** (15,819).—*Sec.*, A. Dunne, 2016 Harrow Road, Wembley, Middx.
- PLUMBING TRADES UNION** (54,900).—*Sec.*, H. Kelly, 15 Abbeville Road, Clapham, S.W.4.
- POST OFFICE ENGINEERING-UNION** (47,855).—*Sec.*, C. G. P. Smith, Greystoke House, Hanger Lane, Ealing, W.5.
- POST OFFICE WORKERS, UNION OF** (160,908).—*Sec.*, C. J. Geddes, O.B.E., U.P.W. House, Crescent Lane, Clapham Common, S.W.4.
- POTTERY WORKERS, NATIONAL SOCIETY OF** (34,000).—*Sec.*, H. Hewitt, O.B.E., 5A Hill Street, Hanley, Stoke-on-Trent.
- POWER LOOM CARPET WEAVERS AND TEXTILE WORKERS' ASSOCIATION** (4,300).—*Sec.*, C. S. Yarsley, Callows Lane, Kidderminster.
- POWER LOOM OVERLOOKERS, YORKSHIRE ASSOCIATION OF** (2,000).—*Sec.*, F. Dickinson, Textile Hall, Westgate, Bradford.
- POWER LOOM TENDERS, SCOTTISH UNION OF** (500).—*Sec.*, R. Macbeth, 77 Hilltown, Dundee.
- PREPARATORY WORKERS' ASSOCIATION, NELSON AND DISTRICT** (1,177).—*Sec.*, C. W. Doodson, 22 New Brown Street, Nelson.
- PRESS TELEGRAPHISTS, THE NATIONAL UNION OF** (1,407).—*Sec.*, M. A. Clayton, Ludgate House, 207 Fleet Street, E.C.4.
- PRINT BLOCK ROLLER AND STAMP CUTTERS' SOCIETY** (417).—*Sec.*, T. Albiston, 4 Elliott Avenue, Darwen, Lancs.
- PRINTERS AND ASSISTANTS, THE NATIONAL SOCIETY OF OPERATIVE** (37,783).—*Sec.*, R. W. Briginshaw, 13-16 Borough Road, S.E.1.
- PRINTING, BOOKBINDING, AND PAPER WORKERS, THE NATIONAL UNION OF** (134,517).—*Sec.*, W. A. Morrison, 74 Nightingale Lane, S.W.12.
- PRINTING MACHINE MANAGERS' TRADE SOCIETY, THE** (5,626).—*Sec.*, P. Astins, C.B.E., 19 Meymott Street, S.E.1.

THE INTERNATIONAL MONETARY FUND

THE INTERNATIONAL MONETARY FUND was established by the United Nations Monetary and Financial Conference held at Bretton Woods, U.S.A., in July, 1944, and began operations on Dec. 27, 1945. Its purposes include the promotion of international monetary co-operation through a permanent institution providing for consultation and collaboration, the establishment of stable relations between currencies, the removal of foreign exchange restrictions, and giving confidence to members by making the Fund's resources available to them and thus providing them with opportunity to correct maladjustments in their balance of payments. An Act giving effect to the Bretton Woods Agreement in the United Kingdom was passed on December 20, 1945. The size of the Fund was initially set at \$8,800,000,000, to which each member country is called upon to contribute. The United Kingdom representatives are the Rt. Hon. R. A. Butler, M.P. (Chancellor of the Exchequer) as Governor, with Sir George Bolton, K.C.M.G., as Alternate. Sir Edmund Hall-Patch, G.C.M.G., is United Kingdom Executive Director and Leslie F. Crick, Alternate, while Frank A. Southard, Jr., is United States Executive Director. Mr. Ivar Rooth is Managing Director.

THE INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

1818 H Street, N.W., Washington 25, D.C., U.S.A.

THE INTERNATIONAL BANK was established by the United Nations Monetary and Financial Conference held at Bretton Woods, U.S.A., in July, 1944. Its members are Governments. The objects of the Bank are (1) to assist in the reconstruction and development of its member countries by facilitating the investment of capital for productive purposes, thereby promoting the long-range growth of international trade and the improvement of standards of living; (2) to promote private foreign investment by guarantees of and participations in loans and other investments made by private investors; and (3) when private capital is not available on reasonable terms, to make loans for productive purposes out of its own resources or funds borrowed by it. The authorized capital stock is \$10,000,000,000, divided into 100,000 equal shares available for subscription only by members. From June 25, 1946, when the Bank commenced operations, to June 30, 1953, the net income from operations amounted to the equivalent of \$76,513,511. This income has been allocated to a supplemental reserve. A further sum of \$37,236,477 had by June 30, 1953, been received by way of commissions on loans and has been allocated to Special Reserve. The Bank consists of a Board of Governors, Executive Directors, who are responsible for the conduct of the general operations of the Bank, and President and staff. The United Kingdom representatives are the Rt. Hon. R. A. Butler, Governor, with Sir Leslie Rowan, Alternate, Sir Edmund Hall-Patch, Executive Director, with Leonard Waight, Alternate. George M. Humphrey is U.S. Governor, with Samuel C. Waugh, Alternate, and Andrew N. Overby is Executive Director with J. S. Hooker, Alternate. The President and Vice-President are Eugene Black and Robert L. Garner, U.S.A.; and the Treasurer Henry W. Wiley, U.S.A. Secretary, Morton M. Mendels (Canada).

BANK FOR INTERNATIONAL SETTLEMENTS

THE BANK FOR INTERNATIONAL SETTLEMENTS is an international financial organization, which was established in 1930, partly to facilitate the execution of the Young Plan which concerns the transfer of reparations payments due from Germany in respect of the 1914-1918 war, and partly to promote the co-operation of Central Banks and to provide additional facilities for international payment operations. The Bank was incorporated under a charter granted by Switzerland according to the terms of a Convention between Switzerland and *inter alia* the Governments of Belgium, France, Germany, Great Britain and Italy. The authorized capital is Gold Francs 500,000,000 (units of 0.29032258 grammes fine gold) of which Gold Francs 125,000,000 are paid up. The greater proportion of the shares has been issued to central banks or to banking groups in the countries of the above five founder Governments and in the United States. The balance was later issued to the central banks of certain other European countries. Administration of the Bank is in the hands of the Board of Directors which is composed of the Governors of the founding central banks, *ex officio*; a corresponding number of persons nominated by them; and the Governors of certain other central banks selected by the Board. President of the Bank and Chairman of the Board is Maurice Frère (Belgium). The British Directors are Cameron F. Cobbold and Sir Otto Niemeyer (Vice-Chairman). The bank is Agent for the O.E.E.C. in so far as the European Payments Union is concerned.

MONEY TURNOVER IN 1952

THE LONDON BANKERS' CLEARING HOUSE, in Post Office Court, 10 Lombard Street, is the medium, through which Bankers obtain the amount of Cheques and Bills in their hands for collection from other Bankers. The total for the year 1952 was £110,584,000,000, an increase of £1,811,000,000 as compared with 1951. As a result of a war-time change in the working of the Bankers' Clearing House, the Metropolitan and Country Cheque Clearings have ceased to exist as separate Clearings and, together with a large part of the Town Clearing, now form one Single Clearing. The rest of the Town Clearing, namely, that from the Head Offices, and certain City Branches of Clearing Banks, is still carried out separately. —Chairman, A. W. Tuke; Deputy Chairman, The Lord Aldenham; Secretary to the Committee, A. I. Hancock; Asst. Sec., Miss M. P. Greenwood; Chief Inspector, R. F. Chatham; Deputy Inspector, C. W. Sudbury.

JOINT STOCK COMPANIES

In 1935 there were 14,826 public and 124,143 private Companies on the Register with paid-up capital of £3,963,000,000 and £1,730,000,000 respectively. During 1952, 12,156 Companies were registered with nominal capital £51,270,000; 3,105 Companies went into liquidation (Voluntary 2,669; Compulsory, 436).

On December 31, 1952, there were 259,071 Companies on the registers in Great Britain, of which 11,891 were Public Companies with total paid-up capital, £3,917,000,000, and 247,180 Private Companies, with total paid-up capital, £2,395,000,000.

NEW U.K. CAPITAL ISSUES

[Compiled by the Midland Bank Limited]

Year	Amount	Year	Amount
1940-45	£25,465,000	1949	£138,448,000
1946	130,770,000	1950	312,932,000
1947	151,108,000	1951	251,990,000
1948	231,365,000	1952	370,485,000

Billions, a Home and Abroad

A billion in the British Isles is regarded as a million millions (1,000,000,000,000) but in France and in some other parts of the Continent of Europe, and in Canada and the U.S.A., it is to be interpreted as equivalent to a thousand millions (1,000,000,000) only.

NATIONAL SAVINGS CERTIFICATES

The amount, including accrued interest, remaining to the credit of investors in National Savings Certificates on March 31, 1953, was approximately £2,256,300,000. In 1952-53, £159,400,000 was subscribed and £138,600,000 (excluding interest) was repaid.

First Issue (cost price 15s. 6d. and ten-year maturity value 26s.), Feb., 1916, to March 31, 1922; may be retained indefinitely in the absence of further notice with interest after the tenth year at 1d. per month per Certificate.

Second Issue (cost price 16s. and ten-year maturity value 26s.), April 1, 1922, to Sept. 29, 1923; may be held indefinitely in the absence of further notice, on similar terms to first issue, after the tenth year.

Third Issue (cost price 16s. and ten-year maturity value 24s.), Oct. 1, 1923, to June 30, 1932; may be held until 22 years after date of purchase, and thereafter in the absence of further notice, with interest after the tenth year at 2d. per period of three months per unit Certificate until each unit is worth 28s. Then at the rate of 2½d. per completed period of three months until it is worth 33s., and thereafter, in the absence of further notice at the rate of 1d. at the end of each completed calendar month.

Conversion Issue (cost price 16s. and ten-year maturity value 24s.), in exchange for First Issue, January 18 to April 30, 1932. Terms of extension beyond ten years as for Third Issue.

Fourth Issue (cost price 16s. and eleven-year maturity value 23s.), on sale from August 2, 1932, to May 31, 1933, and may be held indefinitely unless notice to the contrary is given by the Treasury. After 11th year 2d. is added at the end of each period of 3 months until the value is 29s., then at the rate of 2½d. for each period of 3 months.

Fifth Issue (cost price 16s. and twelve-year maturity value 23s.) on sale from June 1, 1933, to February 28, 1935, and may be held indefinitely unless notice to the contrary is given by the Treasury. After 12th year 4d. is added at the end of each period of 6 months until the value is 29s., then at the rate of 2½d. for each period of 3 months.

Sixth Issue (cost price 15s. and ten-year maturity value 20s.) on sale from March 1, 1935, to November 21, 1939. After 10th year 3½d. is added at the end of each period of 6 months until the value is 27s.

Seventh Issue (cost price 15s. and ten-year maturity value 20s. 6d.) on sale from November 22, 1939, to March 31, 1947. After 10th year 3½d. is added at the end of each period of 6 months until the value is 27s. 6d.

Eighth Issue (cost price 10s., and 10-year maturity value 13s.), on sale from April 1, 1947, to January 31, 1951.

Ninth Issue (cost price 15s., and 10-year maturity value 20s. 3d.) on sale from February 1, 1951.

£1 Issue (cost price £1, 10-year maturity value 23s.) on sale January 11, 1943, to March 31, 1947. After 10th year, 1d. is added at the end of each period of 3 months until the value is 27s.

The normal maximum holding of National Savings Certificates by an individual is 500 of the ordinary issues up to the Seventh Issue, 250 of the £1 issue, 1,000 units of the Eighth Issue and 700 units of the Ninth Issue.

Note.—Saving Certificates may be bought in single documents representing 1, 2, 3, 4, 5, 10, 20, 50 and 100 15s. units.

SAVINGS BANKS

Post Office Savings Bank.—On Dec. 31, 1952, there were approximately 22,600,000 active deposit accounts in the *Post Office Savings Banks*, with the sum of £1,812,299,000 due to depositors. On Dec. 31, 1952, Government Stock to the amount of £923,477,000 stood to the credit of holders in the books of the *Post Office Savings Banks*. Any sum from one shilling to £500 may be deposited, and interest is allowed at 2½ per centum per annum. A depositor may have more than one account. There is a limit of £3,000 to the amount which may stand to his credit and he may not deposit more than £500 in the aggregate in any year.

P.O.S.B. DEPOSITS

1952....	1,774,749,000	71,406,000	29,765,000

In 1951 the *Average Amount due to each Depositor in Active Accounts* was £83 15s. 7d.

Trustee Savings Banks were started in the early years of the 19th century by public-spirited men who recognized the importance of individual thrift to the well-being of the community. Their aim has always been to improve the facilities for thrift and to increase the recognition of the importance of wise spending and wise saving. They are not conducted for private profit, and their sole concern is to offer to the public the best service and the most convenient and remunerative method of saving compatible with sound administration and the greatest possible degree of security. They combine security, which is inseparable from a close connection with the State, with the freedom which can only come from independent management. They are directed by local voluntary Trustees and Managers, whose duties are set out in Acts of Parliament and in Rules certified by the Registrar of Friendly Societies. They are subject to Government supervision, and are also inspected on behalf of the Trustee Savings Banks Inspection Committee, a statutory body which submits an Annual Report to Parliament.

Trustee Savings Banks are full partners in the National Savings Movement, and consequently all deposits in these Banks directly assist the nation's finances.

On Nov. 20, 1952, there were 6,604,012 active accounts in the Trustee Savings Banks. The total assets of the Banks amounted to £1,076,087,897 which comprised £953,730,646 due to depositors in the Ordinary and Special Investment Departments, £103,192,111 Stocks and Bonds held for depositors and £19,165,140 representing the accumulated surplus of the individual Trustee Savings Banks throughout the country. Information about these Banks and their offices, numbering 1,259 (principal and subordinate) in November, 1952, can be obtained from the *Trustee Savings Bank Association*, Tavistock House South, Tavistock Square, London, W.C.1. *Chairman*, Sir Kenneth Stewart, G.B.E.; *Secretary*, R. T. H. Scott, M.B.E.

Life Assurance and Fire and General Insurance

LIFE ASSURANCE

THE list on the following two pages contains the names of all the more important British Life offices, and of Commonwealth companies (marked C), all of which transact business in this country.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy-holders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are marked (O) in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches. Those having an Industrial branch are indicated by letter (I).

FIGURES.—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended December 31, 1952.

LIFE FUNDS.—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reinsuring parts of the risks.

EXPENSES.—The expenses of a Life office include, in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 16½%, of which about 5½% is expended on commission and 11% on other expenses. This ratio taken by itself is frequently misleading, because, if the proportion of new business is large, the percentage of the total pre-

miums absorbed in expenses may legitimately be higher than where the new business is small. Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policy holder through reduced premium being equivalent to an immediate cash bonus.

INTEREST.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. The rate of interest given is before deduction of Income Tax except where marked (N)—net.

VALUATIONS.—The last columns of the table are derived from the valuation returns made by the companies to the Board of Trade. A valuation indicates liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate. Various mortality tables are employed, the most used being known as the A. 1924-29, H^m, O^m, H^m(^b) and O^m(^b)—the latter exclude mortality in the first five years of assurance. If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The O^m and O^m(^b) tables in conjunction are more stringent than the O^m table alone, the H^m is more stringent than the A. 1924-29 and with every table the lower the rate of interest assumed the more stringent is the valuation. The foregoing remarks, however, do not apply in the case of an office which has adopted a Bonus Reserve Valuation.

FIRE INSURANCE RATES

MOST large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows:—

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous proximity 2s. 6d.

Household goods therein, usually 2s.

A number of companies issue "comprehensive" policies embracing in one contract all risks incidental to private houses and contents.

Shops and Warehouses, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, from 2s.

Stock and Utensils in trade fixtures, and household furniture in such shops and warehouses, from 2s.

Most fire insurance companies transact accident (including Motor) and miscellaneous business,

and if a strong company be selected it will probably be found to the advantage of an insurer that he should effect with it all such policies as he may require, in place of dividing them amongst several companies. The "comprehensive" policies, previously referred to, combine in one contract protection against damage by fire to the contents of a house, or from burglary, housebreaking, larceny, theft, etc., and insurance against domestic servants' employers' liability, damage from storm or tempest, third party risks, and other hazards. This can usually be arranged for an annual premium of 5s. per £100 of the full value of the contents of the house. Fire insurance of the house itself is not included, however, in this estimate, but can be included under the same policy, if desired. The advantage of a policy of this description is that it obviates the inconvenience of payments of small amounts in insurance premiums at different dates, and that in one comprehensive form it supplies protection at a moderate cost for all a householder's ordinary insurance requirements.

NOTE.—As Insurance is highly technical, particularly where business risks are involved, the advice and assistance of a qualified Insurance Broker can be utilized with considerable advantage.

* NOTE.—The Valuation period is for the 5 years ending in December of the year stated, unless otherwise marked.

A.—Annual Valuation.

- Atlas.—Three years ending December 31, 1952.
- Caledonian.—Three years ending December 31, 1950.
- Canada Life.—Five years ending June 30, 1953—Bonuses relate to pre-1950 premium rate business.
- Ecclesiastical.—Five years ending February 28, 1949.
- Equity and Law.—Three years ending December 31, 1952.
- Ideal Life.—Three years ending December 31, 1950.
- Life Association of Scotland.—Three years ending December 31, 1951.
- Liverpool Victoria.—Three years ending December 31, 1950.
- London and Manchester.—One year ending March 24, 1953.

Midland Employers' Mutual.—Life business commenced 1947.

National Mutual.—Two years ending December 31, 1952.

National Mutual of Australasia.—One year ending Sept. 30, 1952.

National Provident.—Three years ending December 31 1951.

Pilot.—Guaranteed Bonus.

Pioneer.—One year ending March 31, 1953.

Royal Exchange.—Three years ending December 31. 1951.

Standard.—Three years ending Nov. 15, 1949.

United Kingdom.—Three years ending December 31, 1950.

Western Australian.—Five years ending June 30, 1948.

Yorkshire.—Three years ending December 31, 1951.

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE

Life assurance may be effected either with or without participation in profits. If with participation then a higher premium is charged and the Policy is entitled to a Bonus, which is a share in the profits made by the Office, as and when declared. Valuations are made by Offices at periods varying from one to five years and the rate of Bonus then

declared is usually in respect of each year since the previous valuation. These Bonuses are normally payable with the Sum Assured for their full amount, but, if desired, they can be applied to reduce the premium or surrendered for a cash payment. If a Policy is effected without participation the Sum Assured only is payable.

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are "next birthday" unless otherwise stated.

AVERAGE ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE OF £100

Age at Entry	With Profits	Without Profits	Age at Entry	With Profits	Without Profits	Age at Entry	With Profits	Without Profits
	£ s. d.	£ s. d.		£ s. d.	£ s. d.		£ s. d.	£ s. d.

29	2 8 11	1 16 11	39	3 1 10	2 11 9	55	5 13 10	4 18 0
30	2 10 1	1 18 0	40	3 3 7	2 13 3	60	6 18 6	6 1 2

The next table shows the annual premiums payable throughout life for a policy of £100 payable at death, with and without profits. It is not sufficient to judge a life office by premium rates only. An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such interim bonuses compare with valuation

bonuses, especially in cases of endowment assurance. A without profit insurance provides the maximum amount of cover at the lowest cost and if an Office, as in some cases, is prepared to allow the option of converting the insurance at any time to "with" profits either for whole of life or on the Endowment plan, this gives an attractive contract. The change would, of course, entail a higher premium being paid but under this arrangement the highest cover can be obtained in the early years and the alteration made when the increased cost can be met.

ENDOWMENT ASSURANCES.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realization of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no medium promising more satisfactory results than an Endowment assurance participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as so much depends upon profit-

earning capacity—see first page of Life Assurance.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death together with any Bonuses attaching under a "with profit" Policy.

The following table shows the annual premiums, for various ages at entry, charged by the offices named, to secure £100 at the end of 15, 20 and 25 years, or at death, if previous, with profits.

ANNUAL PREMIUMS FOR ENDOWMENT ASSURANCE OF £100, WITH PROFITS

HOW TO ASSIGN A LIFE POLICY

When a Policy is assigned by way of Mortgage, it is better to employ a solicitor: but when the Assignment is absolute, i.e., when a Policy is sold out and out, his services may be dispensed with, provided the Title is clear.

The Assignment may be in the following form to comply with English law, but may be subject to slight variation in other parts of the British Isles:—

I, (name), of (address), in the County of, (occupation), in consideration of the sum of (pounds) paid to me by (name), of (address), in the County of, (occupation), the receipt of which I herewith acknowledge, do hereby, as beneficial owner, assign unto the said, his Executors, Administrators and Assigns, all that Policy of Assurance on my life for £..... effected with the (name of Company), numbered, and dated, and all monies assured by or to become payable thereunder. *And I hereby certify that the transaction hereby effected does not form part

of a larger transaction, or of a series of transactions, in respect of which the amount or value, or the aggregate amount or value, of the consideration exceeds five hundred pounds.* In witness whereof I have hereunto set my hand and seal this day of, 19....

Signed, sealed and delivered by the above-named, in the presence of—

Name,
Address

The document must be stamped by the Inland Revenue Stamp Office.

Notice of the Assignment should be sent, in duplicate, to the Head Office of the Company immediately on execution. The Company is entitled to charge a fee of five shillings for acknowledgment, and will retain one copy and the other will be returned with acceptance of service endorsed thereon.

* This wording should be omitted when not applicable.

Friendly Societies—Great Britain

Acts 1896-1948.

VOLUNTARY (i.e. Not Including State) BUSINESS.

In spite of the expansion of *Compulsory* "Health" insurance since the introduction of the *State* scheme in 1912 and its extension in 1948, the *Voluntary* business of Friendly Societies registered under the Friendly Societies Act, 1896, still continues on a large scale, as shown by the following comparative totals—those in ordinary type relate to registered Friendly Societies proper (embracing both "Centralized" societies and "Orders with Branches"); those in *italics* "Collecting" societies which, although registered under the Friendly Societies Acts, are subject also to the special provisions of the Industrial Assurance Acts:—

End of Year	No. of Societies on Register		Member-ship	Assurances or Policies	Total Funds	
			Thousands		£,000's	
1951.....	14,353	118	6,794	32,918	212,238	197,881
1938.....	19,600	149	8,491	25,738	151,613	84,837
1913.....	25,475	71	6,783	7,481	51,489	11,165

During the year 1951, Friendly Societies proper paid out £5,573,000 in *Sickness* benefit and over £1,997,000 in *Death* benefit, while payments of claims on *Death* by Collecting societies amounted to £8,227,000.

The membership and funds figures—as at the end of 1951—set out below, indicate the strength of several leading old established societies, including the three largest centenarian Orders which operate through their registered districts and branches, subject to a central body. The first society mentioned which is operated wholly on the "Deposit" system of sickness insurance, has, despite its later establishment, far outstripped all other non-collecting societies in expansion of membership and is indicative of the trend during recent years for many entrants to prefer a cash endowment in old age, e.g. 65, instead of remaining insured for sickness benefit throughout life as was the basis of the older "Accumulating" type of society. There are, however, several systems operated on *Individual Amount* lines (apart from the National Deposit Society's method of a *uniform* contribution throughout membership), one of which known as the "Holloway" (the name of the founder of the "Original" society formed at Stroud in 1875) is worked by a contribution increasing with each year of attained age after the member reaches age 30, up to age 65:

FRIENDLY Socs.—Name with (in brackets) Year Established	Membership	Funds (including Reserves)
National Deposit Friendly Society (1868).....	858,000	£ 21,527,000
Independent Order of Odd Fellows, Manchester Unity (1810).....	572,000	26,033,000
Hearts of Oak Benefit Society (1842).....	468,000	17,606,000
Ancient Order of Foresters (1834).....	370,000	18,821,000
Independent Order of Rechabites, Salford Unity (1835).....	305,000	6,504,000

COLLECTING Socs.—Name and Year Established	No. of Assurances Premium Paying	Free Paid-up	Funds (including Reserves)
Liverpool Victoria Friendly Society (1843).....	12,807,000	3,840,000	£ 106,803,000
Royal Liver Friendly Society (1850).....	7,916,000	1,622,000	55,162,000
Scottish Legal Life Assurance Society (1852).....	2,914,000	730,000	17,014,000

Although the present National Insurance scheme with its provision of "cradle to the grave" benefits has obviously had repercussions on the *Voluntary* Friendly Societies, only time can reveal the full extent of its effect on the numerical strength and potential income of these societies, with their various systems of Sickness insurance and combined benefits tables based on a wide range of contributions scaled according to age and the extent and nature of the benefits provided.

When the modest scheme of 1912 was introduced some people doubted the *Voluntary* Friendly Societies' ability to survive for long, and yet they continued to grow in the face of keen competition, but their remarkable expansion has naturally brought many societies up to a point where they have already found it increasingly difficult to maintain a sufficient inflow of new, young entrants to replace membership losses due to death and other causes. In recent years, too, many of the older (non-deposit type) societies have had to introduce

more attractive tables to cater for the growing preference amongst members for a *curtailed* (instead of *whole-life*) Sickness insurance to enable a margin of contributions to accumulate to their credit as an increasing *cash endowment* payable in full at age 65, or in the event of prior death, with the option of drawing on the credit from time to time if the member is in need, subject to certain conditions, including the retention of a specified minimum sum in the member's account.

In considering how far the general body of members comprising the Friendly Societies movement can afford to continue their *voluntary* insurances along with their higher State scheme contributions in future, it must not be overlooked that present-day wage levels are substantially higher for all classes of workers than in 1912, and the Government has declared that continued *Voluntary* insurance to supplement State benefits, wherever one's means permit, should be encouraged.

Moreover, in addition to the widespread branch units of the better known "Orders," there are numerous small independent societies whose membership is maintained more easily than in the large societies, by age-long custom of family and social ties within their own locality, and there still exist a few such societies whose formation dates back far beyond any "Friendly Society" legislation. In fact, long before the term "Friendly Society" came into use, the seeds of *Voluntary mutual insurance* had been sown in the ancient religious and trade "Guilds." As is evident from the many extant parchment returns detailing their rules and possessions under a decree of Richard II, Guilds had become widespread in Britain by the 14th century. By then, the purely charitable character of the original Guilds had largely changed with the emergence of numerous small institutions adopting primitive *mutual insurance* methods of a regular flat rate contribution in order to obtain relief when sick or in old age and a payment to the widow in the event of death. Some of these old Guilds with their distinctive titles still survive, and the present *Voluntary Register of Friendly Societies* includes eleven societies which have been in existence for upwards of 200 years, the four earliest all operating in Scotland, the oldest being the "Incorporation of Carters in Leith" established as long ago as 1555. The four oldest in England were all formed in London—the "Norman Society" (estd. 1703); the "Society of Lintol"

(estd. 1708); the "Society for the Mutual Help of Swiss in London" (estd. here in 1703—although registered as recently as 1942); and the "Goldsmiths Friendly Society" (estd. 1712), the first two of these having been formed by Huguenot refugees from the Protestant persecution under Louis XIV.

The first Act for the encouragement and protection of "Friendly Societies" in this country was not passed until 1793, but various amending Acts were put on the Statute Book during the next century as the result of the recommendations of successive Select Committees (including a Royal Commission in 1871). For example, it was not until the 1829 Act that all registered Friendly Societies were required to keep proper records of individual sickness and mortality amongst their members, which data enabled the construction of STANDARD Actuarial Tables showing the Expected (average) duration of Sickness at successive ages, and also (with data from the Census) the corresponding mortality rates.

Since the 1875 Act, all registered societies whose operations are susceptible to valuation have been subject to statutory *quinquennial actuarial valuation* and report.

The present consolidating Act of 1896 allows various specific classes other than "Friendly Societies" to be registered thereunder, but exemption from income tax (irrespective of the extent of interest income) is enjoyed only by registered "Friendly Societies."

Co-operative Societies—Great Britain

Industrial and Provident Societies Acts, 1893-1952.

During the 10 years ended 1951 Co-operative Retail Trading Societies (almost all General Supply Stores) expanded their membership by 23 per cent. and assets by 57 per cent. as shown by the following particulars covering the 1,109 societies on the register at the end of 1951 and 1,127 societies in 1941:

Year	Number of Members	Share Capital	Sales	Surplus on Year's Working	Interest on Shares	Dividends on Sales	Total Assets
		£000's	£000's	£000's	£000's	£000's	£000's
1951	10,745,000	222,154	649,772	48,860	6,010	38,169	397,448
1941	8,729,000	163,802	300,394	34,118	5,234	25,558	252,914

In addition, 178 Co-operative Wholesale and Productive Trading Societies (with a total membership of 59,000) were on the register at the end of 1951. The total figures for these societies are dominated by those of the two main Wholesale Trading Societies (with their "Joint" undertaking) whose combined sales for 1951 amounted to £439 millions, their assets at the end of the year totalling £172 millions.

The Industrial and Provident Societies Act, 1952, raised the limit of maximum shareholding by an individual member from £200 to £500, and increased the limits of deposits which a society could receive from a depositor without being deemed to carry on the business of banking, from 10s. to £2 at any one time and from £20 to £50 in all.

Building Societies—Great Britain

Acts 1874-1940.

Building Societies are, with few exceptions, associations incorporated with limited liability under the Building Societies Acts. All *Building Societies* are required to register their rules and file their accounts with the Registrar of Friendly Societies and Building Societies. The following particulars showing the growth of Building Societies (as also that of Friendly and Co-operative Societies respectively tabulated on p. 1222 and above) are based on the Registrar's Annual Statistical Summaries. The Editor is also indebted to the publishers of the "Building Societies Year Book" for details of individual societies from which the second table hereunder has been compiled.

As indicative of the part played by the Building Societies movement in assisting the vast owner-occupier housing expansion after the 1914-1918

war, Building Societies advanced on mortgage a total of almost £1,600 million during the 21 years 1919-1939.

During the ensuing 13 years 1940-1952, mortgage advances totalled £2,002 million, of which £1,776 million was for the last 7 years, the £276 million advanced in 1949 being an all-time record exceeding by £136 million the pre-war 1936 peak figure.

During the 13 years 1940-1952, the proportion of mortgage balances to total assets showed a reduction from over 91 to 85 per cent., with a corresponding increase in the ratio of investments and other assets from less than 9 to 15 per cent. of total assets with a marked increase in investments in government securities, while reserves and profit balances rose to £77 million or the equivalent of 1s. 3d. per £ of the total mortgage debt at the end of 1952. During

1952 societies' own investments increased to £158 million. Their total liquid funds (including cash and bank balances) at the end of the year represented one-seventh of total assets.

For the year 1952 interest received by societies from borrowers amounted to £52 million—of which, it is computed, one-third was absorbed in taxation borne by the societies whose interest payments to shareholders and depositors totalled nearly

£30 million. Management costs, at £8,776 for 1952, still averaged only about 2d. per £1 of the mean mortgage assets.

The average mortgage interest rate charged by societies is 4½ per cent., and the interest rates offered to investors are mainly 2½ per cent. on shares and 2 per cent. on deposits (both tax paid by the societies). These rates, however, are subject to variation.

BUILDING SOCIETIES, GREAT BRITAIN, 1952—with 1951 totals in italics.

Legal Notes

ADOPTION OF CHILDREN

In England and Wales the adoption of children is regulated mainly by the Adoption of Children Acts, 1926 to 1949, and the Adoption Act, 1950. An order of court is necessary to legalize the adoption. Adoption puts the child adopted practically on the same footing as a child born to the adopter in lawful wedlock, in all matters of custody, education and maintenance; further, it is provided by the Act of 1950 (under sections which do not, however, apply to Scotland) that an adopted child shall be treated as the child of the adopter (and not the child of its natural parents) for the purpose of the devolution of property on an intestacy occurring, or under any disposition (e.g. a Will) made, after the date of the adoption order. Applications are made to the High Court (Chancery), County Court, or Magistrates Court. Orders will not usually be made for a man to be sole adopter of a girl, and applicant (or in the case of a joint application one of the applicants) must be either:—

- (a) Twenty-five years of age or over and at least twenty-one years older than the child in respect of whom application is made; or
- (b) Twenty-one years of age or over and a relative (as defined in the Act of 1950) of the infant; or
- (c) the mother or father of the infant.

The consent of the child's parents or guardian is required before an adoption order will be made, but in certain circumstances (e.g. where the parent or guardian has ill-treated or neglected the child) the Court may dispense with this consent. Since the 1949 Act, marriage between the adopter and the adoptee is prohibited, but marriages of that kind, solemnized before the passing of the Act, are not thereby invalidated.

The 1950 Act places restrictions on societies which make arrangements for the adoption of children.

Scotland.—The Adoption of Children (Scotland) Acts, 1930 to 1949, cover the law relating to the adoption of children in Scotland, where an Adopted Children Register is maintained. Applications are made to the Court of Session, or the Sheriff Court within whose jurisdiction either the applicant or the child resides at the date of application. The Adoption Act, 1950, which is a consolidating Act, also applies, with modifications, to Scotland. Owing to divergence of the laws of England and Scotland there is not, however, complete uniformity in this branch of the law in both countries. Thus, in regard to property rights, an adopted child in Scotland remains a member of the family of his actual parents, nor does an adoption order deprive him of any legal rights competent to him in the estate of his parents. (See further under note dealing with intestacy in Scotland.)

All adoptions in Great Britain are registered in the Registers of Adopted Children kept by the Registrars General in London and Edinburgh respectively. Certificates from these registers, including short certificates which contain no reference to adoptions, can be obtained on conditions similar to those relating to birth certificates. (See below.)

BIRTHS (REGISTRATION)

When a birth takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons:—

1. The father or mother of the child. If they fail;
2. the occupier of the house in which the birth happened;
3. a person present at the birth; or,
4. the person having charge of the child. The duty of attending to the registration therefore rests firstly on the parents. The mother is responsible for the registration of the birth of an illegitimate child. The registration must be made within 42 days (Scotland 21 days) of the birth. Failure to do this, without reasonable cause, involves liability to a penalty of forty shillings (in Scotland the penalty is £1). The registration of a birth will be free when it takes place within 42 days (in Scotland 21 days). There are special provisions relating to late registration. In districts under the Notification of Births Act, 1907 (as extended by an Act of 1915), notice of every birth must be given by the father, or person in attendance on the mother, to the district medical officer of health by post within 36 hours of the birth. This is in addition to the registration already mentioned.

A "Stillbirth" must be registered, accompanied by a certificate of doctor or midwife who was in attendance at the birth or has examined the body of the child.

The re-registration of the birth of a person under the *Legitimacy Act, 1926*, is provided for in that Act (see p. 1133). In Scotland re-registration of a child legitimated *per subsequens matrimonium* or whose birth entry is affected by a Decree of Court respecting status or paternity is provided for by the Registration of Births, etc. (Scotland) Amendment Act, 1934.

Birth at Sea: The master of a British ship must record any birth on board and send particulars to the Registrar General of Shipping.

Birth Abroad: Consular Officers are authorized to register births of British subjects occurring abroad. Certificates are procurable in due course at Registrar General's office, London.

CERTIFICATES

OF BIRTHS, MARRIAGES, OR DEATHS

England and Wales.—Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to 5s. 3d., viz., 1s. 6d. for search, and 3s. 9d. for the certificate. (When application is made by post the charges are 7s. 6d.) They can also be obtained from the Superintendent Registrar having the legal custody of the register containing the entry of which a certificate is required. Certificates of marriages can also be obtained from the incumbent of the church in which the marriage took place (the customary fee being 3s. 9d.); or from the Nonconformist minister (or other "authorized person") where the marriage takes place in a registered building (See *post* under Marriage).

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament, and under Births and Deaths Registration Act, 1947, a modified form of birth certificate, showing the names, sex and date of birth and certain other particulars, but not the parents, may be obtained from the Registrar General, or the appropriate Superintendent Registrar or Registrar, on payment of a fee of 9d. (inclusive of search) and on furnishing certain particulars.

English Registers.—Birth registration exists at Somerset House from 1837. An index to earlier

entries (Births and Marriages) can be consulted at the *Society of Genealogists* at Chaucer House, Malet Place, London, W.C.1.

Scottish Registers of Births, Marriages and Deaths.—Parish registers were instituted for these in 1551, but until the Registration of Births, &c. (Scotland), Act, 1854, they were not properly kept in many cases. Extracts may, however, be obtained from them on payment of 3s. for each entry, but to be valid evidence it must be shown that the registers from which the entries are taken were regularly kept. Lists of the old parish registers may be consulted in the offices of the Registrar General, New Register House, Edinburgh, or of local Registrars. These old registers are in the charge of the Registrar General, and since 1854 local registers have been transmitted to him at stated periods. A fee of 20s. is payable for a search of all the Scottish registers, and 1s. is payable for a search of a particular parish. An extract of an entry may be obtained on payment of 3s. Extracts of entries are issued at reduced rates for specified purposes as in England, and similar provision exists for abbreviated birth certificates. The Registrar General may permit searches to be made by and extracts to be given gratis to persons unable to pay the fees.

BRITISH NATIONALITY AND CITIZENSHIP OF THE UNITED KINGDOM AND COLONIES

General.—The law as to British Nationality is now to be found mainly in the British Nationality Act, 1948, which came into force on Jan. 1, 1949. The Act introduces a new term, "citizenship." Every person who under the Act is a citizen of the United Kingdom and Colonies, or any citizen (by virtue of legislation in that country) of Canada, Australia, New Zealand, the Union of South Africa, India, Pakistan, Southern Rhodesia or Ceylon (hereafter referred to as "the Dominions") has by virtue of that citizenship the status of a British subject, and may be known either as a British Subject or as a Commonwealth citizen. Under s. 2 of the Newfoundland (Consequential Provisions) Act, 1950, potential citizens of Newfoundland under the British Nationality Act, 1948, are deemed to have been potential citizens of Canada.

Nationality before Jan. 1, 1949, was determined mainly by the British Nationality and Status of Alien Acts, 1914-1943, though these Acts did not affect the status of any person born before Jan. 1, 1915.

Retention of nationality by persons born in or who are citizens of Eire (now by virtue of the Ireland Act, 1949, styled the Republic of Ireland).

By the Ireland Act, 1949, a person who was born before Dec. 6, 1922, in what is now the Republic of Ireland (Eire) and was a British subject immediately before Jan. 1, 1949, is not deemed to have ceased to be a British subject unless either (i) he was domiciled in the Irish Free State on Dec. 6, 1922, or (ii) was on or after April 10, 1935, and before Jan. 1, 1949, permanently resident there, or (iii) had before Jan. 1, 1949, been registered as a citizen of Eire under the laws of that country.

In addition by the British Nationality Act, 1948, any citizen of Eire who immediately before Jan. 1, 1949, was also a British subject can retain that status by submitting at any time a claim to the Home Secretary on any of the following grounds: (a) he has been in the service of the United Kingdom government; (b) he holds a British passport issued in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory; (c) he has associations by

way of descent, residence or otherwise with any such place; or on complying with similar legislation in any of the "Dominions."

Citizenship of the United Kingdom and Colonies.

In the majority of cases, a person who is a British subject becomes also a "citizen," either of one of the "Dominions" by virtue of legislation in that country, or of the United Kingdom and Colonies under the 1948 Act. In the latter case, citizenship is acquired by:—

1. *Birth* on or after Jan. 1, 1949, in the United Kingdom and Colonies (which term does not include the "Dominions"), except

- (a) children born to non-citizen fathers enjoying diplomatic immunity from suit or legal process;
- (b) children born to fathers who are enemy aliens in enemy occupied territory.

2. *Descent*, if the father was a citizen by birth. If the father was a citizen by descent only, the child acquires citizenship by descent if either:—

- (a) the child is or his father was born in a protectorate, protected state, mandated territory or trust territory, or in a foreign country where Her Majesty then had jurisdiction over British subjects; or
- (b) the birth (occurring elsewhere than (a)) is registered at a United Kingdom consulate within one year; or
- (c) the father is at the time of birth in the service of the Crown under Her Majesty's United Kingdom government; or
- (d) the child is born in one of the "Dominions" in which a citizenship law has then taken effect and does not become a citizen thereof by birth.

3. *Registration* by the Home Secretary upon application by:—

- (a) a citizen of one of the "Dominions" or of the Republic of Ireland who can show either that he is ordinarily resident in the United Kingdom and has been so resident for a period of twelve months, or is in Crown service under the United Kingdom government;
- (b) a woman married to a United Kingdom, etc. citizen. If she is a British protected person or an alien she must take an oath of allegiance. (A woman who marries on or after Jan. 1, 1949, does not by virtue of that marriage acquire citizenship.)

A minor child of a citizen can be registered upon application being made by his parent or guardian.

4. *Naturalization.*—In order to be eligible for a certificate of naturalization an alien must:—

- (a) during the eight years preceding his application have resided for not less than five years (of which not less than one year immediately preceding the application must have been spent in the United Kingdom) in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory, or have been for five years in the service of the Crown; and
- (b) be of good character and have a sufficient knowledge of the English language; and
- (c) intend to reside in the United Kingdom or any colony, etc., or in the Anglo-Egyptian Sudan, or to enter or continue in the service of the Crown, or in the service of certain organizations.

A British protected person who satisfies (b) and (c) above can apply for naturalization if he can show either that he has resided in the United Kingdom for the twelve months (or such shorter period as the Home Secretary may allow) immediately preceding his application, or that he is in the service of the Crown under Her Majesty's United Kingdom Government.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization are supplied with the form of application which may be obtained from H.M. Stationery Office.

5. *Incorporation of Territory* when citizenship is granted to such persons as are specified by Order in Council.

6. *Transitional Provisions*, which confer citizenship on a person who was a British subject immediately before Jan. 1, 1949, if either:—

- (i) (a) he would, if born after that date, have qualified for citizenship by birth; or
- (b) he is a person naturalized in the United Kingdom and Colonies; or
- (c) he became a British subject by reason of annexation of territory which on Jan. 1, 1949, was included in the United Kingdom and Colonies; or
- (ii) at the time of his birth his father was a British subject and possessed any of the above qualifications; or
- (iii) he was born within territory comprised on Jan. 1, 1949, in a protectorate, protected state or United Kingdom trust territory; or
- (iv) he was not on that date a citizen or potential citizen of one of the "Dominions"; or
- (v) being a woman, had before Jan. 1, 1949, been married to a man who becomes, or would but for his death have become, a citizen.

A British subject who is merely a potential citizen of one of the "Dominions" continues as a British subject without citizenship until he becomes a citizen of such "Dominion" or of the Republic of Ireland, or an alien. If none of these has happened at the date when a citizenship law is passed in the country at which he is potentially a citizen, he becomes a citizen by descent of the United Kingdom and Colonies.

A woman who lost British nationality by reason of marriage to an alien regained it on Jan. 1, 1949.

By the Adoption Act, 1950, an adopted child becomes a citizen of the United Kingdom and Colonies as from the date of the adoption order if the adopter or, in the case of a joint adoption, the male adopter, is a citizen of the United Kingdom and Colonies.

Citizenship of the United Kingdom and Colonies can be lost:—

- (i) by declaration in the prescribed manner by a person who is also a citizen of "Dominion" or of the Republic of Ireland or a national of a foreign country. The Home Secretary can withhold registration of the declaration in time of war;
- (ii) where the Home Secretary is satisfied that citizenship by registration or naturalization was obtained by fraud, false representation, etc.;
- (iii) by the Home Secretary depriving a naturalized person of citizenship if such person has:—

- (a) shown himself by act or speech to be disloyal or disaffected towards Her Majesty; or

(b) in time of war, traded with the enemy; or

(c) within five years after becoming naturalized, been sentenced in any country to a term of twelve months imprisonment; or

(d) continuously resided in foreign countries for seven years, and during that period has neither at any time been in the service of the Crown or of certain international organizations, nor registered annually at a United Kingdom consulate his intention to retain citizenship;

and the Home Secretary is satisfied that it is not conducive to the public good that such person should retain his citizenship;

- (iv) where a naturalized person is deprived of citizenship of a "Dominion" or of the Republic of Ireland, the Home Secretary can also deprive him of citizenship of the United Kingdom and Colonies.

STATUS OF ALIENS.—Property may be held by an alien in the same manner as by a natural-born British subject, but he may not hold public office, exercise the franchise or own a British ship or aircraft. The Republic of Ireland Act, 1949, declares that the Republic, though not part of H.M.'s Dominions, is not a foreign country, and any reference in an Act of Parliament to foreigners, aliens, foreign countries, etc., shall be construed accordingly.

CROWN—PROCEEDINGS AGAINST

Before 1947 proceedings against the Crown were generally possible only by a procedure known as a petition of right, which placed the litigant at a considerable disadvantage and which was not normally available at all in cases of tort (i.e. civil wrongs other than breach of contract). Thus, no proceedings would normally lie against the Government if a subject were injured by the negligent driving of a Government vehicle (although the driver could be sued) or if a Government employee was injured by the defective condition of the Crown premises on which he worked. Now, however, by the Crown Proceedings Act, 1947, which came into operation on Jan. 1, 1948, the Crown, in its public capacity, is largely placed in the same position as a subject, although some procedural disadvantages remain. Among exceptions to the Act are the following: (a) No action lies in tort against the Crown or the individual Crown servant for anything done or omitted to be done in relation to any postal packet or telephone communication, except for loss of a registered inland postal packet, not being a telegram. (b) The Crown and any member of the armed forces are immune from liability in tort in respect of death of, or personal injury to, another member of the armed forces on duty, provided that the death or injury is attributable to service for purposes of pension.

Scotland.—The Act extends to Scotland and has the effect of bringing the practice of the two countries as closely together as the different legal systems will permit. While formerly actions against the Crown, when permissible, were confined to the Court of Session, proceedings may now be brought in the Sheriff Court. The Lord Advocate is the proper defender in proceedings against the Crown.

The Act lays down that arrestment of money in the hands of the Crown or of a Government Department is competent in any case where arrestment

in the hands of a subject would have been competent, but an exception is made in respect of Post Office Savings Bank deposits. On the other hand, the former rule that the wages and salaries of the servants of the Crown are not arrestable remains unaltered.

The period of six months within which actions were required to be brought in accordance with the Public Authorities Protection Act, 1893, is extended to one year, thus bringing the law of Scotland in this respect into line with that of England, where the period was extended to one year by the Limitation Act, 1939.

DEATHS, BURIAL AND CREMATION

DEATHS

(For Certificates, see under BIRTHS).

In England and Wales.—When a death takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons:—1. A relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or, the person causing the body to be buried. Relatives present or in attendance are first required to attend to the registration. The registration must be made within five days of the death, or within the same time written notice of the death sent to the Registrar, in either case accompanied by a certificate of the cause of death, signed by a registered medical practitioner, if any such attended the deceased during his last illness. If notice is sent, information must nevertheless be given and the register signed within fourteen days from the death. It is important that every death should be registered and a certificate obtained before the funeral and delivered to the clergyman or other person who performs the funeral or religious service. No fee is chargeable for this certificate. If at the end of fourteen days the death is not registered, the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place. Failure to comply involves a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods. After twelve months no death can be registered without the Registrar General's consent and on payment of fees amounting to seven shillings and sixpence.

A body must not be disposed of until (1) either the Registrar has given a certificate to the effect that he has registered the death, or (2) until the Coroner has made a disposal order (*Births and Deaths Registration Act, 1926, ss. 1, 2*).

A person disposing of a body must within ninety-six hours deliver to the Registrar a notification as to the date, place, and means of the disposal of the body (*ib. s. 3*).

"Still-born" child. (*See under Births (Registration), p. 1127.*)

Death at Sea.—The master of a British ship must record any death on board and send particulars to the Registrar General of Shipping.

Death Abroad.—Consular Officers are authorized to register deaths of British subjects occurring abroad. Certificates are procurable at the Registrar General's Office, London, from whom certified copies may be obtained. If the deceased was of

Scottish domicile, particulars are sent to the Registrar General for Scotland.

In Scotland, the rules of registration are similar, but (1) the death must be registered within 8 days, failure to do so involving a penalty of £1; (2) the medical man concerned must give a certificate of death to the Registrar in terms of the Registration of Births, &c. (Scotland) Act, 1854, within 7 days; (3) the informant of a death receives from the Registrar a certificate that the death has been registered. This is given to the undertaker, who delivers it to the keeper of the cemetery. Failure to comply is under penalty in all cases.

BURIAL

The duty of burial is incumbent on the deceased person's Executors (if any appointed); it is also a recognized obligation of the husband of a woman, and the parent of a child, also of a householder where the body lies. Funeral expenses of a reasonable amount will be repayable out of deceased's estate in priority to any other claims. Directions as to place and mode of burial are frequently contained in the deceased's will or in some memorandum placed with private papers, or may have been communicated verbally to a relative. Consequently steps should immediately be taken to ascertain the deceased's wishes from the above sources. If the wishes are considered objectionable, they are not necessarily enforceable: legal advice should be taken. A person may legally leave directions for the anatomical examination of his body. As to the place of burial—unless closed by Order in Council—the parish churchyard is the normal burying place for parishioners, or any person dying in the Parish, but nowadays this will apply only in villages and the smaller towns. In populous districts cemeteries and crematoria have been established either by the local council, or a private company, and burials will take place there in accordance with the regulations. For an exclusive right to a burial space in the churchyard a faculty is required from the Ecclesiastical Court. Poor persons may be buried at the public expense by the local authority. As to the necessity for registration of a death before burial, see above.

CREMATION

Under the Cremation Acts, 1902 and 1952, regulations are made by the Home Secretary dealing fully with the cremation of a body, disposal of ashes, etc., and containing numerous essential safeguards.

If Cremation is desired it is advisable for instructions to be left in writing to that effect. Cremation may not take place if deceased has prohibited that form of burial.

To arrange for Cremation the Executor or near relative should instruct the undertaker to that effect and obtain from him the Statutory Forms required as given in the Cremation Regulations issued in 1930 (Statutory Rules and Orders, 1930, No. 1026).

DIVORCE, ETC.

Preliminary.—Matrimonial Suits may be conveniently divided into three classes, viz. (1) those in which a declaration that there has never been a marriage is sought; (2) those in which the duties arising from marriage are sought to be upheld; and (3) those in which, the marriage being admitted, it is sought to end the marriage or the duties arising from it.

(1) *Nullity of Marriage.*—Marriage is void *ab initio* if the parties were in the prohibited degrees of affinity, if it was bigamous, if there was no consent on the part of one or both of the parties, if one of the parties was insane, or if one of the parties was under the age of consent, *i.e.*, 16 —Marriage Act, 1949. Where the formalities of the marriage were defective, the marriage is generally void if both parties knew of the defect (*e.g.*, where marriage took place otherwise than in an authorized building). But absence of the consent of parents or guardians (or of the Court or other authority, in lieu thereof) in the case of minors does not invalidate the marriage. Inability to consummate a marriage may also be a ground for a nullity decree; but in this case, the marriage is only voidable and remains valid until the decree is made.

In *L. v. L.*, a decree of nullity was granted by the High Court on the ground of the husband's inability to consummate the marriage notwithstanding that the wife had, as a result of artificial insemination, conceived a child of which the husband was the father.

Under the Matrimonial Causes Act, 1950, which does not apply to Scotland, a marriage is also voidable (*i.e.*, a decree of nullity may be obtained) on the following grounds—(a) respondent's wilful refusal to consummate the marriage; (b) that either party at the time of marriage was mentally defective or subject to recurrent fits of insanity or epilepsy; (c) that at the time of marriage the respondent was suffering from communicable venereal disease; (d) that at the time of the marriage the respondent was pregnant by another man. In cases, (b), (c) and (d), the petitioner must have been ignorant of the grounds at the date of the marriage and must not have agreed to intercourse taking place since discovering the grounds, and proceedings must be instituted within a year of the marriage.

By the Matrimonial Causes Act, 1950, and, as to Scotland, by the Law Reform (Miscellaneous Provisions) Act, 1949, it is provided that a decree of nullity in respect of a voidable marriage shall not operate so as to bastardize any child, who would have been the legitimate child of the parties to the marriage if the marriage had been dissolved instead of annulled.

A wife's insistence upon the use of contraceptives will not constitute wilful refusal to consummate within (a) above, even though there has been no normal intercourse, but it may enable a petition for Divorce to be brought on the grounds of cruelty or desertion (as to which see below). Further it has been allowed as a defence to a charge of desertion against the aggrieved party.

In one High Court case the judge held that a husband's insistence on the practice of *coitus interruptus* amounted to wilful refusal to consummate the marriage, where there had been no other intercourse. In another High Court case the judge disagreed with this view, but held that, in the circumstances of the particular case, a divorce could be granted on the ground of legal cruelty.

(2) *Restitution of Conjugal Rights.*—This is a form of relief generally sought by a spouse who has been deserted. Disobedience to a decree of restitution of conjugal rights is a ground for obtaining judicial separation.

(3) *Judicial Separation and Divorce.*—The third class of suit includes a suit for judicial separation (which does not dissolve a marriage) and a suit for divorce (which, if successful, dissolves the marriage altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation on the same grounds as those for

divorce and also on the ground specified in (a) above.

Divorce.—Complete divorce is now obtainable by either husband or wife upon any one of the following grounds: adultery of respondent since marriage; desertion by respondent for 3 years immediately before petition; cruelty to petitioner; incurable insanity (under certain conditions); and by the wife, also on commission by the husband of certain criminal sexual offences. Matrimonial Causes Act, 1950, s. 1.

The foregoing is subject to a clause prohibiting any petition for divorce before the lapse of three years from the date of marriage, except in the case of exceptional hardship (upon petitioner) or of exceptional depravity of respondent.

Cruelty, in a legal sense, is conduct of such a character as to have caused injury or a reasonable apprehension of injury to life, limb, or health (bodily or mental). A course of conduct calculated to break the spirit of the sufferer, continued until health breaks down or is likely to break down under the strain, constitutes legal cruelty.

Desertion may be defined as a voluntary withdrawal from cohabitation by one spouse without just cause and against the wishes of the other. Where one spouse is guilty of conduct which forces the other to leave, the party at fault is said to be guilty of constructive desertion.

If, upon disputes arising, the parties agree to live apart, then in general neither can be said to have deserted the other.

When the decree will be refused.—A decree must be refused, even if the suit is undefended, if the allegations in the petition for divorce are not proved. (There is no such thing in the Divorce Court as judgment against the respondent by default.) Other absolute bars to relief are (i) connivance at the adultery of the respondent; (ii) collusion, as where the initiation of the suit is procured by agreement or bargain (but this does not prevent a fresh suit being brought free from collusion); (iii) condonation of the respondent's adultery or cruelty, *i.e.*, complete forgiveness which restores the *status quo*. There are also certain discretionary bars, as, *e.g.*, where the petitioner has been guilty of adultery; of unreasonable delay; of cruelty; or of wilful neglect or misconduct conducing to the adultery, insanity, or desertion alleged. (1950 Act, s. 4.)

Intervention by Queen's Proctor.—At any time during the progress of a suit, and before the decree nisi is made absolute, the Queen's Proctor may intervene.

Decree Absolute.—Every decree of dissolution or nullity is in the first instance a decree nisi. The marriage subsists until the decree is made absolute, usually six weeks after decree nisi. After that date either spouse may marry again; but as to marriage within "Prohibited Degrees" see Marriage—Miscellaneous Notes, p. 1139.

Maintenance, etc.—The Court has wide powers to make orders as to maintenance or alimony (usually payable to an innocent wife), and as to costs. The husband can be ordered to pay his wife's costs, even if she is unsuccessful in her suit or defence. A guilty co-respondent may be ordered to pay costs and damages.

By the Matrimonial Causes Act, 1950, the High Court in England may, where the husband has wilfully neglected to provide reasonable maintenance for the wife or children, order the husband to make provision for them, even though no matrimonial suit is pending between the parties to the marriage.

CUSTODY OF CHILDREN

In suits for nullity, divorce or judicial separation, the Court can make orders as to the custody of and access to the children of the marriage and as to their upkeep. A guilty spouse will normally be entitled to reasonable access to the children of the marriage and may even be awarded the custody if the Court thinks fit. The paramount consideration is always the welfare of the child.

A spouse who has been deprived of the custody of a child of the marriage will not thereby be deprived of his other rights as the child's guardian unless the Court expressly so orders.

SEPARATION BY AGREEMENT

Husband and wife may agree, with or without consideration, to separate and live apart, but the agreement, to be valid, must be followed by an immediate separation. It is most desirable to consult a solicitor in every such case.

MAGISTRATE'S SEPARATION AND MAINTENANCE ORDERS

When a husband has been guilty of adultery or assault or has deserted his wife, or has been guilty of persistent cruelty to her or her children, or of wilful neglect to maintain her or her infant children, or where he is an habitual drunkard, or insists on having intercourse while suffering from a venereal disease, or compels her to submit herself to prostitution, the wife may obtain relief from the local magistrates' court. A husband may apply on the ground that the wife has been cruel to his children; or is an habitual drunkard; or has committed adultery. The Court may declare that the applicant is no longer bound to cohabit with the other spouse. Where a wife is the applicant, the legal custody of children under sixteen may be given to her, and the husband may be ordered to pay a weekly sum not exceeding £5 for the benefit of the wife and a sum not exceeding £120s. a week for each child until the child attains sixteen. Further, if a child is or will be engaged in a course of education, or training after attaining the age of sixteen, the Court may on the application of the wife make an order for the payment of maintenance in respect of that child for a further period of up to two years from the date of the making of the order; such further period may be extended on subsequent applications to the Court, but this maintenance provision will in no case be extended beyond the date when the child attains the age of twenty-one. Where the husband applies, the custody of any children of the marriage may be given to him. The Court may, on giving the custody of any children to either spouse, make such order, as to access to those children by the other spouse, as it thinks fit. If the wife has been guilty of adultery, no order will be made on her application unless there was condonation or connivance or conduct conducing thereto by the husband; and if, having obtained an order, she commits adultery, the order must be discharged, unless the court is of opinion that the husband condoned to the adultery by failing to make such payment of the separation allowances as he was able. An order may be altered, varied or discharged at any time on fresh evidence, or, as regards orders for payment, on cause being shown. All applications for relief, except on grounds of desertion or failure to maintain, must be made within six months of the offence complained of. The Summary Procedure (Domestic Proceedings) Act, 1937, separates the hearing of matrimonial disputes from ordinary Court business; specifies the persons allowed to be present; limits newspaper reports, etc., etc.

SCOTLAND

DIVORCE

The following are the grounds for divorce:—

1. *Adultery*.—A mere confession by the defender is of itself insufficient; there must be proof of the facts. Direct evidence is not required, if facts can be established which give rise to an inevitable inference of adultery. There must be no collusion between the parties, and the pursuer is required to swear to this. It is not collusion, however, for a guilty spouse to give information of an act of adultery already committed. It is a defence to an action of divorce for adultery to plead that the innocent spouse has condoned the misconduct on which the action is founded.

2. *Desertion*.—The defender must have wilfully and without reasonable cause deserted the pursuer and persisted in such desertion for a period of not less than three years. It must be shown that the desertion was without reasonable cause, and that the pursuer has throughout the period been willing to adhere. Refusal by one spouse to have marital relations with the other for any period of three years may amount to desertion. Here also, collusion is fatal to the success of the action.

3. *Incurable Insanity*.—The defender must, for five years preceding the raising of the action, have been under care and treatment as an insane person.

4. *Cruelty*.—The degree of cruelty to be established depends on the circumstances of each individual case, but the test, generally speaking, is that the conduct complained of must be such as to endanger the health of the pursuer. Cruelty may take the form of habitual drunkenness on the part of one of the spouses.

5. *Unnatural Sexual Offences*.—An extract of the criminal conviction is sufficient proof.

Effect of Divorce on Property.—A husband or wife obtaining decree of divorce against the other, except on the ground of incurable insanity, is entitled to claim his or her legal rights as if the offender was dead. Where there has been a successful cross-action the effect is the same as though both spouses had died at the date of decree.

Nullity of Marriage.—A declaration of nullity of marriage may be obtained on the ground of any impediment, viz., consanguinity and affinity, subsistence of a previous marriage, non-age of one of the parties, incapacity or insanity of one of the parties, or by the absence of genuine consent.

SEPARATION

A decree of judicial separation may be obtained by one spouse against the other on the grounds of (a) adultery, (b) cruelty. This entitles the parties to live apart, but does not dissolve the marriage. The husband, if the guilty party, is liable for alimony.

CUSTODY OF CHILDREN

In actions for divorce and separation, the Court has a discretion in awarding the custody of the children of the marriage. The welfare of the children is the paramount consideration, and the mere fact that a spouse is the guilty party in the action does not of itself deprive him or her of the right to claim custody, though where the considerations of welfare are equally balanced the Court will have regard to the element of guilt.

ILLEGITIMACY AND LEGITIMATION
ENGLAND AND WALES

A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Public Assistance Authority where the

child becomes chargeable to the local authority and the justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 20s. a week. The evidence of the woman must be corroborated in a material particular. The mother has the custody of her bastard children. *Prima facie* every child born of a married woman during a marriage is legitimate; and this presumption can only be rebutted by strong, distinct, satisfactory and conclusive evidence.

LEGITIMATION.—By the *Legitimacy Act, 1926*, which came into force on Jan. 1, 1927, where the parents of an illegitimate person marry, or have married, whether before or after that date, the marriage, if the father is at the date thereof domiciled in England or Wales, renders that person, if living, legitimate as from Jan. 1, 1927, or from the date of the marriage, whichever last happens. This does not legitimate a person whose father or mother was married to a third person at the time when the illegitimate person was born. It is the duty of the parents to supply to the Registrar General information for re-registration of the birth of a legitimated child.

Declarations of Legitimacy.—A person claiming that he, his parent, or any remoter ancestor has become legitimated, may petition the High Court or the County Court for the necessary declaration.

Rights and Duties of Legitimated Persons.—A legitimated person, his spouse or issue may take property under an intestacy occurring after the date of legitimation, or under any disposition (e.g., a will) coming into operation after such date, as if he had been legitimate.

He must maintain all persons whom he would be bound to maintain had he been born legitimate, and he is entitled to the benefit of any Act of Parliament which confers rights on legitimate persons to recover damages or compensation. The Act specially provides that nothing therein contained is to render any person capable of succeeding to or transmitting a right to any dignity or title.

SCOTLAND

Illegitimate Children (Scotland) Act, 1930.—The mother of an illegitimate child may raise an action of affiliation and aliment against the father, either in the Court of Session or, more usually, in the Sheriff Court. Where in any such action the Court finds that the defender is the father of the child, the Court shall in awarding inlying expenses, or aliment, have regard to the means of the parties, and the whole circumstances of the case. The Court may, upon application by the mother or by the father of any illegitimate child, or in any action for aliment for an illegitimate child, make such order as it may think fit regarding the custody of such child and the right of access thereto of either parent, having regard to the welfare of the child and to the conduct of the parents and to the wishes as well of the mother as of the father and may on the application of either parent recall or vary such order. The obligation of the mother and of the father of an illegitimate child to provide aliment for such child shall (without prejudice to any obligation attaching at common law) endure until the child attains the age of sixteen years.

By Scots Law an illegitimate child is legitimated by the subsequent marriage of its parents provided there was no impediment to the marriage of the parents at the time of the conception of the child. Such legitimation is recognized by International Law so far as the laws of particular countries allow it and is valid to that extent in England. By the *Legitimacy Act, 1926*, an

illegitimate child may, in certain circumstances, succeed on intestacy. By the Registration of Births, Deaths and Marriages (Scotland) Amendment Act, 1934, a child so legitimated, who has already been registered as illegitimate, may, in certain circumstances be re-registered as legitimate.

INTESTACY

ENGLAND AND WALES

As regards deaths on or after January 1, 1953, the position is governed by the Administration of Estates Act, 1925, as amended by the Intestates' Estates Act, 1952. The latter Act considerably increased the benefits of a surviving spouse of an intestate, and also extended the provisions of the Inheritance (Family Provision) Act, 1938 (see under "Wills"), to intestacies. These notes deal with the position under the 1952 Act, so that if the death occurred before 1953 reference must be made elsewhere. If the intestate leaves a spouse and issue, the spouse takes (i) the "personal chattels"; (ii) £5,000 with interest at 4 per cent. from death until payment; and (iii) a life interest in half of the rest of the estate. This life interest can be capitalised at the option of the spouse. "Personal chattels" are articles of household use or ornament (including motor-cars), not used for business purposes. The rest of the estate goes to the issue. If the intestate leaves a spouse and no issue, but leaves a parent or brother or sister of the whole blood or issue of such brothers and sisters, the spouse takes (i) the "personal chattels"; (ii) £20,000 with interest at 4 per cent. from death until payment, and (iii) half of the rest of the estate absolutely. The other half of the rest of the estate goes to the parents, equally if more than one, or, if none, to the brothers and sisters of the whole blood. If the intestate leaves a spouse, but no issue, no parents, and no brothers or sisters of the whole blood or their issue, the spouse takes the whole estate absolutely. If resident therein at the intestate's death, the surviving spouse may generally require the personal representatives to appropriate the interest of the intestate in the matrimonial home in or towards satisfaction of any absolute interest of the spouse, including the capitalized value of a life interest. In certain cases, leave of Court is required. On a partial intestacy, any benefit (other than personal chattels specifically bequeathed) received by the surviving spouse under the will must be brought into account against the statutory legacy of £5,000 or £20,000 as the case may be. If there is no surviving spouse, the estate is distributed among those who survive the intestate in the following order (those entitled under earlier numbers taking to the exclusion of those entitled under later numbers):—(1) issue; (2) father or mother (equally, if both alive); (3) brothers and sisters of the whole blood; (4) brothers and sisters of the half blood; (5) grandparents (equally, if more than one alive); (6) uncles and aunts of the whole blood; (7) uncles and aunts of the half blood; (8) the Crown.

In cases (1), (3), (4), (6) and (7) the persons entitled lose their interests unless they or their issue not only survive the intestate, but also attain twenty-one or marry under that age, their shares going to the other persons (if any) within the same group who do attain twenty-one or marry. Moreover, in the same cases, succession is not *per capita*, but *per stirpes*, i.e., by stocks or families. Thus, if the intestate leaves one child and two grandchildren, being the children of a child of the intestate who pre-deceased the intestate, the two grandchildren represent their deceased parent and take between them one-half of the issue's share, the remaining half going to the surviving child. Similarly,

nephews and nieces represent a deceased brother, and so on.

When the deceased died partially intestate (*i.e.*, leaving a will which disposed of only part of his property), the above rules apply to the intestate part.

Children must bring into account (hotchpot) any substantial advances received from the intestate during his lifetime before claiming any further share under the intestacy. Special hotchpot provisions apply to partial intestacy.

Note that the old rule of primogeniture no longer applies.

For further details, see Administration of Estates Act, 1925.

The Legitimacy Act, 1926, contains special provisions concerning the intestacy of an illegitimate child or the mother of an illegitimate child.

SCOTLAND

Heritage.—The lines of succession are: (1) descendants; (2) collaterals; (3) ascendants and their collaterals and so on in the ascending scale. Males have preference over females and the rule of primogeniture obtains. Regard is had, however, to the right of representation; thus, if the eldest son of the deceased, being his heir, has predeceased him leaving issue, the issue (whether male or female) are preferred to the younger sons of the deceased. Daughters only succeed if there are neither sons nor the issue of predeceasing sons, and where there are more than one, they share equally. There being no descendants, brothers, etc., will succeed, those of the full blood excluding those of the half blood. Among collaterals it is noted that the deceased's immediate younger brother is preferred to an elder brother. Failing a younger brother and his issue the estate ascends to the next elder brother and so on. If there are no brothers and sisters, nor the issue of brothers and sisters, the estate goes to the father and failing him to his collaterals; failing these the estate ascends to the paternal grandfather and his collaterals. The succession never ascends to the mother and her relations; even the mother's own estate, after vesting in her son or daughter, never ascends to the maternal line again.

By the Intestate Husband's Estate (Scotland) Acts, 1911 and 1919, the widow of a man dying intestate and without lawful issue is entitled to the whole estate both heritable and moveable if under £500 in value; if over that amount, she takes £500 with interest at 4 per cent. from the date of death, out of the heritable and moveable estate rateably before any division is made, and without prejudice to her rights of terce and *ius relictae* (see *post*, p. 1143). Section 5 of the Law Reform (Miscellaneous Provisions) (Scotland) Act, 1940, gives like rights to a surviving husband. The same section covers the case of partial intestacy.

Moveable.—One-third of the moveable estate goes to the surviving spouse as *ius relictae* (*relictae*); one-third to surviving children as *legitum* (see *post*, p. 1143); and one-third to surviving children and issue of predeceasing children *per stirpes*, *i.e.*, the share which would have fallen to a predeceased parent, if alive, is divided equally among the children. Where no children or issue of children survive, half of the estate goes to the surviving spouse and half to the heirs *in mobilibus*, *i.e.*, nearest heirs including representatives of predeceasing, subject to the spouse's right to £500 (*supra*). The lines of succession are the same as in heritable succession, but the right of representation (*supra*) only applies where there are next of kin or the issue of predeceasing next of kin. Intestate Moveable Succession (Scotland) Act, 1855 (amended 1919). Beyond that relationship heirs

take *per capita*. Where an intestate leaves no issue and is predeceased by his father, his mother is entitled to the same rights as the father would have had on survivorship (1919 Act). It is of interest to note that a Committee was recently set up by the Secretary of State for Scotland to make such recommendations as seemed desirable for the alteration of the law in regard to intestate succession; the legal rights of spouses and children, and the law in relation to adopted persons and adopters. The Committee have issued their Report in which important alterations are proposed.

JURY SERVICE

Liability to Jury Service depends upon inclusion in the local Jury Book. This is compiled from the Electors Lists for each year (see *post* under "Voters' Qualifications"). The names of all persons who are on 20th November qualified and liable to serve as jurors are marked with the letter "J" on the Electors Lists. The marked Electors Lists are published, and anyone whose name is improperly marked may before the following 25th January claim that, although qualified to serve [see below] he is exempt from service [see below]; the marks will be removed from the names of exempted persons. The remaining marked names are thereafter included in the Jury Book. No one whose name actually appears in the Jury Book may claim exemption on any ground whatever except illness or, if a woman, for medical reasons.

QUALIFICATIONS

England and Wales.—Every man and woman between the ages of 21 and 60 years (persons over 60 are exempt but not disqualified) residing in England or Wales being the owner, legally or under a trust, of freehold land worth £20 a year or more, or of leasehold land worth £20 a year or more (if the lease is for at least 21 years or a life interest) in the county in which they live; or being a householder assessed to the poor rate or inhabited house duty at £30 in Middlesex or £20 elsewhere; or occupying a house with at least 15 windows; is qualified and liable to serve on juries in the superior courts (civil and criminal), and at Assizes in their own county, and on petty juries in the local County Court or Quarter Sessions. Also all burgesses of boroughs having separate quarter sessions or a borough civil court are qualified and liable to serve on juries therein. Special regulations govern the qualifications and method of listing common jurors in the City of London; and jurors for a coroner's inquest. By the Juries Act, 1949, a person attending for jury service is entitled to be paid travelling and subsistence allowances together with compensation for loss of earnings and other loss or expenses to a maximum of 20s. per day.

Disqualifications.—Any person who has been attainted of treason or felony, or convicted of any infamous crime (unless he has obtained a free pardon) is disqualified from service on all juries.

Exemptions.—The persons who are exempt from serving on juries (including coroner's juries) include: peers; M.P.'s; judges; ministers of religion (Christian and Jewish); practising lawyers; officers of the Courts and coroners; prison, etc., officers; asylum keepers; practising M.R.C.S.'s, M.R.C.P.'s and L.R.C.P.'s; practising apothecaries, doctors and chemists (and registered dentists at their option); midwives; members of the armed forces; members of the Mersey Docks and Harbour Board, and of the Port of London Authority; certain members of Trinity House, Deptford Strand; masters of buoy and light vessels under the Trinity Houses, and all licensed water pilots; household servants of

the Crown; officers of the Post Office, customs and excise; sheriff's officers; police officers; special constables; metropolitan magistrates and their court clerks and servants; officers of the Houses of Parliament; Registrars of births, deaths, and marriages.

As to their own counties: members of the L.C.C., and commissioners of income tax.

As to their local counties: borough councillors and J.P.s., Town Clerks and borough treasurers; burgesses of boroughs having separate Quarter Sessions.

As to their own area of jurisdiction: J.P.s.

Moreover a juror can never be called upon to serve oftener than once in each year; this period of exemption is longer in certain counties.

JURY SERVICE IN SCOTLAND

It is the duty of the Sheriff in each county to make up a list of persons qualified and liable to serve as jurors. The list is compiled from information which every householder is required to provide. From this list the General Jury Book is made up. Part II of the Juries Act, 1949, applies only to Scotland and provides, *inter alia*, for the payment of travelling expenses and subsistence allowances to jurors, and for compensation for loss of earnings, of which the latter must not exceed 20s. per day.

QUALIFICATIONS

Every man or woman between the ages of 21 and 60 is qualified, who is possessed of heritable property of the yearly value of at least £5, or of moveable property of the value of at least £200 sterling.

Exemptions.—The persons who are exempt from serving on juries include: peers, judges of the supreme courts, sheriffs, magistrates of Royal Burghs, ministers of religion, parochial schoolmasters, practising lawyers, clerks and officers of court, prison officers, university professors, physicians, surgeons and dentists, officers in the Navy or Army on full pay, customs officers, messengers-at-arms and other officers of the law, lighthouse keepers and their assistants, soldiers, Inland Revenue officials and officers of the Post Office.

Jurors failing to attend without good cause are liable to a penalty.

LANDLORD AND TENANT

ENGLAND AND WALES

The law governing the relationship of landlord and tenant is complicated by the mass of legislation on the subject, and no attempt is made here to deal in any detail with that legislation. Some of the statutes which govern specific aspects of the topic are set out at the end of this note with brief particulars. Basically the relationship between the parties to a lease is governed by the lease itself, although there are certain matters which will be implied in a lease although the lease be silent on these matters e.g. an obligation on the tenant to pay the rent. To take effect at law, i.e. to create a legal estate in favour of the tenant, a lease must be by deed, with the exception that a lease for three years or less at the best rent without a fine to take effect in possession at once can be validly created, even at law, in writing or even by word of mouth. The liability of the parties under the covenants in the lease depends essentially upon the wording of the covenants themselves. In many leases the landlord reserves the right to re-enter and forfeit the lease if the tenant is in breach of covenant, but usually before the landlord forfeits the lease he must serve a notice on the tenant. See S. 146, Law of Property

Act, 1925. It is emphasised that no attempt is made here to deal comprehensively with the law on this subject, which is very wide, but the few points dealt with above may show the desirability of seeking professional assistance in these matters. Important statutes include:—

(1) As to agricultural holdings—the Agricultural Holdings Act, 1948. Among other things, this Act regulates the length of notice necessary to determine an agricultural tenancy, the tenant's right to remove fixtures on the land, his right to compensation for damage done by game, for improvements and for disturbance, and his right to require the consent of the Minister to the operation of a notice to quit.

(2) As to business premises—the Landlord and Tenant Act, 1927, Part I is the main statutory provision. Under this Act, a tenant of such premises may have rights to compensation for improvements, for loss of goodwill, and to the grant of a new lease in certain cases. Premises regularly used for carrying on a profession are within the provisions as to compensation for improvements, but are otherwise outside Part I of the Act.

(3) As to unfurnished dwelling houses—the complicated mass of legislation generally known as the Rent Acts. If a house is within these Acts, the tenant may have a personal right to reside in the house and can only be ousted on certain grounds. Further, each house within the Acts has a standard rent, and the rent recoverable by the landlord is limited to this rent with the addition of permitted increases. If there is a mortgage of a house which is within the Acts, the mortgagee can only take steps to enforce his security if certain grounds exist. Further, he cannot in general increase the rate of interest.

Houses let at a rent which include board or substantial attendance or furniture are governed by the Furnished Houses (Rent Control) Act, 1946, as amended by the Landlord and Tenant (Rent Control) Act, 1949.

SCOTLAND

A Lease is a Contract, the relationship of the parties being governed by the terms thereof. As is also the case in England (see the foregoing Section) legislation has played an important part in regulating that relationship. Thus, what at Common Law was an Agreement binding only the parties to the deed, becomes in virtue of Statute 1449 c. 17, a contract binding the landlord's successors, as purchasers or creditors, provided the following four conditions are observed; (1) the lease, if for more than one year, must be in writing, (2) there must be a rent, (3) there must be a term of expiry, and (4) the tenant must have entered into possession.

It would be impracticable in a brief section of these Notes to enter upon a general discussion of this branch of the law and, accordingly, the plan adopted in the preceding Section of quoting a few important Statutes is followed here.

The Agricultural Holdings (Scotland) Act, 1949, which is a consolidating act applicable to Scotland, contains provisions similar to those in the English Act, which is alluded to in the preceding Section. It cannot here be analysed in detail.

It is of interest to note that the Small Landholders Act, 1911, provided for the setting up of the Land Court which has jurisdiction over a large proportion of agricultural and pastoral land in Scotland.

In Scotland business premises are not controlled by Statute to so great an extent as in England, but the Tenancy of Shops (Scotland) Act, 1949, gives a measure of security to tenants of shops. This

Act, which is in force until December 31, 1953, enables the tenant of a shop who is threatened with eviction to apply to the Sheriff for a renewal of the tenancy. If the landlord has offered to sell the subjects to the tenant at an agreed price the application for a renewal of the tenancy may be dismissed. Reference should be made to Section 1 (3) of the Act for particulars of other circumstances under which the Sheriff has a discretion to dismiss an application. The Act applies to premises held by the Crown or Government Departments, either as landlord or tenant.

The series of complicated Statutes known as the Rent and Mortgage Interest (Restrictions) Acts, 1920 to 1939, govern the relations between landlord and tenant in regard to unfurnished houses, including parts thereof if let as separate dwellings. One effect of these Acts is to give security of tenure to tenants who, except in certain circumstances, cannot be evicted at the will of the landlord. It is important to note that, notwithstanding conditions in the lease of a controlled house providing for the removal of the tenant, it is not possible to contract out of the Acts. Houses controlled are those of rateable value not exceeding £90. Employees occupying premises by virtue of their employment are not tenants and so cannot claim protection.

The Rent of Furnished Houses Control (Scotland) Act, 1943, which is in operation until March 31, 1954, contains provisions applicable to houses or parts of houses let with furniture and with or without services, as also to unfurnished premises let with services. Application may be made to a Tribunal set up under the Act to approve, reduce and, in certain cases, to increase the rents of such houses.

LEGAL AID

Criminal Cases.

The Poor Prisoners' Defence Act, 1930, provides for free legal aid in criminal proceedings in specified cases, and official lists are kept of solicitors and barristers willing to undertake the defence of poor prisoners. On trial for an indictable offence (i.e., before the higher courts, such as Assizes or Quarter Sessions) the person charged may have free legal aid, if Justices, on committal for trial, or Judge of trial court grant a *Defence Certificate*. If the person's means are insufficient, such Certificate may be granted in cases where desirable, and must be given for a murder charge. In Magistrates' Courts, a Defence Certificate may be granted to a person of insufficient means if it is considered desirable to do so owing to gravity of charge or exceptional circumstances.

Scotland.—In every sheriffdom there are Solicitors for the poor, and in the Court of Session there are Counsel and Solicitors for the poor, all of whom act gratuitously. No Court dues are payable in the first instance. The means that preclude a person from the benefit of the Poors' Roll are not fixed, and each application depends on its own circumstances. See paragraph below on legal aid now available under the Legal Aid and Solicitors (Scotland) Act, 1949.

THE LEGAL AID AND ADVICE ACT 1949

[NOTE.—In reading the following note on the above Act the introductory paragraph to the note must be borne in mind. Until legislation is introduced to bring the Act into full operation the Poor Prisoners' Defence procedure outlined above will continue to apply.]

The Act is designed to make legal aid and advice more readily available for persons of small and moderate means. The main structure of the new service is contained in the Act itself, but the ad-

ministrative details are embodied in a scheme made by the Law Society. The various parts and provisions of the Act may be brought into force at different times by statutory instrument.

The part of the Act dealing with legal aid in civil proceedings came into force on the 2nd October, 1950, limited, however, to proceedings (including matrimonial causes) in the High Court and Court of Appeal and proceedings remitted by the Supreme Court to a County Court. The Government has decided that the provisions of the Act which provide for legal aid by a solicitor in cases where the question of litigation does not arise or has not arisen, and oral legal advice generally, and legal aid in Courts other than those mentioned above, and the provisions of the Act dealing with legal aid in criminal matters must be indefinitely deferred as one of the measures to be taken to curtail Government expenditure.

The service is divided into three parts.

1. *Legal Aid in Civil Proceedings.*

Eligibility for this assistance depends upon an applicant's "disposable income" and "disposable capital." Legal aid may be available if the former does not exceed £420 per annum, but a person may be refused assistance if he has a disposable capital of more than £500 and it appears that he can afford to proceed without legal aid. Even so, the applicant may be required to contribute up to half the excess of his disposable income above £156, together with the whole excess of his disposable capital above £75. Disposable income is calculated by making deductions from gross income in respect of certain matters such as dependants, interest on loans, income tax, rates, rent and other matters for which the applicant must or reasonably may provide. Disposable capital is calculated by excluding from gross capital the value of the house in which the applicant resides, of furniture and household possessions; a deduction of up to £75 may be made in respect of dependants. Except in matrimonial proceedings or cases where the spouses are living apart, any resources of a person's wife or husband are to be treated as that person's resources. These figures will be assessed by the National Assistance Board, and will be certified to a Local Committee, who will determine whether reasonable grounds exist for the grant of a civil aid certificate. Appeal from refusal of a certificate lies to an Area Committee. A person resident in England or Wales desiring legal aid may apply for a certificate to any Local Committee; if resident elsewhere, application should be made to the Local Committee for London. If a certificate is granted, the applicant may select his solicitor, and, if necessary, counsel, from a panel. However, in matrimonial causes, where the maximum contribution payable by an applicant does not exceed £10, his case will be conducted by a solicitor employed whole time to deal with such cases. Legal aid may be given in proceedings before most Courts in England and Wales, including civil proceedings before the Justices such as for affiliation, separation or maintenance orders, but not in arbitration proceedings. Further, proceedings wholly or partly in respect of defamation, breach of promise of marriage, seduction, inducement of one spouse to leave or remain apart from the other are excepted from the scheme, as are also relator actions, election petitions and proceedings by way of judgment summons. Where the question of taking, defending or being a party to proceedings does not arise or has not arisen, but, if it did arise, the proceedings would be such that legal aid could be given in connection therewith, the aid of a solicitor may be obtained if it is reasonable that such aid should be given, provided that the applicant's disposable income does

not exceed £156 per annum and his disposable capital does not exceed £75.

2. Legal Advice.

Provision is made for the giving of *oral* advice in England and Wales for any person (and outside Great Britain for a member of H.M. Forces) on legal questions by a solicitor employed for the purpose. Each person seeking such advice may be required to show that he cannot afford to obtain advice in the ordinary way and to pay a half-crown fee, or such other fee as may be prescribed. This provision includes help in preparing an application for legal aid. A Legal Advice Centre will be established in all big cities for this purpose, and smaller towns will be served by a circuit system. In remote districts arrangements will be made for advice from a local practitioner.

3. Legal Aid in Criminal Courts.

The Part of the Act dealing with aid in criminal cases is concerned with the extension of procedure under existing Acts. Application for free legal aid under the Poor Prisoners' Defence Act, 1930, may be made by letter by any person arrested or summoned for an offence, as well as by a person charged with an offence. The letter should be addressed to the clerk to the Justices and must give particulars of the offence charged and set out the grounds of the application. Refusal of a legal aid certificate by a Justice after such application does not prevent the applicant being granted a legal aid certificate at the hearing. Legal aid is also available under the 1930 Act in proceedings on the question of the sentence to be passed, and after as well as before the defendant has pleaded or been found guilty.

Provision is also made for applications for legal aid in the event of an appeal under the Criminal Appeal Act, 1907, and the Summary Jurisdiction (Appeals) Act, 1933.

In any application for aid under the Poor Prisoners' Defence Act, 1930, the Summary Jurisdiction (Appeals) Act, 1933, or the Criminal Appeal Act, 1907, if any doubt exists as to whether the applicant can afford to provide his own legal aid, or whether it is desirable in the interests of justice that he should have free legal aid, such doubt is to be resolved in favour of the applicant. Further, the Justices have an almost absolute discretion in deciding applications.

SCOTLAND

The Legal Aid and Solicitors (Scotland) Act, 1949, came into force on 2nd October, 1949. For the time being the scheme provided by the Act is limited to civil actions in the Court of Session and in the Sheriff Courts except actions in respect of defamation or verbal injury, breach of promise of marriage, the inducement of one spouse to leave or remain apart from the other, election petitions (under the Parliamentary Elections Act, 1868, or the Elections (Scotland) (Corrupt and Illegal Practices) Act, 1890), and small debt proceedings (i.e. under £20) and proceedings for summary removing, in both of which liability for the debt and the amount thereof are admitted. Advice from solicitors, as distinct from proceedings, is not yet available.

As to those to whom legal aid is available, the same considerations as to income and capital apply in Scotland as in England. (See the preceding paragraph.) A person believing himself to be eligible may instruct any solicitor of his own choice who is on the official lists, or he may apply for a solicitor to one of the various Committees which are set up to administer the scheme. Application for a certificate granting legal aid is thereafter made to the appropriate Committee by

the applicant's solicitor, who is required to prepare, for the signature of the applicant, a memorandum setting forth the grounds of the proposed action. Investigation into the applicant's financial means is carried out by the National Assistance Board after the Committee has considered the memorandum and, on a suitable contribution, if any, by the applicant being approved, a Certificate is granted enabling the applicant to proceed with his action.

MARRIAGE

4.—MARRIAGE ACCORDING TO RITES OF THE CHURCH OF ENGLAND

1. MARRIAGE BY BANNS.—The Marriage Act, 1949, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony during morning service or, if there is no morning service on a Sunday on which the banns are to be published, during evening service. Where the parties reside in different parishes, the banns must be published in both. Under the Act, banns may be published and the marriage solemnized in the parish church, *which is the usual place of worship of the persons to be married or either of them*, although neither of such persons dwells in such parish; but this publication of banns is *in addition to* any other publication required by law. The Act provides specially for the case where one of the parties resides in Scotland and the other in England, the publication being then in the parish in England in which one party resides, and, according to the law and custom in Scotland, in the place where the other party resides. After the lapse of three months from the last time of publication, the banns become useless, and the parties must either obtain a licence (see below), or submit to the republication of banns.

2. MARRIAGE BY LICENCE.—Marriage licences are of two kinds:—

(i) A *Common Licence*, dispensing with the necessity for Banns, granted by the Archbishops and Bishops through their Surrogates, for marriages in any church or chapel duly licensed for marriages. A Common Licence can be obtained in London by application at the Faculty Office (1 The Sanctuary, Westminster, S.W.1) and (for marriages in London) at the Bishop of London's Diocesan Registry (1 Dean's Court, Doctors' Commons, E.C.4), by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office are available for all England and Wales. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings. [The cost of licences through a clerical Surrogate in the country (see below) varies, according to the diocese, from £1 15s. to £2 12s. 6d.] No previous notice is required and the licence is available as soon as it is issued. Before a licence can be granted one of the parties must make an affidavit that there is no legal impediment to the intended marriage; and also that one of such parties has had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the

licence within the parish or ecclesiastical district of the church in which the marriage is to be solemnized, or the church in which the marriage is to be solemnized is the usual place of worship of the parties or one of them. In the country there may generally be found a parochial clergyman (Surrogate) before whom the affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some dioceses it is necessary for the Surrogate to procure the licence from the Bishop's Registry.) The Licence continues in force for three months from its date.

- (ii) *A Special Licence* granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, etc.; but the reasons assigned must meet with his Grace's approval. Application must be made to the Faculty Office. Fees for licence, etc., £25.

3. **MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE.**—A marriage may be performed in church on the Superintendent Registrar's Certificate (as to which see below) without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the ecclesiastical parish of the church in which the marriage is to take place unless the church is the usual place of worship of the parties or one of them.

MARRIAGE FEES.—These are not uniform, but if excessive the Diocesan Chancellor has power to moderate them. The usual fees are paid although a stranger-clergyman be invited to perform the service.

B.—MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE

The following marriages may be solemnized on the authority of a Superintendent Registrar's Certificate (either with or without a licence):—

- (a) A marriage in a registered building (e.g. a nonconformist church registered for the solemnization of marriages therein).
- (b) A marriage in a register office.
- (c) A marriage according to the usages of the Society of Friends (commonly called Quakers).
- (d) A marriage between two persons professing the Jewish religion according to the usages of the Jews.
- (e) A marriage according to the rites of the Church of England (see above—in this case the marriage can only be *without* licence).

NOTICE.—Notice of the intended marriage must be given as follows:—

- (i) *Marriage by certificate (without licence)*—If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party. If the parties reside in different registration districts, notice must be given by each to the Superintendent Registrar of the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before the notice can be given.
- (ii) *Marriage by certificate (with licence)*—One notice only is necessary, whether the parties live in the same or in different registration districts. Either party may give the notice, which must be given to the Super-

intendent Registrar of any registration district in which one of the parties has resided for the period of fifteen days immediately preceding the giving of notice.

The notice (in either case) must be in the prescribed form and must contain particulars as to names, marital status, occupation, residence, length of residence, and the building in which the marriage is to take place. The notice must also contain or have added at the foot thereof a solemn declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law (see below) has been duly given, and that the residential qualifications (mentioned above) have been complied with. A person making a false declaration renders himself or herself liable to prosecution for perjury. The notice is entered in the marriage notice book.

ISSUE OF CERTIFICATE:

- (i) *Without licence.*—The notice (or an exact copy thereof) is affixed in some conspicuous place in the Superintendent Registrar's office for 21 days next after the notice was entered in the marriage notice book. After the lapse of this period the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage, which can then take place at any time within three months from the date of the entry of the notice.
- (ii) *With licence.*—The notice in this case is not affixed in the office of the Superintendent Registrar. After the lapse of one whole day from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three months from the date of entry of the notice.

SOLEMNIZATION OF THE MARRIAGE:

- (i) *In a Registered Building.*—The marriage must generally take place at a building within the district of residence of one of the parties, but if the usual place of worship of either is outside the district of his or her residence, it may take place in such usual place of worship, provided that it is not more than two miles distant from the boundary of the district in which the notice is given. Further, if there is not within the district of residence of one of the parties a registered building within which marriages are solemnized according to the rights and ceremonies which the parties desire to adopt in solemnizing their marriage, it may take place in an appropriate registered building in the nearest district.

The presence of a Registrar of Marriages is not necessary at marriages at registered buildings which have adopted the provisions of section 43 of the Marriage Act, 1949. This section provides for the appointment of an "authorized person" (a person, usually the minister or an official of the building, certified by the trustees or governing body as having been duly authorized for the purpose) who must be present and must register the marriage.

The marriage must be solemnized between the hours of 8 a.m. and 6 p.m. with open doors in the presence of two or more witnesses. The parties must at some time during the ceremony make the following

declaration—"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D." Also each of the parties must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]," or, if the marriage is solemnized in the presence of an authorized person without the presence of a Registrar, each party may say in lieu thereof: "I, A. B., do take thee, C. D., to be my wedded wife [or husband]."

however, been made by various statutes which have now been replaced by the Marriage Act, 1949 (see the 1st Schedule to the Act). It is now permitted to contract a marriage with:—

Deceased wife's sister.
Deceased brother's widow.
Deceased wife's brother's daughter.
Deceased wife's sister's daughter.
Father's deceased brother's widow.
Mother's deceased brother's widow.
Deceased wife's father's sister.
Deceased wife's mother's sister.
Brother's deceased son's widow.
Sister's deceased son's widow.

No clergyman can be compelled to solemnize any of the foregoing marriages, but he may allow his church to be used for the purpose by another minister. *During the lifetime of a person upon whose decease a marriage is now authorized (but which would otherwise be prohibited owing to affinity), it is not lawful for such a marriage to be contracted.*

Minors.—Persons under 21 years of age are generally required to obtain the consent of certain persons (see Marriage Act, 1949, section 3 and Schedule). Where both parents are living, both must consent; where one is dead, the survivor, or, if there is a guardian appointed by the deceased parent, the guardian and the survivor. No consent is required in the case of an infant's second marriage. In certain exceptional cases consent may be dispensed with, e.g. the insanity of a parent. If consent is refused the Court may, on application being made, consent to the marriage; application can be made for this purpose to the High Court, the County Court, or a Court of Summary Jurisdiction. The Act prohibits any marriage where either party is under 16 years of age.

C.—MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR NORTHERN IRELAND

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days, should either apply to the session clerk to publish banns or give notice of marriage to the registrar; as regards Northern Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by Certificate with licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

MARRIAGES IN SCOTLAND

According to the law of Scotland, marriage is a contract which is completed by the mutual consent of parties.

Impediments to marriage: These render the marriage null and void. (a) Age: If either party is under the age of 16. (b) Forbidden Degrees: If the parties are within certain degrees of relationship. (c) Subsisting previous marriage. (d) Impotency of either party. (e) Non-residence, i.e. if the legal requirement of prior residence of one or other of the parties in Scotland have not been complied with. (f) Insanity of either party.

No consent of parents or guardians is necessary. Marriages may be regular or "irregular."

FEES OF SUPERINTENDENT REGISTRARS.

For a marriage by certificate (with licence) in the presence of a Registrar.....	15	0

MISCELLANEOUS NOTES

Consanguinity and Affinity.—A marriage between persons within the prohibited degrees of consanguinity or affinity is void. Relaxations have,

Regular Marriages.

A regular marriage is one which is celebrated by a Minister of religion or authorized Registrar after due notice by the publication of banns or publication by the Registrar. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must have resided in the Registration District for at least 15 days before the ceremony. No form, place or hours are prescribed by law. There are no canonical hours as in England. Public proclamation is made by (a) banns or (b) notice by the Registrar. Banns must be proclaimed in the parish church of both parties. It is ordered that the proclamation of banns should be made three times, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed 2s. 6d. A certificate of proclamation of banns is only valid for three months.

Under the Marriage Notices (Scotland) Act, 1878, a notice posted up in a conspicuous or accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns, but a minister of the Church of Scotland is not bound, although he is entitled, to celebrate a marriage not preceded by banns. The statute is limited to persons living in Scotland, *i.e.*, for at least 15 clear days prior to the notice. Exhibition is made for 7 consecutive days, during which time any person may appear personally and lodge an objection in writing subscribed by him. If no objections are lodged the Registrar issues a certificate: fees, 2s. 6d. Such certificate of publication is only valid for three months. The Naval Marriages Act, 1908, regulates the publication of banns on board H.M. ships and the granting of certificates by the Officer-Commanding.

Marriage before Registrar: After obtaining a certificate of due publication as above, it is competent for the parties to contract the marriage in the office of the authorized Registrar in his presence and in the presence of two witnesses. Such a marriage is regular and valid in all respect.

Marriage by Licence: In unforeseen and exceptional circumstances—see Section 2 of the Marriage (Scotland) Act, 1939—where normal methods of publication cannot be carried through, the Sheriff, on application by the parties, may grant a licence which is deemed in all respects to be equivalent to a certificate of publication.

Irregular Marriages.

Since the passing of the Marriage (Scotland) Act, 1939, only one form of irregular marriage is recognized, *viz.* marriage by co-habitation and habit and repute. If parties live together constantly as husband and wife, and if they are held to be such by the general repute of the neighbourhood, then there may arise a presumption from which marriage can be inferred. Before such marriage can be registered, however, a decree of declarator of marriage must be obtained from the Court of Session.

RECEIPTS

Receipts should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, etc., received.

In Scotland, as in England, inability to produce receipts does not necessarily bar defence to an action for payment.

TOWN AND COUNTRY PLANNING

The Town and Country Planning Act, 1947, repealing most of the provisions of earlier Planning Acts, contains very far-reaching provisions affecting the liberty of an owner of land to develop and use it as he will. From the 1st July, 1948, the appointed day under the Act, a person had generally to get planning permission and pay a development charge before carrying out any development on his land. Application for planning permission is made to the Local Planning Authority, who must keep a register, open to the public, of the decision on such applications. Development charge is not payable in respect of operations begun or uses of land instituted on or after the 18th November, 1952 (Town and Country Planning Act, 1953). Every Local Planning Authority must carry out an area survey before the 1st July, 1951 (unless extended), and submit a report to the Minister with a development plan. But the plan is not intended to be final, for the Authorities must make fresh surveys at least once in every five years. The plan does not obviate the necessity of obtaining planning permission.

What is Development:—

(a) Carrying out of building, engineering, mining or other operations.

(b) Making a material change in use.

It is expressly provided:—

(1) That if one dwelling-house is converted into two or more dwelling-houses, this involves a material change in use.)

(2) That advertisements erected on the exterior of a building constitutes a material change of use if this is not the normal use of the building (except *e.g.* professional plates, traffic signs).

What is not Deemed Development:—

(a) Maintaining, improving or altering the interior of a building (except works for making good war damage), provided there is no material change to the exterior.

(b) Change of use of property within the curtilage of a dwelling-house for a purpose incidental to the use of the dwelling-house as such. (It will, however, be development if building operations are carried out.)

(c) Use of property for agriculture or forestry.

(d) Change of use within the same class specified in the Use Classes Order, 1950.

N.B.—(1) It will be development if a material change of use is made from one class to another.

(2) A change of use within the same class will be development if building, etc., operations are carried out.

Development for which no Permission is Required:—

(a) Resumption of normal use of land temporarily used for some other purpose on the appointed day.

(b) Use for occasional purpose of land which on the appointed day was normally used for one purpose but was also used for the occasional purpose.

(c) In the case of land occupied at some time since 1936 but unoccupied on the appointed day, the use of that land for the purpose for which it was last used.

Application can be made to the Local Planning Authority to determine whether or not an operation or change of use constitutes development.

Planning Permission.—Application for such permission is not always necessary, as the Minister may make Development Orders giving general permission for a specified type of development. Thus a General Development Order of 1950 specified a

number of types of development for which no permission is required.

Appeal against refusal of permission lies to the Minister, whose decision is final. If the result of the appeal is unsatisfactory, an applicant may in certain circumstances require the Council to purchase the land, or claim compensation from the Local Planning Authority if the value of the land is less than it would have been had permission been granted, but to claim compensation the desired development must fall within one of six classes specified in Part II of the Third Schedule to the Act.

Enforcement Notice.—If development is carried out without permission, or in defiance of conditions attached to such permission, the Local Planning Authority may within four years thereafter, or, if permission has been granted subject to conditions, within four years of the alleged failure to comply with a condition, serve an enforcement notice on the owner of the land calling upon him to demolish or alter any building, or to discontinue the use of land, or to comply with the said conditions. If the notice is not complied with, the Local Planning Authority may take appropriate steps to enforce it, recovering their expenses from the owner for the time being of the land. Appeal against an enforcement order lies to a Court of Summary Jurisdiction and thence to Quarter Sessions.

For further details and other provisions of the planning law, the Act of 1947 and the Orders made under the Act, the Town and Country Planning (Amendment) Act, 1952, and the Town and Country Planning Act, 1953, should be consulted.

It is emphasized that the grant of development permission does not excuse the obtaining of building, etc., licences under other Statutes.

Scotland.

In Scotland special provisions, on similar lines, have been made by the Town and Country Planning (Scotland) Act, 1947, which incorporates certain provisions of the Town and Country Planning (Scotland) Act, 1945, all other planning Acts being repealed. The Town and Country Planning Act, 1953, see above, applies to Scotland and should be consulted.

VOTERS' QUALIFICATIONS

The franchise is governed by the Representation of the People Acts, the latest of which, the Acts of 1948 and 1949, have made important changes in the law. Those entitled to vote as electors at a parliamentary election in any constituency are those resident there on the qualifying date who, at that date and on the date of the poll, are British subjects of full age and not subject to any legal incapacity to vote; but registration as an elector in the register to be used at the election in question in that constituency is a pre-requisite, and at a general election no person may vote in more than one constituency. Since the Electoral Registers Act of 1949, the registers are prepared once in each year only. The Register is published not later than March 15, in each year and is for use in the period of 12 months commencing on March 16. The qualifying date referred to is, in England and Wales, the preceding November 20, and in Scotland the preceding December 2. It is, however, provided that any person who is not of full age on the relevant qualifying date, but is of full age on June 15, and is otherwise duly qualified, is entitled to vote at elections held in Great Britain between October 2 of that year and March 15 of the following year. The relevant dates for electors in Northern Ireland are in each case different. Detailed provisions are laid

down as to the meaning of "residence" in doubtful cases.

The Act of 1948 abolished the university constituencies and the business premises vote.

The Register is prepared by the Registration Officer in each constituency in Great Britain. It is the registration officer's duty to have a house to house or other official inquiry made as to the persons entitled to be registered and to publish preliminary electors lists showing the persons appearing to him to be entitled to be registered. Any person whose name is omitted may claim registration, and any person on the list may object to the inclusion therein of other persons' names: the registration officer determines the claims and objections. The procedure is slightly different for Northern Ireland.

Special provision is made for "Service voters," who include wives of Service voters resident with their husbands outside the United Kingdom. Such persons may make a Service declaration in a prescribed form and are then treated as resident at the address specified in the declaration. Service voters may vote by post or by proxy, on making the necessary application to the registration officer.

Certain other persons (e.g. those unable to go in person to the polling station owing to the general nature of their occupation, blindness or other physical incapacity, etc.) may vote by post or, in some cases, by proxy as "absent voters."

The local government franchise now depends upon either residence in the area or the possession of a non-resident qualification, i.e. occupation as owner or tenant of rateable lands or premises of the yearly value of not less than £10, excluding occupation of furnished dwelling-houses let for less than nine weeks and excluding occupation as a lodger. There are provisions, similar to those relating to the parliamentary franchise, for the preparation of registers, etc., and in fact the same register is used, as far as possible, with a mark indicating those persons entitled to vote for local government purposes only.

The Acts apply generally to Scotland where certain matters relating to local government and parliamentary elections are further regulated by Representation of the People (Scotland) Regulations, 1949.

WILLS

IMPORTANT NOTE.—The following notes must be read subject to the provisions of the Inheritance (Family Provision) Act, 1938, which is liable to affect or modify the will of any person (domiciled in England) dying after July 13, 1939. This Act empowers the High Court to order maintenance out of the testator's estate for the benefit of certain "dependants," i.e., a surviving wife or husband; an unmarried (or invalid) daughter; an infant (or invalid) son. Such order can be made if the will does not itself make "reasonable provision" for the maintenance of the dependant who seeks the order. An application must be made within six months of probate. A legally adopted child comes within the definition of a "son" or "daughter" under the Act. For further details as to the limits of an order, the Act itself should be consulted.

Since the object of the Act is to provide maintenance for dependants, an application is not likely to be successful where the estate is very small: e.g., two or three hundred pounds.

REASONS FOR MAKING A WILL.—Every person should make a will. However small the estate, it is safer in every case to protect the interests of the survivors by a will, and by the appointment of one or more trustworthy persons as executors

to carry the testator's wishes into effect. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—e.g., the income being paid to his widow and the capital being ultimately divided among his children, for this requires the skill of a practised lawyer. When property is thus "settled," there may be a saving in death duties. Assuming a lawyer is not employed, a person having resolved to make a will must remember that it is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that admits of another meaning than the one intended. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed (see below) an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is best to make a new will, revoking the old one. The use of *codicils* should be left to the lawyer. A will should be written in ink and very legibly, on a single sheet of paper. Although, of course, forms of wills must vary to suit different cases, the following forms may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others.

Nothing more complicated should be attempted. The forms should be studied in conjunction with the notes following.

This is the last will and testament of me [Thomas Smith] of [Vine Cottage, Silver Street, Reading, Berks] which I make this [thirteenth] day of [February, 1953] and whereby I revoke all previous wills and testamentary dispositions.

1. I hereby appoint [John Green of — and Richard Brown of —] to be the executor(s) of this my will.

2. I give all my property real and personal to [my wife Mary or my sons Raymond and David equally or as the case may be].

Signed by the testator in the presence of us both present at the same time who, at his request, in his presence and in the presence of each other have hereunto set our names as witnesses.

Thomas Smith
Signature of
Testator;

William Jones (signed) of Green Gables, South Street, Reading, tailor.

Henry Morgan (signed) of 16, North Street, Reading, butcher.

Should it be desired to give legacies and or gifts of specific property, instead of giving the whole estate to one or more persons, the form above should be used with the substitution for clause 2 of the following clauses:—

2. I give to — of — the sum of £ — and to — of — the sum of £ — and to — of — all my books (or as the case may require).

3. All the residue of my property real and personal I give to — of —.

TERMS.—Real property includes freehold land and houses; while personal property includes

debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stocks and shares in companies, and the like. The words "my money," apart from the context, will normally only include actual ready money. The expression "goods and chattels" should not be used. In giving particular property, ordinary language is sufficient, e.g., "my house, Vine Cottage, Silver Street, Reading, Berks." Such specific gifts fail, if not owned by the testator at his death.

RESIDUARY LEGATEES.—It is well in all cases where legacies or specific gifts are made, to leave to some person or persons "the residue of my property," although it may be thought that the whole of the property has been disposed of in legacies, etc., already mentioned in the will. It should be remembered that a will operates on property acquired after it has been made.

EXECUTION OF A WILL, AND WITNESSES.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately afterwards sign their names in his and in each other's presence. A person who has been left any gift or share of residue in the will, or whose wife or husband has been left such a gift should not be an attesting witness. Their attestation would be good, but they would forfeit the gift. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same."

A blind person may make a will in Braille. If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. A blind person cannot witness a will.

If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," etc. Any omission in the observance of these details may invalidate the will. The stringency of the law as to signature and witnessing of a will is only relaxed in favour of soldiers, sailors and airmen in certain circumstances.

EXECUTORS.—It is usual to appoint two executors, although one is sufficient; any number up to and including four may be appointed. The name and address of each executor should be given in full. An executor may be a legatee. Thus a child of full age or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not essential; but it is desirable here as elsewhere, to avoid ambiguity or vagueness.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy generally lapses

and falls into the residue. Where a residuary legatee pre-deceases the testator, his share of the residuary estate will not generally pass to the other residuary legatees, but will pass to the persons entitled on the deceased's intestacy. In all such cases it is desirable to make a new will.

TESTAMENTARY CAPACITY.—A minor cannot make a will except, in certain circumstances, if he be a soldier, sailor or airman. A married woman (married on or since January 1, 1883) may dispose by will of any real or personal property as if she were a man. As to the powers of a woman married before that date it is advisable to consult a solicitor.

REVOCATION.—A will is revoked by a subsequent will (but, if it does not expressly revoke former wills, only so far as such subsequent will operates as an implied revocation as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing or otherwise *destroying* the same with the intention of revoking it. Such destruction must either be by the testator or by some other person in his presence and at his direction. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will, unless, in the case of a will made on or after Jan. 1, 1926, it is expressed to have been made in contemplation of a particular marriage (Law of Property Act, 1925, s. 177); so that after marriage a new will should be made, except in this last case.

PERSONAL APPLICATION FOR PROBATE OR LETTERS OF ADMINISTRATION

Application for probate or for letters of administration may be made *in person* at the Principal Probate Registry, or at a district registry, by the executors or persons entitled to a grant of administration. Applicants should bring (1) the will, if any; (2) a certificate of death; (3) particulars of property liable to estate duty; and (4) generally, a list of debts and funeral expenses. In an application for administration, the applicant will be required to enter into a bond for due administration, generally with two sureties who must attend at the Registry, although they need not do so at the same time as the applicant.

WHERE TO FIND A PROVED WILL

A will proved since 1858 must have been proved either at the Principal Registry at Somerset House, or a District Registry. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and a copy of any will read on payment of a search fee of one shilling. In the latter case, the original will proved in the District Registry, is there kept, and may be seen or a copy obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probates and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about October of the following year.

SCOTS LAW OF WILLS

A domiciled Scotsman, unlike a domiciled Englishman, cannot in certain circumstances, dispose of the entirety of his estate. If he leave a

widow and children, the widow is entitled to a one-third share in the whole of the moveable estate (her *jus relictae*), and the children are entitled to another one-third share equally between them (their *legitim*). If he leave a widow but no children—or children but no widow—the *jus relictae* or *legitim* is increased to a one-half share in the estate. The remaining portion is known as the *dead's part*. The widow is also entitled to *terce*, i.e., a life rent in one-third of her husband's heritable property. A surviving husband and children have comparable rights in the wife's estate. The *dead's part* is the only portion of which the testator can freely dispose. All burdens falling upon the representatives in moveables are payable out of the whole of the moveables before any division. Burdens in the nature of legacies are payable out of the *dead's part*. Pupils cannot make wills. Minors may dispose of moveables without the consent of any other person; but minors (unless they be serving in H.M. forces) cannot dispose of heritage. A will must be in writing (except that a person may leave a legacy verbally if the amount of that legacy does not exceed 100 Scots (£8 6s. 8d. sterling) and may be typewritten or even in pencil. A will may be either (1) *holograph*, i.e., written by the testator himself, in which case no witnesses are necessary; a printed form filled up by the testator is not necessarily *holograph* but may be made effectual when it has clearly been adopted as *holograph*. Words written on erasure or marginal additions or interlineations in *holograph* writings, if proved to be in the handwriting of the maker of the deed are valid; (2) *tested*, i.e., signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. If the testator cannot write, or is blind, his will may be authenticated by a notary and two witnesses. It is better that the will be not witnessed by a beneficiary thereunder, although this circumstance will not invalidate the attestation of the will or (as it would in England) the gift. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills are registered in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh. The original deed may be inspected on payment of a small fee and a certified official copy may be obtained. A Scottish will is not revoked by the subsequent marriage of the testator. The subsequent birth of a child, no testamentary provision having been made for him, may revoke a will in whole or in part. A will is revoked by a subsequent will, either expressly or by implication; but in so far as the deeds can be read together both wills have effect.

"Confirmation," the Scottish equivalent of Probate, is obtained in the Sheriff Court of County in which the deceased was domiciled at the date of his death or, where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor nominate is one nominated by the deceased in his will. An Executor dative is one appointed by the Court (1) in the case of intestacy or (2) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must be given up. In estates under £500 confirmation is obtained under a simplified procedure at reduced fees.

PASSPORT REGULATIONS

Applications for Foreign Office passports must be made on the forms obtainable at any of the Passport Offices (addresses given below) or at any Local Office of the Ministry of Labour and National Service.

London.—Clive House, Petty France, Westminster, S.W.1. (Hours: 10-4, Saturdays 10-1.) Tel., Abbey: 8010.

Liverpool.—India Buildings, Water Street, Liverpool 2. (Hours: 9.30-4, Saturdays 9.30-1.) Tel., Central: 9411.

Glasgow.—14 Blythswood Square, Glasgow, C.2. (Hours, 9.30-4, Saturdays 9.30-1.) Tel., Central: 0260.

Ministry of Labour Local Offices.—(Hours, 9-5, Saturdays 9-1.)

The Passport Offices are also open for cases of special emergency only, between 4 p.m. and 6 p.m. (Saturdays 1-4) and in London on Sundays and Public Holidays between 10 a.m. and noon.

To facilitate the issue of passports applicants are recommended to make personal application to any one of the above mentioned offices. If it is not possible to make personal application at one of the Passport Offices or Ministry of Labour Local Offices, completed forms of applications should be sent to one of the three Passport Offices, with photographs, supporting documents and the fee of £1. Remittances sent with postal applications should be in the form of a Postal Order which should be crossed and made payable to the Passport Office. Cheques, notes or postage stamps should not be sent in payment.

Foreign Office Passports are granted:—

- (i) To citizens of the United Kingdom and Colonies.
- (ii) To British subjects without citizenship.
- (iii) To British Protected Persons.

Passports are available for *five years* in the first instance, unless otherwise stated. They may be renewed from time to time for further consecutive periods of one to five years from the date of expiry, provided the total period of validity of ten years from the original date of issue is not exceeded. They are not available *beyond ten years from the original date of issue*. Thereafter, or if at any time the Passport contains no further space for visas, a new Passport must be obtained.

A Passport including particulars of the *holder's wife* is not available for the wife's use when she is travelling alone.

Children who have reached the age of sixteen years require separate Passports. When they apply for a Passport the written consent of father or other legal guardian is necessary.

The application must be recommended in Section 9 by a Member of Parliament, Justice of the Peace, Minister of Religion, Medical or Legal

Practitioner, Bank Officer, established Civil Servant, Public Official, Police Officer or any person of similar standing personally acquainted with the applicant. The applicant's birth certificate and other evidence in support of the statements made in the application must be produced.

In the case of children under the age of 16 requiring a separate passport, an application should be made by the child's father or other legal guardian on form (B) obtainable from a Passport Office or any local office of the Ministry of Labour and National Service.

Unless they are also citizens of the United Kingdom and Colonies, citizens of Commonwealth countries should normally apply to their High Commissioner in London, and citizens of the Irish Republic resident in the United Kingdom should apply to the Irish Embassy.

If the applicant for a Passport be a British subject by naturalization or registration, the Certificate of Naturalization or registration must be produced with the application.

British Passports are only available for travel to the countries named thereon, but may be endorsed for additional countries. The possession of a Passport so endorsed does not, however, exempt the holder from compliance with any *Immigration Regulations* in force in British or foreign countries, or from the necessity of obtaining a *visa* where required.

Passports endorsed as valid for the British Commonwealth are also available for travelling to territory under British protection or mandate, not, however, including the Aden Protectorate, for which a special endorsement is required.

A Passport cannot be issued or renewed by the Foreign Office on behalf of a person already abroad; such person should apply, in a foreign country, to the nearest British Mission or Consulate, or, within the British Commonwealth outside the United Kingdom of Great Britain and N. Ireland, to the nearest local Passport issuing authority.

Persons resident in Northern Ireland should apply by post to the Branch Passport Office, Liverpool; citizens of the United Kingdom and Colonies resident in the Irish Republic should make application to the Visa Section, British Embassy, 30 Merrion Square, Dublin.

A British passport is not valid for entry into any territory for which a military, Control Commission or other special permit is required, unless such a permit has first been obtained.

PHOTOGRAPHS

Duplicate unmounted photographs of applicant (and his wife, if to be included in the Passport) must be sent. These photographs should be printed on *thin* paper and measure not more than 2½ in. by 2 in. or less than 2½ in. by 1½ in. They should be taken full face without a hat.

THE NATIONAL BUILDINGS RECORD

37 Onslow Gardens, S.W.7

(Kensington: 8161)

Chairman of Advisory Council, Sir James Mann, P.S.A., F.B.A.

Director and Secretary, Walter H. Godfrey, C.B.E., F.S.A., F.R.I.B.A.

The National Buildings Record is an organization established in 1941 under the direction of an Advisory Council. It is supported by an annual grant from the Treasury, and its functions are:

To maintain a library of photographs of English and Welsh architecture which is open to the public for consultation and study. It is arranged

topographically and contains approximately 40,000 items.

To supply copies of photographs where negatives are available. There are approximately 200,000 negatives.

To prepare and acquire additional records which are constantly being added to the photograph library.

To maintain an index of architectural records (photographs, measured drawings, sketches, and engravings) in public and private possession.

PROFESSIONAL FEES

The following notes on the Fees and Charges of various Professions are based on information supplied by the appropriate professional Societies and Institutes.

SOLICITORS

Solicitors and their clients may make special agreements as to remuneration in non-contentious business (including conveyancing) under Section 57 of the Solicitors Act, 1932. In the absence of any such agreement the solicitor's remuneration is governed by Orders made under Section 56 of that Act. There are two methods of charging under the Orders. The more usual is by a scale based upon the amount of money involved; the other is by a charge (usually known as a Schedule II charge) determined by reference to all the circumstances of the case, the amount of money involved being only

one factor amongst many. Usually a scale charge is payable, provided the transaction has not been abortive, but a solicitor has an option to elect, before undertaking any business, to be paid a Schedule II charge instead. For negotiating sales or purchases the charges are always under Schedule II. In addition to solicitors' charges, disbursements such as Government stamp duty, search fees and Land Registry fees may be payable.

The following tables illustrate the scales of charges on sales, purchases and mortgages based upon the amount of money involved:—

I. For land (including houses) having a title which is *not* registered at the Land Registry.

Scale of Charges.

	For the first £1,000	For the second and third £1,000	For the fourth and each sub- sequent £1,000 up to £10,000	For the remainder without limit
	per £100 s. d.	per £100 s. d.	per £100 s. d.	per £100 s. d.
Vendor's solicitor for conducting a sale of property by public auction, including the conditions of sale:—				
When the property is sold.....	30 0	15 0	7 6	3 9
When the property is not sold, then on the reserved price.....	15 0	7 6	3 9	1 10½
NOTE:—A minimum charge of £7 10s. is to be made whether a sale is effected or not.				
Vendor's solicitor for deducing title to freehold, copyhold or leasehold property, and perusing and completing conveyance (including preparation of contract or conditions of sale, if any).....	45 0	30 0	15 0	10 0
Purchaser's solicitor for investigating title to freehold or leasehold property, and preparing and completing conveyance (including perusal and completion of contract, if any).....	45 0	30 0	15 0	10 0
Mortgagor's solicitor for negotiating loan.....	16 10½	16 10½	5 7½	3 9
Mortgagor's solicitor for deducing title to freehold or leasehold property, perusing mortgage and completing.....	45 0	30 0	15 0	10 0
*Mortgagee's solicitor for negotiating loan.....	33 9	33 9	11 3	7 6
Mortgagee's solicitor for investigating title to freehold or leasehold property, and preparing and completing mortgage.....	45 0	30 0	15 0	10 0

* These charges apply equally to land having a registered title.

II. For land (including houses) having a title registered at the Land Registry.

Scale of solicitor's charges for Transfers on Sale, Charges, Sub-Charges, Mortgages, Sub-Mortgages and Transfers thereof.

Value of Land or Amount of Charge	Scale of Remuneration	Value of Land or Amount of Charge	Scale of Remuneration
(1) Up to and including £200	£4.	For the remainder without limit.....	4s. per £100.
Over £200 but not ex- ceeding £300.....	£4 10s.	(2) Fractions of £100 under £50 are to be reckoned as £50.	
For each additional £100 thereafter up to £1,000.	£1 10s. per £100.	Fractions of £100 above £50 are to be reckoned as £100.	
For the second and third £1,000....	£1 per £100.	In sales by auction further charges may be payable, which will be computed under Schedule II, e.g. for preparing or perusing Particulars of Sale and poster and attending the sale.	
For the fourth £1,000... ..	10s. per £100.		
For each subsequent £1,000 up to £13,000.	7s. 6d. per £100.		
For each subsequent £1,000 up to £17,000.	5s. per £100.		

CHARTERED AND INCORPORATED ACCOUNTANTS

On December 5, 1945, the Council of the Institute of Chartered Accountants in England and Wales expressed the opinion that, having regard to the increased cost of salaries and other expenses falling on practising members of the Institute, a substantial increase in fees and charges over those ruling in 1939 was justifiable. Neither the Council of the Institute nor the Council of the Society of Incorporated Accountants and Auditors has laid down any scale of fees and charges. Examples of pre-war rates are given below.

Auditing.—Fees are based on time occupied. Usual rates per day (seven hours) are:—Principals 7 to 15 guineas; Managing Clerks 5 guineas; First Class Clerks 3 to 4 guineas; Second Class Clerks 2 to 3 guineas; other Clerks $\frac{1}{2}$ to 1 guinea. If at a distance from the office or outside the United Kingdom, hotel and travelling expenses will be charged.

Investigating Accounts, Opening Books of Account, etc.—Usual rates per day (seven hours) are:—Principals 7 to 21 guineas; Managing and other Clerks: As for Auditing.

Receivers, Liquidators and Trustees in Bankruptcy.—Usually a commission or percentage on the amount realised and on the amount distributed in dividend.

Voluntary Liquidators.—The remuneration of a liquidator of a company in a members' voluntary winding-up is fixed by the company in general meeting. In the case of a creditors' voluntary winding-up remuneration is fixed by the Committee of Inspection, or, if there is no such committee, by the creditors. In either case application may be made to the Court to fix the remuneration.

Taxation.—The rates charged for taxation matters are generally higher than those for simple audits. In 1935 the Council of the Institute passed a resolution that a member undertaking taxation work on the basis that he should be remunerated by a percentage on the amount recovered, or receive no remuneration if no recovery results, would be liable to be regarded as acting discredibly.

ARCHITECTS

1. Fees for New Works

For taking the Client's instructions, preparing sketch design, making approximate estimate of cost by cubic measurement, or otherwise, preparing drawings and specifications for the purpose of obtaining tenders, advising on tenders and preparation of contract, selecting and instructing Consultants (if any), furnishing to the Contractor two copies of the contract drawings and specifications and such further details as are necessary for the proper carrying out of the works, general supervision, issuing certificates for payment, and passing and certifying accounts, the charge in respect of new works, exclusive of the services enumerated in Clause 8, is to be a percentage on the total cost of all executed works or orders as follows:—

(i) If the contract and/or order exceeds £4,000 the percentage is 6 per cent.

(ii) If the contract and/or order does not exceed £4,000 the percentage is 10 per cent. in the case of works costing £200 graduated to 6 per cent. in the case of works costing £4,000, as the special character of such works may render appropriate.

(iii) These percentages apply to the great bulk of an Architect's work but the charge may be reduced to 5 per cent. in the case of extensive works of a simple character which involve continuous repetition of units.

2. Alterations and Additions

In the case of alterations of and additions to existing buildings a higher percentage may be charged, not exceeding twice the amount due under Clause 1 for new works of the same cost.

3. Fittings, Decorations, etc.

In works in which designs for fittings, furniture, appointments, decorations, garden work or complex details or construction are main features, special fees will be charged adequate to the circumstances.

4. Omitted Works

In addition to a percentage on the total cost of executed works, the Architect is entitled to charge in respect of all works included in the tender and/or order, but subsequently omitted not being merely provisional or contingent sums, two-thirds of the charge due upon them had they been executed.

5. Partial Service

If the project or part of it be abandoned or deferred, or if the services of the Architect are dispensed with, the charges in respect of the abandoned or deferred project or services for which the Architect was employed are as follow:—

(i) For taking Client's instructions and preparing preliminary sketch plans to illustrate possibilities of a site or cost of a scheme the charge is on *quantum meruit*.

(ii) For taking Client's instructions, preparing sketch design sufficient to indicate the Architect's interpretation of the Client's instructions (but not in detail adequate to enable quantities to be prepared) and making approximate estimate of cost, the charge is on *quantum meruit* and should not exceed one-sixth of the percentage stated in Clauses 1 or 2 (as the case may be) on the estimated cost of such works.

(iii) For taking Client's instructions, preparing sketch design, making approximate estimate of cost by cubic measurement, or otherwise, and preparing drawings and particulars sufficient to enable quantities to be prepared by an independent Quantity Surveyor or a tender obtained, the charge is two-thirds of the percentage stated in Clauses 1 or 2 (as the case may be) on the estimated cost of such works.

(iv) For the purpose of this clause a project shall be deemed to have been abandoned or deferred if either (a) the client notifies the Architect to that effect, or (b) no contract has been entered into or order given for the works within six months of the completion by the Architect of the work described in the last preceding sub-clause.

6. Mode and Time of Payment

The Architect is entitled to payment in stages as follows:—

(i) For the services described in Clause 5 (i) forthwith upon completion of such work.

(ii) For the services described in Clause 5 (ii) forthwith upon the completion of such work.

(iii) During the preparation of the working drawings referred to in Clause 5 (iii), instalments of the fees set out in that Clause dependent upon the amount of work completed.

(iv) For the services described in Clause 5 (iii) forthwith upon signing of a contract, or the giving of an order, or the abandonment or deferring of the work less any payments already received by him pursuant to the last three preceding sub-clauses.

(v) For the remainder (if any) of the services payment shall be made by instalments from time to time as the work of supervision proceeds.

7. Work Executed with Old Materials, etc.

When work is executed wholly or in part with old materials, or where material, labour or carriage is provided by the Client, the percentage shall be calculated as if the works had been executed throughout by a Contractor, and with new material.

8. Services not Included in Percentage

Additional charges are to be made in accordance with the amount of work involved for:—

(i) Advising as to the selection and suitability of sites. Negotiating as to sites or buildings. Surveying sites or buildings and taking levels, and making surveys, measurements, and plans of existing buildings.

(ii) The preparation of further sketch designs necessitated by a material alteration in, or addition to, the Client's instructions, or altering the working drawings and specification in consequence thereof prior to the commencement of the works. Altering drawings, or preparing new drawings, and other services occasioned by variations or additions required by the Client after the commencement of the works. Making additional drawings for the use of the Client, Clerk of Works, Contractors, or Sub-Contractors, drawings for and negotiating with ground landlords, adjoining owners, public authorities, licensing authorities or others.

Services in respect of:—

(iii) Party Walls, Rights of Light and other easements, reservations or restrictions.

(iv) Litigation, arbitration or valuation.

(v) Delay in building operations by causes beyond the control of the Architect, such as *force majeure*, bankruptcy, obstruction by parties.

9. Surveys

For making inspection, preparing report or giving advice on the structural or sanitary condition of premises, the charge is by time in accordance with Clause 13, the minimum fee being 3 guineas in addition to the cost of assistance.

10. Litigation and Arbitration

For qualifying to give evidence, settling proofs, conferences with Solicitors and Counsel, attendance in Court or before Arbitrations or other tribunals, and for services in connection with litigation, the charge is based upon the time occupied, but is in no case to be less than 7 guineas per day.

Architects acting as Arbitrators are recommended to base their charges upon the total time occupied in dealing with a case at the rate of £2 2s. an hour exclusive of out-of-pocket expenses and other disbursements.

11. Dilapidations

For estimating dilapidations and furnishing or checking a schedule of the same, the charge is 5 guineas per cent. on the sum agreed, the minimum fee being £5 5s. For negotiating settlement of claim and for other services, the charge is by time in accordance with Clause 13.

12. Travelling Time

An additional charge may be made if the work should be at such a distance as to lead to an exceptional expenditure of time in travelling.

13. Time Charges

In cases in which charges are based upon time occupied the minimum fee is 7 guineas per day exclusive of charges for Assistants' time.

14. Expenses

The Scale is in all cases exclusive of the cost of appliances, copies of documents, lithography, travelling and hotel expenses and all other reason-

able disbursements, which are to be charged in addition.

STRUCTURAL ENGINEERS

The following charges are those usually in operation among Consulting Structural Engineers who are not connected with any firm of contractors and who receive remuneration for their services directly from their clients. Full details of the scales which it authorizes can be obtained from the Institution of Structural Engineers, 11 Upper Belgrave Street, S.W.1.

Reports, Advisory Work and Surveys

For inspections, professional advice, opinions and reports: a fee of Three Guineas per hour upwards, minimum three hours at rate agreed, plus any necessary expenses for travel and services of Engineer's staff.

Constructional Work

A fee of £25, plus (1) for Reinforced Concrete, $7\frac{1}{2}$ per cent. on total cost of work, with an additional 1 per cent. on the first £20,000; for preparation of Bending Lists, 5 per cent. on cost of steel bent and fixed in work; (2) for Structural Steelwork and other work except (1) above, 6 per cent. on total cost of work, with additional 1 per cent. on first £20,000; (3) an additional fee where the Engineer is required to give advice or accept responsibility for the strength or safety of brickwork or other items not covered by (1) and (2) above.

The above scale is governed by conditions regarding constructional emergencies, remuneration for work done to the Engineer's Specification and/or Drawings, remuneration for works varied or abandoned, travelling and out-of-pocket expenses, etc.

Bills of Quantities, etc.

A fee of from $1\frac{1}{2}$ per cent. to $2\frac{1}{2}$ per cent. (depending on the size and complexity of the work) of the total actual cost or, in the case of abandoned work, the total estimated cost. Measuring and making-up accounts for variations upon contracts, including pricing and agreeing totals with contractors: $2\frac{1}{2}$ per cent. upon the amount of the additions and $1\frac{1}{2}$ per cent. upon the amount of the omissions, less the provisional sums or work omitted as a whole.

Technical Evidence

For "qualifying," considering documents, preparing proof of evidence, attending consultations, appearing before Parliamentary Committees, Courts of Law, Arbitration Tribunals and Official Enquiries: (1) a fee of Three Guineas per hour upwards, varying in accordance with the standing of the Engineer and the importance of the case, with a minimum of three hours at whatever rate is agreed; (2) a charge for the time spent by the Engineer's assistants; (3) a refresher for each day for which the Engineer is requested to hold himself in readiness to attend but is subsequently not required, at the rate agreed for one hour per day; (4) fees at the agreed hourly rate for time occupied in travel, together with travelling and out-of-pocket expenses.

Valuations and Negotiations for Purchase

For valuation of, and negotiations for the purchase of, engineering undertakings less than £10,000: a percentage charge dependent on the amount of work and responsibility involved; £10,000 or more: a fee in accordance with Ryde's Scale, i.e. Thirteen Guineas, plus one-half of one Guinea per cent. of the total.

QUANTITY SURVEYORS

In general Quantity Surveyors' fees are calculated as a percentage upon the estimated cost of the work or are based upon the time involved. Details of the scales of charges which they authorize can be obtained from:—

THE ROYAL INSTITUTION OF CHARTERED SURVEYORS, 12 Great George Street, S.W.1., and
THE INSTITUTE OF QUANTITY SURVEYORS, 98 Gloucester Place, W.1.

STOCKBROKERS

The Rules and Regulations drawn up by the London Stock Exchange Council are voluminous and technical. Generally speaking the scale of brokerage is $\frac{1}{2}$ per cent. up to £10,000 and $\frac{1}{4}$ per cent. on any balance in excess of £10,000 on British Government Stocks. On shares not exceeding 15s. the brokerage is $\frac{1}{4}$ d. to 2½d. per share; not exceeding 30s., 3½d. per share; not exceeding 40s. 4½d.; not exceeding 60s., 7½d. per share; and so on. There are minimum charges of 5s. on less than £20; 10s. on less than £100; and £1 on £100 and over. In certain circumstances the above charges may be modified. Copies of the Rules and Scale of Commission may be obtained from the Secretary.

SHIPBROKERS

A scale of Minimum Agency Charges became Shipbrokers (Office, 63 Fenchurch Street, London, E.C.3.) from 1920, and has been revised from time to time. Copies (price 6d. post free) may be obtained from the Secretary.

AUCTIONEERS AND ESTATE AGENTS

(Summary based on the Scales of Charges of the Professional Societies)

Sales by Private Treaty or by Auction

Freehold Property and Ground Leases, including in the case of auctions the preparation of particulars and advising as to reserves:—On the first £300, 5 per cent.; on the next £4,700, 2½ per cent.; on the residue, 1½ per cent.

In addition to the above charges:—On payments for goodwill, 5 per cent. on the first £1,000 and 2½ per cent. on the residue; and on amounts paid by the purchaser for *Chattels*, *Fixtures*, *Fittings*, *Furniture*, *Trade Stocks*, and other *Movable Effects*, *Timber*, and *Tenant-right*, 5 per cent. on the first £500, and 2½ per cent. on the residue, to include inventory and valuation.

Where the division of an estate into a number of lots involves substantial additional work, an increased remuneration shall be payable.

On all sales by auction, commission is exclusive of out-of-pocket expenses, unless otherwise stated.

Sales before Auction

After acceptance of instructions, whether sale arranged by auctioneer or not, the same scale as for sale by auction.

Non-Sale

In the event of non-sale at the auction, a fee, the amount of which is a matter of arrangement, is payable.

Sales within 3 Months after Auction

Whether arranged by auctioneer or not, same commission as for sale by auction merging any fee for non-sale previously paid.

Leasehold Property (other than Ground Leases).—On disposing of leases by private treaty, auction.

assignment or otherwise:—On the rent the same commission as for a letting (see below), and, in addition, where the necessary instructions are held.—On the premium and any consideration which is equivalent thereto, or on payments for goodwill, 5 per cent. on the first £1,000; and 2½ per cent. on the residue; and on payments for *Chattels*, *Fixtures*, etc.:—As for Freehold Property (see above).

NOTE.—Where two Agents are co-operating at the request of the owner, the commission shall be at the rate of a scale and a quarter.

Purchases

Freehold and Leasehold Property.—One-half of the fee for a sale, such fee including advising as to value if required. If no purchase is effected, the usual scale for valuation should be charged: one guinea per cent. on first £1,000; half a guinea on next £9,000; and a quarter of a guinea per cent. beyond on the residue. Minimum fee, £5 5s.

Lettings

NOTES.—(a) Should the rent be a progressive one, the commission is based on the average rent for the period up to the first possible break of the tenancy. (b) When a property, which an Agent has been instructed to let or sell, is let with an option to purchase, and the tenant afterwards exercises his option, or becomes the purchaser within the period of the option, the commission for selling, less the commission already paid on the letting, will then become payable.

(1) *Unfurnished Premises* (excepting flats, offices, and parts of a building with liability to repair, and Farms and Agricultural Land); (a) Where the letting is for 1 year or less—5 per cent. on the amount of the rent for 1 year; (b) For more than 1 year and for less than 5 years—7½ per cent. on 1 year's rent; (c) For 5 years or more—10 per cent. on 1 year's rent; and in addition a commission on the premium, consideration, or goodwill as on sales of leasehold property (see above).

(2) *Flats or Offices*, or parts of a building where the tenant is liable for repair or redecoration—10 per cent. on 1 year's rent, whatever the term; and in addition a commission on the premium, consideration or goodwill as on sales of leasehold property (see above).

(3) *Furnished Premises or Sporting Rights*, including collection of rent but excluding the making and checking of inventories—7½ per cent. on the rent payable.

(4) *Farms and Agricultural Land.*—On yearly lettings—5 per cent. on 1 year's rent; on Leases for 3 years or more—7½ per cent.

(5) *Land on Building Lease, or at a Fee Farm Rent, by Auction or by Private Treaty.* (a) On Ground Rents up to £50—1 year's Ground Rent; (b) Exceeding £50 and not exceeding £100, as in (a) on first £50, plus 75 per cent. on the residue. (c) Exceeding £100 and not exceeding £1,000, as in (b) on first £100, plus 50 per cent. on the residue. (d) Exceeding £1,000, as in (c) on first £1,000, plus 25 per cent. on the residue; and in addition where a premium is paid, a Commission of 5 per cent. on the first £1,000, and 2½ per cent. on the residue.

MEDICAL FEES

There is now no usual scale of charges made by General Practitioners. Since July, 1948, the National Health Service has been available without payment at the time to everyone in the country. Private practice continues and fees are arranged mutually between the doctor and patient concerned.

CUSTOMS TARIFF OF GREAT BRITAIN AND NORTHERN IRELAND

(1952-1953)

IMPORT DUTIES ACT, 1932

This Act provides that on and after 1st March, 1932, a duty equal to 10 per cent. of their value is imposed on all goods imported into the United Kingdom. The Act empowers the Import Duties Advisory Committee to recommend additional duties to the Treasury, who may by Order charge the same. Orders have been made covering additional duties on a considerable number of articles. The following goods are exempt:—

(1) Goods for the time being chargeable with Customs Duty by or under any enactment other than the Import Duties Act, 1932; except composite goods of which some of the components are liable to such other customs duty. Such composite goods are chargeable under the Import Duties Act, 1932, only up to the amount, if any, by which the amount of the general ad valorem duty or other duty shown in the Schedules of Duties on pp. 1224-1227 exceeds the other customs duty except where otherwise expressly provided in the Schedule or where the other Customs Duty is chargeable under Key Industry Duty.

(2) Goods which are consigned direct to a ship-building yard registered by the Commissioners of Customs and Excise and which will be used for the building, repairing or refitting of ships in that yard.

(3) Goods imported for use in the construction or repair of the boilers or propelling machinery of ships, or for accessories of such boilers or machinery.

(4) Machinery if imported under licence issued by the Treasury.

(5) Goods exempt under Imperial Preference.

(6) Goods intended to be used in scientific research or in connection with the advancement of learning or art, or with the promotion of any sport, provided they are not intended for sale or any purpose which is substantially commercial, and if imported under licence issued by the Treasury.

(7) Goods imported for industrial research, i.e. for the purpose of subjecting them, or any material or component thereof, to examination or test with a view to promoting the manufacture in the United Kingdom of articles similar to those goods or to such material or component (under Treasury licence).

(8) Goods specifically exempted by the Import Duties Act, 1932, and Treasury Orders made thereunder, viz.

Advertising material (not trade).

Albardin Grass.

All articles consigned to any gallery or museum under the control of a Public Authority or University in the United Kingdom approved for the purpose of this provision by the Treasury, or any other Institution or Body so approved, and declared by the consignee to be imported solely for use as exhibits or specimens and not for sale.

Alloys of metal, unwrought in blocks, ingots, cakes, bars and slabs containing more than 50 per cent. by weight of bismuth.

Aluminium, unwrought.

Animal Ivory.

Animals, Live, Quadruped.

Apples, 16 Aug. to 15 April.

Araroba, crude.

Arc lamp carbons.

Argol and other crude tartrates.

Bagasse.

Bilberries. Bismuth Metal.

Boot or shoe pullovers.

Boron minerals, crude.

Briar root, blocks roughly shaped by sawing but not further manufactured.

Bristles of the pig, hog or bear.

Bromine.

Cable core. Cadmium mass.

Calcium carbide. Calcium tartrate.

Calcium Cyanamide (or cyanamide of lime).

Carborundum, crude ground or graded but not further manufactured.

Cassava (or tapioca).

Cassia pulp.

Catalogues (not trade).

Cinchona bark.

Coal, coke, and manufactured fuel of which coal or coke is the chief constituent.

Cobalt metal in the form of rondels, pellets or squares but not including alloys of cobalt.

Coca leaves. Coconuts.

Common reeds (*Phragmites communis*), crushed and baled.

Copper iodide. Copper unwrought, in ingots, bars, billets, blocks, slabs, cakes or rods.

Cork, raw and granulated, cork shavings and waste.

Cotton (raw) (including unmanufactured cotton waste and unbleached cotton liners).

Cotton seed, rape seed and linseed.

Diamond-set articles of the following kinds, being articles which are used or defective and fit only for the recovery of diamonds set therein:— Drill bits, reaming shells and parts of tools.

Diatomaceous earth, not bagged or otherwise packed, containing not less than 35 per cent. of moisture.

Dye Stuffs and some varieties of organic intermediate products or mixtures thereof, used in production of dye stuffs on the fibre.

Emery, crude, unground.

Esparto.

Exposed photo plates, films or prints.

Farina (or potato starch).

Felspar, raw, including crushed but not ground.

Ferro-chromium.

Ferro-manganese, refined, containing less than 3 per cent. carbon.

Ferro-silicon, containing not less than 20 per cent. silicon.

Fish of British taking, including shell-fish; wet salted split fish; chilled or frozen salmon.

Fishery salt (in coarse crystals of a kind for curing fish).

Flax and true hemp. Flint, unground.

Floral concretes.

Fork, shovel or spade handles.

Fruit, dried, without sugar: Prunes, Apples, Pears, Peaches and Nectarines.

Gaboon mahogany (*Okoumé*) logs, in natural state, not hewn or sawn except cross-cut at the ends and not less than 10 feet long and 2 feet in diameter.

Gallnuts. Gambier.

Garnet concentrates, not ground nor graded.

Gas mantle ash.

Glycol ethers and glycol etheresters.

Gold and silver bullion and coin.

Goods which, at the time of their importation into the United Kingdom, constitute or form part of a ship which is being imported for the purpose of being broken up.

Gramophone records adapted for the blind.

Grapefruit, Orange juice and Pulp: Preserved, sweetened or unsweetened.

Gum arabic. Gum tragacanth.

Hay and straw.

Hemp of the variety *crotalaria juncea*.

Herring meal.

Hides and skins (including fur skins, but not including goat skins), raw, dried, salted or pickled but not further treated.

Insulin. Iodine.

Ipcacuanha root. Iron bromide.

Iron ore and iron concentrates, in the form of briquettes.

Iron pyrites, including cupreous pyrites.

Iron and Steel of the following descriptions.

Pig iron, smelted wholly with charcoal.

Pig iron produced in an electric furnace, containing more than 0.1 per cent. by weight of cobalt, but not more than 0.025 per cent. by weight of phosphorus and not more than 0.02 per cent. by weight of total carbon.

Pig iron produced in an electric furnace, containing not more than 0.025 per cent. by weight of phosphorus, not more than 0.02 per cent. by weight of sulphur and not more than 2.5 per cent. by weight of total carbon.

Vanadium-titanium pig iron produced in an electric furnace.

Ingot manufactured entirely from pig iron smelted wholly with charcoal.

Billets, billets, slabs, bars and rods of wrought iron produced by puddling with charcoal from pig iron smelted wholly with charcoal.

Bandsaw strip over 3 inches wide and from 19 to 24 gauge (Birmingham wire gauge) in thickness.

Sponge iron of sorts.

Jute, raw and waste. Kelp.

Lard.

Maize in grain.*

Manuscripts and typescripts and like products of duplicating machines.

Maps; architectural or engineering designs; hydrographic charts.

Matrices for reproduction of gramophone records.

Meat. Mercury.

Metallic ores.

Mica slabs and splittings.

Microfilm for optical but not cinematographic projection, other than trade advertising material.

Mineral phosphates of lime.

Molasses when delivered to a licensed distiller for manufacture of spirits or yeast, to others for use in the manufacture of yeast or solely as food for stock.

Mother of pearl, trochus and other hard shells.

Myrobalans.

Natural but not Terpeneless Essential Oils.

Natural raw materials in dried state.

Newspapers, periodicals, printed books, pamphlets, leaflets and forms; printed music.

Newsprint.

Nickel-copper alloys.

Nickel flakes. Nickel hydroxide. Nickel mass.

Nickel powder. Nickel, unwrought.

Nitrate of lime.

Organic intermediate products.

Paintings in oil or water colours, ink, pencil and charcoal drawings, and pastels, on canvas or paper (including board).

Pearls, unset. Persian berries.

Persimmon wood, hickory and cornel wood.

Pigs' Tongues in airtight containers.

Pit props, wooden.

Platinum in grain, ingot, bar or powder.

Potassium carbonate, chloride, nitrate and sulphate; kainite and other potassium fertilizer salts.

Printed parts of newspapers, etc.

Printed publications advertising travel or exhibitions outside U.K.

Pyrethrum flowers.

Quartz, Rock crystal, raw, including crushed.

Quercitron bark extract.

Radium ores.

Raffia, stripped and dried only.

Rags of sorts.

Ramie, not dressed.

Raw Tung oil.

Rice, broken.

Rosin.

Roundwood logs and pine, spruce, and aspen in the natural state or free from bark or bast, not hewn or sawn except cross cut at the ends, in lengths not exceeding 50 inches, the top diameter not being more than 12 inches.

Rubber (raw) including crepe; rubber latex; gutta-percha (raw).

Sacks, of sorts.

Sausage casings, hog natural, value of over £10 per cwt.

Scientific films (that is to say, cinematograph films exempted under the provisions of Section 8 of the Finance Act, 1928, from the Customs Duty imposed by Section 3 of the Finance Act, 1925).

Scrap material of sorts.

Seaweed, unground, dried or bleached, but not further treated.

Shellac, Seed lac and Stick lac.

Silica refractory bricks.

Silicon and alloys containing not less than 90 per cent. silicon.

Silkworm gut, natural. Siloxanes.

Sodium nitrate.

Solid natural resins.

Straw pulp, bleached.

Sulphur. Sulphuric acid; oleum.

Sumach leaves.

Talc, steatite and soapstone, whether ground or not.

Tantalum metal. Tea.†

Telegraph Poles, wooden, of certain sizes.

The following articles of a size and shape adapted for use in articles of jewellery or imitation jewellery, not mounted, set or strung, viz.:-

Articles of glass.

Artificial pearls.

Non-precious and imitation stones.

Imitations of tortoiseshell, mother of pearl, amber or coral.

Beads made of the above-mentioned materials, or of shells, seeds or bones.

Tin (unwrought).

Unmanufactured waste of certain materials.

Unset precious and semi-precious stones and pearls except unmounted diamonds drilled so as to be adapted for use in wire-drawing dies.

Vegetable fibres of sorts, stripped and dried only.

Wax.

Whales of British taking.

Whale oil and hardened whale oil. Whale products shown to the satisfaction of the Commissioners of Customs and Excise to have been produced or manufactured in floating factories which are British concerns.

Wheat in grain. White arsenic.

Wood pulp.

Wool and animal hair (raw), whether cleaned, secured or carbonized or not; rags of wool not pulled; rags, partly of wool, not pulled; wool noils; and wool waste not pulled or garnetted.

* Chargeable under Ottawa Agreement Act, 1932, with 2s. per qr.

† Chargeable with Duty under other enactment.

CUSTOMS DRAWBACK

Certain classes and descriptions of goods are eligible for drawback under the Second Schedule of the Import Duties Act, 1932, in respect of duties chargeable.

The following conditions must be complied with in order to establish a title to drawback under these provisions:

(a) The goods must have been exported or shipped as stores on or after the operative date of each drawback. (b) The person who exports the goods or ships them as stores must be the importer of the goods or some person who has taken delivery thereof directly from the importer. (c) The goods must be exported in the same state as that in which they were imported. (d) The goods must not have been used. The drawback shall be an amount equal to the duty paid.

DUTIES UNDER OTHER ACTS

Goods chargeable with Customs Duty under enactments other than the Import Duties Act, 1932 (at 1 January, 1954).

And so on for any less number of gallons.			CIDER RETAILER, annual licence:	
(2) <i>Brewed by a brewer other than a brewer for sale.</i>			*For consumption on the premises:	
For every 36 gallons of worts of a specific gravity of 1,055 degrees.....		16 1 0	from £2 5s. 0d. where annual value is under £30, up to £6 where it is £100 or over.	
And so on for any less number of gallons.			Not to be consumed on the premises	2 0 0
BEER-DEALERS' AND BREWERS (annual):			COMPENSATION FUND.—Publicans are now called upon to pay an additional duty on renewal; or grant of new licence (<i>Monopoly Value</i>) (4 E.7, c. 23).	
Beer-Dealer, Wholesale.....		10 10 0	DISTILLER'S Annual Licence: according to distillation in preceding year, viz.:	
Brewer of Beer for sale: according to quantity brewed in preceding year, viz.: not exceeding 100 barrels, £1; exceeding 100, £1 for first 100, and 8s. 0d. for every further 50.†			Not exceeding 50,000 gallons.....	10 0 0
Other brewers, if the beer brewed by the brewer is not chargeable with duty, then, annual value of house not exceeding £10.....		1 5 0	Exceeding 50,000, £10 for first 50,000, and £10 for every further 25,000 or fraction thereof.†	
The annual value exceeding £10 but not exceeding £15.....		2 10 0	ENTERTAINMENTS DUTY	
Ditto in every other case in addition to the duty on the beer made.....		0 4 0	The Finance Act, 1952, laid down three scales of Entertainments Duty for—	
Retailers of beer (Beer-house Licence):			(1) Entertainments where all performers whose words or actions constitute the entertainment are actually present and performing, and the entertainment consists solely of one or more of the following items, viz., a stage play, a ballet, a performance of music, an cisteddfod, a lecture or recitation, a music hall or other variety entertainment, a puppet or marionette show, a circus, travelling show or menagerie.	
*For consumption on the premises:			Where payment of admission, excluding the duty—	
a Duty equal to a third of the annual value of the premises, subject to the following minimum:			Does not exceed 1s.....	No duty.
In non-urban areas, and in urban areas with a population of less than 2,000.....		3 10 0	Exceeds 1s. and does not exceed 1s. 5d.....	0 0 1
Urban areas, population over 2,000.....		6 10 0	Exceeds 1s. 5d.—	
Not to be consumed on premises: from £1 10s. 0d. where annual value does not exceed £10, up to £20 where it exceeds £500.			For first 1s. 5d.....	0 0 1
BOOKMAKERS.—A licence is required for each meeting at a Dog Racecourse at which a totalizator is operated, by every bookmaker who attends the course for the purpose of receiving or negotiating bets. The rate is determined by the number of enclosures at the course and the category (as shown below) of the particular enclosure in which the bookmaker operates. For every meeting of 8 races or less:			For every 5d. or part of 5d. over 1s. 5d.....	0 0 1
Where there is only one enclosure.....		12 0 0	Certain exemptions allowed (Schools, Educational Institutions, etc.).	
Where there are two enclosures only:			(2) Entertainments which include racing, games, other sports or exhibitions being entertainments not falling in Scales (1) or (3) or any other entertainment not falling within these descriptions.	
(a) The cheaper enclosure.....		6 0 0	Where payment of admission, excluding the duty—	
(b) The dearer enclosure.....		24 0 0	Does not exceed 1s.....	No duty.
*For Early-closing and Six-day Licences, proportionate reduction, as for Publicans (q.v.).			Exceeds 1s. and does not exceed 1s. 1½d.....	0 0 1½
† Beginners are charged a proportionate part of the annual rate.			Exceeds 1s. 1½d.—	
			For first 1s. 1½d.....	0 0 1½
			For every 1d. or part of 1d. over 1s. 1½d.....	0 0 0½
			NOTES.—Entertainments consisting solely of games, races or other sports, to which this scale would be applicable, are exempt from duty, if (a) the entertainment is provided by a society, institution or committee established and conducted	

for the promotion of amateur games or sports and not conducted or established for profit, and (b) if no payment be made nor reward given for the participation of any person in any game, race or other sport constituting the entertainment or part of the entertainment, other than prizes of a reasonable number and value competed for and won by individuals taking part therein.

Cricket matches are excluded from the entertainments in respect of which entertainments duty is payable. (*Finance Act, 1953*).

(3) Entertainments which consist of or include any item which is a reproduction of the words or actions of performers not actually present and performing or of other events, scenes or objects (real or imaginary) or a reproduction of a musical performance.

Where payment of admission, excluding the duty, is an amount mentioned in the following table the rate of duty shall be that shown against the amount.†

PUBLICANS, Annual Licences, for Spirits,
Beer, and Wine, to be consumed on
the premises: a Duty equal to half
the annual value of the premises,
subject to a minimum of from £5 to
£10, according to population of dis-
trict. There is an option to pay in
proportion to the annual "compen-
sation value" in certain cases of large
public-houses and "seasonal" hotels.
Publicans: Annual licences for Spirits,
Beer, Wine for consumption off the
premises:

From £10 (Ann. Value not exceeding
£10) to

£50 (Ann. Value not exceeding
£500).

Hotels and Restaurants: Duty charged
according to proportion that receipts
from intoxicating liquors bear to total
receipts, or, optionally, 25% of the
"annual licence value"; subject in
either case to a minimum charge.

Clubs: an Excise Duty of 3d. in the
£ on their purchases of intoxicating
liquors, but no Licence Duty.

Publicans keeping their premises
closed the whole of Sunday or closing
one hour sooner than otherwise re-
quired on week-days, pay only six-
sevenths of the above duty; and
keeping closed on Sunday, and also
closing one hour earlier each day
through the week, only five-sevenths
of the above duty.

INCOME TAX is chargeable on an individual's (a married woman's income is normally included with that of her husband) income of the fiscal year ending 5th April. An individual receiving income from a business or a profession can, however, use his own accounting year as a basis for his assessment. The standard rate of income tax for 1953-54 is 9s. in the £.

Houses: Where assessment does not

exceed £40.....	one-quarter
Exceeds £40, but not £50..	£10
Exceeds £50, but not £100	one-fifth
Exceeds £100.....	£20 plus one-sixth of excess of £100.

A reduction may be claimed in the assessment of any year where average cost of previous five years' maintenance, etc., exceeds scale allowance for that year.

Under Schedule B.—Fixed assessment on actual year basis to cover value of amenity lands—parks, gardens etc., not used for husbandry. Also on woodlands, although these can be assessed on actual profits under Sch. D. Case I if taxpayer so elects. Schedule B assessments are to equal one-third of annual value of the land for Schedule A purposes.

Under Schedule C.—Dividends, interest, annuities from public revenue on actual year basis. Income

STATUTORY INCOME is computed as follows:—

Under Schedule A.—Assessed on an actual year basis, the annual value of Houses, Lands, Tenements, etc., including houses occupied by the owner. Net assessment is computed by deducting scale allowance for repairs, insurance, etc., from rack rental, i.e. rent payable when landlord undertakes all repairs and maintenance and tenant pays rates. Scale repairs, etc., by reference to gross assessment.

Lands.....one-eighth

MARRIED COUPLES WITHOUT CHILDREN

NOTE.—The Table shows the tax payable by Married Couples without Children and, in the case of earned income, of Earned Income Relief. The Taxpayer, however, may be entitled to further reliefs which would reduce the tax payable below the amount shown in the Table.

Tax is deducted at source. For exceptions see Schedule D.

Under Schedule D.—Generally on income of preceding year. Profits of Trades and Professions, Interest on public revenue escaping Schedule C and on Bank and Post Office Savings Bank Accounts, etc. Income from Foreign or Commonwealth securities, rents and possessions. For persons domiciled and ordinarily resident in Great Britain this income is assessable whether remitted or not. Persons not domiciled or British subjects not ordinarily resident in Great Britain are assessable only on remittances to the United Kingdom of this income in any year in which they become technically resident. Income from Trades, Professions, Employments or Pensions arising abroad is assessable only to extent that it is remitted and then only when person entitled thereto is technically resident in United Kingdom.

Profits from letting of Furnished Houses, etc., and Excess Rents (arising when rent of unfurnished house less attributable repairs allowance exceeds net Schedule A assessment).

Under Schedule E.—Income from all Employments and Pensions, including Salaries, Wages, Emoluments, Directors Fees, etc. Taxed under system commonly known as PAYE on actual year basis.

Since 5th April, 1949, unemployment and sickness benefit payable under the National Insurance Act are not assessable to income tax. Maternity

benefit under the same Act has never been assessable.

Expense allowances and payments in kind (less expenses incurred in performance of duties) to Directors and employees enjoying emoluments of £2,000 p.a. or more now assessable.

TAXABLE INCOME is Statutory Income less Allowances and Deductions, as under:

Personal Allowance.—To single person... £120
To married man living with or normally maintaining his wife... £210

Note.—When either husband or wife is absent from United Kingdom throughout a complete fiscal year they are treated as separate entities for tax purposes, each entitled to Single Personal Allowance. This course is not followed if it is to the advantage of the spouses to be jointly assessed on the basis of the husband's residential position. A married woman permanently separated from her husband is treated as a *ferme sole*.

Allowance for Children.—For each child under 16 years (or if over that age at beginning of fiscal year receiving full time education at recognized educational establishment) and who does not have income in the year exceeding £85 in its own right.....

Scholarship or bursary does not count for this purpose.

MARRIED COUPLES WITH ONE CHILD

NOTE.—The Table shows the tax payable by Married Couples with one child after deduction of the Married Allowance and Allowance for one child and, in the case of earned income, of Earned Income Relief. The Taxpayer, however, may be entitled to further reliefs which would reduce the tax payable below the amount shown in the Table.

"Child" includes step-child and adopted child

When a husband and wife are divorced or permanently separated, relief in respect of any children of the marriage can be given to either the father or the mother or divided between them in any way they may mutually agree. Alternatively, the relief will be divided in the ratio in which they each contribute to the children's maintenance and education. In this connection, any payments which the father makes under an Order of Court or Separation Agreement for the benefit of the children or in any way which would entitle him to deduct the payments as a charge in his own income tax return would not count for the purpose of apportioning the Child Relief.

The "Family Allowance" for children ranks as the father's income subject to Earned Income Allowance. Allowance may also be claimed when child over 16 years is articulated or apprenticed provided emoluments (exclusive of premiums returned) do not exceed £52 in the year.

Allowance for Dependent Relatives.—A maximum deduction for each dependent relative of

This allowance is reduced by £1 for every £1 by which the relative's own income

(excluding voluntary allowance) exceeds £15. Claimant must maintain relative who must be incapacitated by old age or infirmity from maintaining himself or herself, except in the case of his or his wife's widowed mother. If more than one person gives support to the dependent relative then allowance is divided pro rata. If annual maintenance afforded is less than £50 allowance limited to amount expended.

A taxpayer, who by reason of his or her own or infirmity has to retain the services of a daughter resident with him or her is entitled to an allowance of

Allowance for Housekeeper or Person looking after children

An allowance of £60 is granted to:—

- any male taxpayer entitled to single personal allowances, any female taxpayer who was either working full time in some employment or business or was totally incapacitated throughout the year and a married man entitled to higher personal allowance whose wife is totally incapacitated throughout the whole of the year, who has a female person resident with and maintained or employed by him or her for the purpose of having care of any child or children

£60

£40

£60

for whom the taxpayer is entitled to claim child relief.

- (b) a widow or widower who has a female relative (or, if no relative is available, a female person) resident with her or him in the capacity of Housekeeper.

Earned Income.—Allowance of two-ninths of the earned income including pensions (after deduction of allowance for tools, uniform, superannuation fund contributions, etc.), subject to maximum allowance of £450.

Married woman earning income in her own right has deduction of two-ninths of such earnings and, in addition, an allowance equal to seven-ninths of her earnings subject to a maximum of £120 plus Reduced Rate Reliefs as shown below.

Age Allowance.—Allowance of two-ninths of unearned income where taxpayer (or his wife) attains 65 years subject to total income not exceeding £600. Marginal relief given on incomes slightly in excess of £600.

Pension Contributions and National Insurance Act.—Part of the employees N.I. contribution and contributions to "approved" superannuation fund are allowed as deductions from income. Taxpayer paying "employer's" contribution in respect of personal servants may deduct whole of such contribution from his income.

Life Assurance Premiums.—Relief is given on premiums paid for Life Assurance or for Contracts for Deferred Annuities on life of taxpayer or his wife. In all cases, except those of policies or contracts taken up in connection with a Superannuation Scheme, a capital sum must be payable at death. Where date of policy or contract is after 22nd June, 1916, and total premiums available for relief to taxpayer and his wife do not exceed £25 an amount of £10 or total premiums, whichever is less, may be deducted from assessable income. Where total premiums exceed £25 relief given at two-fifths of standard rate. For policies or contracts dated before 22nd June, 1910, following rates of relief apply:—

Where total income does not exceed £1,000. Half standard rate (maximum 3s. 6d.).

Income between £1,000 and £2,000. Three-quarters standard rate (maximum 5s. 3d.).

Income exceeding £2,000. Full standard rate (maximum 7s.).

Where annual premium exceeds 7 per cent. on capital sum assured relief is limited to sum equal to 7 per cent. Relief also given on sums paid under Act of Parliament or under terms of employment for securing deferred annuity to widow or provision for children after death of the taxpayer. Relief is given as for life policy or deferred annuity premiums above except that there is no restriction on amount of standard rate. Total relief under either of these headings limited to one-sixth of total income.

Rates of Tax on Taxable Income in the £

On first £100.....	2s. 6d.
On next £150.....	5s. 0d.
On next £150.....	7s. 0d.
On balance.....	9s. 0d.

Small Income Relief.—Persons whose TOTAL income, from whatever source, does not exceed £250 are entitled to a deduction of two-ninths of their total income in addition to other reliefs they may

enjoy (except Earned Income Relief). Marginal Relief for those whose total income is somewhat in excess of £250 is given by adding a sum equal to two-fifths of the excess of £250 to the liability calculated as above on £250.

Building Society Interest.—Majority of Societies operate under special arrangement with Inland Revenue authorities and interest is paid to depositors and shareholders "free of income tax." While there is thus no liability to income tax on such interest it must be included in taxpayer's total income for assessment to sur-tax. The interest received must be grossed at the standard rate when brought in for sur-tax purposes.

SUR-TAX is additional income tax payable on incomes exceeding £2,000. Sur-tax is charged on a sliding scale as follows:—

No Sur-tax on first £2,000.

On each £ of next	£500	2s.	in the £
"	£500	2s. 6d.	"
"	£1,000	3s. 6d.	"
"	£1,000	4s. 6d.	"
"	£1,000	5s. 6d.	"
"	£1,000	6s. 6d.	"
"	£1,000	6s. 6d.	"
"	£1,000	7s. 6d.	"
"	£1,000	7s. 6d.	"
"	£2,000	8s. 6d.	"
"	£3,000	9s. 6d.	"
"	£5,000	10s.	"
On each £ above	£20,000	10s.	"

Deeds of Covenant.—Where covenant to pay annual sums of money is made for other than valuable and sufficient consideration the period of the covenant must be for a term which can exceed six years if the Covenantor wishes to divest himself of such income for income tax purposes. Any such covenant entered into after 10th April, 1946, must be in favour of an individual, not employed in any way by Covenantor and not, for example, a charitable body in order to divest the Covenantor of the income for Sur-tax purposes.

Settlements in favour of taxpayer's own infant children.—The income of any such Settlement made since 22nd April, 1936, is treated as that of the Settlor for all income tax purposes if:—

- the Settlement can be revoked inside a period of six years (unless the child becomes bankrupt).
- the income is paid to or for the benefit of the child during the lifetime of the settlor. This ceases to apply at the end of the fiscal year in which the child attains 21 years or marries.

Agreements for the Avoidance of Double Taxation have been made between the United Kingdom and Aden Colony, Antigua, Argentina, Australia, Barbados, Basutoland, Bechuanaland, Belgium, British Guiana, British Honduras, British Solomon Islands Protectorate, Brunei, Burma, Canada, Ceylon, Cyprus, Denmark, Dominica, Falkland Islands, Fiji, Finland, France, Gambia, Gilbert and Ellice Islands, Gold Coast, Grenada, Guernsey, Ireland (Rep.), Israel, Jamaica, Jersey, Kenya, Malaya, Mauritius, Montserrat, Netherlands, New Zealand, Nigeria, North Borneo, Northern Rhodesia, Norway, Nyasaland, St. Christopher

and Nevis, St. Lucia, St. Vincent, Sarawak, Seychelles, Sierra Leone, Singapore, Southern Rhodesia, Swaziland, Sweden, Tanganyika, Trinidad, Uganda, Union of South Africa, United States of America, Virgin Islands, and Zanzibar.

Double Taxation Relief.—Relief may be obtained by residents of the United Kingdom in respect of any income tax payable in any other Country, Colony or Dominion, not covered by the specific Agreements referred to above, when that income is also liable to British income tax. A credit against the British tax liability on the doubly taxed income is given at a rate equal to the rate paid outside the United Kingdom subject to a limit of the taxpayer's average or effective rate of British tax.

Persons Resident Abroad.—Persons normally resident outside the United Kingdom are not liable to United Kingdom Tax on income arising outside the United Kingdom (including Dominion, Colonial and Foreign Loans issued in London) nor on the interest from:—

3% War Stock 1954-59; 3½% War Stock 1952; 4½% Victory Bonds; 4½% Unfunded Loan 1960-90; 4½% and 3% Defence Bonds (all issues except the 5th); 2½% National War Bonds (except 1954-56 issue); 3% Savings Bonds (all issues).

Such persons become taxable if they are resident in the United Kingdom if they visit for a period or periods exceeding six months in any fiscal year or if they visit for any period in a year in which they have retained a place of abode in the United Kingdom. They would then be liable to United Kingdom Tax on all remittances of income arising abroad. If they visit the United Kingdom in four consecutive years for periods averaging three months or more per annum they would be regarded as ordinarily resident there.

A person who is not resident in the United Kingdom who has income which is liable to United Kingdom tax cannot claim any of the normal income tax allowances unless he is,

- (a) a British subject,
- (b) a present or former servant of the Crown; or widow of a former Crown servant;
- (c) employed by any missionary society controlled from the United Kingdom or a servant of a native State under British protection,
- (d) a resident of the Isle of Man or the Channel Islands; or
- (e) was previously resident in the United Kingdom but resides abroad for the sake of his health or the health of a member of his family.

Such a person can claim a proportion of the normal allowances in the ratio which his income liable to United Kingdom Tax bears to his total income.

This relief is now extended to persons residing in Belgium, France, Netherlands, Sweden and Denmark.

Post war Credits.—Those credits arising out of the temporary reduction of certain income tax allowances during the years 1941-42, 1942-43, 1943-44, 1944-45 and 1945-46 are repayable to women over 60 and men over 65 years of age. Forms for claiming repayment may be obtained at any Post Office.

INCOME TAX ACT, 1952

The Income Tax Act, 1918 and all subsequent Income Tax Acts and Finance Acts up to and including the Finance Act, 1951 (in so far as they relate to income tax) have been consolidated in the

Income Tax Act, 1952. This Act came into force as from 6th April, 1952.

NOTES ON INCOME TAX ADMINISTRATION

Income Tax under Schedules A, B, D and E, is assessed by H.M. Inspector of Taxes. Where taxpayer is assessable under Schedules A and (or) B, these assessments will be made by H.M. Inspector for the district in which the land or property giving rise to the assessment is situated. Assessments under Schedule D (Profits of Trades and Professions) and under Schedule E are made by H.M. Inspector of Taxes for the district in which Trade, Profession or Employment is carried on, or from which Pension is paid. Other Schedule D income is assessable by H.M. Inspector for the district to which the taxpayer makes his individual return. This is called his Primary district and is determined by the main source of his earned income. Where taxpayer has no earned income his chief place of residence determines his Primary district. H.M. Inspector for this district decides, with the agreement of the taxpayer, against which assessment or assessments the Personal Allowances shall be given. Notices of Assessment are sent to taxpayer who should make a formal appeal against any assessment which he disputes direct to H.M. Inspector by whom the Notice was issued within the time limit for such appeals as stated on the notice. The reason for disputing the assessment must be stated on appeal. If the assessment cannot be agreed, the taxpayer may appeal to the General Commissioners (whose address will be supplied by H.M. Inspector) and an appeal may be made from their decision to the Supreme Court on points of law.

The tax on such assessments is demanded by and should be paid to the Collector of Taxes who receives the necessary instructions from H.M. Inspector of Taxes and is in no position to discuss the assessment.

Sur-tax is assessable by the Special Commissioners of Income Tax to whom returns for this purpose can be made; but this is unnecessary where a full return of all income is made to H.M. Inspector of Taxes. Procedure of appeal is the same as for Income Tax assessment.

PAYE.—Income Tax payable under Schedule E is deducted by employer, who accounts for it to the Collector of Taxes. The amount of tax deduction from each payment of salary, wage, pension, etc., is determined by reference to Tax Tables issued by H.M. Inspector of Taxes to employer, in conjunction with the taxpayer's Code Number. This Code Number is an interpretation of the taxpayer's Allowances and Reliefs. Notices of Coding are issued by H.M. Inspector of Taxes and they may take into account income assessable under other Schedules. Care should be taken to check Notice of Coding and advise H.M. Inspector of Taxes of any necessary amendment in order that no considerable over or under-deduction of income tax may take place. The tax deductions are on a cumulative basis and can be carried on by any number of employers should changes in employment take place during fiscal year. When leaving one employment a statement (Form P45) showing code number, remuneration, and tax deductions to date should be obtained from old employer and handed, in due course, to new employer. At the end of fiscal year employer should give employee a statement (Form P60) showing total remuneration and tax deductions for the year.

STANDARD RATES OF INCOME TAX

Standard Rates of Income Tax (since the passing of the Income Tax Act, 1842) —The Income Tax year from April 6 to the following April 5.

OTHER TAXES AND STAMP DUTIES

(ADMINISTERED BY THE BOARD OF INLAND REVENUE.)

NOTE.—(1) The instruments for which the use of adhesive postage stamps is "permitted" under the Stamp Act, 1891, are:—

Agreements liable to the duty of 6d.—s. 22. Bills of exchange (including cheques), for payment of money on demand—s. 34 (1). Policies of Insurance (not life or marine)—s. 99. Receipts—s. 101 (2).

(a) The Commissioners as a general rule allow deeds, etc., to be stamped after execution:—

WITHOUT PENALTY, ON PAYMENT OF DUTY ONLY:
Agreements under hand only, liable to the duty of 6d.—Agreements for letting furnished houses for less than a year.

Foreign sea policies, within 10 days of arrival in U.K.

Deeds and instruments not otherwise excepted, within 30 days of first execution.

NOTE.—Where wholly executed *abroad*, the period begins to reckon from the date of arrival here.

PENALTIES ENFORCEABLE ON STAMPING, IN ADDITION TO DUTY:—

Agreements under hand only. Attested copies or contracts: after 14 days from their first execution.... 10 0 0

Receipts, within 14 days after they have been given..... 5 0 0

Receipts, after 14 days, but within one month..... 10 0 0

Other Instruments presented after the proper time (subject to special provisions in some cases)..... 10 0 0

AGREEMENT for Lease, *see* LEASES.

AGREEMENT for SALE of PROPERTY—charged with *ad val.* duty as if an actual conveyance on sale (*see post*, p. 1164) with certain exceptions, *e.g.* agreements for the sale of land, stocks and shares, goods, wares or merchandise, or a ship (*see* s. 59 (1), Stamp Act, 1891). If *ad val.* duty is paid on an agreement in accordance with this provision, the subsequent conveyance or transfer is not chargeable with any duty and the Commissioners will upon application either place a denoting stamp on such conveyance or transfer or will transfer the *ad val.* duty thereto. Further, if such an agreement is rescinded, not performed, etc., the Commissioners will return the *ad val.* duty paid.

AGREEMENT, not otherwise charged with duty, under hand only..... 0 0 6
N.B.—The following agreements are exempt:—

(a) Where the value of the subject-matter is less than £5.

(b) For the hire of any labourer, artificer, manufacturer, or menial servant.

£ s. d.

(c) For the sale of any goods, wares, or merchandise (but hire purchase agreements, *post*, p. 1166, are not exempt).

Not otherwise charged with duty, under seal or with clause of registration..... 0 10 0

APPOINTMENT of a new trustee or in exercise of a power over property, not being by a will; also on retirement of trustee, although no new trustee be appointed..... 0 10 0

" 275 " " 300..	1	7	6
	1	10	0

Exceeds £300 but does not exceed £500 for every £50 and any fraction of £50

Exceeds £500 but does not exceed £3,000 for every £50 and any fraction of £50

Exceeds £3,000, but does not exceed £3,450 for every £50 and any fraction of £50

Exceeds £3,450, for every £50 and any fraction of £50

If the consideration does not exceed £3,450 the Conveyance or Transfer on Sale must contain a certificate of value in the following form:—

If the consideration does not exceed £500 (or £3,000 or £3,450 as the case may be) a statement certifying that the transaction does not form part of a larger transaction or a series of transactions in respect of which the amount or value or the aggregate amount or value of the consideration exceeds £500 (or £3,000 or £3,450 as the case may be).

If the Conveyance or Transfer on Sale does not contain the appropriate statement duty at the full rate of £1 for every £50 or fraction of £50 will be payable whatever the amount of the consideration.

CONVEYANCE OR TRANSFER of any other kind fixed duty
Included under this head are Transfers for nominal consideration within any of the following categories:—

(a) Transfers vesting the property in trustees on the appointment of a new trustee of a pre-existing trust, or on the retirement of a trustee.

(b) Transfers, where no beneficial interest in the property passes, (i) to a mere nominee of the transferor, (ii) from a mere nominee of the transferee, (iii) from one nominee to another nominee of the same beneficial owner.

(c) Transfers by way of security for a loan or re-transfer to the original transferor on repayment of a loan.

£ s. d.

(d) Transfer to a residuary legatee of stock, etc., forming part of the residue divisible under a will.

(e) Transfers to a beneficiary under a will of a specific legacy of stock, etc. (Note.—Transfers by executors in discharge, or partial discharge, of a pecuniary legacy are chargeable with *ad valorem* duty on the amount of the legacy so discharged.)

(f) Transfers of stock, etc., forming part of an intestate's estate to the person entitled to it.

(g) Transfers to a beneficiary under settlement on a distribution of the trust funds of stock, etc., forming the share or part of the share of those funds to which the beneficiary is entitled in accordance with the terms of the settlement.

(h) Transfers on the occasion of a marriage to trustees of stocks, etc., to be held on the terms of a settlement made in consideration of marriage.

(i) Transfers by the liquidator of a company of stocks, etc., forming part of the assets of the company to the persons who were shareholders, in satisfaction of their rights on a winding-up.

The evidence necessary to establish that a transfer is liable to the fixed duty of 10s. should take the form of a certificate setting forth the facts of the transaction. In cases falling within (b) or (c) such a certificate should be signed by (1) both transferor and transferee or (2) a member of a Stock Exchange or a solicitor acting for one or other of the parties or (3) an accredited representative of a bank; in the last case when the bank or its official nominee is a party to the transfer, the certificate, instead of setting out the facts, may be to the effect that "the transfer is excepted from Section 74 of the Finance (1909-10) Act, 1910." A certificate in other cases should be signed by a solicitor or other person (e.g. a bank acting as trustee or executor) having a full knowledge of the facts.

Registering Officers will in any case in which a Marking Officer's certificate has not been given require such evidence in order to satisfy themselves that a transfer stamped with the 10s. fixed duty is duly stamped.

COVENANT—For repayment of money, see MORTGAGE.

For original creation and sale of any annuity, see CONVEYANCE.

For an annuity (except on original creation and sale) or other periodical payments, see BOND.

Separate Deed of, made on occasion of sale or mortgage, but not being an instrument chargeable with *ad valorem* duty as a Conveyance or Mortgage: same duty as a Conveyance on sale, or a Mortgage, but not to exceed

Estate Duty in respect of agricultural property is to be charged in part on agricultural value at the rates set out in the Finance Act, 1919, as amended by the Finance Act, 1949, in lieu of the above rates.

Gifts made by deceased during his life for public or charitable purposes, are liable for duty, unless made more than twelve months before death; other gifts are liable for duty, unless made more than five years before death; gifts made in consideration of marriage, or as part of deceased's reasonable normal expenditure, excepted. Gifts not exceeding £100 in value or amount (or in certain circumstances £500) also excepted.

Payment of Estate Duty may, by agreement with the Commissioners, be made, wholly or in part, in the form of real or leasehold property comprised in the estate.

Interest at 2 per cent. per annum is also payable on the Estate Duty on personality from the date of the death up to that of delivery of the affidavit or account.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, and 2 per cent. interest

is charged on all unpaid instalments from twelve months after death.

FACULTY OR DISPENSATION:

In England, in all cases.....	30 0 0
In Scotland or Ireland, in some cases £20, in others.....	25 0 0

Duty has been abolished on a Faculty, Licence, Commission or Dispensation for admitting or authorizing any person to act as notary public.

FEEs are taken in all Public Departments by means of Stamps: such payments are accounted for to the Exchequer under the heading of Miscellaneous Revenue.

Exceeds £3,000, but does not exceed £3,450, for every £50 and fraction of £50.

Exceeds £3,450, for every £50 and fraction of £50.

The instrument must contain similar certificates of value as a Conveyance or Transfer on Sale (*ante*, p. 1164-5), with the substitution of the words "property conveyed or transferred" for the word "consideration."

N.B.—The instrument is not deemed to be duly stamped unless it has been adjudicated, *i.e.* the instrument has been lodged with the Commissioner who will judge the value of the property and the duty payable.

LOCAL TAXATION LICENCES

Administered by the respective County Councils and County Borough Councils.

DOGS of any kind (annually), Great Britain ..	£ s. d.
Dogs under 6 months of age, and those kept solely for the purpose of tending sheep or cattle on a farm, or by shepherds, or by blind persons for their guidance, exempt from Duty.	0 7 6

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springs; proprietors, or tenants, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; owners or occupiers, or their servants, killing deer on their own enclosed land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorize others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence. Sailors, soldiers, armen, territorial soldiers, or constables, on duty or at practice, need not take out a gun licence, nor need occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorize any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are as follows:—

GAME LICENCES, if taken out after 31st July and before 1st Nov., to expire on 31st July following.

After 31st July, to expire 31st Oct. ...	£ s. d.
After 31st Oct., to expire 31st July ..	3 0 0
For a continuous period of 14 days.	2 0 0
Gamekeeper's (Great Britain), to expire 31st July.	2 0 0
Game-Dealer's Licence, to expire 1st July, annually.	2 0 0

GUN LICENCES (gun, air gun or pistol).

A Firearm Certificate (5/- for the first, 2/6 subsequently—renewable every 3 years) is also necessary (with certain exceptions) for any person in possession of a firearm, other than a smooth bore gun with a barrel not less than 20 inches in length, or an air weapon.

A person under 17 may not purchase or hire and (with certain exceptions) a person under 14 may not have in his possession a firearm.

Firearm regulations are strictly enforced.

MECHANICALLY PROPELLED VEHICLES:—

Cycles.	£ s. d.
Bicycles (other than electrically propelled).	0 10 0

Licensing of Public Vehicles.

Public vehicles and also the persons concerned with driving and conducting them must be licensed. Vehicles are licensed by the Police Traffic area offices; licensing of personnel is effected by the authority in the area in which they live—not the area where the vehicle is to operate. Addresses of these authorities can be obtained from local Police Stations.

Tractors, Cranes, Excavators, Agricultural Vehicles, etc.

Locomotive ploughing engines, tractors, etc., not used for hauling on roads any objects except their own necessary gear, etc..... 2 0 0

MOTOR DRIVER'S LICENCE, annually ..	0 5 0
-------------------------------------	-------

Motor-cars and cycles must be registered with; and licences to drive obtained from, the respective Clerks of the County Councils or County Borough Councils.

BROADCAST RECEIVING LICENCES

Sound.—Broadcast Receiving Licences (excluding television) may be obtained at most Post Offices at a charge of £1. One licence covers any number of sets in a single household; but lodgers, paying guests and occupiers of flats (even if not self-contained) count as separate householders and require separate licences. Licences are required both for self-contained sets and for loud speakers worked by wire extensions from main receiving sets outside the household concerned. Licences are also required by those using apparatus which is rented or hired. A separate licence is necessary for a wireless receiving set fitted in a motor-car.

Television.—Broadcast Receiving Licences (including television) are obtainable, price £2, at most Post Offices in areas conveniently situated for television reception. Elsewhere in the United Kingdom licences are only available at Head Post Offices (Northern Ireland, Belfast only). If applica-

tion is made at any other office which conducts wireless licence business arrangements can be made for a licence to be issued at a Head Post Office and forwarded by post to the applicant. If the applicant holds an unexpired (£1) sound licence it should be surrendered when the television licence is applied for and a rebate at the rate of 1s. 8d. a month claimed on the unexpired portion of the surrendered (£1) licence.

Blind Person's Free Licences.—Free broadcast receiving licences (excluding television) may be obtained by blind persons who produce the required certificates of registration.

Period of Validity.—An initial licence (either sound or television) is valid for twelve months from the first day of the month of issue. A renewal licence covers a period of twelve months from the date on which the previous licence expires.

POSTAL REGULATIONS OF GREAT BRITAIN AND NORTHERN IRELAND

For full conditions, exceptions, &c., see Post Office Guide, price 2s. 6d., Associated volumes are London Post Offices and J Streets (1s. 6d.), Post Offices in the United Kingdom (3s. 6d.) and Postal Addresses (1s.).

CHIEF POSTAL SERVICES LETTERS

Inland (U.K. and Irish Republic):—

- Not exceeding 4 oz. per copy 1½d.
Every further 4 oz., or less per copy ½d.
Limits: 2 lb. in weight; in size as Letters.

Inland (Papers whether "Registered at G.P.O." or not) and British Commonwealth and Foreign:—As for Printed Papers.

PARCELS

Should be marked "Parcel Post," and must be handed across the counter; postage must be prepaid by stamps, affixed by the sender. On Sundays parcels are not accepted or (except during Christmas) delivered. The name and address of sender should be inside or (not too prominent) on the outside of every parcel, and preferably at right angles to the name and address of the addressee.

A rural postman will accept any packets he can conveniently carry, except overseas parcels or overseas letters intended for insurance; but if on foot or cycle not more, without notice, than 15 lb. from one person. He may weigh parcels on request. Mail-drivers need not accept between regular stopping points.

Parcels to or from Irish Republic, Channel Is. or I. of Man are liable to customs duty: except in last case, the sender must declare contents when posting. Addressee must pay clearance fees (6d. or 1s.) if any duty be payable. Senders can undertake to pay customs charges of Irish Republic and some overseas countries (fee 6d., and a deposit).

Inland:—(Limit of size: length, 3 ft. 6 in.; length and girth combined, 6 ft.):—

(a) Britain and Northern Ireland:—

Not over 2 lb. 1s. 0d.	Not over 7 lb. 1s. 0d.
" " 3 lb. 1s. 2d.	" " 8 lb. 1s. 1d.
" " 4 lb. 1s. 4d.	" " 11 lb. 2s. 0d.
" " 5 lb. 1s. 6d.	" " 15 lb. 2s. 1d.
" " 6 lb. 1s. 8d.	

(b) Irish Republic:—

Not over 2 lb. 1s. 0d.	Not over 8 lb. 1s. 0d.
" " 5 lb. 1s. 5d.	8 to 11 lb. (limit) 2s. 0d.

H.M. Forces Abroad, and Warships outside Home Waters (see also p. 1176):—

Not exceeding 3 lb. 1s. 3d.
" " 7 lb. 2s. 3d.
" " 11 lb. 3s. 6d.
" " 22 lb. (limit) 5s. 6d.

British Commonwealth and Foreign:—

Various (see pp. 1178-80). See P.O. Guide for mode of packing, prohibitions, &c.

GENERAL REGULATIONS

EXPORT RESTRICTIONS.—Under Board of Trade regulations many kinds of goods may be sent abroad (including Irish Republic) only under the authority of an export licence. Enquiries in the matter should be addressed to the Controller, Export Licensing Branch, Board of Trade, Atlantic House, Holborn Viaduct, E.C.1.

Under the Defence (Finance) Regulations, senders of parcels exceeding £10 in value to most foreign countries, including the U.S.A., and also to Canada (including Newfoundland), must furnish with the parcel a currency declaration (form C.D.3) which, together with explanatory notices, may be obtained from banks.

PROHIBITED AND DUTIABLE ARTICLES.—Among prohibitions are offensive or dangerous things, packets likely to impede the P.O. sorters and certain kinds of advertisement. To Irish Republic, Channel Islands, and I. of Man dutiable articles must be sent in Parcels. Abroad generally they may be sent in Parcels, Insured Boxes (to those countries which accept them) or (where the "Green Label" system applies) in Letters, or Small Packets (p. 1174).

FOODSTUFFS.—For conditions under which Foodstuffs may be sent abroad see *Post Office Guide*.

CERTIFICATE OF POSTING unregistered parcels free; other unregistered postal packets, 1d.

UNPAID PACKETS, except Business Reply packets and redirected parcels, are charged double postage on delivery; **UNDERPAID PACKETS**, double the deficiency.

UNDELIVERABLE POSTAL PACKETS.—*Inland packets chargeable with a postage of 2d. or more*, undelivered, are returned to sender without charge, if his address is found either outside or inside. Packets without sender's address or any enclosure of importance are destroyed, except parcels, which, if not applied for, are generally disposed of after 3 months, or if perishable are dealt with as requisite. *Packets chargeable with postage not exceeding 2d.* are returned to sender only on payment of a second postage, and if name, address and request for return appear on outside; those without such request are disposed of. *British packets undelivered abroad* are returned to sender here on payment of charges due; printed papers of no value only if request for return appears outside in a language known in the country of destination. Magazine Post packets are charged with return postage, when return is requested. Parcels further incur other charges unless abandonment is requested at the time of posting.

REPLY COUPONS, for the purpose of prepaying replies to letters, are exchangeable abroad for stamps representing a minimum commonwealth or Foreign letter-postage. Price (valid in all countries of the Universal Postal Union), 6d.; (valid within the Commonwealth and Irish Republic only, not in Anglo-Egyptian Sudan), 3d. Sold at chief offices.

POSTE RESTANTE:—

(solely for the accommodation of travellers, and for three months only in any one town).—A packet may be addressed as a rule to any Post Office except Town Sub-Offices, and should have the words "Poste Restante" or "to be called for" in the address. If addressed to initials, fictitious names or Christian name only, it is treated as undeliverable. Applicants must furnish sufficient particulars to ensure delivery to the proper owner. Redirection from a Poste Restante is not undertaken for more than 14 days unless longer (up to 3 months) is applied for. Letters at a seaport for an expected ship, are kept 2 months; otherwise letters are kept for 2 weeks—or for 1 month if originating from abroad—at the end of which time they are treated as undeliverable, unless bearing a request for return at or before the end of the period.

REDIRECTION.—(1) By agent of addressee: *Packets other than parcels* may be reposted free not later than the day after delivery (not counting Sundays and public holidays) if unopened and not tampered with, and if original addressee's name is unobscured. *Parcels* may be redirected free of charge, within the same time limits, only if the original and the corrected addresses are both within the same Town Delivery Area (or within the London Postal District). *Registered packets*,

which must be taken to a Post Office, are re-registered free only up to day after delivery. (2) By the Post Office (not undertaken when other persons remain at the address). Requests for redirection of letters, &c., should be on printed forms, obtainable from the postmaster, and must be signed by the persons to whom the letters are to be addressed. Redirection is free for 6 months; thereafter for each different surname and each new address costs 1s. for 12 months, and 5s. for each subsequent year. Separate forms must be filled in for the forwarding of telegrams.

REGISTRATION, INLAND.—All kinds of postal packets intended for registration should be marked "Registered" in bottom left-hand corner, and must be handed to an officer of the Post Office, and a receipt taken. Parcels (or the string with which they are tied) and letters must be fastened with adhesive (if tape is used each piece must be signed or distinctively marked), or sealed with wax, lead, &c. Minimum fee 6d. exclusive of postage. Advice of delivery, a further 3d. The latest time for registering is usually half an hour before the latest time for posting ordinary packets. Compulsory registration is applied to (a) any packet apparently meant for registration and wrongly posted (6d. less any prepaid excess postage); (b) packets found open (or undeliverable) and containing any bank or currency note, coin, jewellery, stamps, uncrossed bearer cheques, uncrossed postal orders without payee's name, &c., in each case 20s. or more in value (6d.).

COMPENSATION, INLAND.—Subject to certain prescribed regulations which are fully set forth in the Post Office Guide, the Post Office pays compensation for (i) loss of or damage to registered letters and parcels, (ii) though not as a legal right, for loss of or damage to unregistered parcels and for unregistered packets conveyed by Express Messenger all the way. No compensation is paid, however, for consequential injury or damage arising in respect of anything sent by post. *Registered letters and parcels:* The fees for registration are 6d. covering compensation up to £5; 7d., £20; and 1d. for each additional £20 up to the maximum of 2s. 2d. for £400. (No legal right to compensation exists in respect of registered letters and parcels sent to and from Irish Republic). *Unregistered parcels and unregistered packets conveyed by Express Messenger all the way:* Maximum compensation £3 (£2 for unregistered parcels sent to or from Irish Republic).

Compensation in respect of money of any kind (coin, notes, orders, cheques, stamps, etc.) is only given if the money is sent by *registered letter* post in one of the special envelopes sold officially (see p. 1174) and, in the case of paper money, if particulars (for identification) are kept; the maximum compensation for coin, which must be packed so as not to move about, is £5. Compensation for eggs, fish, poultry, game and rabbits, meat, fruit and vegetables is paid only if sent by *parcel post*; and for fragile articles only if the cover of the packet has been conspicuously marked "Fragile, with care." No compensation is paid for deterioration due to delay of perishable articles or for damage to exceptionally fragile articles, liquids or semi-liquids sent by letter or parcel post to or from Irish Republic whether registered or not.

REGISTRATION, COMMONWEALTH AND FOREIGN (except for parcels and a magazine post packet for Canada, including Newfoundland), is in force to all countries with the exception of China (excluding Formosa); valuable articles may not be sent in unregistered letters. Fee, 6d. If claimed within a year, compensation (in the U.K., £2 18s.) is paid to the

sender for entire loss of registered packets while in the custody of a country in the Universal Postal Union.

INSURANCE, COMMONWEALTH AND FOREIGN. may be effected on packets to many countries at the following rates:—8s. for £12; 2d. each further £12 up to 6s. 2d. for £400 (lower maxima in many countries). For *H.M. Warships outside Home Waters* only parcels are insurable, up to £50. Packets containing no articles (besides correspondence) but valuable papers (banknotes, &c.) or valuable documents (plans, &c.) can be insured as *letters*; other valuable articles should be sent as insured parcels, or as "insured boxes."

COMPENSATION up to a maximum of 93s. may be given for loss or damage in the U.K. to *uninsured* parcels to or from most Commonwealth and Foreign Countries, if certificate of posting is produced.

No compensation will be paid for any loss or damage due to the act of the Queen's Enemies.

INSURED BOX POST.—Jewellery and precious articles (*not* letters or valuable paper) may be sent in insured boxes to certain countries. Postage 3d. per 2 oz. (minimum 1s. 3d. plus appropriate insurance fee); maximum weight 2 lb., size 12 × 8 × 4 in. Customs declarations must be filled in.

CASH ON DELIVERY SERVICE, INLAND (*not* to or from Irish Republic, nor to H.M. Ships.—A sum (Trade Charge) up to £40 can, under certain conditions, be collected from addressee and re-mitted to sender of a parcel or registered letter posted at a Money Order Office, or of goods consigned by railway. Fees (extra to usual postal or rail charges): For Trade Charge up to £1, 10d.; £2, 1s.; £5, 1s. 2d.; and for each further £5 or part thereof, 2d. An additional charge of 3d. is made on deliveries sent by rail.

CASH ON DELIVERY, COMMONWEALTH AND FOREIGN.—Applicable to parcels only, but not to all countries, nor to H.M. Naval and Military Forces and R.A.F. serving overseas. Fees for collection: 4½d. for Trade Charge (amount to be collected) not exceeding £1, with 2½d. extra for each additional £1 of Trade Charge up to the maximum, which is usually £40 (fee 8s. 6d.), but in some countries less. Addressee has also to pay on delivery, besides Customs, if any, a further fee (4d. in U.K.) not prepayable. If Trade Charge cannot be collected, the rules for undeliverable parcels apply.

EXPRESS AND SPECIAL SERVICES (INLAND).—In general the express services are limited to the hours of telegraph business, but the times vary according to the service used and local conditions. No. (4) (*below*) is available on Sundays only. On Sundays No. (5) (*below*) is available only to places within the London Postal Area (*see* p. 1176, and next paragraph). Waiting fees: 10 minutes free, each further 10 minutes or less, 2d.—(1) *All the way*, by P.O. messenger, of packets, conspicuously marked "Express" above the address, handed over the counter. Inclusive charge, 6d. per mile, or part of a mile, with 1d. on each separate packet after the first. Live animals, liquids, and money may be delivered by this service. (2) *After transmission by post*, on addressee's application (6d. per mile, or part of a mile, and 1d. for every ten or less additional packets). (3) *After transmission by post*, at sender's request "Special Delivery" from the ordinary delivery office, if messengers are available (6d.+postage). Packets must be marked "Express," and letters bear a broad blue or black vertical line back and front. (4) *See* p. 1176. (5) Of a message telephoned to an express delivery office (20 words 1d., minimum 3d., besides express and telephone charges).

(6) ("Raillex.") Postal packets not liable to registration are despatched by rail, met, and specially delivered in Britain, Douglas (I.O.M.), Northern Ireland, Jersey and Guernsey. Inclusive charges, 2 oz., 3s.; 1 lb. (maximum) 3s. 6d.; but packets from Jersey and Guernsey to Britain, Douglas or N. Ireland may not exceed 2 oz. (7) *A Railway Parcel*, is similarly accelerated at the cost of a telegram, of railway charges, and of Service (1) at both ends of its journey.

RAILWAY LETTERS, &c.—A letter not liable to registration, if taken to a Parcel or Booking Office of British Railways while the station is open, weekdays or Sundays, will be sent off by next train or steamer to a station or port on British Railways, or to Douglas (I.O.M.), Jersey, Guernsey and Northern Ireland. The stations and trains of the London Transport Executive are outside the scope of the arrangement. Fee (besides postage): 2 oz., 8d.; 4 oz., 1s. 2d.; 1 lb. (maximum), 1s. 6d.; to Irish Republic, 2 oz. (maximum), 8d. Unless marked "to be called for," it is posted in the nearest letter-box at station of address. Except on Sundays, or in Irish Republic, it can be delivered Express under Service (3), or directly from the station (Service (1)) by wiring for messenger to meet it. For other combinations of rail and express, *see* preceding paragraph, Services (6) and (7).

AIRWAY LETTERS.—On certain air routes operated by the British European Airways Corporation, airway letters are conveyed by the next available direct air service from the air terminal where they are handed in and (1) transferred to the post on arrival, or (2) left at the airport or town terminal of B.E.A.C. to be called for. The conditions on which these services are operated are, in general, similar to those applying to the Railway Letter Service, the charges are identical and the same limit of weight applies. Full information regarding the services can be obtained from any office of B.E.A.C.

INTERNATIONAL EXPRESS SERVICE.—Delivery by special messenger of correspondence (including parcels) to or from certain countries. In some cases the service is restricted to certain towns. 6d. is paid by the sender, the rest, if any, by addressee, according to the local regulations. (*See* P. O. Guide.)

POST CARDS.—Minimum size 4 × 2½ in., maximum 5½ × 4½ in. The left-hand half of the address side may be used for correspondence, inland or abroad. Plain cards, if as stiff as official cards and not under 1/16th inch thick, may also be used both inland and abroad.

Reply Post Cards for abroad must have the heading *Carte Postale avec réponse payée* on first part, and on the second part (valid only to country of origin) *Carte Postale—Réponse*.

BUSINESS REPLY CARDS AND ENVELOPES (Inland, excluding Irish Republic). This service enables a person or firm to receive cards or letters from clients without prepayment of postage, the postage together with a fee of ½d. being paid by the addressee on each card or letter delivered.

A licence to use the service must be obtained from the Post Office.

PRINTED PAPER POST (including former BOOK POST).—For certain printed or written matter (p. 1171).

By this post may be sent books and other works of a literary character, with or without written dedications, and any other written, typed or printed matter not being in the nature of a letter, drawings, paintings, photographic prints, engravings, maps, &c., together with normal non-fragile binding and anything necessary for safe transmission. Commercial printed forms, legal documents.

printers' copy and proofs, examination papers, answers and corrections, the writing on which refers solely to the subject matter of the document, Christmas and picture cards with date, names and addresses of sender and addressee, and with conventional formulas not exceeding 5 words or initials, are also admitted, and circulars (if in characters resembling typewriting, only under special conditions). To overseas, receipts, invoices and statements of account, admissible inland, go only as Commercial Papers, and there are other differences. Written chess-moves and puzzle-solutions, also blank stationery, are inadmissible. Printed papers being subject to examination in the post, the cover, if any, must be capable of easy removal and replacement for purposes of examination, i.e., without breaking, tearing, ungumming, or cutting. (For full conditions see the official Guide, or free leaflet P. 386 w.).

ARTICLES FOR THE BLIND (inland, excluding Irish Republic). Books, papers, literature and specified articles specially adapted for the use of the blind are admissible subject to certain conditions. A packet should bear on the outside the indication "Articles for the Blind" and the name and address of the sender. Packets must be capable of easy examination in the post. Rate:—2 lb., ½d.; 5 lb., 1d.; 8 lb., 1½d.; 11 lb., 2d.; 15 lb., 2½d. Limits: weight, 15 lb.; size, as for letters.

BLIND LITERATURE, COMMONWEALTH AND FOREIGN, INCLUDING Irish Republic (in other respects treated as Printed Papers):—Papers, periodicals and books, if printed in special type and subject to certain conditions of posting, marked outside "Blind Literature," with name and address of sender. Packets must be capable of easy examination in the post. Rate to all parts:—2 lb., ½d.; 5 lb., 1d.; 8 lb., 1½d.; 11 lb., 2d.; 15 lb., 2½d. (maximum for Irish Republic, 11 lb.).

SAMPLE POST (not to Irish Republic).—Restricted to bona-fide Trade Samples, without saleable value; but one key, printers' blocks, fresh cut flowers, and certain scientific specimens can be sent abroad by Sample Post. Rate:—Inland: Up to 4 oz., 1½d.; 6 oz., 2d.; 8 oz., 2½d.; Abroad: Not exceeding 2 oz., 1½d.; for each further 2 oz. or less, ½d. Limits: Inland: Size, 24 × 18 × 18 in., weight 8 oz.; Abroad: Brit. Commonwealth, territories under British Trusteeship, British Post Offices at Tangier and in the Persian Gulf; Burma, Israel and Jordan, 24 × 12 × 12 in., 5 lb.; Elsewhere: as for Letters, B iii (p. 1171), 1 lb. If in roll form, everywhere as for Letters, A ii. Packets must be capable of easy examination in the post.

SMALL PACKETS POST (Commonwealth & Foreign).—For small articles of merchandise by Printed Paper mails. Registration is allowed; not insurance. Available only to certain countries. A green Customs label must be affixed and, in certain cases, Customs declarations prepared. Postage 1½d. per 2 oz., minimum 7½d. Limits: weight, 2 lb.; size, as for Letters, A ii and B iii (p. 1171).

NEWSPAPER POST (INLAND).—For newspapers "registered at the G.P.O." (p. 1171).

The cover, if any, must be open at both ends and easily removable, and copies should be folded so that title is readily inspected. No writing or additional printing is permitted, other than the words "with compliments," name and address of sender, request for return if undelivered, and a reference to a page.

Newspapers not "registered at G.P.O." or supplements to registered newspapers apart from their ordinary publications should be sent at printed paper rate.

STAMPS, ENVELOPES, POST CARDS, &c.

Stamps of reigns before that of King George V are no longer valid.

POSTAGE STAMPS (used also for receipts, telegrams, and certain inland Revenue duties) are sold of the respective values of ½d., 1d., 1½d., 2d., 2½d., 3d., 4d., 5d., 6d., 7d., 8d., 9d., 10d., 11d., 1s., 1s. 3d., 1s. 6d., 2s. 6d., 5s., 10s., and £1. Books containing 6 ½d., 6 1½d., 3 1d. and 6 ½d. stamps,

2s. 6d., or containing 12 2½d. and 6 each of 2d., 1½d., 1d. and ½d. stamps, 5s. Rolls of ½d., 1d., 1½d., 2d., 2½d., 3d., or 4d., stamps are also sold, joined lengthwise or sideways and rolls of 6d. stamps joined lengthwise.

REGISTERED LETTER ENVELOPES with a 8½d. embossed stamp (6d. for registration and 2½d. for postage), are of four sizes: F. 5½ in. × 3½ in. or G. 6½ in. × 3½ in., 9½d. each; H. 8 in. × 5 in., 10d. each; K. 11½ in. × 6 in., 11d. each.

LETTER CARDS with 2½d. stamp: 3d. each.

POST CARDS, with impressed 2d. stamp: 2½d. each. Reply: double the Single figures.

EMBOSSSED ENVELOPES with 2½d. stamp; "A" (4½ × 3½ in.) or "Commercial" (5½ × 3½ in.), 3d. each. Air Letter Forms impressed with 6d. stamp, 6d. each.

Embossed or impressed postage stamps cut out of envelopes, post cards, letter cards, air letter forms, newspaper-wrappers, or telegram forms, may be used as adhesive stamps in payment of postage or telegrams provided they are not imperfect, mutilated, or defaced in any way.

MONEY ORDERS

Advice of Payment: 3d. inland (and to Irish Republic), 3d. for foreign and colonial orders (to certain countries). Payment may be stopped (fee 6d.); or deferred up to 10 days in case of Ordinary Inland Money Orders. Inland orders (including those for Irish Republic) may be crossed for payment through a bank.

Inland Ordinary Money Orders (and to Irish Republic).

The poundage charged is, for sums not exceeding £10, 8d.; and for each additional £10, 2d., to £50 (maximum), 1s 4d. No order may contain a fractional part of 1d. The rules and regulations are on the forms issued. No poundage is charged for M.O. in payment of many Revenues (e.g., Income Tax) if demand note is produced.

Inland Telegraph Money Orders (and to Irish Republic).

Money may be transmitted by this means from all Money Order offices which dispatch telegrams, and paid at most of those which also deliver telegrams, and at some other offices. On Sundays, Christmas Day and Good Friday, inland telegraph money orders for amounts not exceeding £5 are issued at all Money Order Offices which transact telegraph business at the times when these offices are open for telegraph counter business and sums up to £5 are payable at, or in the delivery areas of, London Chief Office, the District Offices, and some Branch Offices in London, and all head and many of the more important other offices outside London.

Poundage at the same rate as for Ordinary Inland Money Orders, plus supplementary fee of 3d., and cost of official Telegram of Advice, 1s. 10d. for Inland Orders and 2s. 1d. for Irish Republic Orders.

Ordinary Money Orders for Abroad.

Poundage, £1, 6d.; £2, 1s.; £3, 1s. 6d.; and thereafter 3d. per £1 or part thereof. Limits of amount, £10, £20 or £40; validity, normally 12 months.

At present, not more than £10 per day per remitter can be sent to Canada or any other country outside the *Scheduled Territories* (formerly known as the Sterling Area), and then only when the purpose of the remittance is declared on a special form and permission has previously been granted by the Accountant General's Department G.P.O. (Postal Remittance Branch I).

Telegraph Money Orders for Abroad.

Only to certain countries, *e.g.*, Australia, Canada, India, New Zealand, S. Africa, Egypt, U.S.A. Poundage as in last paragraph, *plus* cost of official Telegram of Advice (at Letter Telegram rate, if desired to certain countries) *plus* a supplementary fee. For restrictions, see the preceding paragraph.

POSTAL ORDERS

Postal Orders (British pattern) are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on weekdays. They are also issued and paid in most countries within the Commonwealth. Transmission of postal orders to Canada or any other country outside the Scheduled Territories (formerly known as the Sterling Area) is prohibited except to members of H.M. Forces under special arrangements, particulars of which may be obtained at any Post Office transacting Postal Order business. They are *paid* (but not *issued*) in Irish Republic. They are printed with a counterfoil, for every multiple of 6d. up to 5s., for 6s., and by 1s. steps up to 21s. and 40s. Adhesive, unmarked current British Postage Stamps not exceeding two in number, if affixed in the 2 spaces provided, increase the value of an Order by not more than 5d. (orders up to 4s. 6d.) or 11d. (orders of 5s. and upwards). Poundage: 6d. and 1s., 1½d.; 1s. 6d. to 5s., 2d.; 6s. to 21s., 3d., 40s., 6d. The name of payee must be inserted. If not presented within six months of the last day of the month of issue, Orders must be sent to the local Head Postmaster, or in London to the District Postmaster, for verification, and commission equal to the original poundage will be charged.

INLAND TELEGRAMS

Telegrams are accepted during counter business hours at any post office or railway station at which telegraph business is transacted. They may also be handed with the necessary payment to messengers delivering telegrams or express letters. Telegrams may be tendered by telephone at all times. Rate, 12 words or less 1s. 6d. (to Irish Republic 12 words or less 2s. 0d.), each further word 1½d. Priority rate (not available to or from Irish Republic) 9d. extra. A redirection charge of 1s. 6d. per telegram is made if the original and new addresses are in the same place, free delivery area or London Postal District. In all other cases the charge is at the ordinary inland rate. Telegrams handed in on *Sundays* and (exc. Scotland) *Good Friday* or *Christmas Day* are charged 9d. extra. Replies may be prepaid up to 6s. (Irish Republic 6s. 6d.); the reply voucher may be used, or its value refunded to sender of original telegram, within 12 months. Receipt for charges free on request. Certified copy 9d., sometimes more. Hand-delivery is free within 3 miles (1 in Irish Republic) of the nearest telegraph delivery office, or within the town postal area; beyond the free limit the charge is 9d. per mile to be paid by sender. In Irish Republic charge is collected on delivery.

(1) TELEGRAPH OFFICES ALWAYS OPEN IN LONDON:—Chief Office (King Edward Street), Leicester Sq., Charing Cross Road.

(2) PROVINCIAL TELEGRAPH OFFICES.—Certain offices in the largest towns are open for delivery on weekdays at all hours, but only vitally important telegrams are sent out after ordinary delivery hours.

COMMONWEALTH AND FOREIGN TELEGRAMS

In the list of countries on pp. 1178–80, the ordinary or FULL RATE per word is given (minimum charge, cost of 5 words) from any part of the United Kingdom. To any place in the British Commonwealth the full rate does not exceed 1s. 4d. per word.

To places in the Commonwealth, Commonwealth Social Telegrams (GLT) are available. The charge is 6s. 8d. for 11 words or less (including the indicator = GLT =), and 8d. for each word after 11 except to Canada, Cyprus, and the British West Indies to which lower charges apply.

Most countries admit Letter Telegrams at reduced charges. Letter Telegrams, which must be written in plain language, are subject to delay in transmission in favour of ordinary telegrams.

Full particulars of the charges and services available to any country will be given on enquiry at any Postal Telegraph or Cable & Wireless Office.

RADIOTELEGRAMS

Radiotelegrams for transmission to ships at sea in any part of the world may be handed in at any Postal Telegraph Office or dictated over the telephone. The standard rate of charge for messages sent to ships through coast stations in the British Isles is 1s. 0d. a word; there is a reduced rate of 6d. a word for messages to ships regularly engaged on short voyages to or from ports in the British Isles. The address should contain (1) the name and/or rank of the addressee, (2) the name of the ship, and (3) either the name of a British coast station if the sender knows that the ship is within range of that station, or the word "Wireless".

Radiotelegrams may be sent to service personnel on board H.M. Ships in foreign waters at a charge of 7½d. a word and in the Home Fleet at a charge of 4d. a word. The address should contain (1) the name of the addressee and his rank or rating, (2) the word "Warship" (or "Submarine") (3) the name of the ship (or identifying letters and number) and (4) the word "Admiraltyradio" (or, in the case of the Home Fleet, the words "Homewaters Admiraltyradio").

Radiotelegrams may also be sent to R.A.F. vessels at a reduced rate of 4d. per word. Such radiotelegrams should be addressed in the same way as for commercial vessels and in addition should include the words R.A.F. Vessel before the name of the ship.

TELEPHONES

Quarterly rentals for single exclusive lines for private-residence subscribers range from £1 10s. 0d. to £2, and include, free, 37½d. worth of local calls (*viz.* calls of 1½d. to 6d. value, up to 15 miles distance); if over 3 miles from the exchange, an extra 7s. 6d. a quarter is payable in respect of each furlong or part thereof beyond the 3 miles. Shared service, in which two subscribers use one line but enjoy nearly all the facilities of exclusive line service, is offered under certain conditions. For this service a rebate of 7s. 6d. is allowed from the normal quarterly rental for a single exclusive line. Trunk call charges (*viz.*, to exchanges over 15 miles away) vary with distance, but do not exceed 3s. 9d. by day (for 3 minutes) and 1s. 6d. from 6.0 p.m. to 10.30 p.m. (7s. 6d. and 2s. 3d. to Irish Republic.) Call Office charge 3d. extra. *Personal calls* (to specified person) 1s. 6d. extra (6 p.m. to 10.30 p.m. 9d.); if the required person cannot be found, nothing further is charged. For fuller information, see the Preface to the Telephone Directory.

GENERAL SUNDAY AND HOLIDAY ARRANGEMENTS

ON SUNDAY THROUGHOUT THE U.K. no Parcel Post, non-telegraphic Money Order, Postal Order business is transacted, nor is there a delivery of letters, &c., except by Express Services (4) and (5) below. There is a collection for night despatch in most places. IN LONDON, the Chief Office and Leicester Square Branch Office are open always, and 33 other offices are open from 9 a.m. to 1 p.m. for stamps, telephone, telegrams, and with some

exceptions telegraph money orders up to £5 and savings bank demand withdrawals up to £3. **OUTSIDE LONDON** all Head Offices and some country telegraph Sub-offices open 9-10.30 a.m. (Scotland 9-10 a.m.) for stamps, telegrams, registration and with some exceptions telegraph money orders up to £5 and Savings Bank demand withdrawals up to £3; but all town sub-offices, and most non-telegraph country offices, are closed. Many stations send railway letters (p. 1173), and telegrams at train times.

EXPRESS SERVICE 4 ("Special Delivery on Sundays"): Two limited inter-city services, (a) for London, Belfast, Dublin and certain provincial cities (except that the service is not in operation from Southampton to Belfast or between Dublin and some of the provincial cities), (b) between Belfast and Cork, are available only: (1) Sundays: reciprocally between the cities in each group; (2) Good Friday: to London only from the others of group (a). Delivery is made from offices only during periods when they are open for telegraphic business. The handing-in offices in London are:—The London Chief Office, King Edward St., E.C.1., W. and S.W. District Offices, and (Branch Offices) Camberwell Green, Clapham Common, Hammersmith Broadway, Holloway, Leicester Square, Stratford, and Swiss Cottage. Packets, marked "Express: Sunday Delivery," must be handed in in time to catch preceding night mails (in London, Sat., 12 noon-3.30 p.m. for Belfast, 2.15 p.m.-7.0 p.m. for Dublin and 4.15 p.m.-6.30 p.m. for provincial cities in group (a)). Fee 1s. 6d., besides postage, covers delivery within any of the cities (in Dublin and Cork, not beyond the first mile). Not available for parcels.

EXPRESS DELIVERY by messenger of a telephoned message (Service 5, p. 1173) is on Sundays restricted to the London Postal Area. But a letter reaching "Central Telegraph Office, London, E.C.1.," early on Sunday morning will be telephoned to a telephone subscriber in the London Telecommunications Region if the envelope be marked conspicuously "For Telephone Delivery on Sunday," with a broad blue or black perpendicular line back and front, usual postage being prepaid on the envelope, and 3d. per 30 words or less by stamps affixed to the enclosed message.

CHRISTMAS DAY AND GOOD FRIDAY.—*London:* One morning delivery of letters, parcels, &c., on Christmas Day: none on Good Friday except by Express Services 4 and 5. The same offices as on Sundays open from 9 a.m. to 1.0 p.m.

Outside London: In Scotland business is as usual on Good Friday; on Christmas Day some town sub-offices are shut, and after 1 p.m. many chief offices are open only for telegraph; there are one or two deliveries of letters, etc. In England, Wales and N. Ireland office open as Sundays; there is one delivery of letters and parcels; no acceptance of parcels.

OTHER PUBLIC HOLIDAYS

London.—One morning delivery of letters and parcels, except on Boxing Day. On Bank Holidays, in addition to the London Chief Office and Leicester Square Branch Office which are open always, 44 offices open 10 to 1 (but Boxing Day, same as on Sundays) for all classes of business, but parcels are not despatched till next day.

Outside London.—In Scotland, chief offices open in the morning, some in evening, for all business; telegrams delivered mostly as usual; one delivery of letters, &c. On New Year's Day offices open as on Sundays, and for the same business; no delivery of letters and parcels. In England,

Wales and N. Ireland, one letter and parcel delivery (except on Boxing Day). Most non-telegraph country, and all town, sub-offices are closed. Head offices and some others open 9 a.m. to noon, country telegraph sub-offices 9 a.m. to 10.30 a.m., for most classes of business. On Boxing Day the hour of business are the same as on Christmas Day.

LETTERS AND PARCELS FOR MEMBERS OF H.M. ARMY OR AIR FORCE

MEMBERS STATIONED AT HOME.—While serving in Great Britain or Northern Ireland a unit will employ a "Place name" address.

Addresses must show: (a) Army or Air Force number (in the case of "other ranks" only); (b) rank; (c) name; (d) squadron, battery, company, or other section of the unit; (e) Army or Air Force Unit (including in the latter case the letters "R.A.F."); (f) correct postal address of the place at which the unit is stationed. The words "c/o G.P.O.," "c/o Army Post Office," or any unauthorized form of address must not be used.

MEMBERS SERVING OVERSEAS.—In the British Army of the Rhine, British Army Post Offices 1, 2, 3 and 5, British Forces Post Office 6, 10 and 21, British Element Trieste Force, Malta or Malta Garrison, Middle East Air Force, Middle East Land Force, British Troops in Austria, British Forces in Greece. Addresses must show (a) Army or Air Force Number (in the case of "other ranks" only); (b) rank; (c) name; (d) squadron, battery or company (or other section of the unit) or name or number of the R.A.F. unit, where this is allowed; (e) Army unit or the words Royal Air Force; (f) the name of the particular force in which serving (i.e. British Army of the Rhine, Middle East Land Forces, etc.).

Rates of Postage to H.M. Armed Forces

(a) Members of H.M. Army and Air Force stationed at home and personnel of H.M. Ships believed to be in Home Waters (including the North Sea)—the ordinary inland rates of postage apply.

(b) Members of H.M. Army and Air Force serving overseas and personnel of H.M. Ships believed to be in Foreign Waters:—

Letters, 2½d. for the first ounce and 1d. for each additional ounce.

Postcards, 2d. each.

Printed Papers, including Newspapers, 1d. for first 2 oz. and ½d. each additional 2 oz.

Parcels, not exceeding:

3 lb., 1s. 3d.; 7 lb., 2s. 3d.; 11 lb., 3s. 6d.; 22 lb., 5s. 6d.

OVERSEAS TELEPHONES

The caller should ask for CONTINENTAL or INTERNATIONAL RADIO Service and give the name of the country and town required. Callers in London with Dial Telephones with letters should dial "CON" or "INT." The charges shown (p. 1177) are minimum rates for a call of three minutes duration, each further minute or part thereof costing one-third of this charge. Some countries are divided into zones, additional charges being required for calls to the more distant zones.

A. Continental Services.

The rates quoted (p. 1177) are for calls from all places in Great Britain, Northern Ireland, the Isle of Man and the Channel Islands to the first zone of the country concerned. For Personal Calls an additional charge equivalent to one minute's conversation is made: if a personal call is unsuccessful this charge alone is made.

B. Oversea (Radio) Services.

Calls can be booked up to two days in advance. Minimum rate, the same from all parts of Great Britain, Northern Ireland, the Isle of Man and the

Channel Islands are shown below. Hours of service to most countries are limited. A person to person call may be booked without extra charge; if it fails (or call is cancelled) a Report Charge is made (4s. to 6s.) but not if call matures. Time allowance is made for interruption by adverse radio conditions and a limited duration facility (minimum 3 mins.) is available enabling connection to be terminated after a specified period of effective conversation. A reduced rate (to p.m. to 10 a.m. on weekdays and all day on Sundays) is available

on services with Canada (except Newfoundland), U.S.A., Cuba and Mexico. Reduced Sunday rates apply also in the services with certain countries in Central America and in certain other services.

C. Ship's (Liners) Radio-Telephone Service.

Service is also available to certain British and foreign liners. Minimum charge to ships in Atlantic waters within limits 22° N., 35° W., 35° N. and in the Mediterranean Sea is 36s.; beyond these limits it is 72s. In the services with certain French and Italian Liners slightly higher rates apply.

(a) Frequent.

(b) Irregular.

* To chief town, not necessarily all parts.

§ Except Buka and Bougainville.

(c) Weekly.

§ Limit.

WEIGHTS AND MEASURES

The Weights and Measures Act of 1878, superseding all previous laws, enacts the legal measures for Great Britain, basing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Department of the Board of Trade.

The YARD and the POUND are the only two independent standards for weights and measures. The GALLON, the capacity standard, wet or dry, is based upon the Pound. The Act of 1878 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights, both water and air at the temperature of 62° Fahrenheit, with the barometer at 30 inches.

Apothecaries' Weight.

Measures of Weight.

- 20 grains = 1 scruple (℞).
3 scruples = 1 drachm (℥).
8 drachms = 1 ounce.

Measures of Capacity.

- 60 minims (min.) = 1 fluid drachm.
8 fluid drachms = 1 fluid ounce.
20 fluid ounces = 1 pint.
8 pints = 1 GALLON.

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' drachm is not the same as the Avoirdupois dram, and is spelled differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437.5 grains). A fluid drachm (54.6875 grains) is equal in weight to TWO Avoirdupois drams.

Approximate Equivalents:—

- 1 "kitchen-spoon" = ½ fluid oz.; 1 "dessert-spoon" = ½ fluid oz.; 1 "tea-spoon" = ½ fluid oz.

Avoirdupois Weight.

- 7000 grains (gr.) = 1 pound (lb.).
16 drams (dr.) = 1 ounce.
16 ounces = 1 POUND.
14 pounds = 1 stone.*
28 pounds = 1 quarter (of a cwt.).
100 pounds = 1 cental.
4 quarters (112 lb.) = 1 hundredweight (cwt.).
20 hundredweight (2,240 lb.) = 1 ton.

Troy Weight.

- 24 grains = 1 pennyweight (dwt.).
20 dwt. = 1 ounce.

For gold and silver the ounce, divided decimally, and not into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce = 480 Avoirdupois grains (31.1035 Grammes) in weight. There is no Troy POUND.

Jewellers' Weight.

The metric carat of 200 milligrammes is the legal standard of weight for precious stones and pearls.

Measures of Capacity.

- 4 gills = 1 pint.
2 pints = 1 quart.
4 quarts = 1 GALLON.
1 gallon = 277.274 cubic inches.
2 gallons = 1 peck.
8 gallons = 1 bushel.
6 bushels = 1 quarter.
A chaldron is 36 bushels = 4½ quarters.

* The Smithfield stone of 8 lb. (for dead meat) was abolished in 1939.

Measures of Length.

- 12 inches (in.) = 1 foot (ft.).
3 feet = 1 yard (yd.).
6 feet = 1 fathom.
5½ yards = 1 pole.
22 yards = 1 chain = 100 links.
10 chains = 1 furlong.
8 furlongs = 1 mile = 1,760 yards.
3 miles = 1 league (obsolete).

Height of Horses: Hand = 4 inches. Span = 9 inches.

A Cricket Pitch is 22 yards (20 chains) between the stumps.

A Lawn Tennis Court is 78 × 36 feet (double) and 78 × 27 feet (single).

A Croquet Lawn is 105 × 84 feet (full size) or a smaller multiple of 5 × 4 feet.

A Badminton Court is 44 × 20 ft., with net 30 ins. deep and 5 ft. high at centre.

A Polo Ground is 300 × 160 yds.

A Football Ground (Association) is 130 × 100 yds. (full size) and 120 × 80 yds. for international matches; (Rugby) 110 × 75 yds. (full size).

Square or Surface Measure.

- 144 sq. inches = 1 sq. foot.
9 sq. feet = 1 sq. yard.
30½ sq. yards = 1 perch, or rod, or pole.
40 perches = 1 rood.
4 roods = 1 acre.
10 square chains = 1 acre.
640 acres = 1 square mile.

Dimensions of an Acre.—The acre is 4,840 sq. yards, or 220 × 22 yards. The length of a side of a square acre is 69.57 yards; an area 110 × 22 yards (or 220 × 11 yards) would be half an acre; an area 55 × 22 yards (or 110 × 11 yards) would be one quarter of an acre, and so on.

Decimal Parts of an Acre.—The following note is appended to Ordnance Maps: "To convert Decimal Parts of an Acre into Roods and Perches, multiply by 4, this will give Roods and Decimals of a Rood, multiply this Decimal by 40, thus obtaining Perches and Decimals of a Perch."

Cubic Measure.

- 1,728 cubic inches = 1 cubic foot.
27 cubic feet = 1 cubic yard.

Angular or Circular Measure.

- 60 seconds (") = 1 minute (').
60 minutes = 1 degree (°).
30 degrees = 1 sign (of the Zodiac. See p. 166).
90 degrees = 1 right angle or quadrant.
12 signs (4 quadrants) = 1 circumference.
Diameter of circle × 3.1416 = circumference.
Diameter squared × .7854 = area of circle.
Diameter squared × 3.1416 = surface of sphere.
Diameter cubed × .5236 = solidity of sphere.
One degree of circumference × 57.3 = radius.*
Diameter of cylinder × 3.1416; product by length of height, gives the surface.
Diameter squared × .7854; product by length or height, gives solid content.

* Or, one radian (the angle subtended at the centre of a circle by an arc of the circumference equal in length to the radius) = 57.3 degrees, nearly.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

Water Measures.

- Cubic inch. = 252.458 grains.
Gallon (277.274 cu. in.) . . . = 10 lb. (distilled).
Cubic foot. = 62.321 lb.
35.943 cubic ft. (224 gals.) = 1 ton.

Water for Ships: Tun, 210 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.

An *Inch of Rain* on the surface of an acre (43·560 sq. feet) = 3·630 cubic feet = 100·992 tons.

Cisterns: A cistern 4 feet by 2½ and 3 deep will hold brimful 186·963 gallons, weighing 16 cwt. 2 qrs. 21·6 lbs. in addition to its own weight.

NOTE.—Commonwealth countries in general use the same system of Weights and Measures as the United Kingdom. Exceptions are:—

South Africa.—Metric System compulsory for chemists, and permissible (along with British) in other cases. Some old Dutch measures are still used:—*Liquid*: Leaguer = about 128 imperial gallons; half aum = 15½ imperial gallons; anker = 7½ imperial gallons. *Capacity*: Muld = 3 bushels. The general surface measure is *Morgen*, equal to 2·1165402 acres; 1,000 Cape lineal feet are equal to 1,033 British feet. The short ton of 2,000 lb. is used.

Canada.—Same as British but with short ton of 2,000 lb., as in U.S.A.

METRIC WEIGHTS AND MEASURES

See also "Double Conversion Tables for Weights and Measures."

In addition to the Imperial standard weights and measures, the use of the Metric system of weights and measures was made permissive in Great Britain in 1897.

In the Metric system, the standard of length is the METRE, the standard of weight is the KILOGRAM, and the standard of capacity is the LITRE. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

1.—MEASURES OF LENGTH.

10 millimetres = 1 centimetre = 0·39370113 inch.

(mm.) (cm.)

10 centimetres = 1 decimetre = 3·9370113 inches.

(dm.)

10 decimetres = 1 METRE (m) = 1·0936143 yards.

10 metres = 1 dekametre = 10·936143 yards.

(dam.)

10 dekametres = 1 hectometre = 109·36143 yards.

(hm.)

10 hectometres = 1 kilometre = 0·62137 mile.

(km.)

A kilometre is approximately five-eighths of a mile, so that 8 kilometres (4·97082 miles) may be regarded as 5 miles.

2.—MEASURES OF SURFACE.

1 sq. centimetre = 0·15498 sq. inch.

1 sq. METRE = 10·76365 sq. feet = 1·19596 sq. yds.

1 are (a) = 0·0988 rood.

1 hectare (ha) = 2·4711 acres.

1 sq. kilometre = 0·38611 sq. mile.

3.—MEASURES OF CAPACITY.

1 centilitre (cl.) = 0·0704 gill.

1 decilitre (dl.) = 0·17598 pint.

1 LITRE (lit.) = 1·7598 pints = 0·88 Imp. quart = 0·22 Imp. gallon.

1 hectolitre (hl.) = 21·9975 Imp. gallons = 25·4171 U.S. gallons = 2·7497 Imp. bushels = 2·8377 U.S. bushels.

1 cubic metre = 35·31338 cu. ft. = 1·30794 cu. yds. (cbm. or m³.)

1 cubic cm. (water) = 1 gram; 1,000 cubic cm. (water) or 1 litre = 1 kilogram; 1 cubic metre (1,000 litres, 1,000 kilograms) = 1 metric ton.

4.—MEASURES OF WEIGHT.

1 centigram (cg.) = 0·15432 grains.

1 decigram (dg.) = 1·5432 grains.

1 gramme (gm.) = 15·4323 grains.

1 dekagram (dag.) = 5·6438 drams.

1 hectogram (hg.) = 3·5274 oz.

1 KILOGRAM kg. = 32·1507 oz. Troy = 35·2734 oz.

Avoirdupois = 2·2046223 lb. Avoirdupois.

1 myriagram = 22·046223 lb. Avoirdupois.

1 quintal (q.) = 220·46 lb. Avoirdupois = 2·2045 Centals = 1·9684 cwt.

1 tonne (t.) = 0·98421 long ton = 1·10231 short tons.

NOTES.

1 hectolitre = 2·75 bushels.

1 hectolitre per hectare = 1·11 bushels per acre.

1 quintal = 3·6743 bushels.

1 quintal per hectare . . . 1·49 bushels per acre.

GEOGRAPHICAL MEASURES.

The Poles are two points at the opposite extremities of that diameter of the earth round which it revolves. The North Pole is the central point in the *Arctic Circle* (which is drawn at 66° 30' North) so called from ἀρκτος. (The Bear), the Northern Constellation of *Ursa Major*. Similarly the South Pole is at the centre of the *Antarctic* (opposite Arctic) *Circle*, which is drawn at 66° 30' South. The *Equator* is a great circle, equally distant from the North and South Poles. For geographical purposes, the surface of the earth is divided by circles of Latitude *parallel* and of Longitude *perpendicular* to the Equator. These circles are divided into Degrees, Minutes, and Seconds. Degrees of Latitude are numbered from the Equator to the North and South Poles. Meridians of Longitude are numbered from the primary circle of Longitude, or Meridian, which passes through the astronomical Observatory of Greenwich (England). The *Date* or *Calendar Line* is shown on p. 145.

A *Geographical Mile* is the length of one minute of Latitude. If the earth were a sphere, every minute of Latitude would be of the same length; but, as it is a spheroid, the length of a minute increases from 6,046 feet at the Equator to 6,108 feet at the Poles. The mean length of the geographical mile is 6,076·8 feet.

The Polar diameter of the Earth is 7,899 statute miles. The mean equatorial diameter is 7,926 miles. The circumference at the Equator is 24,902 miles.

The *Tropics of Cancer* and *Capricorn*, in *Astronomy*, are the most northerly and southerly points of the ecliptic at which the sun reaches its greatest distance north or south of the equator and turns (τρόμος = a turning) towards it again; in *Geography*, the two parallels of latitude distant about 23° 28' north and south of the equator, being the boundaries of the torrid zone.

WIND FORCE MEASURES

The *Beaufort Scale*, for measuring wind velocity at sea, has been accepted internationally and is used in communicating weather conditions. Devised by Admiral Sir Francis Beaufort in 1805, it consists of these numbers 0-12, each representing a certain strength or velocity of wind, from calm to hurricane.

Scale No.	Wind Force	M.p.h.
0	Calm	0
1	Light air	1-3
2	Slight breeze	4-7
3	Gentle breeze	8-12
4	Moderate breeze	13-18
5	Fresh breeze	19-24
6	Strong breeze	25-31
7	High Wind	32-38
8	Gale	39-46
9	Strong gale	47-54
10	Whole gale	55-63
11	Storm	64-75
12	Hurricane	over 75

DOUBLE CONVERSION TABLES FOR WEIGHTS AND MEASURES.

NOTE.—The central figures in heavy type represent either of the two columns beside them, as the case may be. Examples:—1 centimetre=0.394 inch and 1 inch=2.540 centimetres. 1 metre=1.094 yards and 1 yard=0.914 metre. 1 kilometre=0.621 mile and 1 mile=1.609 kilometres.

Centi- metres.		inches.	Metres.		Yards.		Kilo- metres.		Miles.		Hectares.		Acres.		Square Kilometres.		Square Miles.
2.540	1	0.394	0.914	1	1.094	1.609	1	0.621	0.404	1	2.471	2.590	1	0.386

NOTE.—*Folio* means a sheet folded in half, *quarto* folded into four, and so on; thus, a crown 8vo page is one-eighth the size of a crown sheet. Books are usually bound up in sheets of 16 or 32 pages. Octavo books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad); a crown octavo book of 320 pages will therefore require 5 sheets of quad crown, or 20 reams per 1,000 copies, the odd 16 sheets in each ream being allowed as waste. Newspapers (and some books in editions of 50,000 or over) are printed on rotary presses, for which the paper is supplied in continuous reels.

Sizes of Types

The type size chiefly used in "Whitaker" is 5½ point, or *Ruby*, set on a 6 point "body." The column contains 78 lines, and is 12 Pica ems wide; on an average every column contains about 3,100 letters, or 710 words.

Today type up to 14 point size is usually set by a keyboard machine, and mechanically cast in single letters or in complete lines of type (e.g. Monotype and Linotype). All type is cast to one uniform height ("type high"), which is 1½ inch. Individual letters vary in *breadth*, but the "body" of each character is of uniform *depth* throughout the alphabet in each size. The unit of *breadth* is the Pica M (Em) 6 of which, side by side, occupy one inch of space. The unit of *depth* is the Point (72 Points = 1 inch), so that 6 lines of 12 Point occupy 1 inch in depth. The names of the various sizes are:—

Brilliant (3½ point). A column the size of this in "Whitaker," if set in Brilliant would contain 132 lines, and about 1,450 words.

Printing is the art of producing impressions from characters or figures

Diamond (4½ point) is the next size; the column would contain 102 lines, and about 1,020 words.

CORRECTING FOR THE PRESS

Copyright by WILLIAM CLOWES & SONS, LTD., Printers of "WHITAKER'S ALMANACK."

The following extract is set up incorrectly in order to explain the conventional methods of correcting for the Press:—

10/ The process of printing, when compared with that of writing, is unquestionably a ~~dear~~ process: provided a sufficient number of any particular book are printed, so as to render the proportion of the first expense upon a single copy inconsiderable. If, for example, it were required, even at the present ~~moment~~ time, to print a single copy, or even three copies or four, only of any production, the cost of printing would be greater than the cost of transcribing.)

12/ It is when hundreds and especially thousands, of the same work are demanded that the great value of the printing press in making knowledge cheap is particularly shown. [It is probable that the first printers did not take off more than two or three hundred, if so many, of their works and, therefore, the earliest printed books must have been still dear, on account of the limited number of their readers. CAXTON, as it appears by a passage in one of his books, was a cautious printer; and required something like an assurance that he should sell enough of any particular book to repay the cost of producing it. In his 'Legends of Saints,' he says, "I have submysed (submitted) myself to translate into English the Saints of Legend," called 'Legenda aurea' in Latin; and William, Earl of Arundel, sent me a worshipful gentleman, promising that my said lord should, during my life, give and grant to me a yearly fee, that is 10 note, a buck in summer and a doe in winter.

1. Is the mark for changing the wrong letter in the word process.
2. To substitute one word for another.
3. and 24. The first is the method of marking a short insertion, the second of marking a long one.
4. To have a space put between the two words.
5. To turn a letter which has been placed upside down.
6. To close the word in which a space has been improperly left.
7. and 8. To take away (delete, blot out) a superfluous letter or word.
9. 12. and 22. Different marks for transposing the arrangement of letters, words, or sentences.
10. To have no fresh paragraph.
11. To substitute a comma for a full-point or period.
13. To commence a new paragraph.
14. 19. 21. and 27. To insert points and marks of quotation.
15. To have any particular part printed in Italic.
16. To have words or letters printed in 'lower case,' or small letters; Roman is always understood, unless otherwise directed.
17. To have a word remain, which has been accidentally or erroneously marked. *stet* is the Latin for 'let it stand.'
18. Points out a letter which does not match with the others: a 'wrong fount.'
20. and 23. To have certain parts printed in small or full capitals.
25. To set straight whatever may stand crooked.
26. To remove the unnecessary black mark between the words, which arises from what should form the space not having been pushed down.

24. desired me - and promised to take a reasonable quantity of them - and

HALL MARKS ON PLATE*

ASSAY OFFICE MARKS.—Official marks stamped on gold and silver plate at Assay Offices in the United Kingdom until 1921 and thenceforward in Great Britain.

Assay Office ... Distinguishing Mark.
London (Goldsmiths' Hall) Leopard's Head (uncrowned from 1300 to 1478-9, when it became crowned until 1821, since when it has been uncrowned). From 1697-1720 this mark was used in London, for gold only and not for silver.

Birmingham ... Anchor.
Chester City Arms (3 Garbs and a Sword).
Sheffield Crown.
Edinburgh Castle. [Ring.
Glasgow Tree, Salmon, Bell, Bird and
Dublin Harp crowned.

The Assay Offices at Bristol, Exeter, Newcastle upon Tyne, Norwich and York have long been closed.

Makers' Mark (instituted in 1363).—This is impressed by the maker, and consists of initial letter (or letters) indicating the Surname (or Christian and Surname) of the maker.

Date Mark (instituted in 1478-9).—The year in which the article is marked at the Assay Office is indicated by a letter on a shield, the *type of letter* and the *shape of the shield* being changed in cycles of 20, 25 or 26 years. The "year" (at Goldsmiths' Hall) runs from May 20 to May 28. In 20-year cycles (London, invariably, Chester, alternately with 25, and Sheffield, alternately with 25), the letters J, V, W, X, Y, Z are omitted; in 25-year cycles (Birmingham, Edinburgh and Dublin, and alternately at Chester and Sheffield) the letter "j" is omitted from the alphabet; at Sheffield in the first two cycles, letters were used not alphabetically but arbitrarily, at Glasgow all the letters are employed in a 26-year cycle.

The Standard Mark (originally "The King's Mark.")—The "lion passant,"  for silver articles only, was first used in 1544, and has been in use ever since (except during the *Higher Standard* period, 1697-1720). From 1544-9 it was crowned; since then, uncrowned.

The Sovereign's Head.—The portrait of the reigning Sovereign was impressed on all plate chargeable to duty assayed from 1784-1880-90. The duty on plate was removed in 1890, and the Sovereign's head does not appear on plate assayed before 1784 or after 1890.

The Crown.—On gold articles only, of the two higher standards (22 and 18 carats); on the lower standards (14 and 9 carats) the decimal (14.585 and 9.375). It is used on all silver articles in lieu of the lion passant.

Britannia.—A full-length figure of Britannia was impressed on silver plate of a special standard of fineness (11 oz. 10 dwt. of fine metal to each 10 dwt. of alloy) during a short period only, 1697-1720; since that date the Britannia quality has been manufactured in small quantities, bearing the figure of Britannia, with the lion's head erased and the date mark.

Sterling Silver.—Articles of silver plate marked at an assay office are guaranteed to be of the requisite standard of purity and to contain 11 oz. 2 dwt. of fine metal to each 18 dwt. of alloy.

Fine Gold.—Articles of gold plate marked at an assay office are guaranteed to contain such amount of pure gold as is marked thereon by the assaying office in carats and decimals thereof.

* For the greater part of the material for this article readers of the ALMANACK are indebted to the late Mr. Wilfrid Cripps (author of "Old English Plate") by whose courtesy also many of the illustrations were provided.

London (Goldsmiths' Hall) Date Marks

From 1438 to 1956.

	Lombardic, simple.....	1438-9 to 1457-8
	Lombardic, external cusps	1458-9 " 1477-8
	Lombardic, double cusps	1478-9 " 1497-8

	Italic letter, small ...	1618-9 " 1637-8
	Court hand	1638-9 " 1657-8
	Black letter, capitals	1658-9 " 1677-8
	Black letter, small ...	1678-9 " 1696-7
	Court hand	1697 " 1715-6 (From March 1697 only.)
	Roman letter, capitals	1716-7 to 1735-6
	Roman letter, small	1736-7 " 1755-6

	Old English, capitals	1756-7 to 1775-6
	Roman letter, small...	1776-7 „ 1795-6
	Roman letter, capitals	1796-7 „ 1815-6
	Roman letter, small...	1816-7 „ 1835-6
	Old English, capitals	1836-7 „ 1855-6
	Old English, small ...	1856-7 „ 1875-6
	Roman letter, capitals [A to M square shield N to Z as shown.]	1876-7 „ 1895-6
	Roman letter, small...	1896-7 „ 1915-6
	Black letter, small ...	1916-7 „ 1935-6
	Roman letter, capital	1936-7 „ 1955-6

An article marked with the letter F 1721-2 can be distinguished from letter F 1801-2 by the difference in the shape of the respective shields; as also those containing the crowned leopard's head and the lion passant; the absence of the sovereign's head in the former as against its presence in the latter case; the different form of the leopard's head (which was "crowned" until 1821); and lastly, the irregularity of the stamp in the first case as compared with the uniformity of the latter stamp. These again can be distinguished from F 1881-2 as before, by the different shield of the date letter only (the shields of the remaining marks being the same as those of 1801-2); the absence of crown on leopard's head, and the presence of the Queen's *vice* the King's head.

Jubilee Mark on Silver, 1935.

In 1935 permission was granted to celebrate a National Event by a special mark on silver plate. The special mark was applicable to the year 1935; but for the convenience of the trade it was arranged that articles marked during the previous two years could also bear the mark, the marks, as shown above, being (1) Maker's initials, (2) Standard mark known as the "Town Mark," (3) Assay Office mark (Goldsmiths' Hall), (4) Date mark, and (5) Special Silver Jubilee mark.

Imported Plate.

Any gold or silver plate or article manufactured out of Great Britain and Northern Ireland and brought to be assayed, stamped or marked at a British Assay Office must be marked in the manner prescribed by the Order in Council of May 11, 1906, under which the mark for each Assay Office is ordained to be:—*London*, the sign of the Constellation Leo; *Birmingham*, Equilateral Triangle; *Chester*, Acorn and two leaves; *Sheffield*, the sign of the Constellation Libra; *Edinburgh*, St. Andrew's Cross; *Glasgow*, double block letter F inverted; *Dublin*, Boujet. For both gold and silver the decimal equivalent is used as the standard mark with the carat in numerals with a decimal equivalent—e.g. 22.916 or 18.750. The annual date letter is to be added by the Assay Office, as for plate, etc., of home manufacture.

THE PERIODS OF ENGLISH ARCHITECTURE

Date

Style

I. Before 55 B.C.	Ancient British.
II. 55 B.C. to A.D. 420	Roman Period.
III. A.D. 449 to Norman Conquest (1066)	Anglo-Saxon.
IV. 1066-1189 (i.e. to end 12th cent.)	Norman.
V. 1189-1307 (i.e. 13th cent.)	Early English (Lancet, or Geometrical).
VI. 1307-1377 (i.e. 14th cent.)	Decorated (or Curvilinear).
VII. 1377-1485 (i.e. 15th cent.)	Perpendicular (or Rectilinear).
VIII. 1485-1558 (i.e. first half 16th cent.)	Tudor.
IX. A.D. 1558-1625. Early Renaissance.	{ Elizabeth (A.D. 1558-1603). Jacobean (A.D. 1603-1625).
X. A.D. 1625-1830. Late Renaissance.	{ Stuart (A.D. 1625-1702). Queen Anne and Georgian (A.D. 1702-1830).
XI. Modern Architecture (The Age of Revivals)	{ William IV. (A.D. 1830-1837). Victoria (A.D. 1837-1901). Edward VII. (A.D. 1901-1910). George V. (A.D. 1910-1936). Edward VIII. (A.D. 1936). George VI. (A.D. 1936-1952).
XII. Recent Architecture.	20th cent.

This Comparative Table (from "A History of Architecture," by the late Sir Banister Fletcher) shows the approximate period of each style. It must, however, be remembered that the transition from one style to the next was slow and gradual, and can often hardly be traced.

The "Remedy" is the amount of variation from standard permitted in fineness and in weight of coins when first issued from the Mint.

Bank of England Notes are issued for sums of 10s., £1 and £5. As from April 22, 1943, the Bank of England ceased to issue bank notes of denominations of £10 and upwards, and commenced to withdraw those already issued; notes of these denominations ceased to be legal tender on May 1, 1945.

Silver.—No silver coins have been struck since 1946, except Maundy money.

Nickel Brass is an alloy of copper 79 parts, nickel 1 part and zinc 20 parts.

Bronze is an alloy of copper 95½ parts, tin 3 parts and zinc 1½ parts. These proportions are subject to slight variation.

Cupro-nickel is an alloy of nickel 25 parts and copper 75 parts.

Treasury Notes.—Under the provisions of the *Currency and Bank Notes Act, 1928*, Treasury Notes of the value of £1 and 10s. were replaced by Bank of England Notes and the profits of the whole Note issue were paid over by the Bank to H.M. Treasury.

Legal Tender of Money.—Bank of England Notes of £1 and 10s. are legal tender in Great Britain and Northern Ireland for the payment of any amount; those of £5 are legal tender in England and Wales only. Change cannot be

† Discontinued.

demanded except from the Bank of England. Gold (dated 1838 onwards), if of or above the least current weight, is legal tender to any amount. Silver (dated 1816 onwards), and cupro-nickel are legal tender for sums up to £2, nickel brass 3d. up to 2 shillings, and bronze (introduced 1860, to replace copper), up to 12d.

Output of the Royal Mint in 1952.—92% of the year's output, one of the highest recorded, was for colonial and foreign governments. The number of coins struck for home circulation was the lowest since 1894—39,511,641 of a value of £663,092. No cupro-nickel ("silver") coins were struck for home circulation, the 1,013,477 sixpences being for the colonies. There are no 1952 pennies. All gold sovereigns (which are struck in order to preserve the highly skilled craftsmanship of minting gold coins) were placed in the national gold reserve.

New Coins of Queen Elizabeth.—Authorized by Royal Proclamations, the new coins were issued by the banks on March 25, 1953. There was at the time a surplus in circulation of most coin and no demand for the new coin for purely currency purposes. The Royal Mint issued specimen sets of coins including all coins from the half-crown to the farthing and the two types of shilling, in transparent plastic envelopes, which were sold at 8s. 6d. each. The face value of the coins was 7s. 4½d. Coronation crowns were issued from May 21, 1953, in plastic containers at 5s. 6d. each. There was a large demand for both these issues; over a million specimen sets and six million crown pieces were issued. Later in 1953, collectors' sets of proof coins, individually struck from highly polished dies, were issued at 25s. each. Designers of the new coins were, Mrs. Mary Gillick (obverse ("head") of the coins); Gilbert Ledward, R.A. (obverse of the Coronation crown); Cecil Thomas, E. G. Fuller and W. M. Gardner (reverses of the coins). The new shilling, sixpence and 3d. piece were also placed in general circulation in 1953.

NOTE.—The legal weight of a penny is one-third, of the halfpenny one-fifth, and of the farthing one-tenth of an ounce avoirdupois; the halfpenny is one inch in diameter.

THE ROYAL MINT

Coins struck in 1951 and 1952

Grand Totals.....	385,829,406	..	482,884,747	..

* Maundy coins are made of standard silver.

† Excludes new coins of Queen Elizabeth struck for issue in 1953 and bearing that date.

TABLE II.—SHOWING THE AMOUNT WHICH £1 ACCUMULATING AT COMPOUND INTEREST WILL REACH IN FROM ONE TO FIFTY YEARS AT VARIOUS RATES.

When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year less $\mathcal{L}1$, must be taken. Thus, for $\mathcal{L}x$ at $z\frac{1}{2}$ per cent. for 25 years, take 26 years, $\mathcal{L}36.012$, and deduct $\mathcal{L}x - \mathcal{L}35.012$.

CURRENT LITERATURE

invaluable

Current Literature is a monthly periodical recording all the books published in the United Kingdom each month.

The book list is sub-divided into forty-nine classifications so that anyone interested particularly in, say, biography, will find all the biographies together in the one section. A number of the best books of the month are reviewed in the editorial columns.

The prepaid subscription rate is 5s. post free to any part of the world.

Specimen copy post free from

PRINCIPAL CHARITABLE BEQUESTS OF THE YEAR

Appended is an alphabetical list of some of the principal bequests for charitable purposes recorded during the past year.

The list records legacies published during the past twelve months and not necessarily those becoming payable during that period.

The tendency to leave the residue of an estate for charitable purposes at the discretion of the Trustees would appear to be on the increase. There are six cases in this year's list, which shows an advance over other years. This may be due to the testator's doubt regarding the final amount which will be left after the payment of estate duty, and the desire to allow the trustees to distribute the final remainder in accordance with the wishes or known desires of the testator.

The bequest of the ultimate residue of the £212,275 estate of Mr. Emile Wertheimer to the King Edward Hospital Fund is also governed by the proviso that the income, for the 21 years following his death, be applied for charitable purposes at the discretion of his Trustees. Apart from this bequest, and one other, the list is devoid of large bequests to hospitals. This follows the trend of recent years since the introduction of the National Health Service Bill. However, large bequests for research, especially for cancer purposes, appear to be on the increase, as is shown in some notable bequests in the list.

The well-known charities, the Church, Services Benevolent Funds, and the National Trust are again fully represented and two large bequests for educational purposes are noted, including the ultimate residue of the £55,124 estate of Sir George Piggott to his old school Westminster. The major portion of the ultimate residue of the £45,786 estate of Mr. Edward H. Jubb is left to the R.A.F. Benevolent Fund for the benefit of "The Few".

A large legacy for the benefit of animals is shown in the bequest of the ultimate residue of the £21,013 estate of Mrs. Ethel J. Porter to The Dogs Home, Battersea.

Name	Gross Value	
Dr. Horatio White Abbott, of 21 Vallance Gardens, Hove.	£71,415	Subject to life interests £5,000 to University of Lausanne and the remainder for charitable purposes at the discretion of his Trustees, having regard for his wishes regarding the institution of a Chair of Research for a cure for cancer.
Sir John Bayley, of East Court, Ramsgate, Kent.	£120,924	One-half the residue equally between R.S.P.C.A., U.K. Beneficent Assoc., R.N.L.I., Distressed Gentlefoks Aid Assoc., and the National Institute for the Deaf, and Forces Help Society.
Mr. Edward John Beatty, of 43 Lancaster Road, Birkdale, Southport.	£78,693	Subject to life interests the residue to the Royal Infirmary, Liverpool, Royal Southern Hospital, Liverpool, David Lewis Northern Hospital, Liverpool, and the Smithdown Road Hospital, Liverpool.
Mr. Frederick Beavan, of Low Barton, Whitting- ham, Northumberland.	£130,870	Subject to a number of bequests the residue to the Bishop of the Roman Catholic Diocese of Hexham and Newcastle for charitable purposes.

(continued on page xv)

DR. BARNARDO'S HOMES

NATIONAL CHILDREN'S HOME AND ORPHANAGE

(Founded 1869)

40 Branches

For 85 years the National Children's Home has been helping needy boys and girls. During that time over 36,000 children have been trained for good citizenship. Two-thirds of the income is dependant on voluntary support and funds are urgently needed. Legacies are especially solicited.

CHIEF OFFICES: Highbury Park, London, N.5.

The Welfare of the Deaf

THE N.I.D. is the only national body in the British Isles dealing with every aspect of deafness—there are 90 Welfare Societies or Missions concerned with the deaf and dumb and over 170 Lip-reading Classes and Social Clubs for the hard of hearing.

Homes for deaf and deaf-blind women and a hostel for deaf working boys are administered by the N.I.D. Extensions to them and the provision of further homes for the deaf are an urgent need.

The work of the National Benevolent Society and of the Deafened Ex-

Servicemen's Fund has now been taken over and assistance is given in every problem concerning the welfare of the deafened ex-serviceman and woman.

Voluntary Gifts and Legacies are earnestly sought.

Chairman: THE ARCHDEACON OF HAMPSHIRE

Secretary: GRAHAM W. SIMES

AREA OF WORK: LONDON, MIDDLESEX, SURREY, ESSEX AND WEST KENT

There are more than 6,000 Deaf and Dumb in this area

OBJECTS:

To promote the spiritual, social and general welfare of the Deaf and Dumb.

Association has established 10 Centres of its own and hires rooms for services, lectures, clubs, etc.

Gifts gratefully acknowledged by Secretary, R.A.D.D., 55 Norfolk Square, W.2.

ROYAL BLIND PENSION SOCIETY

Patron—HER MAJESTY THE QUEEN

President: (Vacant)

Treasurer: Mr. P. LAURENCE POCOCK

This Society grants Pensions to the Blind Poor at their own homes in sums ranging from 15s. to 25s. per month. There are upwards of 650 pensioners, residing in various parts of the Kingdom, among whom over £8,000 are annually distributed.

To be eligible, applicants must be totally blind, above 21 years of age, and of good moral character. Amount of Income at the discretion of the Committee. No distinction is made in regard to sex or creed.

Application must be made on the printed forms provided by the Society.

Contributions will be gratefully received by the Treasurer or by the BANK OF ENGLAND.

9, SUFFOLK STREET, PALL MALL, S.W.1.

E. JEFFERY HICKS, M.A., Secretary [3]

Please HELP these children!

Since its foundation in 1827, several thousand orphans of Merchant Seamen have been cared for, educated, and set up in life; and there are now over 300 boys and girls at the school, more than half of whom lost their fathers during the late war. The assured income does not meet the expenditure. New subscribers are urgently needed to bridge the gap.

Maintained by voluntary subscriptions only. Not State-aided.
